CSG HOLDING CO., LTD.

# SEMPANAUR REPORT 2018

Chairman of the Board:

# CHEN LIN

August 2018

## Section I Important Notice, Content and Paraphrase

Board of Directors and the Supervisory Committee of CSG Holding Co., Ltd. (hereinafter referred to as the Company) and its directors, supervisors and senior executives hereby confirm that there are no any fictitious statements, misleading statements, or important omissions carried in this report, and shall take all responsibilities, individual and/or joint, for the facticity, accuracy and completeness of the whole contents.

Ms. Chen Lin, Chairman of the Board, Mr. Wang Jian, responsible person in charge of accounting and Ms.Wang Wenxin, principal of the financial department (accounting officer) confirm that the Financial Report enclosed in the semi-annual report of the Company is true, accurate and complete.

All directors were present the meeting of the Board for deliberating the semi-annual report of the Company in person.

This report involves future plans and some other forward-looking statements, which shall not be considered as virtual promises to investors. Investors are kindly reminded to pay attention to possible risks.

Details of the risk factors and countermeasures of future development have been well-described in this report, please find in Section IV Performance Discussion and Analysis.

The Company has no plans of cash dividend distribution, bonus shares being sent or converting capital reserve into share capital.

This report is prepared both in Chinese and English. Should there be any inconsistency between the Chinese and English versions, the Chinese version shall prevail.

|   | End of this period                   | End of last year             | Increase/decrease in<br>this period-end over<br>that of last year-end |
| Total assets (RMB)  | 20,524,811,756                       | 19,535,002,368               | 5.07%   |
| Net assets attributable to shareholders of the listed company (RMB)   | 8,789,183,848                        | 8,458,587,873                | 3.91%   |
| The total share capital of the company as of the previous trading day of  |                                      | 2,856,769,678                |   |
| Fully diluted earnings per share calculated with latest equity (RMB/sh  | 0.12                                 |                              |   |

Note (1): The data in the above table has included apportionment of equity incentive expense included in profit and loss of RMB 93.81 million from Jan. to Jun. 2018, which affected the net profit attributable to shareholders of the listed company of RMB 82.55 million. In the period from Jan. to June 2018, after eliminating the impact of equity incentive cost sharing, the net profit attributable to shareholders of the listed company was RMB 435.39 million, with a year-on-year increase of RMB 42.4 million and growth rate of 10.79%;

Note (2): After eliminating the impact of equity incentive cost sharing, net profit attributable to shareholders of the listed company from Jan. to June 2018 was RMB 416.6 million with a year-on-year increase of RMB 55.66 million and growth rate of 15.42%;

Note (3): After eliminating the impact of equity incentive cost sharing, basic earnings per share from Jan. to June 2018 was RMB 0.16 per share, with year-on-year growth rate of 14.29%;

Note (4): After eliminating the impact of equity incentive cost sharing, diluted earnings per share from Jan. to June 2018 was RMB 0.16 per share, with year-on-year growth rate of 14.29%;

Unit: RMB

Note (5): After eliminating the impact of equity incentive cost sharing, weighted average ROE from Jan. to June 2018 was 5.05%, with year-on-year growth rate of 0.1%.

#### V. Difference of accounting data under domestic and overseas accounting standards

#### 1. Differences of the net profit and net assets disclosed in financial report prepared under international and Chinese accounting standards

 $\Box$  Applicable  $\sqrt{Not}$  applicable No such differences in the report period.

## 2. Difference of the net profit and net assets disclosed in financial report prepared under overseas and Chinese accounting standards

 $\Box$  Applicable  $\sqrt{\text{Not applicable}}$ 

No such differences in the report period.

#### 3.Explanation of the difference of accounting data under domestic and overseas accounting standards

 $\Box$  Applicable  $\sqrt{Not}$  applicable

#### VI. Items and amounts of extraordinary profit (gains)/loss

 $\sqrt{\text{Applicable}}$   $\Box$  Not applicable

| Item  | Amount     | Note |
|---|------------|------|
| Gains/losses from the disposal of non-current asset (including the write-off that accrued for impairment of assets)   | -567,830   |      |
| Governmental subsidy reckoned into current gains/losses (not including the subsidy<br>enjoyed in quota or ration according to national standards, which are closely relevant<br>to enterprise's business) | 22,013,800 |      |
| Other non-operating income and expenditure except for the aforementioned items  | 1,567,244  |      |
| Less: Impact on income tax  | 3,453,960  |      |
| Impact on minority shareholders' equity (post-tax)  | 771,819    |      |
| Total   | 18,787,435 |      |

It did not exist that items defined as recurring profit (gain)/loss according to the lists of extraordinary profit (gain)/loss in Q&A Announcement No.1 on Information Disclosure for Companies Offering Their Securities to the Public --- Extraordinary Profit/loss in the report period..

## Section III Overview of the Company's Business

#### I. Main business of the Company in the report period

CSG is a leading domestic brand of energy-saving glass and a renowned brand of solar PV products, electronic glass and display devices. Its products and technologies are very popular at home and abroad. Its main business covers R&D, manufacturing and sales of high quality float glass and architectural glass, solar glass, silicon materials, renewable energy products such as PV battery and modules, and new materials and information display products such as ultra-thin electronic glass and display devices. It also provides one-stop services such as project development, construction, operation and maintenance of solar photovoltaic power plants.

#### Flat glass business

CSG's five production bases for flat glass now has 10 float glass production lines representing the most advanced technology in domestic market and 2 solar glass production lines. The annual capacity of various high-grade float glass has reached more than 2.32 million tons and the annual capacity of solar rolled glass has reached over 0.43 million tons. The Company owns quartz sand raw material bases in Jiangyou, Sichuan Province and Yingde, Guangdong Province. The production bases for flat glass, solar glass of the Company located in Dongguan, Chengdu, Langfang, Wujiang, and Xianning, which can produce various colors of high-grade float glass and ultra-clear float glass with thickness from 1.3mm to 25mm, each performance indicator of which has reached domestic advanced level. Those products are widely used in high-grade buildings, decoration and furniture, mirror, automotive windshield, scanner, copier, display devices and solar energy field.

The Company always adheres to innovation, transformation and upgrading as well as implementation of differentiated competitive strategy, which further enhances the profitability of flat glass business. In the first half of 2018, all subsidiaries actively launched the improvement and optimization of production process, and increased the sales of high-value-added products such as original glass of automotive glass, continuing to enhance the market competitiveness of CSG's flat glass.

#### Architectural glass business

As the nation's largest supplier of high-grade engineering and architectural glass, CSG has five architectural energy-saving glass processing bases which are located in Tianjin, Dongguan, Xianning, Wujiang and Chengdu. The Company possesses the world's most advanced glass deep-processing equipment and testing instruments, and its products cover all kinds of architectural glass. R&D and use of coating technology of the Company keep pace with the world and its technology of high end product is even of the world's leading level. Following the second generation of energy-saving glass products, the Company has successively developed the third generation and multi-function energy-saving glass products with continuous improving energy-saving and heat-preservation effect. Its high-quality energy-saving LOW-E insulating glass has occupied more than 50% of the domestic high-end market. At present, the Company's LOW-E coated insulating glass and LOW-E coated glass have reached annual capacity of more than 16 million square meters and 36 million square meters respectively.

The Company's quality management system for engineering and architectural glass has been respectively approved by organizations of UK AOQC and Australia QAS. The product quality which meets the national standards of the US, the UK and Australia enables CSG has an advantage in the international tendering and bidding. Since 1988, CSG's engineers and technicians have been continuously participating in the formulation and compilation of various national standards and industry standards. Various high-quality architectural glass of the Company has been used in many landmark buildings at home and abroad, such as Beijing Capital International Airport, CCTV, Shanghai Oriental Fisherman's Wharf, China Resources Headquarters Building, Shenzhen KingKey100 Building, Ping An International Finance Centre, Hangzhou International Airport, Chengdu International Finance Centre, Hangzhou Hampton and other more than ten Hilton Hotel, Hong Kong Four Seasons Hotel, Melbourne Airport, Tokyo Midtown, International Centre of Abu Dhabi.

#### Solar Energy PV business

CSG has entered solar photovoltaic industry since 2005 and is one of enterprises which first enter the field in China. After more than ten years of construction, operation and technological upgrading, CSG has built a complete industrial chain in the world, covering high purity polycrystalline silicon materials, silicon wafer, silicon solar cell and modules, and design and construction of solar photovoltaic power plants, by which the Company ensures the stable quality and best cost-efficiency of its PV products to customers.

The quality of the Company's polysilicon has reached the advanced level in the industry and it has reserved electronic-grade polysilicon production technology. Meanwhile, the Company is also promoting silicon wafer project of Yichang CSG and technological innovation of solar cell module in Dongguan in order to enhance the anti-risk capacity of its PV industry chain and drive the balanced, stable development of its PV industry chain. When the projects are completed, the quality and performance indicators of the Company's silicon wafers and silicon solar cells will be greatly increased and the general competitiveness of the chain will be further improved.

To perfect its solar energy chain, in 2015, the Company established Shenzhen CSG PV Energy Co., Ltd., a wholly-owned subsidiary, the mainline business of which is to invest and develop solar photovoltaic power plants and extend CSG's solar energy industry to cover highly value-added terminal applications. At the end of 2016, the Company newly established New Energy Application Department to generally manage the investment, operation and maintenance of the Company's PV power plants and effectively integrate internal resources, so as to enlarge and strengthen its solar energy industry.

#### Electronic glass and display device business

The Company, with its more than 20 years of experience in float glass production and powerful technology and innovation team, entered the ultra-thin electronic glass market in 2010 and gradually completed the nationwide strategic layout with four production bases, namely Hebei Panel Glass, Yichang Nanbo Photoelectric Glass, Qingyuan CSG and Xianning CSG Photovoltaic Glass. Its electronic glass products have occupied more than 50% of the domestic market. The quality of CSG's aluminum and high-aluminum electronic glass between 0.2mm to 1.1mm has reached the domestic leading level, the performance of which is comparable to that of imported products, breaking the monopoly of foreign technology. Currently, the products are widely used in mobile terminal cover glass, tempered glass protective film, ITO conductive Glass, extending to the fields of high-speed rail, military industry, smart home and others.

Since Shenzhen Nanbo Display Technology Co., Ltd was established in the year of 2000, the Company's main products and core technologies of the business have included vacuum magnetron sputtering coating, yellow light pattern forming and TP module processing, forming two complete touch industry chain. With electronic glass as basic materials, one industry chain is glass coating—glass yellow light pattern forming—glass touch module processing and its main products covers high-grade and medium-grade ITO conductive glass, glass Sensor/G-TP module, AR, AF, RT, DLC and other differentiated products of composite coatings on glass substrates. With flexible optical film as basic materials, the other industry chain is substrate coating—flexible yellow light pattern processing—flexible touch module manufacturing and its main products include high-grade and medium-grade ITO conductive roll film, roll film Sensor/F-TP module, etc. Besides, the company has been devoted to the research and development of high-end anti-glare (AG) glass substrate since 2013 and presently it is able to successfully produce high-quality sodium calcium AG glass and high-alumina AG glass. With years of development, Shenzhen Nanbo Display Technology Co., Ltd has become an application materials supplier in the display touch industry, touch sensor and TP module, and it can provide customers with a full range of one-stop touch screen material solutions.

#### II. Major changes in main assets

| Main assets              | Note of major changes   |  |  |  |
|--------------------------|---|--|--|--|
| Equity assets            | There was no significant change in equity assets in the report period.            |  |  |  |
| Fixed assets             | There was no significant change in fixed assets in the report period.             |  |  |  |
| Intangible assets        | There was no significant change in intangible assets in the report period.        |  |  |  |
| Construction in progress | There was no significant change in construction in progress in the report period. |  |  |  |

#### 1. Details of major changes in main assets

#### 2. Main overseas assets

 $\Box$  Applicable  $\sqrt{\text{Not applicable}}$ 

#### **III.** Core Competitiveness Analysis

(1) The Company currently has built complete industrial chains in the industries it involved, which has complementary advantage. In the glass industry, the Company has set up the industry chain as quartz sand  $\rightarrow$  high quality float glass  $\rightarrow$  architectural energy-saving glass. In the solar energy industry, the Company has finished the comprehensive construction of industry chain from high purity polycrystalline silicon materials, silicon wafer processing to cell and its module, photovoltaic rolled glass, etc. and extended to terminal application of PV power plant. In the electronic glass and display device industry, the Company has set up a complete industrial chain from the production of the base materials of electronic glass to touch module processing. With the improvement of technology in the chains, the industrial advantages emerged.

<sup>(2)</sup> The Company possesses a complete industry layout. At present, the Company has established large production bases in East China, West China, South China, North China and Central China, which enables the Company to be closer to the market and serve the market better.

<sup>③</sup>The Company has capability of technology innovation and product innovation. It owns independent intellectual property rights of high-end float glass production process. The technology level of ultra-thin electronic glass is in the leading position in China. The Company also keeps its R&D and production of energy-saving glass in line with the world's advanced level, and its technique and technology in the field of solar energy keep leading position in domestic market.

(4) The Company possesses high anti-risk capability. It has established a perfect internal control system. Meanwhile, the management and control ability of account receivable and inventory stand in a high level within the industry. CSG's new management team has an international perspective and a more open management philosophy. It aims to achieve further expansion of capacity and market coverage and continues to expand new business fields along with the national policies of the Belt and Road based on the intensive development of CSG's main business, making the Company be bigger and stronger, so as to be a comprehensive industrial group.

### Section IV. Performance Discussion and Analysis

#### I. Overview

Since 2018, China has continued to deepen the supply-side structural reform, steadily propelled the tasks of de-capacity, de-leveraging, de-stocking, de-cost and addressing weakness, further promoted replacing old growth drivers with new ones, and continuously improved the structure of economic development.

In 2018, CSG, facing the complex and volatile economic environment and increasingly fierce market competition, seized favorable market opportunities timely and coped with all kinds of difficulties bravely to ensure the development of production and operation activities. Oriented by market demand, the Company carefully analyzed its competitive advantages, took the initiative to transform business mode and update technologies, and improved operating quality by fine management to realize the advancement in stability. In the first half of 2018, the operation revenue of the Company was RMB 5,471 million with a year-on-year increase of RMB 527 million and growth rate of 10.66%. After eliminating the impact of equity incentive cost sharing, the Company realized net profit of RMB 444 million, with a year-on-year increase of RMB 44 million and growth rate of 10.87%, and net profit attributable to the parent company of RMB 435 million, with a year-on-year increase of RMB 42 million and growth rate of 10.79%.

#### (I) Glass business

The State has continuously strengthened the structural adjustment of excess capacity, adopted strict environmental protection control policies to eliminate backward production capacity, which promoted the glass business to enter a benign operation cycle step by step, and optimized the supply and demand structure. The Company spares no effort to grasp the development opportunities of all its products in the process of supply-side structural reform.

**Float glass:** In the first half of 2018, the market of float glass continued the favorable trend of last year. The Company adhered to the concept of high-quality, energy-saving and environmental protection product. Based on its own technological quality advantages and capacity scale advantages, it has kept strengthening internal management and intensive cultivation, improved production technology level, co-ordinated sales management and quality services, facilitated differentiation and high-end of products, consolidated its brand advantage, and improved customer satisfaction. Consequently, the operating profit rose significantly and the revenue and net profit increased by 17 % and 24% respectively.

Architectural glass: In 2018, due to the sustained high prices of bulk raw materials, especially glass originals, and the growth of downstream fixed asset investment slowed down, the profitability of architectural glass was squeezed. Under this pressure, the Company responded positively through a series of measures such as adjusting its market strategy, strengthening industry synergy, optimizing product structure, increasing overseas orders, intensifying communication with customers, improving production efficiency, and guaranteed the profit growth, with revenue rising by 6% year-on-year and net profit rising by 12%.

#### (II) Solar energy business

In 2018, the State further promoted high-quality and orderly development of the photovoltaic industry, and strove to cultivate a number of high-quality photovoltaic enterprises through the hands of the market, so as to push the achieving of the connection to grid at an equal price to be achieved. Besides, the investment and technical innovation in the photovoltaic industry have led to a substantial increase in production capacity and a downward pressure on market price. In addition, as the material manufacturing of photovoltaic industry is a heavy assets industry, as well as the energy cost of Yichang Base of the group is higher than that of other companies in the same industry. Consequently, the management has adopted various strategies to respond positively including attaching importance to production technology innovation and product innovation, planning technological upgrading, and enhanced the production capacity of high value-added products. Meanwhile, In compliance with the guidance of industry put forward by the

State, the Company determined the connection to grid at an equal price as the cost control target and industrial development goal and ultimately realized revenue increased by 3.54% year-on-year, and accumulated net profit of RMB minus 45 million.

#### (III)Electronic glass and display device business

In the first half of 2018, with the accumulation of technology and the steady development of the market, the performance of the electronic glass and display devices continued to improve. For the sector of electronic glass, the company maintained its current capacity and its technology was approaching world-class level. The high-aluminum products of Qingyuan CSG have entered into the original chips market of cover plate of the domestic mainstream brands of mobile phone and Yichang Photoelectric has successfully gained its expected technical objective in technical innovation. With the trial production of Xianning Photoelectric, a new generation of high-aluminum products will be on the market, and the competitive advantage in the high-end electronic glass market will continue to strengthen. For the sector of display device, the Company has always adhered to the high-end and smart product route. As it seized the market opportunities of vehicle touch market in the first half year of 2018, the business shipment volumes of TP module increased substantially, with gross margin rising significantly. The revenue and net profit of the electronic glass and display device business sector rose by 19% year-on-year and 162% year-on-year respectively in the first half of the year.

#### X. Risks and response measures the Company faces

In 2018, in the face of "New Normal" of domestic economic development and "New CSG" construction task of the Company, the Company will face the following risks and challenges:

① In 2018, under the efforts of the Board of Directors and all employees, the daily operation of the Company is stable. However, the Company still faces the risk of lack of high-end talent reserve. To cope with aforesaid risks, the Company will take the following measures:

A. Construct new corporate culture of CSG as soon as possible, establish an kind of open, equal, fair and enterprising corporate culture, and reinforce internal core cohesion of employees;

B. Establish remuneration incentive system which related to performance and improve employee incentive mechanism;

C. Strengthen internal employee training, introduce external high-quality talent, and rapidly establish a high-quality talent team;

D. Establish sustainable talent recruitment, cultivation, utilization, retaining, and development management system; create a future-oriented human resource production, development, supply system that can support the future development of CSG.

<sup>(2)</sup>The glass industry is under pressure from fierce competition for similar products and rising raw materials, the solar energy and PV industry is faced with the risk of industrial integration and price fluctuation, the electronic glass and display devices industry will encounter the risk of accelerated technical upgrading and slow down in electronic product demand. To cope with aforesaid risks, the company will take the following measures:

A. In the flat glass industry, the Company will accelerate the technical upgrading and reform of the existing production line to realize differential operation, expand industrial scale and strengthen industrial competitiveness through industrial M&A;

B. In architectural glass industry, the Company will strengthen the development of high-end market and overseas market, consolidate the competitive advantage of the Company, and actively develop the residence market, explore new profit growth point, and at the same time, maintain the industrial advantageous position of the Company through market-oriented extension of industrial chain;

C. In the solar photovoltaic industry, the Company intends to further improve the power generation efficiency of silicon wafers, cells and modules, reduce manufacturing costs, and improve the market competitiveness of products through technical upgrading measures such as ingot single crystal and wet-method black silicon PERC technology. At the same time, the Company will firmly upgrade its technology towards electronic-grade polysilicon and excavate new products and explore new product market;

D. In electronic glass and display devices industry, the Company will strengthen research and development of new technology, new product, maintain its technical leading advantage in the industry, and further improve the product quality of ultra-thin electronic glass, so as to rapidly develop terminal market and improve industrial profitability.

③ Since 2018, the market price of the glass and solar industry have experienced great fluctuations, while the price of upstream raw material has fluctuated significantly, and meanwhile the labor price is constantly rising, which has brought risks to the operation of the Company. To cope with risk, the Company will take the following measures:

A. Vigorously exploit potential and increase efficiency, and effectively implement energy saving and consumption reduction;

B. Focus on the market change, and lock the price of bulk commodity at proper time;

C. Utilize bulk purchase advantage to reduce purchase cost;

D. Improve automatic production level, raise labor productivity.

(4) Risk of fluctuation of foreign exchange rate: At present, nearly 14.37% of the main business income of the Company are from overseas, in the future, the Company will further develop overseas business, and therefore, the fluctuation of exchange rate will bring certain risk to the operation of the Company. To cope with such risk, the Company will settle exchange in time and use safe and effective risk evading instrument and product to relatively lock exchange rate and reduce the risk caused by fluctuation of exchange

rate.

#### IV. Engaging and dismissing of CPA

Whether the semi-annual report has been audited or not

 $\Box$  Yes  $\sqrt{No}$ 

The semi-annual report of the Company has not been audited.

# V. Explanation from Board of Directors, Supervisory Committee and Independent Directors (if applicable) for "Non-standard audit report" of the period that issued by CPA

 $\Box$  Applicable  $\sqrt{\text{Not applicable}}$ 

# VI. Explanation from Board of Directors for "Non-standard audit report" of the previous year

 $\Box$  Applicable  $\sqrt{\text{Not applicable}}$ 

#### VII. Issues related to bankruptcy and reorganization

 $\Box$  Applicable  $\sqrt{Not}$  applicable

#### VIII. Lawsuits

Significant lawsuits and arbitrations

 $\Box$  Applicable  $\sqrt{\text{Not applicable}}$ 

There were no significant lawsuits or arbitrations in the report period. Other lawsuits  $\Box$  Applicable  $\sqrt{Not}$  applicable

#### IX. Penalty and rectification

 $\Box$  Applicable  $\sqrt{\text{Not applicable}}$ 

No penalty or rectification for the Company in the report period.

#### X. Integrity of the Company and its controlling shareholders and actual controllers

 $\Box$  Applicable  $\sqrt{\text{Not applicable}}$ 

## XI. Implementation of the Company's stock incentive plan, employee stock ownership plan or other employee incentives

 $\sqrt{\text{Applicable}}$   $\Box$  Not applicable

On Oct. 10, 2017, the third meeting of the company's eighth session of the board of directors deliberated and approved 2017 A-share Restricted Stock Incentive Plan (Draft) of CSG and its abstract, the Implementation Evaluation and Management Measures of 2017 A-share Restricted Stock Incentive Plan (Draft) of CSG and the Proposal to Apply for the Shareholders' Meeting to Authorize the Board of Directors to Handle the Issues Related to 2017 A-share Restricted Stock Incentive Plan. For the above-mentioned contents, please refer to the Decision Bulletin of the Third Meeting of the Eighth Session of the Board of Directors (Notice No. 2017-063) published in www.cninfo.com.cn on Oct. 11, 2017. The independent directors of the company have issued independent opinions on the issues related to the company's 2017 restricted A-share incentive plan.

On Oct. 26, 2017, 2017 fifth temporary shareholders' meeting of the company convened the above three resolutions. On Dec. 11, 2017, the 21<sup>st</sup> temporary meeting of the eighth session of the board of directors deliberated and approved *the Resolution on Adjusting the Granting List and Quantity of Targets of 2017 A-share Restricted Stock Incentive Plan.* It is determined that 454 staff will be granted with 97,511,654 restricted shares on Dec. 11, 2017. The first award price is RMB 4.28 /share and 17,046,869 restricted shares will be reserved.

The granting of restricted shares was completed on Dec. 25, 2017. For detailed contents, refer to *the Announcement on Completion of the Granting of 2017 Restricted A-shares* (Notice No.: 2017-079) published in www.cninfo.com.cn on Dec. 22, 2017. According to the relevant provisions of the Accounting Standards for Enterprises, the implementation of restricted shares will have certain impacts on the financial situation and operating results of the company in the coming years. The results will be based on the annual audit report issued by the accounting firm.

#### XII.Major related transaction

#### 1. Related transaction with routine operation concerned

#### $\Box$ Applicable $\sqrt{\text{Not applicable}}$

In the report period, the Company did not have related transaction with routine operation concerned.

#### 2. Related transaction with acquisition of assets or equity, sales of assets or equity concerned

#### $\Box$ Applicable $\sqrt{\text{Not applicable}}$

In the report period, the Company did not have related transaction with acquisition of assets or equity, sales of assets or equity concerned.

#### 3. Related transaction with jointly external investment concerned

- $\Box$  Applicable  $\sqrt{\text{Not applicable}}$
- In the report period, the Company did not have related transaction with jointly external investment concerned.

#### 4. Credits and liabilities with related parties

 $\Box$  Applicable  $\sqrt{\text{Not applicable}}$ 

There were no credits and liabilities with related parties in the report period.

#### 5. Other major related transaction

 $\Box$  Applicable  $\sqrt{\text{Not applicable}}$ 

There was no other major related transaction in the report period.

# XIII.Particular about non-operating fund of listed company occupied by controlling shareholder and its affiliated enterprises

 $\Box$ Applicable  $\sqrt{Not}$  applicable

It did not exist that non-operating fund of the listed company was occupied by controlling shareholder or its affiliated enterprises in the report period.

#### XIV. Significant contracts and their implementation

#### 1. Trusteeship, contract and leasing

#### (1) Trusteeship

 $\Box$  Applicable  $\sqrt{Not}$  applicable

No trusteeship for the Company in the report period.

#### (2) Contract

 $\Box$  Applicable  $\sqrt{\text{Not applicable}}$ 

No contract for the Company in the report period.

#### (3) Leasing

 $\Box$  Applicable  $\sqrt{Not}$  applicable

No leasing for the Company in the report period.

#### 2. Major guarantees

 $\sqrt{\text{Applicable}}$   $\Box$  Not applicable

#### (1) Guarantee

Unit: RMB 0,000

Construction and operation of pollution prevention and control facilities

The Company has built flue gas dust removal and denitrification system on production lines. The system runs normally, and the emission of exhaust gas meets regulations.

The environmental impact assessment of construction projects and other environmental protection license

The new production line of light guide plate photoelectric materials of Xianning CSG Photoelectric Glass Co. Ltd. newly established in 2017 has entered into the stage of trial production. Its pollution prevention and control facilities are running normally, and environmental protection acceptance work is being carried out. The subsidiary companies have effectively carrying out the "Three Simultaneous" procedures for all other new and old projects, and have been rewarded with the pollutant discharge license within the validity period. They timely declared the pollutant discharge, carried out the monitoring and reporting of pollutant discharge and paid the environmental tax.

#### Emergency response plan system of environment incident

In accordance with the national requirements, all subsidiary companies prepared emergency environmental response plan for environment incident, organized and carried out expert evaluation and put on record in the local environmental protection department as required, conducted the emergency drill against environmental incidents. And no major environmental incidents occurred in the first half of 2018.

Environmental self-monitoring scheme

In accordance with provisions of national laws and regulations and the requirements put forward in the assessment documents of the environment impact of construction project and reply, the subsidiary companies built on-line monitoring equipment for waste water and exhaust gas which are put into operation normally. They compared and reviewed the effectiveness of the on-line monitoring facilities on a regular basis. Besides, they also entrusted the third-party units to carry out the manual monitoring of the environment and fully monitor the discharge of the pollutants.

Other environmental information to be disclosed

The key monitored subsidiary companies above municipal level disclosed their environment protection status and made regular updating through websites, display cards, environmental information platform and other ways.

#### Other information related to environment protection

CSG always attaches great importance to environmental protection work, actively fulfills its social responsibility, adheres to the development road of energy saving, emission reduction, low carbon and environmental protection. In order to further reduce pollutant emissions, many subsidiaries of the group have carried out the construction of desulfurization facilities in 2018. After such facilities are completed and put into production, the emission concentration of sulfur dioxide will be further reduced substantially on the basis of existing emission level which has met with standards, and the ultra-low emissions will be achieved step-by-step.

#### 2. Performance of social responsibility for targeted poverty alleviation

No targeted poverty alleviation was carried out in the first half of the year, no follow-up plan for targeted poverty alleviation either.

### XVI. Statement on other important matters

 $\sqrt{\text{Applicable}}$   $\Box$  Not applicable

1. Short-term Financing Bills

On Dec.14, 2016, the second extraordinary shareholders' general meeting of 2016 of CSG deliberated and approved the proposal of the offering and registration of short-term financing bills, and agreed the Company's registration and issuance of short-term financing bills with a total amount of RMB 2.7 billion, which could be issued by stages within period of validity of the registration according to the Company's actual demands for funds and the status of inter-bank funds. However, the term of each issue shall not be longer than one year and the registered quota shall not exceed 40 percent of the Company's net assets.

#### 2. Ultra-short-term financing bills

On 14 May 2018, the 2017 Annual General Meeting of Shareholders' deliberated and approved the proposal of application for registration and issuance of ultra-short-term financing bills with registered capital of RMB 4 billion at most and validity within 2 years(This amount is not subject to a 40% net asset limit). which could be issued by stages within period of validity of the registration according to the Company's actual demands for funds and the status of inter-bank funds.

For details, please refer to www.chinabond.com.cn and www.chinamoney.com.cn.

#### 3. Perpetual bonds

On April 15, 2016, the Shareholders' General Meeting 2015 of CSG deliberated and approved the proposal of application for registration and issuance of perpetual bonds, and agreed the Company to register and issue perpetual bonds with total amount of

RMB 3.1 billion which could be issued by stages within period of validity of the registration according to the Company's actual demand for funds and the capital status of inter-bank market.

#### 4. Medium-term notes

On December 10, 2014, the First Extraordinary Shareholders' General Meeting 2014 of CSG Holding Co., Ltd deliberated and approved the proposal of application for registeration and issuance of medium term notes with total amount of RMB 1.2 billion at most. On May 21, 2015, National Association of Financial Market Institutional Investors (NAFMII) held the 32nd registration meeting of 2015, in which NAFMII decided to accept the registration of the Company's medium-term notes, amounting to RMB 1.2 billion and valid for two years. China Merchants Bank Co., Ltd. and Shanghai Pudong Development Bank Co., Ltd. were joint lead underwriters of these medium-term notes which could be issued by stages within period of validity of the registration. On July 10, 2015, the Company issued the first batch of medium term notes with total amount of RMB 1.2 billion and valid term of 5 years at the issuance rate of 4.94%, which will be redeemed on July 14, 2020.

On April 15, 2016, the Shareholders' General Meeting of 2015 of CSG deliberated and approved the proposal of application for registration and issuance of medium term notes with total amount of RMB 0.8 billion, which could be issued by stages within period of validity of the registration according to the Company's actual demands for funds and the status of inter-bank funds. On March 2, 2018, National Association of Financial Market Institutional Investors (NAFMII) held the 14<sup>th</sup> registration meeting of 2018, in which NAFMII decided to accept the registration of the Company's medium term notes, amounting to RMB 0.8 billion and valid for two years. Shanghai Pudong Development Bank Co., Ltd. and China CITIC Bank Corporation Limited were joint lead underwriters of these medium term notes which could be issued by stages within period of validity of the registration. On May 4, 2018, the Company issued the first batch of medium-term notes with total amount of RMB 0.8 billion and valid term of 3 years at the issuance rate of 7%, which will be redeemed on May 4, 2021.

On May 22, 2017, the Shareholders' General Meeting of 2016 of CSG deliberated and approved the proposal of application for registration and issuance of medium term notes with total amount of RMB 1 billion, which could be issued by stages within period of validity of the registration according to the Company's actual demands for funds and the status of inter-bank funds.

## **III. Basic Information of the Company**

CSG Holding Co Ltd (the "Company") was incorporated in September 1984, known as China South Glass Company, as a joint venture enterprise by Hong Kong China Merchants Shipping Co., LTD (香港招商局轮船股份有限公司), Shenzhen Building Materials Industry Corporation (深圳建筑材料工业集团公司), China North Industries Corporation (中国北方工业深圳公司) and Guangdong International Trust and Investment Corporation (广东国际信托投资公司). The Company was registered in Shenzhen, Guangdong Province of the People's Republic of China and its headquarters is located in Shenzhen, Guangdong Province of the People's Republic of China and its headquarters shares ("A-share") and foreign shares ("B-share") publicly in October 1991 and January 1992 respectively, and was listed on Shenzhen Stock Exchange on February 1992. As at June 30, 2018, the registered capital was RMB 2,856,769,678, with nominal value of RMB 1 per share.

The Company and its subsidiaries (collectively referred to as the "Group") are mainly engaged in the manufacture and sales of flat glass, architectural glass and other building energy - saving materials, polycrystalline silicon and solar module and the construction and operation of photovoltaic plant as well as the manufacture and sales of electronic glass and display device etc.

The main subsidiaries included in the scope of consolidation this year are detailed in the notes.

The financial statements were authorised for issue by the Board of Directors on August 27, 2018.

## IV. Basis of the preparation of financial statements

#### 1. Basis of preparation

The financial statements are prepared in accordance with the *Accounting Standards for Business Enterprises - Basic Standard*, and the specific accounting standards and other relevant regulations issued by the Ministry of Finance on 15 February 2006 and in subsequent periods (hereafter collectively referred to as "the Accounting Standard for Business Enterprises" or "CAS"), and *Information Disclosure Rule No. 15 for Companies with Public Traded Securities - Financial Reporting General Provision* issued by China Security Regulatory Commission.

#### 2. Going concern

As at June 30, 2018, the Group current liabilities exceed current assets about RMB 1,466 million and committed capital expenditure of about RMB 218 million. The directors of the Company has assessed the following facts and conditions: a) the Group has been able to generate positive operating cash flows in prior years and expect to do so in the next 12 months, From January to June 2018, the net cash inflow from operation activities is approximately RMB 765 million; b) the Group has maintained good relationship with banks, so the Group has been able to successfully renew the bank facilities upon the expiry. As at June 30, 2018, the Group had unutilised banking facilities of approximately RMB 5.4 billion, among which long-term banking facilities were about RMB 251 million. In addition, the shareholder of the Group or other appointed related parties are willing to provide the Group with RMB 2 billion interest-free loan. The Group also has other sources of financing, such as issuing short-term bonds, ultra-short-term financing bonds and medium-term notes. The directors are of view that the banking facilities and shareholder's support above can meet the funding requirements

# V. Significant accounting policies and accounting estimates

The Group determines its specific accounting policies and estimates according to manufacturing and operation feature. It mainly reflected in provision for bad debts of receivables, inventory costing method, amortisation of property, plant and equipmentand intangible assets, criteria for determining capitalised development expenditure, and timing for revenue recognition.

Please see Note for the key judgements adopted by the Group in applying important accounting policies.

#### 1. Statement of compliance with the Accounting Standards for Business Enterprises

The financial statements of the Company for the first half year of 2018 truly and completely present the financial position as of June 30, 2018 and the operating results, cash flows and other information for the first half year of 2018 of the Group and the Company in compliance with the Accounting Standards for Business Enterprises.

#### 2. Accounting period

The Company's accounting year starts on 1 January and ends on 31 December.

#### 3. Operating cycle

The Company's operating cycle starts on 1 January and ends on 31 December.

#### 4. Recording currency

The recording currency is Renminbi (RMB). The economic environment of subsidiaries, Hong Kong Southern Glass Trading Limited and China Southern Glass (Hong Kong) Limited, determines their recording currency is Hong Kong dollar. The recording currency in this report is Renminbi (RMB).

### 5. Business combinations

### (a)Business combinations involving entities under common control

The consideration paid and net assets obtained by the absorbing party in a business combination are measured at book value. The difference between book value of the net assets obtained from the combination and book value of the consideration paid for the combination is treated as an adjustment to capital surplus (share premium). If the capital surplus (share premium) is not sufficient to absorb the difference, the remaining balance is adjusted against retained earnings. Costs directly attributable to the combination are included in profit or loss in the period in which they are incurred. Transaction costs associated with the issue of equity or debt securities for the business combination are included in the initially recognised amounts of the equity or debt securities.

#### (b) Business combinations involving entities not under common control

The cost of combination and identifiable net assets obtained by the acquirer in a business combination are measured at fair value at the acquisition date. Where the cost of the combination exceeds the acquirer's interest in the fair value of the acquiree's identifiable net assets, the difference is recognised as goodwill; where the cost of combination is lower than the acquirer's interest in the fair value of the acquiree's identifiable net assets, the difference is recognised in profit or loss for the current period. Costs directly

attributable to the combination are included in profit or loss in the period in which they are incurred. Transaction costs associated with the issue of equity or debt securities for the business combination are included in the initially recognised amounts of the equity or debt securities.

#### 6. Preparation of consolidated financial statements

The consolidated financial statements comprise the financial statements of the Company and all of its subsidiaries.

Subsidiaries are consolidated from the date on which the Group obtains control and are de-consolidated from the date that such control ceases. For a subsidiary that is acquired in a business combination involving enterprises under common control, it is included in the consolidated financial statements from the date when it, together with the Company, comes under common control of the ultimate controlling party. The portion of the net profits realised before the combination date presented separately in the consolidated income statement.

In preparing the consolidated financial statements, where the accounting policies and the accounting periods of the Company and subsidiaries are inconsistent, the financial statements of the subsidiaries are adjusted in accordance with the accounting policies and the accounting period of the Company. For subsidiaries acquired from business combinations involving enterprises not under common control, the individual financial statements of the subsidiaries are adjusted based on the fair value of the identifiable net assets at the acquisition date.

All significant intra-group balances, transactions and unrealised profits are eliminated in the consolidated financial statements. The portion of subsidiaries' equity and the portion of a subsidiaries' net profits and losses and comprehensive incomes for the period not attributable to Company are recognised as minority interests and presented separately in the consolidated financial statements under equity, net profits and total comprehensive income respectively. Unrealised profits and losses resulting from the sales of assets by the Company to its subsidiaries are fully eliminated against net profit attributable to shareholders of the parent company. Unrealised profits and losses resulting from the sales of assets by a subsidiary to the Company are eliminated and allocated between net profit attributable to shareholders of the parent company and non-controlling interests in accordance with the allocation proportion of the parent in the subsidiary.

After the control over the subsidiary has been gained, whole or partial minority equities of the subsidiary owned by minority shareholders are acquired from the subsidiary's minority shareholders. In the consolidated financial statements, the subsidiary's assets and liabilities are reflected with amount based on continuous calculation starting from the acquisition date or consolidation date. Capital surplus is adjusted according to the difference between newly increased long-term equity investment arising from acquisition of minority equity and the share of net assets calculated based on current shareholding ratio that the parent company is entitled to. The share is subject to continuous calculation starting from the acquisition date. If the capital surplus (capital premium or share capital premium) is not sufficient to absorb the difference, the remaining balance is adjusted against retained earnings.

If the accounting treatment of a transaction which considers the Group as an accounting entity is different from that considers the Company or its subsidiaries as an accounting entity, it is adjusted from the perspective of the Group.

## 7. Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, deposits that can be readily drawn on demand, and short-term and highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

#### 8. Translating of foreign currency operations and foreign currency report form

(a) Foreign currency transaction

Foreign currency transactions are translated into RMB using the exchange rates prevailing at the dates of the transactions.

At the balance sheet date, monetary items denominated in foreign currencies are translated into RMB using the spot exchange rates on the balance sheet date. Exchange differences arising from these translations are recognised in profit or loss for the current period, except for those attributable to foreign currency borrowings that have been taken out specifically for the acquisition or construction of qualifying assets, which are capitalised as part of the cost of those assets. Non-monetary items denominated in foreign currencies that are measured at historical costs are translated at the balance sheet date using the spot exchange rates at the date of the transactions. The effect of exchange rate changes on cash is presented separately in the cash flow statement.

(b) Translation of foreign currency financial statements

The asset and liability items in the balance sheets for overseas operations are translated at the spot exchange rates on the balance sheet date. Among the shareholders' equity items, the items other than "undistributed profits" are translated at the spot exchange rates of the transaction dates. The income and expense items in the income statements of overseas operations are translated at the spot exchange rates of the transaction dates. The differences arising from the above translation are presented separately in the shareholders' equity. The cash flows of overseas operations are translated at the spot exchange rates on the dates of the cash flows. The effect of exchange rate changes on cash is presented separately in the cash flow statement.

#### 9. Financial instrument

#### (a) Financial assets

(i) Classification of financial assets

Financial assets are classified into the following categories at initial recognition: financial assets at fair value through profit or loss, receivables, available-for-sale financial assets and held-to-maturity investments. The classification of financial assets depends on the Group's intention and ability to hold the financial assets. The Group had no financial assets at fair value through profit or loss and held-to-maturity investments for the period.

#### Receivables

Receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Receivables comprise notes receivable, accounts receivable and other receivables.

Available-for-sale financial assets

Available-for-sale financial assets are non-derivative financial assets that are either designated in this category or not classified in any of the other categories at initial recognition. Available-for-sale financial assets are included in other current assets on the balance sheet if management intends to dispose of them within 12 months after the balance sheet date.

#### (ii) Recognition and measurement

Financial assets are recognised at fair value on the balance sheet when the Group becomes a party to the contractual provisions of the financial instrument. The related transaction costs that are attributable to the acquisition of receivables and available-for-sale financial assets are included in their initial recognition amounts.

Available-for-sale financial assets are subsequently measured at fair value. Investments in equity instruments are measured at cost when they do not have a quoted market price in an active market and whose fair value cannot be reliably measured. Receivables are measured at amortised cost using the effective interest method.

Gains or losses arising from change in fair value of available-for-sale financial assets are recognised directly in equity, except for impairment losses and foreign exchange gains and losses arising from translation of monetary financial assets. When such financial assets are derecognised, the cumulative gains or losses previously recognised directly into equity are recycled into profit or loss for the current period. Interests on available-for-sale investments in debt instruments calculated using the effective interest method during the period in which such investments are held and cash dividends declared by the investee on available-for-sale investments in equity instruments are recognised as investment income, which is recognised in profit or loss for the period.

#### (iii) Impairment of financial assets

The Group assesses book values of financial assets at each balance sheet date. If there is objective evidence that a financial asset is impaired, an impairment loss is provided for.

The objective evidence of impairment losses on financial assets refers to events that actually incurred after the initial recognition of financial assets, have influence on the expected future cash flow from the financial assets and the influence can be reliably measured.

Objective evidence which indicates the occurrence of impairment for available-for-sale equity instruments includes significant or non-temporary decrease of fair value of equity instruments investment. The Group conducts individual Checkion on each available-for-sale equity instruments investment at balance sheet date, if the fair value of the available-for-sale equity instrument is less than its initial investment cost for more than 50% (inclusive) or less than its initial investment cost continually for more than 1 year, that means impairment incurred; if the fair value of the available-for-sale equity instrument is less than its initial investment cost for more than 20% (inclusive) but has not reached 50%, the Group will comprehensively consider other factors such as price volatility to determine whether the equity instrument investment has been impaired. The Group calculates the initial investment cost of initial available-for-sale equity instruments investment using the weighted average method.

When an impairment loss on a financial asset carried at amortised cost has occurred, the amount of loss is provided for at the difference between the asset's carrying amount and the present value of its estimated future cash flows (excluding future credit losses that have not been incurred). If there is objective evidence that the value of the financial asset is recovered and the recovery is related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed and the

67

amount of reversal is recognised in profit or loss.

If an impairment loss on available-for-sale financial assets measured at fair value is incurred, the cumulative losses arising from the decline in fair value that had been recognised directly in shareholders' equity are transferred out from equity and into impairment loss. For an investment in debt instrument classified as available-for-sale on which impairment losses have been recognised, if, in a subsequent period, its fair value increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in profit or loss, the previously recognised impairment loss is reversed into profit or loss for the current period. For an investment in an equity instrument classified as available-for-sale on which impairment losses have been recognised, the increase in its fair value in a subsequent period is recognised directly in equity.

#### (iv) Derecognition of financial assets

Financial assets are derecognised when: i) the contractual rights to receive the cash flows from the financial assets have expired; or ii) all substantial risks and rewards of ownership of the financial assets have been transferred; or iii) the control over the financial asset has been waived even if the Group does not transfer or retain nearly all of the risks and rewards relating to the ownership of a financial asset.

On derecognition of a financial asset, the difference between the carrying amount and the sum of the consideration received and the cumulative changes in fair value that had been recognised directly in owner's equity, is recognised in profit or loss.

#### (b) Financial liabilities

Financial liabilities are classified into two categories at initial recognition: financial liabilities at fair value through profit or loss and other financial liabilities. Other financial liabilities in the Group mainly include payables, borrowings and bonds payable.

The fair value change of financial liabilities at fair value through profit or loss is charged to income statement.

Payables comprise accounts payable, notes payable and other payables, which are recognised initially at fair value and measured subsequently at amortised cost using the effective interest method.

Borrowings and bonds payable are recognised initially at fair value, net of transaction costs incurred, and subsequently measured at amortised cost using the effective interest method.

Other financial liabilities within one year (including one year) is presented as current liabilities, while non-current financial liabilities due with one year (including one year) is reclassified as non-current liabilities due within one year. Others are presented as non-current liabilities.

A financial liability (or a part of a financial liability) is derecognised when all or part of the obligation is extinguished. The difference between the carrying amount of a financial liability (or a part of financial liability) extinguished and the consideration paid is recognised in the income statement.

#### (c) Determination of fair value of financial instruments

The fair value of a financial instrument that is traded in an active market is determined at the quoted price in the active market. The fair value of a financial instrument that is not traded in an active market is determined by using a valuation technique. During valuation, the

Group adopts a valuation technique suitable for current situation, which is supported by sufficient available data and other information, chooses the inputs consistent with the feature of assets or liabilities considered in the transaction thereof with market participants, and uses related observable inputs in preference to the greatest extent. Unobservable inputs are used when it is unable to obtain or is infeasible for related observable inputs.

# 10. Recognition standard impairment and receivables

# (1) Bad debt provision on receivable accounts with major amount individually

| Basis of recognition or standard amount of Receivables that are individually significant | The amount individually greater than 20 million.  |
|--|---|
| Basis of bad debt provision on receivable accounts with major amount individually        | Receivables that are individually significant are subject to<br>separate impairment assessment. A provision for impairment<br>of the receivable is recognized if there is objective evidence<br>that the Group will not be able to collect the full amounts<br>according to the original terms. |

# (2) Receivables that are provided for provision based on their credit risk characteristics

| Name of the portfolio | Basis of bad debt provision               |  |  |  |
|-----------------------|---|--|--|--|
| Portfolio 1           | ccording to percentage of balance method  |  |  |  |
| Portfolio 2           | according to percentage of balance method |  |  |  |

Accounts on aging analysis basis in the portfolio:  $\Box$ Applicable  $\sqrt{Non-applicable}$ 

#### Accounts on percentage basis in the portfolio:

 $\sqrt{\text{Applicable}}$   $\Box \text{Non-applicable}$ 

| Name of the portfolio | Percentage of provision for<br>accounts receivable(%) | Percentage of provision for other<br>receivables(%) |
|-----------------------|---|---|
| Portfolio 1           | 2%  | 2%  |
| Portfolio 2           | 2%  | 2%  |

Accounts on other basis in the portfolio:

 $\Box$ Applicable  $\sqrt{Non-applicable}$ 

## (3) The method of provision for impairment of receivables that are individually significant

| Reason for providing bad debt | A provision for impairment of the receivable is recognized if there is objective evidence that  |
|-------------------------------|---|
| individually:                 | the Group will not be able to collect the full amounts according to the original terms.   |
| Basis of bad debt provision.  | The provision for impairment of the receivable is established at the difference between the carrying amount of the receivable and the present value of estimated future cash flows. |

#### 11. Inventories

#### (a) Classification

Inventories refer to manufacturing sector, including raw materials, work in progress, finished goods and turnover materials, and are measured at the lower of cost and net realisable value.

#### (b)Inventory costing method

Cost is determined using the weighted average method. The cost of finished goods and work in progress comprise raw materials, direct labour and systematically allocated production overhead based on the normal production capacity.

(c)Amortisation methods of low value consumables and packaging materials Turnover materials include low value consumables and packaging materials, which are expensed when issued.

(d)The determination of net realisable value and the method of provision for impairment of inventories Provision for decline in the value of inventories is determined at the excess amount of the carrying amounts of the inventories over their net realisable value. Net realisable value is determined based on the estimated selling price in the ordinary course of business, less the estimated costs to completion and estimated costs necessary to make the sale and related taxes.

(e) The Group adopts the perpetual inventory system.

#### 12. Assets classified as held for sale

A non-current asset or a disposal group is classified as held for sale when all of the following conditions are satisfied: (1) the non-current asset or the disposal group is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such non-current asset or disposal group; (2) the group has signed with other parties legally binding sale agreement and approval has been obtained, is expected to the sale will be completed within one year.

Non-current assets (except for financial assets and deferred tax assets) that meet the recognition criteria for held for sale are recognised at the amount equal to the lower of the fair value less costs to sell and the carrying amount. The difference between fair value less costs to sell and the carrying amount should be presented as impairment loss.

Such non-current assets and assets included in disposal groups as classified as held for sale are accounted for as current liabilities, which are presented separately in the balance sheet.

A discontinued operation is a component of the Group that either has been disposed of or is classified as held for sale, and is separately identifiable operationally and for financial reporting purposes, and satisfies one of the following conditions: (1) represents a separate major line of business or geographical area of operations; (2) is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations; and (3) is a subsidiary acquired exclusively with a view to resale.

Earnings from discontinued operations stated in the income statement include operating profit and loss and disposal gains and losses.

#### 13. Long-term equity investments

Long-term equity investments comprise the Company's long-term equity investments in its subsidiaries, and the Group's long-term equity investments in its associates.

Subsidiaries are the investees over which the Company is able to exercise control. Associates are the investees that the Group has significant influence on their financial and operating policies.

Investments in subsidiaries are measured using the cost method in the Company's financial statements, and adjusted by using the equity method when preparing the consolidated financial statements. Investments in associates are accounted for using the equity method.

#### (a) Initial recognition

For long-term equity investments formed in business combination: when obtained from business combinations involving entities under common control, the long-term equity investment is stated at carrying amount of equity for the combined parties at the time of merger; when the long-term equity investment obtained from business combinations involving entities not under common control, the investment is measured at combination cost.

For long-term equity investments not formed in business combination: the one paid by cash is initially measured at actual purchase price; the long-term investment obtained by issuing equity securities is stated at fair value of equity securities as initial investment cost.

(b) Subsequent measurement and recognition method of profit or loss

Long-term equity investments accounted for using the cost method are measured at initial investment cost. Cash dividend or profit distribution declared by the investees is recognised as investment income in profit or loss.

For long-term equity investments accounted for using the equity method, where the initial investment cost exceeds the Group's share of the fair value of the investee's identifiable net assets at the time of acquisition, the investment is initially measured at cost. Where the initial investment cost is less than the Group's share of the fair value of the investee's identifiable net assets at the time of acquisition, the difference is included in profit or loss for the current period and the cost of the long-term equity investment is adjusted upwards accordingly.

For long-term equity investments accounted for using the equity method, the Group recognises the investment income according to its share of net profit or loss of the investee. The Group discontinues recognising its share of the net losses of an investee after the carrying amounts of the long-term equity investment together with any long-term interests that in substance form part of the investor's net investment in the investee are reduced to zero. However, if the Group has obligations for additional losses and the criteria with respect to recognition of provisions under the accounting standards on contingencies are satisfied, the Group continues recognising the investment losses and the provisions. For changes in owners' equity of the investee other than those arising from its net profit or loss, its proportionate share is directly recorded into capital surplus, provided that the proportion of shareholding of the Group in the investee remains unchanged. The carrying amount of the investment is reduced by the Group's share of the profit

distribution or cash dividends declared by an investee. The unrealised profits or losses arising from the transactions between the Group and its investees are eliminated in proportion to the Group's equity interest in the investees, based on which the investment gain or losses are recognised. Any losses resulting from transactions between the Group and its investees attributable to asset impairment losses are not eliminated.

(c) Definition of control, joint control and significant influence over the investees

The term "control" refers to the power in the investees, to obtain variable returns by participating in the related business activities of the investees, and the ability to affect the returns by exercising its power over the investees.

The term "significant influence" refers to the power to participate in the formulation of financial and operating policies of an enterprise, but not the power to control, or jointly control, the formulation of such policies with other parties.

(d) Impairment of long-term equity investments

The carrying amount of long-term equity investments in subsidiaries and associates is reduced to the recoverable amount when the recoverable amount is less than the carrying amount.

#### 14. Fixed assets

(1) Recognition and initial measurement

Fixed assets comprise buildings, machinery and equipment, motor vehicles and others.

Fixed assets are recognised when it is probable that the related economic benefits will flow to the Group and the costs can be reliably measured. Fixed assets purchased or constructed by the Group are initially measured at cost at the time of acquisition.

Subsequent expenditures incurred for a fixed asset are included in the cost of the fixed asset when it is probable that the associated economic benefits will flow to the Group and the related cost can be reliably measured. The carrying amount of the replaced part is derecognised. All the other subsequent expenditures are recognised in profit or loss in the period in which they are incurred.

#### (2) Depreciation methods

Fixed assets are depreciated using the straight-line method to allocate the cost of the assets to their estimated residual values over their estimated useful lives. For the fixed assets that have been provided for impairment loss, the related depreciation charge is prospectively determined based upon the adjusted carrying amounts over their remaining useful lives.

The estimated useful lives, the estimated net residual values expressed as a percentage of cost and the annual depreciation rates of fixed assets are as follows:

| Categories | Depreciation methods | Period of depreciation | Estimated net residual value | Annual depreciation rate |
|------------|----------------------|------------------------|------------------------------|--------------------------|
|------------|----------------------|------------------------|------------------------------|--------------------------|

| Buildings                 | straight-line method | 20 to 35 years | 5% | 2.71% ~ 4.75% |
|---------------------------|----------------------|----------------|----|---------------|
| Machinery and equipment   | straight-line method | 8 to 20 years  | 5% | 4.75%~11.88%  |
| Motor vehicles and others | straight-line method | 5 to 8 years   | 0% | 12.50%~20.00% |

#### 15. Construction in progress

Construction in progress is recorded at actual cost. Actual cost comprises construction cost, installation cost, borrowing costs eligible for capitalised condition and necessary expenditures incurred for its intended use. Actual cost also includes net of trial production cost and trial production income before construction in progress is put into production.

Construction in progress is transferred to fixed assets when the assets are ready for their intended use, and depreciation begins from the following month.

Book value of construction in progress is reduced to the recoverable amount when the recoverable amount is below book value.

#### 16. Borrowing costs

The borrowing costs that are directly attributable to the acquisition and construction of an asset that needs a substantially long period of time for its intended use commence to be capitalised and recorded as part of the cost of the asset when expenditures for the asset and borrowing costs have been incurred, and the activities relating to the acquisition and construction that are necessary to prepare the asset for its intended use have commenced. The capitalisation of borrowing costs ceases when the asset under acquisition or construction becomes ready for its intended use and the borrowing costs incurred thereafter are recognised in profit or loss for the current period. Capitalisation of borrowing costs is suspended during periods in which the acquisition or construction of a fixed asset is interrupted abnormally and the interruption lasts for more than 3 months, until the acquisition or construction is resumed.

For the specific borrowings obtained for the acquisition or construction of an asset qualifying for capitalisation, the amount of borrowing costs eligible for capitalisation is determined by deducting any interest income earned from depositing the unused specific borrowings in the banks or any investment income arising on the temporary investment of those borrowings during the capitalisation period.

For the general borrowings obtained for the acquisition or construction of an asset qualifying for capitalisation, the amount of borrowing costs eligible for capitalisation is determined by applying the weighted average effective interest rate of general borrowings, to the weighted average of the excess amount of cumulative expenditures on the asset over the amount of specific borrowings. The effective interest rate is the rate at which the estimated future cash flows during the period of expected duration of the borrowings or applicable shorter period are discounted to the initial amount of the borrowings.

# 17. Intangible assets

#### (1) Valuation method, service life and impairment test

Intangible assets, mainly including land use rights, patents and proprietary technologies, exploitation rights and others, are measured at cost.

#### (a) Land use rights

Land use rights are amortised on the straight-line basis over their approved use period of 30 to 70 years. If the acquisition costs of the land use rights and the buildings located thereon cannot be reasonably allocated between the land use rights and the buildings, all of the acquisition costs are recognised as fixed assets.

(b) Patents and proprietary technologies

Patents are amortised on a straight-line basis over the estimated use life.

(c) Exploitation rights

Exploitation rights are amortised on a straight-line basis over permitted exploitation periods on the exploitation certificate.

(d) Periodical review of useful life and amortisation method

For an intangible asset with a finite useful life, review of its useful life and amortisation method is performed at each year-end, with adjustment made as appropriate.

(e) Impairment of intangible assets

Book value of intangible assets is reduced to the recoverable amount when the recoverable amount is below book value.

#### (2) Internal research and development expenditure accounting policy

The expenditure on an internal research and development project is classified into expenditure on the research phase and expenditure on the development phase based on its nature and whether there is material uncertainty that the research and development activities can form an intangible asset at end of the project.

Expenditure on the research phase related to planned survey, evaluation and selection for research on manufacturing technique is recognised in profit or loss in the period in which it is incurred. Prior to mass production, expenditure on the development phase related to the design and testing phase in regards to the final application of manufacturing technique is capitalised only if all of the following conditions are satisfied:

- the development of manufacturing technique has been fully demonstrated by technical team;
- management has approved the budget for the development of manufacturing technique;
- there are research and analysis of pre-market research explaining that products manufactured with such technique are capable of marketing;
- There is sufficient technical and capital to support the development of manufacturing technique and subsequent mass production; and the expenditure on manufacturing technique development can be reliably gathered.

Other development expenditures that do not meet the conditions above are recognised in profit or loss in the period in which they are incurred. Development costs previously recognised as expenses are not recognised as an asset in a subsequent period. Capitalised expenditure on the development phase is presented as development costs in the balance sheet and transferred to intangible assets at the date that the asset is ready for its intended use.

## 18. Impairment of long-term assets

Fixed assets, construction in progress, intangible assets with finite useful lives and long-term equity investments in joint ventures and associates are tested for impairment if there is any indication that the assets may be impaired at the balance sheet date; intangible

assets not ready for their intended use are tested at least annually for impairment, irrespective of whether there is any indication that they may be impaired. If the result of the impairment test indicates that the recoverable amount of an asset is less than its carrying amount, a provision for impairment and an impairment loss are recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and the present value of the future cash flows expected to be derived from the asset. Provision for asset impairment is determined and recognised on the individual asset basis. If it is not possible to estimate the recoverable amount of an individual asset, the recoverable amount of a group of assets to which the asset belongs is determined. A group of assets is the smallest group of assets that is able to generate independent cash inflows.

Goodwill that is separately presented in the financial statements is tested at least annually for impairment, irrespective of whether there is any indication that it may be impaired. In conducting the test, book value of goodwill is allocated to the related asset groups or groups of asset groups which are expected to benefit from the synergies of the business combination. If the result of the test indicates that the recoverable amount of an asset group or group of asset groups, including the allocated goodwill, is lower than its carrying amount, the corresponding impairment loss is recognised. The impairment loss is first deducted from book value of goodwill that is allocated to the asset group or group of asset groups, and then deducted from book values of other assets within the asset groups or groups of asset groups in proportion to book values of assets other than goodwill.

Once the above asset impairment loss is recognised, it will not be reversed for the value recovered in the subsequent periods.

## **19.** Long-term prepaid expenses

Long-term prepaid expenses include the expenditures that have been incurred but should be recognised as expenses over more than one year in the current and subsequent periods. Long-term prepaid expenses are amortised on the straight-line basis over the expected beneficial period and are presented at actual expenditure net of accumulated amortisation.

#### 20. Employee benefits

#### (1) Short-term employee benefits accounting method

Short-term employee benefits include wages or salaries, bonuses, allowances and subsidies, staff welfare, medical care, work injury insurance, maternity insurance, housing funds, labour union funds, employee education funds and paid short-term leave, etc. The employee benefit liabilities are recognised in the accounting period in which the service is rendered by the employees, with a corresponding charge to the profit or loss for the current period or the cost of relevant assets. Employee benefits which are non-monetary benefits shall be measured at fair value.

#### (2) Post-employment benefits accounting method

The Group classifies post-employment benefit plans as either defined contribution plans or defined benefit plans. Defined contribution plans are post-employment benefit plans under which the Group pays fixed contributions into a separate fund and will have no obligation to pay further contributions; and defined benefit plans are post-employment benefit plans other than defined contribution plans. During the reporting period, the Group's post-employment benefits mainly include basic pensions and unemployment insurance, both of which belong to the defined contribution plans.

#### (3) Basic pensions

The Group's employees participate in the basic pension plan set up and administered by local authorities of Ministry of Human Resource and Social Security. Monthly payments of premiums on the basic pensions are calculated according to prescribed bases and percentage by the relevant local authorities. When employees retire, local labour and social security institutions have a duty to pay the basic pension insurance to them. The amounts based on the above calculations are recognised as liabilities in the accounting period in which the service has been rendered by the employees, with a corresponding charge to the profit or loss for the current

period or the cost of relevant assets.

(4) Termination benefits accounting method

The Group provides compensation for terminating the employment relationship with employees before the end of the employment contracts or as an offer to encourage employees to accept voluntary redundancy before the end of the employment contracts. The Group recognises a liability arising from compensation for termination of the employment relationship with employees, with a corresponding charge to profit or loss at the earlier of the following dates: 1) when the Group cannot unilaterally withdraw the offer of termination benefits because of an employment termination plan or a curtailment proposal; 2) when the Group recognises costs or expenses related to the restructuring that involves the payment of termination benefits.

The termination benefits expected to be paid within one year since the balance sheet date are classified as current liabilities.

#### 21. Provisions

Business restructuring, provisions for product warranties, loss contracts etc. are recognised when the Group has a present obligation, it is probable that an outflow of economic benefits will be required to settle the obligation, and the amount of the obligation can be measured reliably.

A provision is initially measured at the best estimate of the expenditure required to settle the related present obligation. Factors surrounding a contingency, such as the risks, uncertainties and the time value of money, are taken into account as a whole in reaching the best estimate of a provision. Where the effect of the time value of money is material, the best estimate is determined by discounting the related future cash outflows. The increase in the discounted amount of the provision arising from passage of time is recognised as interest expense.

Book value of provision is reviewed at each balance sheet date and adjusted to reflect the current best estimate.

The provisions expected to be paid within one year since the balance sheet date are classified as current liabilities.

#### 22. Share-based payments

Share-based payments are divided into equity-settled and cash-settled payments. The term "equity-settled share-based payment" refers to a transaction in which an enterprise grants shares or other equity instruments as a consideration in return for services.

Equity-settled share-based payment The Group's stock optionstock option plan is the equity-settled share-based payment in exchange of employees' services and is measured at the fair value of the equity instruments at grant date. The equity instruments are exercisable after services in vesting period are completed or specified performance conditions are met. In the vesting period, the services obtained in current period are included in relevant cost and expenses at the fair value of the equity instruments at grant date based on the best estimate of the number of exercisable equity instruments, and capital surplus is increased accordingly. If the subsequent information indicates the number of exercisable equity instruments differs from the previous estimate, an adjustment is made and, on the exercise date, the estimate is revised to equal the number of actual vested equity instruments. The Group determines the fair value of stock optionstock options using option pricing model, which is Black-Scholes option pricing model (B-S model).

In the period at which performance conditions and term of service are met, the relevant cost and expenses of equity-settled payment should be recognized, and capital surplus is increased accordingly. Before the exercise date, the accruing amounts of equity-settled payments on balance sheet date reflect the part of expired waiting period and optimal estimation for the number of the Company final vested equity instruments.

If the non-market conditions and term of service are not met so that share-based payment fail to exercise, the costs and expenses on this portion should not be recognized. If the share-based payment agreement sets out the market conditions and term of non-vesting, as long as performance conditions and term of service are met, it is should be regard as exercisable right, no matter the market conditions and non-vesting conditions are meet or not.

If the terms of equity-settled payment are modified, at least the service is confirmed in accordance with the unmodified terms. In addition, the increase of the fair value of the authorized equity instruments, or the beneficial changes to the employees on the modification date, the increase of service are confirmed.

If the equity-settled payment is cancelled, the cancellation date shall be deemed as an expedited exercise, and the unconfirmed amount shall be confirmed immediately. If the employee or other party is able to choose to meet the non-vesting conditions but not satisfied in the waiting period, equity-settled payment should be cancelled. But if a new equity instrument is granted, and the new equity instrument is confirm to replace the old equity instrument which is canceled in the authorization date of the new equity instrument, the new equity instrument should be disposed by using the same conditions and terms of the old equity instrument for modifications.

#### 23. Revenue

The amount of revenue is determined in accordance with the fair value of the consideration received or receivable for the sales of goods and services in the ordinary course of the Group's activities. Revenue is shown net of discounts, rebates and returns.

Revenue is recognised when the economic benefits associated with the transaction will probably flow to the Group, the related revenue can be reliably measured, and the specific revenue recognition criteria have been met for each type of the Group's activities as described below:

#### (a) Sales of goods

The Group mainly sells flat and engineering glass, products related to solar energy, and electronic glass and displays. For domestic sales, the Group delivers the products to a certain place specified in the contract. When the buyer takes over the goods, the Group recognises revenue. For export sales, the Group recognises the revenue when it finished clearing goods for export and deliver the goods on board the vessel, or when the goods are delivered to a certain place specified in the contract. For above sales, when the buyer takes over the goods, the buyer has the right to sell the products, and should bear the risk of price fluctuation or goods damage.

#### (b) Rendering of services

Revenue is recognised for the rendering of service by the Group to external parties upon the completion of related service.

#### (c) Transfer of asset use rights

Interest income is recognised on a time-proportion basis using the effective interest method.

#### 24. Government grants

#### (1)Judgment basis and accounting method of government grants related to an asset

The government grants related to assets refers to government grant obtained by enterprises and used for purchase and construction of long-term assets or formation of long-term in other ways.

The government subsidies related to assets will be used to write off the book value of assets concerned, or be recognized as the deferred gains and be booked into the gains and losses in a reasonable and systematic manner over the useful life of the assets concerned.

#### (2) Judgment basis and accounting method of government grants related to income

The government grants related to income refer to grants other than those related to assets.

The income-related government subsidy which is used to compensate for costs or losses associated with the subsequent periods will be recognized as deferred gains and is recorded as current gains or losses or offsets related costs during the period in which the relevant cost costs or losses are recognized; The income-related government subsidy which is used to compensate for related costs or losses incurred will be directly included in current profits or losses or related costs. The group adopts the same presentation method for similar government grants.

#### (3) Judgment basis and accounting method of government grants related to ordinary activities.

The ordinary activity government grants should be counted into operating profits; the government grants which not belong ordinary activities should be counted inton non-operationg income.

#### 25. Deferred tax assets and deferred tax liabilities

Deferred tax assets and deferred tax liabilities are calculated and recognised based on the differences arising between the tax bases of assets and liabilities and their carrying amounts (temporary differences). Deferred tax asset is recognised for the deductible losses that can be carried forward to subsequent years for deduction of the taxable profit in accordance with the tax laws. No deferred tax liability is recognised for a temporary differences resulting from the initial recognition of goodwill. No deferred tax asset or deferred tax liability is recognised for the temporary differences resulting from the initial recognition of assets or liabilities due to a transaction other than a business combination, which affects neither accounting profit nor taxable profit (or deductible loss). At the balance sheet date, deferred tax assets and deferred tax liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled.

Deferred tax assets are only recognised for deductible temporary differences, deductible losses and tax credits to the extent that it is probable that taxable profit will be available in the future against which the deductible temporary differences, deductible losses and tax credits can be utilised.

Deferred tax liabilities are recognised for temporary differences arising from investments in subsidiaries and associates, except where the Group is able to control the timing of reversal of the temporary difference, and it is probable that the temporary difference will not reverse in the foreseeable future. When it is probable that the temporary differences arising from investments in subsidiaries and associates will be reversed in the foreseeable future and that the taxable profit will be available in the future against which the temporary differences can be utilised, the corresponding deferred tax assets are recognised.

Deferred tax assets and liabilities are offset when:

- the deferred taxes are related to the same tax payer within the Group and the same taxation authority; and,
- that tax payer within the Group has a legally enforceable right to offset current tax assets against current tax liabilities.

## 26. Leases

## (1) Accounting method of operating lease

Lease payments under an operating lease are recognised on a straight-line basis over the period of the lease, and are either capitalised as part of the cost of related assets, or charged as an expense for the current period.

Lease income under an operating lease is recognised as revenue on a straight-line basis over the period of the lease.

## (2) Accounting method of financing lease

A lease that transfers substantially all the risks and rewards incidental to ownership of an asset is a finance lease. An operating lease is a lease other than a finance lease.

## 27. Safety production costs

According to relevant regulations of the Ministry of Finance and National Administration of Work Safety, a subsidiary of the Group which is engaged in producing and selling polysilicon appropriates safety production costs on following basis:

- (a) 4% for revenue below RMB10 million (inclusive) of the year;
- (b) 2% for the revenue between RMB10 million to RMB100 million (inclusive) of the year;
- (c) 0.5% for the revenue between RMB100 million to RMB1 billion (inclusive) of the year;
- (d) 0.2% for the revenue above RMB1 billion of the year.

The safety production costs is mainly used for the overhaul, renewal and maintenance of safety facilities. The safety production costs are charged to costs of related products or profit or loss when appropriated, and safety production costs in equity account are credited correspondingly. When using the special reserve, if the expenditures are expenses in nature, the expenses incurred are offset against the special reserve directly when incurred. If the expenditures are capital expenditures, when projects are completed and transferred to fixed assets, the special reserve should be offset against the cost of fixed assets, and a corresponding accumulated depreciation are recognised. The fixed assets are no longer be depreciated in future.

#### 28. Segment information

The Group identifies operating segments based on the internal organisation structure, management requirements and internal reporting system, and discloses segment information of reportable segments which is determined on the basis of operating segments.

#### 29. Significant changes in accounting policies

#### (1) Changes in significant accounting policies

 $\Box$ Applicable  $\sqrt{Not}$  applicable

#### (2)Changes in significant accounting estimates

 $\Box$ Applicable  $\sqrt{\text{Not applicable}}$ 

#### 30. Critical accounting estimates and judgements

The Group continually Estimates the critical accounting estimates and key assumptions applied based on historical experience and other factors, including expectations of future events that are believed to be reasonable.

The critical accounting estimates and key assumptions that have a significant risk of possibly causing a material adjustment to book values of assets and liabilities within the next accounting year are outlined below:

#### (a) Income tax

The Group is subject to Income tax in numerous jurisdictions. There are some transactions and events for which the ultimate tax determination is uncertain during the ordinary course of business. Significant judgement is required from the Group in determining the provision for Income tax in each of these jurisdictions. Where the final identified outcome of these tax matters is different from the initially-recorded amount, such difference will impact the income tax expenses and deferred income tax in the period in which such determination is finally made.

#### (b) Deferred income tax

Estimates on deferred tax assets are based on estimates on amount of taxable income and applicable tax rate for every year. Realisation of deferred income tax are subject to sufficient taxable income that are possible to be obtained by the Group in the future. Change of the future tax rate as well as the reversed time of temporary difference might have effects on tax expense (income) and the balance of deferred tax assets or liabilities. Those estimates may also cause significant adjustment on deferred tax.

#### (c) Impairment of long-term assets (excluding goodwill)

Long-term assets at the balance sheet date should be subject to impairment testing if there are any indications of impairment. Management determines whether the long-term assets impaired or not by evaluating and analysing following aspects: (1) whether the event affecting assets impairment occurs; (2) whether the expected obtainable present value of future cash flows is lower than the asset's carrying amount by continually using the assets or disposal; and (3) whether the assumptions used in expected obtainable present value of future cash flows are appropriate.

Various assumptions, including the discount rate and growth rate applied in the method of present value of future cash flow, are required in evaluating the recoverable amount of assets. If these assumptions cannot be conformed, the recoverable amount should be modified, and the long-term assets may be impaired accordingly.

#### (d) The useful life of fixed assets

Management estimates the useful life of fixed assets, based on historical experiences on using fixed assets that have similar properties and functions. When there are differences between actually useful life and previously estimation, management will adjust estimation to useful life of fixed assets. The fixed assets would be written off or written down when fixed assets been disposed or became redundant. Thus, the estimated result based on existing experience may be different from the actual result of the next accounting period, which may cause major adjustment to book value of fixed assets on balance sheet.

#### (e) Goodwill impairment

Goodwill impairment reviews are undertaken annually or more frequently if events or changes in circumstances indicate a potential impairment. For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the cash-generating units ("CGUs"), or groups of CGUs, and future cash flow from each CGU or CGUs is forcasted and discounted with appropriate discount rate.

# VI. Taxation

| Tax item                              | Tax basis   |        |
|---------------------------------------|---|--------|
| Value-added tax ("VAT")               | Taxable value-added amount (Tax payable is calculated<br>using the taxable sales amount multiplied by the applicable<br>tax rate less deductible VAT input of the current period) | 6%-17% |
| City maintenance and construction tax | VAT paid  | 1%-7%  |
| Enterprise income tax                 | Taxable income  | 0%-25% |
| Educational surcharge                 | VAT paid  | 3%-5%  |
| Resource tax                          | Sales volume of silica  | 6.5%   |

# 2. Tax incentives

The main tax incentives the Group is entitled to are as follows:

Tianjin Energy Conservation Glass Co., Ltd. ("Tianjin Energy Conservation") passed review on a high and new tech enterprise in 2015 and obtained the Certificate of High and New Tech Enterprise, the period of validity is three years. It applies to 15% tax rate for three years since 2015. Currently in the review of high and new tech enterprise, this report period temporary by 15% income tax rate.

Dongguan CSG Architectural Glass Co., Ltd. ("Dongguan CSG") passed review on a high and new tech enterprise in 2016 and obtained the Certificate of High and New Tech Enterprise, the period of validity is three years. It applies to 15% tax rate for three years since 2016.

Wujiang CSG North-east Architectural Glass Co., Ltd. ("Wujiang CSG") passed review on a high and new tech enterprise in 2017 and obtained the *Certificate of High and New Tech Enterprise*, the period of validity is three years. It applies to 15% tax rate for three years since 2017.

Dongguan CSG Solar Glass Co., Ltd. ("Dongguan CSG Solar") passed review on a high and new tech enterprise in 2017 and obtained the *Certificate of High and New Tech Enterprise*, the period of validity is three years. It applies to 15% tax rate for three years since 2017.

Yichang CSG Silicon Co., Ltd. ("Yichang CSG Silicon") passed review on a high and new tech enterprise in 2017 and obtained the *Certificate of High and New Tech Enterprise*, the period of validity is three years. It applies to 15% tax rate for three years since 2017.

Dongguan CSG PV-tech Co., Ltd. ("Dongguan CSG PV-tech") passed review on a high and new tech enterprise in 2016 and obtained the *Certificate of High and New Tech Enterprise*, the period of validity is three years. It applies to 15% tax rate for three years since 2016.

Hebei Panel Glass Co., Ltd. ("Hebei Panel") passed review on a high and new tech enterprise in 2016 and obtained the *Certificate of High and New Tech Enterprise*, the period of validity is three years. It applies to 15% tax rate for three years since 2016.

Wujiang CSG Glass Co., Ltd. ("Wujiang CSG") was recognised as a high and new tech enterprise in 2017, and obtained the *Certificate of High and New Tech Enterprise*, and the period of validity was three years. It applies to 15% tax rate for three years since 2017.

Xianning CSG Glass Co Ltd. ("Xianning CSG") was recognised as a high and new tech enterprise in 2017, and obtained the *Certificate of High and New Tech Enterprise*, and the period of validity was three years. It applies to 15% tax rate for three years since 2017.

Xianning CSG Energy-Saving Glass Co., Ltd. ("Xianning CSG Energy-Saving") was recognised as a high and new tech enterprise in 2015, and obtained the *Certificate of High and New Tech Enterprise*, and the period of validity was three years. It applies to 15% tax rate for three years since 2015. Currently in the review of high and new tech enterprise, this report period temporary by 15% income tax rate.

Yichang CSG Photoelectric Glass Co., Ltd. ("Yichang CSG Photoelectric") was recognised as a high and new tech enterprise in 2015, and obtained the *Certificate of High and New Tech Enterprise*, and the period of validity was three years. It applies to 15% tax rate for three years since 2015. Currently in the review of high and new tech enterprise, this report period temporary by 15% income tax rate.

Yichang CSG Display Co., Ltd ("Yichang CSG Display") was recognised as a high and new tech enterprise in 2016, and obtained the *Certificate of High and New Tech Enterprise*, and the period of validity was three years. It applies to 15% tax rate for three years since 2016.

Qingyuan CSG New Energy-Saving Materials Co., Ltd. ("Qingyuan CSG Energy-Saving") was recognised as a high and new tech enterprise in 2016, and obtained the *Certificate of High and New Tech Enterprise*, and the period of validity was three years. It applies to 15% tax rate for three years since 2016.

Sichuan CSG Energy Conservation Glass Co., Ltd. ("Sichuan CSG Energy Conservation") obtains enterprise income tax preferential treatment for Western Development, and temporarily calculates enterprise income tax at a tax rate of 15% for current year.

Chengdu CSG Glass Co., Ltd. ("Chengdu CSG") obtains enterprise income tax preferential treatment for Western Development, and temporarily calculates enterprise income tax at a tax rate of 15% for current year.

Qingyuan CSG New Energy Co., Ltd. ("Qingyuan CSG New Energy"), Suzhou CSG PV Energy Co., Ltd. ("Suzhou CSG PV Energy"), Jiangsu Wujiang CSG New Energy Co., Ltd. ("Wujiang CSG New Energy"), and Yichang CSG New Energy Co., Ltd. ("Yichang CSG New Energy"), Zhangzhou CSG Kibing PV Energy Co., Ltd. ("Zhangzhou CSG"), Heyuan CSG Kibing PV Energy

Co., Ltd. ("Heyuan CSG"), Shaoxing CSG Kibing PV Energy Co., Ltd. ("Shaoxing CSG") are public infrastructure project specially supported by the state in accordance with the Article 87 in *Implementing Regulations of the Law of the People's Republic of China on Enterprise Income Tax*, and can enjoy the tax preferential policy of "three-year exemptions and three-year halves", that is, starting from the tax year when the first revenue from production and operation occurs, the enterprise income tax is exempted from the first to the third year, while half of the enterprise income tax is collected for the following three years. Qingyuan CSG New Energy, Suzhou CSG PV Energy and Wujiang CSG New Energy started to carry out operations in 2015, while Yichang CSG New Energy started operation in 2016, Zhangzhou CSG, Heyuan CSG and Shaoxing CSG started operation in 2017.

In addition, pursuant to the document Fogang Guo Shui Shui Tong [2015] No. 2489, the VAT for photovoltaic power generation of Qingyuan CSG New Energy is subject to the refund upon collection policy.

#### 3. Others

Some subsidiaries of the Group have used the "exempt, credit, refund" method on goods exported and the refund rate is 5%-17%.

# VII. Notes to the consolidated financial statements

#### 1. Cash at bank and on hand

Unit: RMB

| Item                | Balance at the end of the period | Balance at the beginning of the period |
|---------------------|----------------------------------|--|
| Cash on hand        | 14,984                           | 36,182                                 |
| Cash at bank        | 3,358,238,362                    | 2,409,716,983                          |
| Other cash balances | 13,791,823                       | 52,852,599                             |
| Total               | 3,372,045,169                    | 2,462,605,764                          |

Other cash balances include margin deposits for the application of opening letter of credit and loan from the bank, amounting to RMB 13,791,823 (Dec. 31,2017: RMB 2,852,599), which is restricted cash.

# 2. Notes receivable

# (1) Notes receivable listed by classification

| Item                   | Balance at the end of the period | Balance at the beginning of the period |  |
|------------------------|----------------------------------|--|--|
| Bank acceptance notes  | 443,248,211                      | 222,826,841                            |  |
| Trade acceptance notes | 345,830,165                      | 329,405,579                            |  |
| Total                  | 789,078,376                      | 552,232,420                            |  |

# (2) Notes receivable which have been endorsed or discounted at the end of the term by the Group but are not yet due are as follows:

Unit: RMB

| Item                   | Amount of recognition termination<br>at the period-end | Amount of not terminated recognition at the period-end |
|------------------------|--|--|
| Bank acceptance notes  | 2,358,041,319  |  |
| Trade acceptance notes |  | 150,400,507  |
| Total                  | 2,358,041,319  | 150,400,507  |

Accounts receivable on which bad debt provisions are provided on percentage analyze basis in a portfolio

 $\sqrt{\text{Applicable}}$   $\Box$  Non-applicable

Unit: RMB

| Name of contralic | Closing balalnce    |                    |              |  |  |  |
|-------------------|---------------------|--------------------|--------------|--|--|--|
| Name of portfolio | Accounts receivable | Bad debt provision | Proportion % |  |  |  |
| Portfolio 1       | 710,368,384         | 14,207,893         | 2%           |  |  |  |
| Total             | 710,368,384         | 14,207,893         | 2%           |  |  |  |

## (2) Accounts receivable withdraw, reversed or collected during the reporting period

The withdrawal amount of the bad debt provision during the report period was of RMB 7,311,182. The amount of the reversed or collected part during the report period was of RMB 3,725,813.

## (3) The actual write-off accounts receivable

Unit: RMB

| Item                | Write-off amount |
|---------------------|------------------|
| Accounts receivable | 2,754,144        |

The receivables actually written off during the year amounted to RMB 2,754,144, which was due to small receivables and non-related transactions. The reasons for write-off include business disputes or failure to contact the debtor and result in uncollectible payments.

# (4) Top 5 of the closing balance of the accounts receivable colleted according to the arrears party

As at June 30, 2018, the top 5 of the closing balance of the accounts receivable colleted according to the arrears party were collected and analyzed as follows:

|                                     | Balance     | Provision for bad debts | Percentage in total accounts receivable balance |
|-------------------------------------|-------------|-------------------------|---|
| Total balances for the five largest | 100,227,996 | 2,004,560               | 14%   |
| accounts receivable                 |             |                         |   |

# 4. Advances to suppliers

# (1) Listed by aging analysis

Unit: RMB

| 4             | Closing balance |            | Opening balance |            |  |
|---------------|-----------------|------------|-----------------|------------|--|
| Age           | Amount          | Proportion | Amount          | Proportion |  |
| within 1 year | 109,057,887     | 89%        | 130,813,397     | 91%        |  |
| 1 to 2 years  | 102,035         |            | 264,952         |            |  |
| 2 to 3 years  | 72,952          |            | 12,769,674      | 9%         |  |
| over 3 years  | 12,769,674      | 11%        |                 |            |  |
| Total         | 122,002,548     |            | 143,848,023     |            |  |

As at June 30, 2018, advances to suppliers ageing over one-year amount to RMB 12,944,661 (December 31 2017: RMB 13,034,626). They were mainly mainly for prepaid gas and material purchases, and the payment had not been selected because the materials had not been received.

# (2) Top 5 of the closing balance of the advances to suppliers colleted according to the target

As at June 30, 2018, the top five largest advances to supplies are set out as below:

|  | Balance    | Percentage in total advances balance |
|--|------------|--------------------------------------|
| Total advances for the five largest advances | 56,202,340 | 46%                                  |

At the end of the period, the intangible assets arising from internal research and development accounted for 12.98% of total of intangible assets.

## (2) Land use rights not licensed yet

Unit: RMB

| Item | Book value | Reason for not yet obtaining certificates of title |
|------|------------|--|
| Land | 5,351,068  | in the process                                     |

As at June 30, 2018, ownership certificates of land use right ("Land ownership Certificates") for certain land use rights of the Group with carrying amounts of approximately RMB 5,351,068 (cost: RMB 6,586,712) had not yet been obtained by the Group (as at December 31, 2017, carrying amount: RMB 5,473,442, cost: RMB 6,586,712). The Company's management is of the view that there is no legal restriction for the Group to apply for and obtain the Land Ownership Certificates and has no adverse effect on the Group's business operation.

# 12. Development expenditure

Unit: RMB

| Item                       | Opening balance | The increased amount in the period | The decrease amount in the period | Closing balance |  |
|----------------------------|-----------------|------------------------------------|-----------------------------------|-----------------|--|
|                            |                 | Internal development expenditure   | Recognised as intangible assets   |                 |  |
| Development<br>expenditure | 61,365,537      | 19,803,682                         | 9,191,305                         | 71,977,914      |  |
| Total                      | 61,365,537      | 19,803,682                         | 9,191,305                         | 71,977,914      |  |

During Jan.-Jun. 2018, the total amount of research and development expenditures of the Group was RMB 185,844,867 (Jan.-Jun. 2017: RMB 166,809,377), including RMB 166,041,185 (Jan.-Jun. 2017: RMB 151,590,181) recorded in income statement for current period and the research and development expenditure with the amount of RMB 9,191,305 recognised as intangible assets for the current period (Jan.-Jun. 2017: 6,097,439). As at June 30, 2018, the intangible assets arising from internal research and development accounted for 12.98 % of total of intangible assets (31 December 2017: 12.37 %).

# 13. Goodwill

# (1) Book value of goodwill

| Total                                    | 417,349,879     |                                    | 4,709,630 | 412,640,249     |

The Company calculated the amount determined based on the number of restricted stocks issued and the corresponding repurchase price, and confirmed the liabilities and treasury stocks. The decrease in treasury stocks was mainly due to the transfer of the restricted stock stocks during the report period.

## X. Risk related to financial instrument

The Group's activities expose it to a variety of financial risks: market risk (primarily currency risk and interest rate risk), credit risk and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance.

- (1) Market risk
- (a) Foreign exchange risk

The Group's major operational activities are carried out in Mainland China and a majority of the transactions are denominated in RMB. However, some of the export business is settled in foreign currency. Besides, the Group is exposed to foreign exchange risk arising from the recognised assets and liabilities, and future transactions denominated in foreign currencies, primarily with respect to US dollars and HKD. The Group monitors the scale of foreign currency transactions, foreign currency assets and liabilities, and adjust settlement currency of export business, to furthest reduce the currency risk.

As at 30 June 2018 the carrying amounts in RMB equivalent of the Group's assets and liabilities denominated in foreign currencies are summarized below:

|   | 30 June 2018 |            |            |             |  |  |
|---|--------------|------------|------------|-------------|--|--|
|   | USD          | HKD        | Others     | Total       |  |  |
| Financial assets denominated in foreign currency- |              |            |            |             |  |  |
| Cash at bank and on hand                          | 49,684,923   | 2,790,570  | 91,822     | 52,567,315  |  |  |
| Receivables                                       | 151,363,148  | 1,044,013  | 7,568,512  | 159,975,673 |  |  |
| Total   | 201,048,071  | 3,834,583  | 7,660,334  | 212,542,988 |  |  |

| Total   | 201,475,268      | 15,768,749 | 7,499,108  | 224,743,125 |  |  |
| Financial liabilities denominated in foreign      |                  |            |            |             |  |  |
| currency  |                  |            |            |             |  |  |
| Short-term borrowings                             |                  | 62,692,500 |            | 62,692,500  |  |  |
| Payables  | 104,040,185      | 257        | 36,939,407 | 140,979,849 |  |  |

| Tatal | 104 040 195 | (2, (02, 757 | 26 020 407 | 202 (72 240 |
|-------|-------------|--------------|------------|-------------|
| Total | 104,040,185 | 62,692,757   | 36,939,407 | 203,672,349 |

As at 30 June 2018, if the currency had strengthened/weakened by 10% against the USD while all other variables had been held constant, the Group's net profit for the year would have been approximately RMB13,497,047 lower/higher (31 December 2017: approximately RMB8,281,982 lower/higher) for various financial assets and liabilities denominated in USD.

As at 30 June 2018, if the currency had strengthened/weakened by 10% against the HKD while all other variables had been held constant, the Group's net profit for the year would have been approximately RMB5,048,845 higher/lower (31 December 2017: approximately RMB3,988,541higher/lower) for various financial assets and liabilities denominated in HKD.

Other changes in exchange rate had no significant influence on the Group's operating activities.

#### (b) Interest rate risk

The Group's interest rate risk arises from long-term interest bearing borrowings including long-term borrowings and bonds payable. Financial liabilities issued at floating rates expose the Group to cash flow interest rate risk. Financial liabilities issued at fixed rates expose the Group to fair value interest rate risk. The Group determines the relative proportions of its fixed rate and floating rate contracts depending on the prevailing market conditions. As at 30 June 2018, the Group's long-term interest-bearing debt at variable rates and fixed rates as illustrated below:

|                        | 30 June 2018  | 31 December 2017 |
|------------------------|---------------|------------------|
| Debt at fixed rates    | 2,274,000,000 | 1,425,000,000    |
| Debt at variable rates | 90,000,000    | 129,120,000      |
| Total                  | 2,364,000,000 | 1,554,120,000    |

The Group continuously monitors the interest rate position of the Group. Increases in interest rates will increase the cost of new borrowing and the interest expenses with respect to the Group's outstanding floating rate borrowings, and therefore could have a material adverse effect on the Group's financial position. The Group makes adjustments timely with reference to the latest market conditions, which includes increasing/decreasing long-term fixed rate debts at the anticipation of increasing/decreasing interest rate.

#### (2) Credit risk

Credit risk is managed on the grouping basis. Credit risk mainly arises from cash at bank, notes receivable, accounts receivable, other receivables.

The Group expects that there is no significant credit risk associated with cash at bank since they are mainly deposited at state-owned banks and other medium or large size listed banks. Management does not expect that there will be any significant losses from non-performance by these counterparties. Furthermore, as the Group's bank acceptance notes receivable are generally accepted by the state-owned banks and other large and medium listed banks, management believes the credit risk should be limited.

In addition, the Group has policies to limit the credit exposure on accounts receivable, other receivables and trade acceptance notes receivable. The Group assesses the credit quality of and sets credit limits on its customers by taking into account their financial position, the availability of guarantee from third parties, their credit history and other factors such as current market conditions. The

credit history of the customers is regularly monitored by the Group. In respect of customers with a poor credit history, the Group will use written payment reminders, or shorten or cancel credit periods, to ensure the overall credit risk of the Group is limited to a controllable extent.

#### (3) Liquidity risk

Cash flow forecasting is performed by each subsidiary of the Group and aggregated by the Group's finance department in its headquarters. The Group's finance department at its headquarters monitors rolling forecasts of the Group's short-term and long-term liquidity requirements to ensure it has sufficient cash reserve, while maintaining sufficient headroom on its undrawn committed borrowing facilities from major financial institutions so that the Group does not breach borrowing limits or covenants on any of its borrowing facilities to meet the short-term and long-term liquidity requirements.

As at 30 June 2018, the Group had net current liabilities of approximately RMB 1,466 million and committed capital expenditures of approximately RMB 218 million. Management will implement the following measures to ensure the liquidation risk limited to a controllable extent:

- (a) The Group will have steady cash inflows from operating activities;
- (b) The Group will pay the debts that mature and finance the construction projects through the existing bank facilities;
- (c) The Group will closely monitoring the payment of construction expenditure in terms of payment time and amount.

The financial liabilities of the Group at the balance sheet date are analysed by their maturity date below at their undiscounted contractual cash as follows:

| 30 June 2018                |               |              |               |              |                |  |  |
|-----------------------------|---------------|--------------|---------------|--------------|----------------|--|--|

## XI. Disclosure of fair value

## 1. Fair value of financial assets and financial liabilities not measured at fair value

The Group's financial assets and financial liabilities measured at amortized cost mainly include: accounts receivable, short-term borrowings, accounts payable, long term borrowings, bonds payable , long-term payables, ect.

Except for financial liabilities listed below, book value of the other financial assets and liabilities not measured at fair value is a reasonable approximation of their fair value.

|                         | 30 June 2018    |               | 31 December 2017 |               |  |
|-------------------------|-----------------|---------------|------------------|---------------|--|
|                         | Carrying amount | Fair value    | Carrying amount  | Fair value    |  |
| Financial liabilities - |                 |               |                  |               |  |
| Medium term notes       | 2,000,000,000   | 2,005,577,600 | 1,200,000,000    | 1,171,444,800 |  |
| Total                   | 2,000,000,000   | 2,005,577,600 | 1,200,000,000    | 1,171,444,800 |  |

The fair values of payables and medium-term notes are the present value of the contractually determined stream of future cash flows at the rate of interest applied at that time by the market to instruments of comparable credit status and providing substantially the same cash flows on the same terms, thereinto bonds payable belongs to Level 1 and medium term notes belong to Level 2.

## XII. Related party and related Transaction

#### 1. The subsidiaries

The general information and other related information of the subsidiaries are set out in attached note.

#### 2. Joint venture of the Company

On June 30, 2018, the Company has no joint venture.

#### 3. Other related parties

| Name of other related parties       | Relations between other related parties and the Company                    |
|-------------------------------------|--|
| Shenzhen Jushenghua Co. Ltd.        | Persons acting in concert with the first majority shareholder of the Group |
| Yichang Hongtai Real Estate Co. Ltd | Other related parties and their affiliates.                                |

#### 4. Receivables from related parties

#### (1) Receivable item

| Name of the Related parties |  | Closing      | g banlance         | Opening banlance |                    |  |
|-----------------------------|--|--------------|--------------------|------------------|--------------------|--|
| item                        | Related parties                        | Book balance | Bad debt provision | Book balance     | Bad debt provision |  |
| Other<br>receivables        | Yichang Hongtai Real<br>Estate Co. Ltd | 171,000,000  | 3,420,000          | 171,000,000      | 3,420,000          |  |

#### 5. Related party commitment

The commitments in relation to related parties contracted for but not yet necessary to be recognised on the balance sheet by the Group as at the balance sheet date are as follows:

On 22 November 2016, the Company received a letter from its shareholder, Jushenghua, stating that to support the Group's steady operation and development, Jushenghua, as the shareholder of the Company, would like to offer interest-free borrowings with the total amount of RMB2 billion to the Company or through related parties designated by it. For any borrowing drawn, its repayment date is negotiated by the Company and Jushenghua upon withdrawal. When a borrowing is due, if an extension is needed, the Company can apply to the actual lender based on the Company's operation; where the actual lender agrees with the extension application, the term of the borrowing is extended accordingly.

## **XIII. Share Payment**

#### 1. Overall situation of share payment

 $\sqrt{\text{Applicable}}$   $\Box$  Non-applicable

On December 11, 2017, reviewed and approved by the Group's eighth session of the Board of Directors, the Group implemented the 2017 A Share Restricted Stock Incentive Plan. The incentive targets for the restricted shares granted under this plan include company directors and senior management personnel. A total of 454 core management teams, company technology members and main employees. The first grant date of this restricted stock was December 11, 2017. The company granted 97,511,654 restricted shares for the first time to 454 incentive targets. The initial grant price was 4.28RMB per share. Reserved restricted stock ending balance 17,046,869 shares, the grant price has not been determined. The shares granted of the first time has been registered and listed.

This incentive plan is valid for 48 months from the date of grant of the restricted stock to the date of unlocking of all restricted stocks

or the completion of repurchase and cancellation. During the unlocking/exercise period, if the unlocking/exercise condition specified in the incentive plan is reached, the restricted stock granted is unlocked in three phases after 12 months from the grant date.

| Unlock Schedule | Unlock Time  | Unlock Ratio |
|-----------------|--|--------------|
| First unlock    | from the date of the first transaction 12 months after the award date to the date of the last transaction within 24 months from the grant date.  | 40%          |
| Second unlock   | from the date of the first trading day 24 months after the grant date to the date of the last trading day within 36 months from the grant date   | 30%          |
| Third unlock    | from the date of the first trading day 36 months after the grant date to the day of<br>the last trading day within 48 months from the grant date | 30%          |

#### 2. Equity-settled share payment

 $\sqrt{\text{Applicable}}$   $\Box$  Non-applicable

| Method for Determining the Fair Value of Equity<br>Instruments on the Grant Date     | Black-Scholes Model  |
|--|--|
| Determination of the number of vesting equity instruments                            | Based on the latest information on the change in the number of exercisable rights and the completion of performance indicators, the number of equity instruments that are expected to be exercised is revised. |
| Reasons for significant differences between current estimates and previous estimates | Not applicable   |
| Cumulative amount of equity-settled share-based payment in capital reserves          | 103,830,195  |
| Total equity confirmed by equity-settled share-based payment in this period          | 95,635,500   |

According to the relevant provisions of Accounting Standards for Business Enterprises No. 11 - Share Payment and Enterprise Accounting Standard No. 22 - Recognition and Measurement of Financial Instruments, the Group uses the Black-Scholes model (BS model) as a pricing model, deducting incentive objects. The fair value of the restricted stock will be used after the lock-in costs that are required to obtain the rational expected return from the sales restriction period are lifted in the future. The Group will, on each balance sheet date of the lock-in period, revise the number of restricted stocks that are expected to be unlockable based on the newly obtained changes in the number of unlockable persons and performance indicators, and follow the fair value of the restricted stock grant date. The services obtained during the current period are included in the relevant costs or expenses and capital reserves.

The Group actually granted restricted stocks of 97,511,654 shares in 2017, and the total fair value of the equity instruments granted to the incentive target for the first day of grant was RMB 289,519,900, the total fair value as the total cost of the company's equity incentive plan will be confirmed in stages according to the unlocking/exercise ratio during the implementation of the equity incentive plan, and will be included in the "management fees" and "capital" of each period accordingly.

In the first half of 2018, the Group achieved conditions for unlocking restricted stocks. In the current period, the relevant cost sharing amount of the incentive plan was recognized as RMB 95,635,500.

#### 3. Share payment in cash

 $\Box$ Applicable  $\sqrt{Non-applicable}$ 

## XIV. Commitments and contingencies

#### 1. Significant commitments

Important commitments on balance sheet date.

#### (1) Capital commitments

Capital expenditures contracted for by the Group at the balance sheet date but are not yet necessary to be recognized on the balance sheet are as follows:

|                                    | 30 June 2018 | 31 December 2017 |
|------------------------------------|--------------|------------------|
| Buildings, machinery and equipment | 217,726,070  | 150,418,893      |

#### (2) Operating lease commitments

The future minimum lease payments due under the signed irrevocable operating leases contracts are summarized as follows:

|               | 30 June 2018 | 31 December 2017 |
|---------------|--------------|------------------|
| Within 1 year | 2,911,953    | 3,675,748        |
| 1 to 2 years  | 1,944,336    | 1,914,948        |
| 2 to 3 years  | 1,300,108    | 1,472,224        |
| Over 3 years  | 2,656,252    | 3,443,641        |
| Total         | 8,812,649    | 10,506,561       |

#### XV. Other significant events

#### 1. Segment information

#### (1) Definition foundation and accounting policy of segment

The Group's business activities are categorised by product and service as follows:

- Glass segment, engaged in production and sales of float glass and engineering glass and other building energy saving materials, the silica for the production thereof, etc.
- Solar energy segment, engaged in manufacturing and sales of polycrystalline silicon and solar battery and applications, etc.

- Electronic glass and display segment is responsible for production and sales of display components and special ultra-thin glass products, etc.

The reportable segments of the Group are the business units that provide different products or service. Different businesses require different technologies and marketing strategies. The Group, therefore, separately manages the production and operation of each reportable segment and Estimates their operating results respectively, in order to make decisions about resources to be allocated to these segments and to assess their performance.

Inter-segment transfer prices are measured by reference to selling prices to third parties.

The assets are allocated based on the operations of the segment and the physical location of the asset. The liabilities are allocated based on the operations of the segment. Expenses indirectly attributable to each segment are allocated to the segments based on the proportion of each segment's revenue.

#### (2)Financial information of segment

|  | Glass industry | Electronic glass<br>and displays | Solar energy industry | Others    | Unallocated   | Elimination | Total          |
|--|----------------|----------------------------------|-----------------------|-----------|---------------|-------------|----------------|
