Auditors' Report
(English Translation for Reference Only)

To the shareholders of Bingshan Refrigeration & Heat Transfer Technologies Co., Ltd

1. Opinion

We have audited the accompanying financial statements of Bingshan Refrigeration & Heat Transfer Technologies Co., Ltd (“Bingshan Refrigeration & Heat Company”), which comprise the consolidated and company balance sheets as at 31 December 2023, and the consolidated and company income statements, the consolidated and company cash flow statements, the consolidated and company statements of changes in equity for the year then ended, and notes to these financial statements.

In our opinion, the accompanying financial statements have been prepared in accordance with the requirements of Accounting Standards for Business Enterprises, in all material respects and present fairly the consolidated and the financial position of Bingshan Refrigeration & Heat Company as at 31 December 2023, and of their consolidated and the company’s financial performance and cash flows for the year then ended.

2. Basis for Opinion

We conducted our audit in accordance with China Standards on Auditing for Chinese Certified Public Accountants. Our responsibilities under those standards are further described in the “Auditor’s Responsibilities for the Audit of the Financial Statements” section of our report. We are independent of Bingshan Refrigeration & Heat Company in accordance with the Code of Ethics for Chinese Certified Public Accountants, and we have fulfilled our other ethical responsibilities of the code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit.

3. Key Audit Matters

Key audit matters are those matters that we consider, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole and, in forming our audit opinion thereon, and we do not express a separate opinion on these matters.

Revenue Recognition	
Key Audit Matter	How the matter was addressed in the audit
<p>As stated in the Note ‘ No.44,VI. Notes to Consolidated Financial Statements’, revenue on the consolidated statements for the year ended as of December 31, 2023, is 4,815.9415 million Yuan. Revenue of Bingshan Refrigeration & Heat Company and its subsidiaries mainly come from sales of products and installation project. We consider the revenue as the key audit matter, because of the significance of revenue to the overall financial statements, and also the inherent risk of revenue manipulation by the management so for the special purpose.</p>	<p>The main audit procedures carried out for addressing the key audit matters are as follows:</p> <ol style="list-style-type: none"> 1. Understand and evaluate effectiveness of design and operation of the management’s internal control over revenue 2. Carried out analytical review and evaluate the reasonableness of sales income and gross profit margin by segmenting the business and sales in conjunction with industry development and actual situation of Bingshan Refrigeration & Heat Company. 3. Sampling test the sales contracts, identify the clause and condition in respect to the contract performance obligation, consideration and risk and reward transfer of the ownership. Evaluate the revenue recognition of Bingshan Refrigeration & Heat Company whether it is in line with the accounting standards. 4. Sampling select product sales revenue record, reconcile to sales invoice, contracts, dispatch note, acceptance note; Sampling select installation sales revenue record, reconcile to invoice, installation contracts and completion report and Evaluate the recognition of revenue whether is in line with the accounting standards 5. Checking actual installation cost by reviewing the contract budget, contract, invoice and supportive document with signature for the equipment received to evaluate the cost whether it really incurred. 6. Combined with receivable audit, perform confirmation procedures for key clients 7. Perform cut-off test so to ensure whether the transaction is recorded into the appropriate accounting period.

4. Other Information

The management of Bingshan Refrigeration & Heat Company (hereinafter referred to as the “Management”) is responsible for the other information. The other information comprises the information included in the Bingshan Refrigeration & Heat Company 2023 *annual report*, but does not include the financial statements and our auditor’s report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact. We have nothing to report in this regard.

5. Responsibilities of the Management and Those Charged with Governance for the Financial Statements

The Management is responsible for the preparation of the financial statements in accordance with Accounting Standards for Business Enterprises to achieve fair presentation; and designing, implementing and maintaining internal control which is necessary to enable that the financial statements are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Management is responsible for assessing Bingshan Refrigeration & Heat Company’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Management either intends to liquidate Bingshan Refrigeration & Heat Company or to cease operations, or have no realistic alternative but to do so.

Those charged with governance are responsible to overseeing Bingshan Refrigeration & Heat Company’s financial reporting process.

6. Auditor’s Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or

error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are generally considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

During the course of audit in accordance with auditing standards, we exercise professional judgment and maintain professional skepticism. We also carry out the following works:

(1) Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our audit. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

(2) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of its internal control (this sentence would be deleted in circumstance when we are also responsible to issue an opinion on the effectiveness of internal control in conjunction with the audit of the financial statements).

(3) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Management.

(4) Conclude on the appropriateness of the Management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on Bingshan Refrigeration & Heat Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements in accordance with the auditing standards or, if such disclosures are inadequate, we shall modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause Bingshan Refrigeration & Heat Company to cease to continue as a going concern.

(5) Evaluate the overall presentation, structure and content of the financial statements, and also whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

(6) Obtain sufficient and appropriate audit evidence with respect to the financial information of Bingshan Refrigeration & Heat entities or business activities, and issue an audit opinion. We are responsible for guiding, supervising and performing group audits and take full responsibility for audit opinions.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings etc., including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with those relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence and related safeguards, where applicable.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation prohibited public disclosure about the matter or when, in rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

(English translation for reference only)

I. General Information

Bingshan Refrigeration & Heat Transfer Technologies Co., Ltd (the “Company”) previously named as Dalian Refrigeration Company Limited, was reorganized and reformed from main part of former Dalian Refrigeration Factory. On December 8, 1993, the Company went to the public as a listed company at Shenzhen Stock Exchange Market. On March 20, 1998, the Company successfully went to the public at B share market and listed at Shenzhen Stock Exchange Market with total share capital of RMB350,014,975.00Yuan. The registered address is No. 106 East Liaohe Road, Dalian Economic and Technological Development Zone, Liaoning Province, as same as the headquarters’ address. The unified social credit code is 912102002423613009 on the business license.

According to the 13th meeting of the 6th generation of board, extraordinary general meeting for 2015 fiscal year and 'Restricted share incentive plan (draft)', the Company planned to introduce an ordinary share to incentive objectives, which was 10,150,000 number of shares would be granted to 41 share incentive objectives at granted price of RMB5.56Yuan per share. Up to March 12, 2015, the Company received new added share capital of RMB10,150,000.00Yuan.

The general meeting for 2015 fiscal year held on April 21, 2016 approved the profit distribution policy for the year of 2015, which agrees the profit distribution based on the total 360,164,975 number of shares as share capital, paid share dividend of 5 common shares for every 10 shares through capital reserve. The policy stated above was fully implemented on May 5, 2016, and the registered capital was altered to 540,247,462.00Yuan.

The 17th meeting of the 6th generation of board was held on June 4, 2015 and the 2nd interim shareholders’ meeting was held on June 24, 2015, meeting deliberated and passed the proposal of non-public offering of ‘A shares’. China’s Securities Regulatory Commission issued SFC license [2015]3137 on December 30, 2015, approving that new non-public offering cannot exceeded 38,821,954 numbers of shares. The company implemented the post meeting procedures for China’s Securities Regulatory Commission, which is regarding adjustment of bottom price and the number of the shares issued after the implementation of profit distribution policy of 2015 in May, 2016, and accordingly revised the upper limit of non-public offering of share to 58,645,096 number of new ‘A shares’. The company issued the non-public offering of 58,645,096 number of ‘A shares’ to 7 investors, and as a result, the total number of shares of the Company is changed to 598,892,558 shares, and the par value is 1yuan per share and the total share capital is 598,892,558.00Yuan.

According to the ‘Restricted Share Incentive Plan(draft) of Dalian Refrigeration Company Limited for the year of 2016’ and the ‘Proposal regarding the shareholders’ meeting

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

authorized the board of directors to implement the Restricted Share Incentive Plan' approved on the 3rd provisional general meeting held on September 13, 2016, the 9th meeting of the 7th generation of board deliberated and passed the 'Proposal about granting the restricted shares to incentive targets' on September 20, 2016 and set September 20, 2016 as share granted date, and granted 12,884,000 number of restricted shares to 118 incentive targets at granted price of 5.62Yuan per share. By November 22, 2016, The Company has actually received the newly subscribed registered share capital of 12,884,000.00Yuan subscribed by incentive targets.

On May 19, 2017, the general meeting for 2016 fiscal year was held and profit appropriation scheme for 2016 FY was approved, which was every 10 shares will be increased by 4 shares through capital reserve based on the total 611,776,558 number of shares. After the profit appropriation scheme, the registered capital was changed to RMB856,487,181.00Yuan.

On December 28, 2017, The Company held the 3rd extraordinary shareholders meeting in 2017, and reviewed and approved the "Proposal on Repurchasing and Retiring Partially Restricted Stocks of the 2016 Restricted Stock Incentive Plan". On March 8, 2018, after The Company's repurchase and cancellation, The Company implemented the corresponding capital reduction procedures according to law. The registered capital of The Company was changed from 856,487,181.00Yuan to 855,908,981.00 Yuan.

On May 4, 2018, The Company held the 21st meeting of the 7th Board of Directors, and reviewed and approved the "Proposal on Repurchasing and Retiring Partially Restricted Stocks of the 2015 Restricted Stock Incentive Plan". On June 29, 2018, after The Company's repurchase and cancellation, The Company implemented the corresponding capital reduction procedures according to law. The registered capital of The Company was changed from 855,908,981.00 Yuan to 855,434,087 .00Yuan.

On January 17th, 2019, the 1st interim shareholders' meeting was held and approved for "Proposal on Termination of the 2016 Restricted Stock Incentive Plan and Repurchasing and Retiring Restricted Stocks Plan". Up to February 25th, 2019, The Company has completed the repurchasing and retiring stocks plan, respectively The Company shall perform the corresponding capital reduction procedures in accordance with the law and the registered capital decreased from 855,434,087.00Yuan to 843,212,507.00Yuan.

On December 20th, 2019, The Company held the 7th meeting of the 8th Board of Directors and approved to change The Company's name from Dalian Refrigeration Company Limited to Bingshan Refrigeration & Heat Transfer Technologies Co., Ltd.

The company is in general equipment manufacturing industry. The main business activities

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

are the research and development, production and sales of various industrial refrigeration components, as well as the design, production and installation of complete engineering projects. The main products include: scroll type, piston type, screw type compressor units, cold water machine and other refrigeration equipment and all kinds of complete sets of refrigeration projects.

This financial report is approved by the board of directors on April 24, 2024. The financial statements will be reviewed at general meeting.

II. Financial Statements Preparation Basis

(1) Preparing basis

The group's financial statements are prepared according to the actual occurred transactions and events, and in accordance with 'Accounting Standards for Business Enterprises', its application guidelines, interpretations and other relevant provisions promulgated by the Ministry of Finance (collectively referred to as "Accounting Standards for Business Enterprises") and "No. 15 of Information Disclosure and Reporting Rules for Publicly Listed Companies - General Provisions for Financial Reports" (revised in 2023) promulgated by the China Securities Regulatory Commission (hereinafter referred to as the "CSRC").

(2) Going concern

The group has assessed the capacity to continually operate within 12 months since December 31, 2023, and hasn't found the major issues impacting on the sustainable operation ability. The Company's financial statements are prepared on the basis of going concern assumption.

III. Significant Accounting Policies and Accounting Estimates

1. Declaration for compliance with accounting standards for business enterprises

The financial statements are prepared in line with the requirements of Accounting Standard for Business Enterprise, and reflect the relative information of the financial position for the year ended as of December 31, 2023, operating performance, cash flow of the Company and the group for the year then ended truly and fully.

2. Accounting period

The group adopts the Gregorian calendar year as accounting period from Jan 1 to Dec 31.

3. Operating cycle

The group sets twelve months for one operating cycle.

4. Functional currency

Notes to financial statements**January 1, 2023 to December 31, 2023**

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

The group adopts RMB as functional currency.

5. Materiality criteria set up method and basis

The financial statements preparation and disclosure are in line with materiality. For those matters to be disclosed and need judgement for materiality, materiality criteria set up method and basis are as follows:

Disclosures involved by materiality judgement	In the notes to the financial statements	Materiality criteria set up method and basis
Significant receivables with individual provision for bad debts	Note VI.3	Single provision is over 10 million Yuan and represents more than 10% of the total provision
Collection or reverse of significant receivables	Note VI.3	Single provision is over 10 million Yuan and represents more than 10% of the total provision
Significant receivables written off	Note VI.3	Single provision is over 10 million Yuan and represents more than 10% of the total provision
Significant construction in progress	Note XVI.16	Single project budget over 30 million Yuan
Significant JV or associates	Note VIII.3	The book value of long-term equity investment in a single investee accounts for more than 10% of the group's net assets and the amount is greater than 100 million Yuan, or the gain or loss on investment under the long-term equity investment equity method accounts for more than 10% of the group's consolidated net profit
Significant subsidiary		Subsidiary's net assets are more than 10% of the group assets and its net profit is more than 10% of consolidated profit

6. Accounting for business combination under same control and not under same control

(1) Business combination under the same control

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

Business combination under the same control is the situation where entities participating the merger are controlled by the same party or controlled by parties under same ultimate control before and after merger and the control is not temporary.

The group, as an acquirer, the assets and liabilities that the group obtained in a business combination under the same control should be measured on the basis of their carrying amount of the acquiree in the ultimate control party's consolidated financial statements on the combining date. As for the balance between the carrying amount of the net assets obtained by the combining party and the carrying amount of the consideration paid by it, the capital surplus shall be adjusted. If the capital surplus is not sufficient to be offset, the retained earnings shall be adjusted.

(2) Business combination not under same control

Business combination not under the same control is the situation where entities participating the merger are not controlled by the same party or not controlled by parties under same ultimate control before and after merger.

When the group is an acquirer, for a business combination not under same control, the asset, liability and contingent liability obtained, shall be measured at the fair value on the acquisition date. The difference, when combination cost exceeds proportionate share of the fair value of identifiable net assets of acquiree should be recognized as goodwill. If the combination cost is less than proportionate share of the fair value of identifiable net assets of acquiree, firstly, fair value of identifiable asset, liability or contingent liability shall be reviewed, and so the fair value of non-monetary assets or equity instruments issued in the combination consideration, after review, still the combination cost is less than proportionate share of the fair value of identifiable net assets of acquiree, the difference should be recognized as non-operating income.

If a business consolidation not under common control is finally achieved in stages, when preparing the consolidated financial statements, the acquirer shall remeasure its previously held equity interest in the acquiree at its fair value on acquisition date and recognize the gain or loss as investment income for the current period. Other comprehensive income, under equity method accounting rising from the interest held in acquiree in relation to the period before the acquisition, and changes in the value of its other equity other than net profit or loss, other comprehensive income and profit appropriation shall be transferred to investment gain or loss for the period in which the acquisition incurs, excluding the other comprehensive income from the movement on the remeasurement of net asset or liability of defined benefit plan.

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

7. Criteria of control judgment and method of preparation of consolidated financial statements

Consolidation scope is determined on the control basis including the Company and all subsidiaries controlled by the Company. Control criteria is that the group has the power over the investees, enjoy the variable return by involving the relative activities of the investees and also has the impact on the return amount through the power over the investees.

If subsidiaries adopt different accounting policy or have different accounting period from the parent company, appropriated adjustments shall be made in accordance with the Company policy in preparation of the consolidated financial statements.

All significant intergroup transactions, outstanding balances and unrealized profit shall be eliminated in full when preparing the consolidated financial statements. Portion of the subsidiary's equity not belonging to the parent, profit, loss for the current period, portion of other comprehensive income and total comprehensive belonging to minority interest, shall be presented separately in the consolidated financial statements under "minority interest of equity", minority interest of profit and loss", "other comprehensive income attributed to minority interest" and "total comprehensive income attributed to minority interest" title.

If a subsidiary is acquired under common control, its operation results and cash flow shall be consolidated since the beginning of the consolidation period. When preparing the comparative consolidated financial statements, adjustments shall be made to relevant items of comparative figures as regarded that reporting entity established through consolidation has been always existing since the point when the ultimate controlling party starts to have the control.

If a subsidiary is acquired not under common control, its operation results and cash flow shall be consolidated since the beginning of the consolidation period. In preparation of the consolidated financial statements, adjustments shall be made to subsidiary's financial statements based on the fair value of its all identifiable assets, liability or contingent liability on the acquisition date.

When the group partially disposes of the long –term equity investment in subsidiary without losing the control over it, in the consolidated financial statements, the difference, between disposals price and respective disposed value of share of net assets in the subsidiary since the acquisition date or combination date, shall be adjusted for capital surplus or share premium, no enough capital surplus, then adjusted for retained earnings.

When the group partially disposes of the long –term equity investment in subsidiary and lose the control over it, in preparation of consolidated financial statements, remaining share of interest in the subsidiary shall be remeasured on the date of losing control. Sum of the share

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

disposal consideration and fair value of remaining portion of shareholding minus the share of the net assets in the subsidiary held based on the previous shareholding percentage since the acquisition date or combination date, the balance of above is recognized as investment gain/loss for the period and goodwill shall be written off accordingly. Other comprehensive income relevant to share investment in subsidiary shall be transferred to investment gain /loss for the period on the date of losing control.

When the group partially disposes of the long –term equity investment in subsidiary and lose the control over it by stages, if all disposing transactions are bundled, each individual transaction shall be seen as a transaction of disposal of a subsidiary by losing control. The difference between the disposal price and the share of the net assets in the subsidiary held before the date of losing control, shall be recognize as other comprehensive income until the date of losing control where it is transferred into investment gain/ loss for the current period. If the equity investment in the subsidiary is disposed of by stages through multiple transactions until the control is lost, and it is not a bundled transaction, each transaction shall be accounted for separately according to whether the control is lost.

8. Cash and cash equivalent

The cash listed on the cash flow statements of the Company refers to cash on hand and bank deposit. The cash equivalents refer to short-term (normally with original maturities of three months or less) and liquid investments which are readily convertible to known amounts of cash and subject to an insignificant risk of changes in value.

9. Translation of foreign currency

(1) Foreign currency transaction

Foreign currency transactions are translated at the spot exchange rate issued by People’s Bank of China (“PBOC”) on the 1st day of the month when the transactions are accounted initially.

At the balance sheet date, foreign currency monetary items should be converted into reporting currency at the balance sheet date’s spot exchange rate. Exchange differences should be taken into the current profits and losses except special foreign currency borrowings for construction and producing assets which are qualifying for assets capitalization, should be capitalized. Foreign currency non-monetary items, which are recorded in historical cost, should be still recorded at the spot exchange rate when the transaction occurred and no change on reporting currency amount. Foreign currency non-monetary items, which are measured at fair value, should be recorded in the spot exchange rate at the date measuring the fair value and the differences should be recognized as profit and loss from fair value changes and included in the current profits and losses. Invested capital in foreign currency shall be converted into

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

reporting currency at FX rate at when the investment is received, and no foreign exchange difference arises between capital received and monetary items.

10. Financial instruments

(1) Recognition and derecognition of financial instruments

The group shall recognize a financial asset or a financial liability when becoming party to the contractual provisions of the instrument.

An entity shall derecognize a financial asset (or a part of it or a group of similar financial asset) when, and only when: 1) the contractual rights to the cash flows from the financial asset expire, or 2) the entity transfers contractual rights to receive the cash flows of a financial asset, or assumes a contractual obligation to pay those cash flows received to the 3rd party in full amount in time according to the ‘passing-through’ agreement and the entity substantially transfers all the risks and rewards of ownership of the financial asset in nature, or the entity neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset, but the entity has not retained control.

Financial liabilities shall be derecognized if the obligation of the liability is fulfilled, cancelled or expired. An exchange between an existing borrower and lender of debt instruments with substantially different terms shall be accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms an existing financial liability shall be accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of a financial liability extinguished and the consideration paid, including any non-cash assets transferred or liabilities assumed, shall be recognized in profit or loss.

A regular way purchase or sale of financial assets shall be recognized and derecognized, as applicable, using trade date accounting or settlement date accounting.

(2) Classification and measurement of financial assets

At initial recognition, the group shall classify financial assets as measured at amortized cost, fair value through other comprehensive income or fair value through profit or loss on the basis of both the group’s business model for managing the financial assets and the contractual cash flow characteristics of the financial asset. Only when the business model for managing the financial assets is changed, the affected financial assets shall be reclassified.

In determining the business model, the group considers, among others, the way in which the company evaluates and reports the performance of financial assets to key management

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

personnel, the risks affecting the performance of financial assets and the way in which they are managed, and the way in which the relevant business managers are remunerated. In assessing whether the objective is to collect contract cash flows, the group needs to make an analytical judgment on the reasons, timing, frequency and value of the sale of the financial assets before the maturity date.

In determining the contract cash flow characteristics, the group is required to determine whether the contract cash flow is only the payment of principal and interest based on the outstanding principal, (including the assessment of the time value of money correction, judging any significant difference between it and the baseline cash flow/ for financial assets containing early repayment characteristics, is required to determine whether the fair value of early repayment features is very small).

Financial assets are measured at fair value at the initial recognition, but accounts receivable or notes receivable arising from the sale of goods or provision of services, etc., do not contain a significant financing component or do not consider the financing component of less than one year, the initial measurement is based on the transaction price.

For financial assets that are measured at fair value, the related transaction costs are directly included in current profit or loss, and those costs of other categories of financial assets are included in their initial recognized amounts.

Financial assets subsequent measurement based on the classification

1) A financial asset measured at amortized cost

A financial asset shall be measured at amortized cost if both of the following conditions are met: ①the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows;②the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. The financial assets of this category include: monetary fund, receivable, notes receivable and other receivables.

2) Debt instruments measured at fair value through other comprehensive income

A financial asset shall be measured at fair value through other comprehensive income if both of the following conditions are met: ①the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and ②the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. The effective interest rate is applied to interest income. A gain or loss arising from a financial asset measured at fair value through other comprehensive income, which is not part of

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

hedging relationship shall be recognized in other comprehensive income apart from interest income, impairment loss and foreign exchange difference. When this type of financial assets is derecognized, accumulated gain or loss previously in the other comprehensive income shall be out of it and accounted into retained earnings when the financial asset is derecognized. The financial assets of this category include: receivable financing.

3) Equity instruments measured at fair value through other comprehensive income

The group may make an irrevocable election for particular investments in equity instruments that it would be measured at fair value through other comprehensive income, but once the election is made, it is irrevocable. The group only recognizes the dividend (apart from the dividend as investment cost pay back) into profit and loss and fair value movement subsequently will be recognized into comprehensive income and no need for impairment provision. When this type of financial assets is derecognized, accumulated gain or loss previously in the other comprehensive income shall be out of it and accounted into retained earnings when the financial asset is derecognized. The financial asset of this category is equity instruments.

4) A financial asset measured as fair value through profit or loss

Apart from classified as the amortized cost financial assets and as fair value through other comprehensive income financial assets, a financial asset is classified as fair value through profit or loss. The group shall subsequently measure this financial asset at its fair value, except for hedging accounting, any gain or loss on FVTPL shall be accounted into profit and loss. The financial assets of this category include: tradable financial asset other non-current financial asset.

A financial asset shall be classified as fair value through profit or loss if it is recognized contingent consideration through business combination, which is not under same control situation.

(3) Classification, basis for recognition and measurement of financial liability

Except for the financial guarantee contract, commitments to provide a loan at a below-market interest rate and financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies, the group shall initially classify all financial liabilities as it measured at amortized cost or financial liabilities at fair value through profit or loss. For financial liabilities that are measured at fair value, the related transaction costs are directly included in current profit or loss, and those costs of other categories of financial assets are included in their initial recognized amounts.

Financial liabilities subsequent measurement based on the classification

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

1) Financial liabilities as it subsequently measured at amortized cost

Effective interest method is applied to financial liabilities as subsequently measured at amortized cost

2) Financial liability as it measured at fair value through profit or loss

Financial liability measured at fair value through profit or loss including tradable financial liability (derivative instrument of financial liability included) and designated as financial liability measured at fair value through profit or loss. Tradeable financial liability (including derivate instrument of financial liability) are subsequently measured at fair value. The net gain or loss arising from changes in fair value are recorded in profit or loss for the period in which they are incurred. Financial liability designated as it measured at fair value through profit or loss shall be subsequently measured at fair value, except for changes in fair value caused by changes in the group's own credit risk, which are recognized in other comprehensive income, other changes in fair value are recognized in profit or loss for the current period; The group recognizes all fair value changes (including the amount affected by changes in its own credit risk) in profit or loss if the inclusion of changes in fair value caused by changes in its own credit risk in other comprehensive income would cause or widen the accounting mismatch in profit or loss for the current period.

(4) Financial instrument impairment

Based on expected credit loss, the group shall apply the impairment requirements for the followings: ① a financial asset measured at amortized cost; ② debt investment measured at fair value and changes in fair value is through other comprehensive income; ③ lease receivable; ④ a contractual asset and financial guarantee contract.

Expected credit loss is the weighted average of credit losses with the respective risks of a default occurring as the weights. A credit loss herein is referred to as the present value, at original effective rate, of the difference between the contractual cash flows that are due to the group under the contract; and the cash flows that the Company expects to receive, that's the present value of the total cash shortage. The group shall measure expected credit losses of a financial instrument in a way that reflects: ① an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes; ② the time value of money; and ③ reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

Expected credit loss of financial instrument is assessed individually and portfolio. The group assesses the expected credit loss based on the portfolio in accordance with the common

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

characteristics of credit risk which involves type of financial instrument, credit risk grade, and age of trade receivables.

When assessing expected credit losses, the group considers all reasonable and supportable information, including that which is forward-looking. In making these judgments and estimates, the group extrapolates the expected changes in the debtor's credit risk based on historical repayment data combined with factors such as economic policies, macroeconomic indicators and industry risks. Different estimates may affect the provision for impairment, and the provision already made may not equal the actual amount of impairment losses in the future.

1) Impairment testing method of receivable and contract asset

For receivable, notes receivable and contract asset etc., which don't contain significant financing component and arise from sales of products and service provision, the group adopts simplified method to account expected credit loss provision at an amount equal to the whole lifetime expected credit losses.

For lease premium receivable, trade receivable containing significant financing component, and contract asset, the group adopts simplified method to account expected credit loss provision at an amount equal to the whole lifetime expected credit losses.

The group determines the expected credit loss of trade receivable on the basis of portfolios with common characteristics of credit risk, which are considered by expected credit loss measurement reflection, by reference to historical experience of credit loss and by comparison of receivable past due days/ receivable age with default risk rate, unless the single credit loss is separately recognized for contractual payments that is significant in amount and credit impaired. If certain client is significant different from others in terms of credit risk characteristics, or the client's credit risk has significantly increased, such as experiencing severe finance difficulty, its expected credit loss is obviously higher than it to be at accounting age, the group will make separate credit loss provision for this client's receivable.

① Portfolio category and recognition basis of receivable (contract asset)

The group classifies accounts receivable (and contract assets) according to the similarity and relevance of credit risk characteristics based on information such as age, nature of payments, credit risk exposure, historical debt collection, etc. For accounts receivable (and contract assets), the group determines that aging is the primary factor affecting its credit risk and therefore, the group assesses its expected credit losses on the basis of aging portfolios. The group calculates the overdue age based on the payment date agreed in the contract.

No expected credit loss is recognized for receivables from related party within consolidated

Notes to financial statements**January 1, 2023 to December 31, 2023**

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

scope as the group assesses its credit risk is relatively low.

② Portfolio category and recognition basis of notes receivable

Portfolio category	Expected credit loss accounting estimate policy
Bank acceptance note portfolio	Lower credit risk assessed by the management, no expected credit loss recognition
Commercial acceptance note portfolio	Same as receivables portfolio and provided for excepted credit loss allowance based on expected credit loss rate

2) Impairment testing method of debt investment, other debt investment, loan commitments and financial guarantee contracts

With the exception of financial assets (such as debt investments, other debt investments), loan commitments and financial guarantee contracts for which the simplified measurement method is adopted above, the group adopts the general method (three-stage method) for the provision of expected credit losses. At each balance sheet date, the group assesses whether its credit risk has increased significantly since the initial recognition, and if the credit risk has not increased significantly since the initial recognition, in the first stage, the group measures the loss provision at an amount equivalent to the expected credit loss over the next 12 months and calculates interest income based on the carrying balance and effective interest rate; If the credit risk has increased significantly since the initial recognition but no credit impairment has occurred, in the second stage, the group measures the loss provision at an amount equivalent to the expected credit loss over the entire duration and calculates interest income based on the carrying balance and effective interest rate; If credit impairment occurs after initial recognition, in the third stage, the group measures the loss provision at an amount equivalent to the expected credit loss over the entire duration and calculates interest income at amortized costs and effective interest rates. For financial instruments with only low credit risk at the balance sheet date, the group assumes that their credit risk has not increased significantly since initial recognition

The whole life expected credit loss refers to the expected credit loss caused by all possible default events during the whole expected life of the financial instrument. Expected credit losses over the next 12 months are expected credit losses resulting from defaults on financial instruments that may occur within 12 months after the balance sheet date (or if the expected duration of the financial instrument is less than 12 months) and are part of the overall expected credit losses over the life of the financial instrument.

Criteria of significant increase in credit risk and definition of credit impaired assets are disclosed on Note X.1

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

(5) Recognition and measurement of transfer of financial assets

A financial asset is derecognized when the financial asset has been transferred together with substantial all risks and rewards to the transferee. A financial asset can not be derecognized when the substantial all risks and rewards to the financial asset has been retained. When the all risks and rewards of the financial asset are neither transferred nor retained, but the group has given up its control of the financial asset, the financial asset shall be derecognized and recognize the asset and liability originated. Where control of the financial asset is not relinquished, the relevant financial asset shall be recognized according to the extent to which it continues to be involved in the transferred financial asset, and the relevant liability shall be recognized accordingly.

In the case where the financial asset as a whole qualifies for the derecognition conditions, the difference between the carrying value of transferred financial asset at the derecognition date and the sum of the consideration received for transfer and the accumulated amount of changes in fair value in respect of the amount of partial derecognition (financial assets involved in transfer must qualify the following conditions: ① the financial asset is held within a business model whose objective is not only for collecting contractual cash flows but also for sale; ②the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest based on the principal amount outstanding) , that was previously recorded under other comprehensive income is transferred into profit or loss for the period.

In the case where only part of the financial asset qualifies for derecognition, the carrying amount of financial asset being transferred is allocated between the portions that to be derecognized and the portion that continued to be recognized according to their relative fair value. The difference between the amount of consideration received for the transfer and the accumulated amount of changes in fair value that was previously recorded in other comprehensive income for the asset partially qualified for derecognition (financial assets involved in transfer must qualify the following conditions:① the financial asset is held within a business model whose objective is not only for collecting contractual cash flows but also for sale; ; ②the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest based on the principal amount outstanding) and the above-mentioned allocated carrying amount is charged to profit or loss for the period.

Where the assets continue to be involved by providing financial guarantees for the transferred financial assets, the assets that continue to be involved in the same form are recognized at the lower of the carrying value of the financial assets and the amount of the financial guarantees.

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

Financial guarantee amount means the maximum amount of consideration received that will be required to be repaid.

(6) Distinguish between financial liability and equity instrument and accounting

Financial liability and equity instrument shall be distinguished in accordance with the following standards: ① if the group cannot unconditionally avoid paying cash or financial asset to fulfil a contractual obligation, the contractual obligation is qualified or financial liability. For certain financial instrument, although there are no clear terms and conditions to include obligation of paying cash or other financial liability, contractual obligation may indirectly be formed through other terms and conditions. ② the group's own equity instrument shall also be considered whether it is the substitute of cash, financial asset or it is the remaining equity, after the issuer deducts liability, enjoyed by the equity holder, if it must or can be used to settle a financial asset. If the former, the instrument is a financial liability of the issuer, otherwise it is an equity instrument of the issuer. In certain circumstances, financial instrument contract is classified as financial liability, if financial instrument contract specifies the Company must or can use its own equity to settle the financial instrument, the contractual amount of right or obligation equals to that of the numbers of own equity instrument available or to be paid multiplied by fair value when settling, nevertheless the amount is fixed, or varied partially or fully based on the its own equity's market price (such as interest rate, certain commodity's or financial instrument's price variance).

When classifying a financial instrument (or its component) in the consolidated statements, the group takes all terms and conditions agreed by the its member and instrument holder into consideration. If the group because of the instrument, as a whole, bears settlement obligation by paying cash, other financial asset or other means resulted in financial liability, the instrument shall be classified as financial liability.

(7) Derivative financial instrument

The group uses derivative financial instruments such as foreign exchange forward contracts, commodity forward contracts and interest rate swaps to hedge exchange rate risk, commodity price risk and interest rate risk respectively. Derivative financial instruments are initially measured at their fair value on the date the derivative transaction contract is signed, and are subsequently measured at their fair value. A derivative instrument with a positive fair value is recognized as an asset and a negative fair value is recognized as a liability.

Except hedging accounting, all gain or loss from the FV movement of derivative instrument shall be recognized in the income statement.

(8) Financial asset and financial liability offset

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

Financial asset and financial liability shall be presented in the balance sheet separately and cannot be offset, unless the following conditions are all met: ①the Company has the legal right to recognized offset amount and the right is enforceable. ②the Company plans to receive or a legal obligation to pay cash at net amount.

11. Inventories

Inventories are raw material, low-valuable consumable, goods on transit, working-in-progress, finished goods, and cost to fulfil the contract etc.

The inventories are processed on perpetual inventory system, and are measured at their actual cost on acquisition. Weighted average cost method is taken for measuring the inventory dispatched or used. Low value consumables and packaging materials is recognized in the income statement by one-off method.

At the balance sheet date, inventory is measured at the lower of cost and net realizable value. If the cost of the inventory is higher than its net realizable value, a provision is made for the decline in the price of the inventory and it is accounted in the current profit or loss. Net realizable value is the amount of the estimated selling price of inventory in daily activities less the estimated costs to be incurred at completion, estimated selling expenses and related taxes.

Impairment provision for the group's raw materials/goods in stock/WIP/ cost to fulfil the contract is made on an individual inventory item, and when determining its net realizable value, the inventory of goods in stock and materials used for sale are determined at the estimated selling price of the inventory less estimated selling expenses and related taxes; Inventory of materials held for use in production is determined at the estimated selling price of the finished goods produced less the estimated costs to be incurred up to completion, estimated selling expenses and

12. Contract asset and contract liability

(1) Contract asset

Contract asset is an entity's right to consideration in exchange for goods or services that the entity has transferred to a customer when that right is conditioned on something other than the passage of time. For example, the group sold two goods that can be clearly distinguished to the client, then the group has the right to consideration in exchange of the goods because one of the goods are delivered, but the consideration's collection is conditioned on the other goods delivery, in this case, the right to consideration shall be recognized as contract asset.

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

Expected credit loss recognition of contract asset is referred to the Note III、10 Provision for impairment of financial assets.

(2) Contract liability

An entity's obligation to transfer goods or services to a customer for which the entity has received consideration (or the amount is due) from the customer. If a customer pays consideration, or the group has a right to an amount of consideration that is unconditional before the group transfers a good or service to the customer, the group shall present the contract as a contract liability when the payment is made or the payment is due (whichever is earlier).

13. Assets relevant to contract cost

(1) Assets recognition methods in relation to contract cost

Assets relevant to contract cost in the group include cost to fulfill the contract and cost to obtain a contract. Cost to fulfill the contract is presented under inventory and other non-current assets. Cost to obtain a contract is presented under other current assets and other non-current assets.

If the costs incurred in fulfilling a contract with a customer are not within the scope of another Standard such as inventory , fixed assets or intangible assets , an entity shall recognize an asset from the costs incurred to fulfill a contract only if those costs meet all of the following criteria: the costs relate directly to a contract or to an anticipated contract, including direct labor, direct materials and overheads which is clearly stated to be borne by the client and any other cost in line with the contract; the costs enhance resources of the group that will be used in performance obligations in the future; and the costs are expected to be recovered.

An asset as the incremental costs of obtaining a contract with a customer shall be recognized if the group expects to recover those costs. The group may recognize the incremental costs of obtaining a contract as an expense when incurred if the amortization period of the asset t is one year or less. The incremental costs of obtaining a contract are those costs that the group incurs to obtain a contract with a customer that it would not have incurred if the contract had not been obtained (for example, a sales commission). Other expenses incurred in order to obtain a contract rather than the incremental cost, and expected to be recovered (regardless of whether the contract is obtained such as travelling expenses) shall be recognized as an expense when incurred, unless those costs are explicitly chargeable to the customer.

(2) Amortization of asset relevant to contract cost

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

An asset recognized in accordance with contract cost shall be amortized on a systematic basis that is consistent with the transfer to the customer of the goods or services to which the asset relates.

(3) Impairment of asset relevant to contract cost

If the carrying value of the group's assets related to the contract cost is higher than the following two differences, the group will make the impairment provision for the excessive part and recognize the asset impairment loss: ① The remaining consideration that the group is expected to obtain due to the transfer of the commodities related to the asset; ② Estimate the costs to be incurred for the transfer of the relevant goods

14. Long-term equity investment

Long term equity investments are the equity investment in subsidiary, in associated company and in joint venture.

(1) Judgement on control, joint control and significant influence

Equity investments in which the group has a significant impact on the investee are investments in associates.

Significant influence refers to having the power to participate in the decision-making of the financial and operational policies of the investee, but not being able to control or jointly control the formulation of these policies with other parties. Significant influence exists when the entity directly or indirectly owned 20% or more but less than 50% voting shares in the investee, unless there is explicit evidence that the company cannot participate in the production and operation decisions of the investee or have control over the investee.

When having less than 20% voting shares, the group's significant influence still exists if the followings are taken into accounts: representation on the board of directors or equivalent governing body of the investee, participation in financial or operating activities policy-making processes, material transactions between the investor and the investee, interchange of managerial personnel or provision of essential technical information etc.

The group's joint venture investment is an equity investment whereby the parties have jointly control over it and have rights to the net assets of the investee. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require the unanimous consent of the parties sharing control. The group's judgement on joint control is based on the joint arrangement that all participants or combinations of participants collectively control the arrangement and that decisions relating

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

to the activities of the arrangement must be made with the unanimous consent of those participants who collectively control the arrangement.

(2) Accounting

The group initially measures the long-term investment in line with the initial cost for acquiring the investment.

The initial investment cost for long-term equity investment acquired through business combination under common control, is the carrying amount presented in the consolidated financial statements of the share of net assets at the combination date in the acquired company. If the carrying amount of net assets at the combination date in the acquired company is negative, investment shall be recognized at zero.

If long-term equity investment is acquired through business combination not under common control, initial investment cost shall be the combination cost. If the equity investment of investee not under common control is acquired by stages and it's not a bundled transaction, the carrying amount of the equity investment held previously plus newly increased investment cost are taken as the initial investment cost.

Apart from the long-term equity investments acquired through business combination, the cost of investment for the long-term equity investments acquired by cash payment is the amount of cash paid, relevant direct expense, tax and other necessary expenses for the investment. For long-term equity investment acquired by issuing equity instruments, the cost of investment is the fair value of the equity instrument issued.

The Company adopts cost model for investment in subsidiary on separate financial statement. Under cost model, the long-term equity investment is measured at initial investment cost. When more investment is added, it shall increase the carrying amount of investment by adjusting the fair value of additional investment and relevant transaction expenses. Cash dividend or profit declared by investee shall be recognized as investment gain/loss for the period based on the proportion share in the investee.

The Company adopts equity method for investment in joint venture and affiliate. Under equity method, if the initial investment cost is greater than the share of fair value of the identifiable net assets in the investee, the initial investment cost of long-term equity investment is no need to be adjusted; If the initial investment cost is less than the share of fair value of the identifiable net assets in the investee, the difference shall be recorded into the current profit and loss, and the cost of long-term equity investment shall be adjusted at the same time.

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

Long-term equity investment subsequently, under equity method, shall be adjusted for its carrying amount according to the share of equity increase or decrease in the investee. The Company shall recognize its share of the investee's net gain or losses after the investee's net profit adjustment, based on the fair value of the investee's individual identifiable assets at the acquisition date, after making appropriate adjustments thereto in conformity with the accounting policies and accounting period, and offsetting the unrealized profit or loss from the inter-group transactions, not constituting the business, between the entity and its associates and joint ventures according to the shareholding attributable to the group (full amount of loss shall be recognized if the inter-group transaction is impairment loss). The group recognizes net losses incurred by investee to the extent that the carrying value of long-term equity investments and other long-term interests substantially constituting net investments in investee are written down to zero, except where the group is obliged to bear additional losses.

The difference between the book value of long-term equity investment and actual acquisition cost shall be recognized in the gain or loss of investment when the long-term equity investment is disposed of.

For long-term investments accounted under equity method, other comprehensive income recorded shall be accounted on the same basis as the investee directly disposing of related assets or liability when equity method is not used any longer. The movements of shareholder's equity, other than the net profit or loss, other comprehensive income and profit distribution previously recorded in the shareholder's equity of the Company are recycled to investment income for the period on disposal.

If the remaining equity after the partially disposal is still accounted for under the equity method, the relevant other comprehensive income previously recognized under the equity method, is treated on the same basis as the direct disposal of the relevant assets or liabilities by the investee and is carried forward on a proportional basis, and the owner's equity, which is apart from net profit and loss, other comprehensive income and profit distribution of the investee, shall be recognized and proportionally transfers to current investment income.

Where the entity has no longer joint control or significant influence in the investee company as a result of partially disposal of the investment, the remaining investment will be accounted for in line with the Recognition and Measurement of Financial Instruments Standard -No 22 of Accounting Standards for Business Enterprises(No7 Caikuai [2017]), and the difference between the fair value of remaining investment at the date of losing joint control or significant influence and its carrying amount shall be recognized in the profit or loss for the year.

Notes to financial statements**January 1, 2023 to December 31, 2023**

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

Where the entity has no longer control over the investee company as a result of partially disposal of the investment, the remaining investment will be changed to be accounted for using equity method providing remaining joint control or significant influence over the investee company. The difference between carrying amount of disposed investment and consideration received actually shall be recognized as investment gain or loss for the period, and investment shall be adjusted accordingly as if it was accounted for under equity model since acquisition. Where the entity has on longer joint control or significant influence in the investee as a result of disposal, the investment shall be accounted for in accordance with the Recognition and Measurement of Financial Instruments Standard -No 22 of Accounting Standards for Business Enterprises(No7 Caikuai [2017]), and difference between the carrying amount and disposal consideration shall be recognized as investment gain or loss for the period, and the difference between the fair value of remaining investment at the date of losing control and its carrying amount shall be recognized in the profit or loss for the year.

15. Investment property

Investment property is held to earn rentals or for capital appreciation or both and includes property, building and use right of land. They are measured at cost model.

Investment property is depreciated or amortized on straight line basis and its expected useful life, net residual value rate and annual depreciation rate is as follows:

Category	Useful life (years)	Estimated net residual value rate (%)	Annual depreciation rate
Use right of land	50	0	2
Property and Buildings	40	3/10	2.25-2.43

16. Fixed assets

Recognition criteria of fixed assets: defined as the tangible assets which are held for the purpose of producing goods, rendering services, leasing or for operation & management, and have more than one year of useful life.

Fixed assets shall be recognized when the economic benefit probably flows into the group and its cost can be measured reliably. Fixed assets include: building, machinery, transportation equipment, electronic equipment and others.

All fixed assets shall be depreciated unless the fixed assets had been fully depreciated and are still being used and land is separately measured. Straight-line depreciation method is adopted by the group. Estimated net residual value rate, useful life, depreciation rate as follows:

Notes to financial statements**January 1, 2023 to December 31, 2023**

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

No	Category	Useful life (years)	Estimated net residual value rate (%)	Annual depreciation rate (%)
1	Property and Buildings	20-40	3、5、10	2.25-4.85
2	Machinery equipment	5-22	0.5-1、3、5、10	4.09-19.90
3	Transportation equipment	5-12	1、3、5、10	7-33.33
4	Electronic equipment & others	3-15	0-1、3、5、10	6-33.33

The group should review the estimated useful life, estimated net residual value and depreciation method at the end of each year. If any change has occurred, it shall be regarded as a change in the accounting estimates.

17. Construction in progress

The cost of construction in progress is determined according to the actual construction expenditure, including the necessary construction expenditure incurred during the construction period, the capitalized borrowing cost and other related expenses before the construction reaches the condition expected for use.

Constructions in progress are transferred to fixed assets based on the construction budget and actual costs on the date when completing and achieving estimated usable status, and the fixed assets should be depreciated in the next month. Adjustment will be made upon confirmation of their actual values after implementing the completion and settlement procedures.

The construction in progress shall be transferred to fixed assets when it reaches the expected usable state, and the criteria are as follows:

Items	Criteria of transferring to FA
Property and Buildings	Earlier of actual starting of use and completion of inspection
Machinery equipment	Earlier of actual starting of use and completion of installation / inspection

18. Intangible asset

The group's intangible assets include use right of land, patents, non-patented technologies and others. They are measured at actual cost at acquisition day. For acquired assets, the actual cost is measured at actual price paid and relevant other expenses. Invested intangible asset shall be measured at actual cost as contracted or agreed value, however fair value will be taken if the contracted or agreed value is not fair.

(1) Useful life and the basis for recognition, estimation, amortization method or review procedure

Use right of land shall be amortized evenly within the amortization period since the remised

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

date. Patents, technologies and other intangible assets are amortized over the shortest of their estimated useful life, contractual beneficial period and useful life specified in the law. Amortization charge is included in the cost of assets or expenses, as appropriate, for the period according to the usage of the assets. At the end of the year, for definite life of intangible assets, their estimated useful life and amortization method shall be assessed. Any change shall be treated as change on accounting estimate.

(2) The scope and accounting of research and development

The group separates the expenditure on internal research and development projects into research phase expenditure and development phase expenditure. At research phase, expenditure are expenses directly relevant to research activity, including R&D employee's salary, materials, depreciation, technology cooperation cost and assessment testing fees. At development phase, expenses can be capitalized only when meeting the following conditions: (a)the technical feasibility of completing the intangible asset so that it will be available for use or sale.

(b)its intention to complete the intangible asset and use or sell it.

(c)how the intangible asset will generate probable future economic benefits. Among other things, the entity can demonstrate the existence of a market for the output of the intangible asset or the intangible asset itself or, if it is to be used internally, the usefulness of the intangible asset.

(d)the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset.

(e)its ability to measure reliably the expenditure attributable to the intangible asset during its development.

Any expenditure not qualifying for the above conditions shall be accounted into profit and loss account.

The projects expenditure will go to the development stage and start to be capitalized after meeting the above conditions, and passing the technical feasibility and economic feasibility studies, and being approved after evaluation.

19. Impairment of long-term assets

The group assesses whether there is any indication that long-term equity investment, investment property under cost model, fixed assets, construction in progress, right-of-use asset and intangible assets with definite useful life may be impaired. If there is any indication that an asset may be impaired, the asset will be tested for impairment. Goodwill and

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

intangible asset with infinite useful life and development cost not reaching available for use status, are tested for impairment annually no matter there is any indication of impairment or not.

(1) Non-current asset impairment excluding financial asset (except goodwill)

When testing the impairment, the group recognized the recoverable amount of an asset, which the higher of its fair value less costs to sell and the present value of the future cash flows expected to be derived from the asset. After impairment test, any difference of carrying amount over its recoverable amount shall be recognized as impairment loss.

The group estimates recoverable amount based on an individual asset. If it is not possible to estimate the recoverable amount of an individual asset, the recoverable amount is determined on the basis of the asset groups or asset portfolio to which the asset belongs. Asset portfolio is determined based on whether the major cash inflow generated by the asset group is independent from the cash inflow of other assets or the asset portfolio.

Net amount which FV less disposal cost is reference to the agreed sale price or observable market price for similar asset within the arm length transaction. When estimating the present value of future cash flows, management must estimate the expected future cash flows of the asset or group of assets and select an appropriate discount rate to determine the present value of future cash flows.

(2) Goodwill impairment

The group allocates the carrying value of the goodwill generated from the business combination to the relevant asset group or to the relevant asset group combination which is difficult to allocate to the relevant asset group, in a reasonable way from the date of purchase. When conducting impairment tests on goodwill contained within the related asset group or asset group combination, if there are signs of impairment in the asset group or asset group combination related to goodwill, the impairment test shall firstly be conducted on the asset group or asset group combination excluding goodwill, and the recoverable amount shall be calculated and compared with the relevant carrying value so to recognize the corresponding impairment loss; Then, an impairment test is conducted on the asset group or asset group combination containing goodwill to compare the carrying value with the recoverable amount. If the recoverable amount is lower than the carrying value, the impairment loss amount is first offset against the carrying value of goodwill allocated to the asset group or asset group combination, and then offset the carrying value of the asset group and asset group combination based on the proportion of the carrying value of other assets in the asset group or asset group combination without goodwill.

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

The methodology, parameters and assumptions of the goodwill impairment test are referred in Notes VI.19.

Once the impairment loss on the assets is recognized, it can not be reversed in a subsequent period.

20. Long-term prepaid expense

The group's long-term prepaid expense refers to landscape fees, renovation & decoration expenses and other expenses paid and should be allocated over 1 year. It will be amortized evenly within its beneficial period. The remaining unamortized expense should be charged into income statement if long-term prepaid expense can not bring the beneficial inflows. Landscape fees will be amortized for 10 years and renovation & decoration fees will be amortized for 5-10 years.

21. Employee benefits

Employee's benefit comprises short-term benefit, post-employment benefit, termination benefit and other long-term employee's benefit.

Short-term benefit includes salary, bonus, allowance, welfare, social insurance, housing funds, labor union expense, staff training expense, during the period in which the service rendered by the employees, the actually incurred short term employee benefits shall be recognized as liability and shall be recognized in P&L or related cost of assets based on benefit objective allocated from the service rendered by employees.

Post-employment benefits include the basic pension scheme and unemployment insurance etc. Based on the risk and obligation borne by the Company, post-employment benefits are classified into defined contribution plan and defined benefit plan. For defined contribution plan, liability shall be recognized based on the contributed amount made by the Company to separate entity at the balance sheet date in exchange of employee service for the period and it shall be recorded into current profit and loss account or relevant cost of assets in accordance with beneficial objective.

Other long-term employee's benefit refers to all other employee benefits other than short-term benefit, post-employment benefit and termination benefit.

22. Provision

When the Company has transactions such as commitment to externals, discounting the trade acceptance note, unsettled litigation or arbitration which meets the following criterion, provision should be recognized: It is the Company's present obligation; carrying out the obligation will probably cause the Company's economic benefit outflow; the obligation can

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

be reliably measured.

Provision is originally measured on the best estimate of outflow for paying off the present obligations. When determining the best estimate, need to consider the risk, uncertainty, time value of monetary relevant to contingent items. The group needs to review the present best estimate and accordingly adjust the carrying value of the provision account.

23. Revenue recognition and measurement

The group recognizes revenue when it has fulfilled its contractual performance obligations, i.e. when the customer has obtained control of the relevant goods or services. Control right of goods or services refers to the ability to direct the use of, and obtain substantially all of the remaining benefits from, the asset.

If the contract between the group and the customer meets the following five conditions at the same time, the group has fulfilled the performance obligation when the customer obtains the control of the relevant goods or services, and the revenue is recognized:

- 1) the parties to the contract have approved the contract and promised to fulfill their own obligations;
- 2) the contract specifies the rights and obligations of parties related to the transferred commodities;
- 3) the contract has explicit payment terms related to the transferred goods;
- 4) the contract has commercial substance, where the performance of the contract will change the company's future cash flow risk, time distribution or amount;
- 5) the consideration to which the company is entitled as a result of the transfer of goods to the customer is likely to be recovered.

When the group transfers control of a good or service over time, it satisfies a performance obligation and recognizes revenue over time only if one of the following criteria is met, otherwise it shall be the performance obligation at a point in time.

- 1) the customer simultaneously receives and consumes the benefits provided by the entity's performance as the entity performs
- 2) the group's performance creates or enhances an asset (for example, work in progress) that the customer controls as the asset is created or enhanced
- 3) the group's performance does not create an asset with an alternative use to the entity and the entity has an enforceable right to payment for performance completed to date

- (1) Revenue policy from sales

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

The group's revenue mainly includes income from sale of goods and installation of the whole set of refrigeration engineering project.

Based on the actual situation, the group recognizes the revenue as the followings:

- 1) Domestic sales: the sales contract with customers generally includes the performance of obligation of transferring goods. The group recognizes the revenue at the time when the arrival acceptance is completed by customers, having taken all followings into consideration: present debt collection right entitled to the sales of goods, the transfer of the main risks and rewards in the ownership of the goods, the transfer of the legal ownership entitled to the goods, the transfer of physical assets, the acceptance of goods by customers.
- 2) Export sales: the group will recognize the sales revenue after completing the customs declaration and export procedures.

Revenue from installation of the whole set of refrigeration engineering project. In the refrigeration installation contract between the group and the customer, since the equipment sales and installation services cannot be distinguished separately, the entire project contract is regarded as a single performance obligation, and the revenue of the single performance obligation is recognized at the completion of the customer acceptance. when a performance obligation over time is satisfied, revenue shall be recognized within the contract term according to the performance progress, which is determined by the percentage of the cumulative actual cost to expected total contract cost. When the performance progress can not be estimated reasonably, the group recognizes the revenue to the extent where the already incurred cost can be compensated until the performance progress can be decided.

(2) Determining and allocating the transaction price

If the contract includes two or more performance obligations, at the inception date of contract, the group shall allocate the transaction price to each performance obligation identified in the contract on a relative standalone selling price ratio basis and measure the revenue at the allocated transaction price to each performance. If any solid evidence indicates that contract discount is only relevant to one or some (not all) performance obligations, the discount shall be allocated into the one or these performance obligations.

An amount of consideration can vary because of cash discounts, price guarantee. The group determines the best estimate of the variable consideration in line with the expectation or the amount that most probably incurred, but includes, in the transaction price, the variable consideration not exceeding the amount that is highly unlikely to result in a material reversal of cumulative revenue recognized when the relevant uncertainty is eliminated.

The group accounts for consideration payable to a customer as a reduction of the transaction

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

price and, therefore, of revenue unless the payment to the customer is in exchange for a distinct good or service. Accordingly, the revenue shall be recognized at the later of the revenue recognition and the consideration paid to a customer.

For sales with a right of return, the group recognizes the revenue for the consideration expected to have the right to receive arising from transferring the goods to customers when the customer receives the control right over the relevant goods, and recognizes the expected refund amount as provision. At the same time, receivable of return cost, as an asset, shall be recognized for the carrying value of the returned goods when it is expected to be transferred less expected cost for getting it back (including decline in value) and net amount of the above asset cost shall be carried over to the cost. At every balance sheet date, the group will reassess the future sales returns and remeasure the above assets and liabilities.

Where a significant financing component exists in the contract, the transaction price shall be measured at the assumed price that the payment is made by cash when the client receives the control right of goods or services. The difference between the promised consideration and the determined transaction price shall be amortized within the contract period using effective interest rate, and it is the discounting rate at which the dominated price of the contract consideration is discounted to the cash price.

According to the agreement or the regulation etc., the group provide warranty for the goods sold and it is the quality assurance for promising the goods are in commodity with the agreed standards and shall be accounted for as Note III、 22 provision.

24. Government grants

Government grant shall be recognized only when all attached conditions are met and the grant is possibly received. Where a government grant is in the form of a transfer of monetary asset, it is measured at the amount received. Where a government grant is made on the basis of fixed amount or conclusive evidence indicates relevant conditions for financial support are met and expect to probably receive the fund, it is measured at the amount receivable. Where a government grant is in the form of a transfer of non-monetary asset, it is measured at fair value. If fair value cannot be determined reliably, it is measured at a nominal amount of RMB1 Yuan.

Assets-related government grant is the government fund obtained by the group for the purpose of long-term assets purchase and construction or establishment in the other forms. Income-related grants are the grant given by the government apart from the assets-related grants. If no grant objective indicated clearly in the government documents, the group shall judge it according to the principle mentioned above. If the grant is difficult to be separated, it

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

shall be considered as income-related grant as a whole.

Assets-related government grants are recognized as deferred income, which shall be evenly amortized to profit or loss over the useful life of the related asset. Any assets are sold, transferred, disposed of or impaired earlier than their useful life expired date, the remaining balance of deferred income which hasn't been allocated shall be carried forward to the income statement when the assets are disposed of.

Income-related government grants that is a compensation for related expenses or losses to be incurred in subsequent periods are recognized as deferred income and credited to the relevant period when the related expenses are incurred. Government grants relating to compensation for related expenses or losses already incurred are charged directly to the profit or loss for the period. Government grants related to daily business, shall be recognized as other income in accordance with business nature or offsetting related expenses, otherwise, shall be recognized as non-operating income or expenses.

25. Deferred tax assets and deferred tax liabilities

The deferred income tax assets or the deferred income tax liabilities should be recognized according to the differences (temporary difference) between the carrying amount of the assets or liabilities and its tax base and the difference between the carrying amount of tax base item and its tax base.

Deferred tax liability shall be recognized for all taxable temporary difference apart from the followings : (1) temporary differences arise from the initial recognition of goodwill or the initial recognition of assets or liabilities arising from non-business combinations that do not affect accounting profits or taxable income (or deductible losses); (2) The group is able to control the timing of the reversal of taxable temporary differences related to investments in subsidiaries, associates, and joint ventures, and such temporary differences are likely not to be reversed in the foreseeable future.

The group recognizes deferred income tax assets for deductible temporary differences, deductible losses, and tax deductions that are likely to be obtained to offset future taxable income, except for the following situations: (1) the initial recognition of assets or liabilities arising from non-business combination transactions where temporary differences do not affect accounting profits or taxable income (or deductible losses); (2) Deductible temporary differences related to investments in subsidiaries, associates, and joint ventures that cannot simultaneously meet the following conditions: temporary differences are likely to be reversed in the foreseeable future, and taxable income is likely to be obtained in the future to offset deductible temporary differences.

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

The group recognizes deferred income tax assets for all unused deductible losses to the extent that there is likely to be sufficient taxable income to offset the deductible losses. The management uses plenty of judgment to estimate the timing and amount of future taxable income, combined with tax planning strategies, to determine the amount of deferred income tax assets, which results in uncertainty.

On the balance sheet date, deferred income tax assets and deferred income tax liabilities are measured at the applicable tax rate during the expected period of asset recovery or liability settlement.

When the following conditions are met simultaneously, the group shall present the deferred income tax assets and deferred income tax liabilities at the net amount after offsetting: The group has the legal right to settle the current income tax assets and deferred income tax liabilities at the net amount; Deferred income tax assets and deferred income tax liabilities are related to the income tax levied by the same tax collection and management authority on the same taxpayer or on different taxpayers. However, in the future, within the term when each significant deferred income tax asset and deferred income tax liability to be reversed, the involved taxpayers intend to settle the current income tax assets and liabilities on a net basis or acquire assets and settle debts simultaneously.

26. Lease

(1) Lease identification

Lease: A contract, or part of a contract, that conveys the right to use an asset (the underlying asset) for a period of time in exchange for consideration.

At inception of a contract, the group shall assess whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an or many identified assets for a period of time in exchange for consideration.

For a contract that is, or contains several leases, the group shall separate the contract and account each lease separately. The group shall account for each lease component separately from non-lease components of the contract if the contract contains lease and non-lease components. Each leasing part is accounted for according to the leasing standards, while the non-leasing part is accounted for according to other applicable accounting standards. If the contract includes both leasing and non-leasing parts, the group, as the lessor, will split the leasing and non-leasing parts and conduct accounting treatment separately. Each leasing part will be accounted for according to the leasing standards, while the non-leasing part will be accounted for according to other applicable accounting standards. As the lessee, the group chooses not to separate the lease and non-lease, and joins each leased part and its non- leased

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

parts separately into a lease, accounting treatment shall be carried out in accordance with leasing standards; However, if the contract includes embedded derivative instruments that should be split, the group will not merge them with the leasing portion for accounting treatment.

(2) As a lessee

1) Recognition

At the commencement date, the group as a lessee shall recognize a right-of-use asset and a lease obligation except short-term lease and low value asset lease.

Right-of-use assets represents a lessee's right to use an underlying asset for the lease term, and is initially measured at cost.

The cost of the right-of-use asset shall comprise:

- ① the amount of the initial measurement of the lease liability,
- ② any lease payments made at or before the commencement date, less any lease incentives received, which is the incremental cost for the lease
- ③ any initial direct costs incurred by the lessee which is the incremental cost
- ④ an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease, unless those costs are incurred to produce inventories. Where the group remeasures the lease liability in accordance with the relevant provisions of the leasing standard, the carrying value of right-of-use asset is adjusted accordingly.

The group shall follow the following principles when determining the depreciation life of the right-of-use asset: if the ownership of the leased asset can be reasonably determined at the end of the lease term, depreciation shall be calculated and deducted during the remaining service life of the leased asset; Where it is not certain that the ownership of the leased asset can be acquired at the end of the lease term, depreciation shall be calculated at the shorter of the lease term and the remaining service life of the leased asset. The depreciation amount shall be accounted into cost of assets or profit and loss account.

At the commencement date, a lessee shall measure the lease liability at the present value of the lease payments that are not paid at that date.

The lease payments included in the measurement of the lease liability comprise the following payments for the right to use the underlying asset during the lease term that are not paid at the

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

commencement date: ① fixed payments (including in-substance fixed payments) less any lease incentives receivable;② variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;③ the exercise price of a purchase option if the lessee is reasonably certain to exercise that option; ④ payments of penalties for terminating the lease, if the lessee will certainly exercise an option to terminate the lease during the lease term;⑤ amounts expected to be payable by the lessee under residual value guarantees.

When calculating the present value of the lease payments, interest rate implicit in the lease shall be used. If the rate cannot be readily determined, the group shall use the lessee's incremental borrowing rate. Interest on the lease liability in each period during the lease term shall be calculated based on a constant periodic rate of interest, and be recognized as in profit or loss unless its capitalization.

After the lease commencement date, the group increases the carrying amount of lease liability when recognizing the interest on lease liability and; decreases the carrying amount of lease liability when making lease payment. The group remeasures the lease liability in accordance with the present value of revised lease payment, when the followings incur: ①change of in-substance fixed payments (subject to original discounting rate) ② change of amounts expected to be payable under residual value guarantees(subject to original discounting rate) ③ change of an index or a rate used for future lease payments(subject to revised discounting rate) ④ change in assessment of a buy option(subject to revised discounting rate) ⑤ change in assessment of a renew option or termination option or actual situation(subject to revised discounting rate).

2)Short-term lease and low value asset lease

The group has chosen not to recognize the right-of-use asset and lease liability for short-term lease (lease term less than 12 months) and low value asset (30,000 Yuan) when it is single leased new asset. In this case, lease payment will be accounted directly in profit or loss on the straight-line basis in profit or loss.

3)Sales and lease back

The group, as a seller and a lease within the sales and lease back transaction, assesses whether the transfer of the asset is a sale. If the transfer of assets is not a sale, the group shall continue to recognize the transferred assets and at the same time recognize a financial liability equal to the transfer income (Note VI. 34 lease). If the transfer of assets is a sale, the group shall measure the right-of-use asset arising from the leaseback at the proportion of the previous carrying amount of the asset that relates to the right of use retained by the group. Accordingly,

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

the group shall recognize only the amount of any gain or loss that relates to the rights transferred to the buyer-lessor.

(3) As a lessor

The group, as a lessor, classified it as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset unless an operating lease.

1) Financing lease

At the commencement date, the group shall recognize the lease payment receivable and derecognize of finance lease asset. When initially measuring the lease payment receivable, net lease investment value shall be used for the lease payment receivable.

Net lease investment value equals to the any residual value guarantees plus the PV of undue lease receivable discounted at the interest rate implicit in the lease. The group shall recognize interest income over the lease term based on a constant periodic rate. The variable lease payment obtained by the group related to operating leases, which are not included in the net lease investment, shall be accounted for in the current profit and loss when actually incurred

2) Operating lease

Lease payment received shall be recognized as lease income on a straight-line basis within the period.

The initial direct expenses incurred by the group in relation to operating leases are capitalized to the cost of leasing the underlying asset and are recognized in profit or loss by instalments over the lease period on the same basis as rental income. Variable lease payments made by the group in relation to operating leases that are not included in lease collections are recognized in profit or loss for the period when they are actually incurred.

The group shall account for a modification to an operating lease as a new lease from the effective date of the modification, considering any received in advance or lease payments receivable relating to the original lease as part of the lease payments receivable for the new lease

27. Fair value measurement

The group measures investment property, derivative financial instruments and equity instruments at fair value at each balance sheet date. Fair value refers to the price that market participants can receive by selling an asset or can pay for transferring a liability in an orderly transaction that takes place on the measurement date.

Assets and liabilities measured or disclosed at fair value in the financial statements are

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

determined to belong to the different fair value level based on the lowest level of input values that are significant to the fair value measurement as a whole: level 1 input is the unadjusted quoted price for identical asset or liability available at the active market on the measurement date; level 2 input is the directly or indirectly observable input for relevant asset or liability apart from level 1 input; level 3 input is the unobservable input for relevant asset or liability.

(For levels 1 and 2) For financial instruments traded in an active market, the group determines their fair value by their active market quotes; For financial instruments that are not traded in an active market, the group uses valuation techniques to determine their fair value, and the valuation model used is mainly the discounted cash flow model. The input of valuation techniques mainly includes: risk-free interest rate of debt, credit premium and liquidity premium; estimator coefficient. and liquidity discount of equity.

(For level 3) The fair value of level 3 is determined on the basis of the group's valuation models, such as the discounted cash flow model. The group also considers the initial transaction price, recent transactions of the same or similar financial instruments, or full third-party transactions of comparable financial instruments. As at 31 December 2023, level 3 financial assets measured at fair value are valued by using significant unobserved inputs such as discount rates, but their fair value is not materially sensitive to reasonable changes in these significant unobserved inputs.

The group uses the market approach to determine the fair value of unlisted equity investments. This requires the group to determine comparable listed companies, select market coefficient, estimate liquidity discounts, etc., and is therefore subject to uncertainty.

IV. Changes in Accounting Policies, Accounting Estimates

(1) Change in significant accounting policies

Changes on accounting policy and reasons	Memo
<p>Since January 1, 2023, the Company has implemented the provisions of the Interpretation of Accounting Standards for Business Enterprises No. 16 promulgated by the Ministry of Finance, "Accounting treatment of deferred income tax related to assets and liabilities arising from single transactions is not applicable to the initial recognition exemption". Individual transactions to which the provision applies that occur between the beginning of the earliest period of presentation of the financial statements in which the provision is first applied and the date of the first implementation are adjusted according to the provision. Taxable temporary differences and deductible temporary differences arise in respect of lease liabilities and use rights assets recognized at the beginning of the earliest period of presentation of the financial statements for which the provision is first applied, as well as in respect of anticipated liabilities related to the disposal obligation recognized and corresponding related assets. In accordance with this provision and the provisions of Accounting Standard for Business Enterprises No. 18 - Income Tax, the cumulative impact is adjusted to the opening retained earnings and other related financial statement items for the earliest period in which the financial statements are presented.</p>	

(2) Affected items and amount

33. Long-term borrowing

(1) Category of long-term borrowing

Category	Closing Balance	Opening Balance
Pledged loan	609,700,000.00	585,100,000.00
Guarantee loan	70,000,000.00	130,000,000.00
Total	679,700,000.00	715,100,000.00

Note 1: Pledged loan of 0.6 billion Yuan is for business combination in 2022, which comprises

0.3 billion Yuan from Dalian Zhoushuizi Branch of China Construction Bank Corporation, 5 years with 2.75% borrowing rate. 50% shareholdings of Sonyo Compressor (Dalian)Co., Ltd and 37.5% shareholdings of Sonyo Refrigeration System (Dalian) Co., Ltd. were pledged. China Construction Bank Corporation will complete the guarantee in February 2023. 0.3 billion Yuan from Dalian Branch of Bank of Communications Co., Ltd., 7 years with 2.75% borrowing rate. 50% shareholdings of Sonyo Compressor (Dalian)Co., Ltd and 37.5% shareholdings of Sonyo Refrigeration System (Dalian) Co., Ltd. were pledged. Dalian Branch of Bank of Communications Co., Ltd will complete the guarantee in February 2023. In 2024, 40 million Yuan loan is planned to pay back to Construction bank and 1.44 million Yuan loan to Communications bank.

Note 2: Pledged loan includes a new loan of 87 million Yuan in 2023 for acquisition of Sonyo Refrigeration System (Dalian) Co., Ltd. held by Panasonic Corporation of China Co., LTD and Sanyo Electric (China)Co., Ltd. The loan is expired by 7 years with 2.75% borrowing rate. Up to December 31, 2023, the closing balance is 79million Yuan and will be repaid 5 million Yuan in 2024.

Note 3: In year 2016, the Development Fund from China Development Bank gave support to the Company's intelligent and green equipment of cold chain and service industry base project and provided special fund to the Company's holding shareholder, Bingshan Group. The fund is 160 million Yuan with 10 year's expiration at 1.2% rate. Once the fund arrived, Bingshan Group gave it to the Company at the same rate of 1.2% in lump sum. The above fund needed to be warranted by the Company. The guarantee seems to be given for the holding shareholder, but it is for the Company itself in fact. Up to December 31, 2023, the closing balance is 130 million Yuan and will be repaid 60 million Yuan in 2024.

X. Risk Related to Financial Instruments

The main financial instruments held by the group are borrowings, accounts receivable, accounts payable, other non-current financial asset etc. The detailed explanation is referred to the note No.VI. The related risks of these financial instruments and the risk management policy conducted to reduce these risks by the group are introduced as below. The group management conducts to manage and monitor these risks exposure and control these risks under certain risk level.

1. Objectives and policies of each risk management

The objectives of risk management conducted by the Company are to reach the balance between risk and profit return by reducing the negative influence to operating performance to the minimum level as well as maximizing the shareholders' and other investors' profits. Based on these objectives, the basic risk management policy is to recognize and analyze all sorts of risk that the Company faced with, to set up the proper risk tolerance bottom line conducting risk management, as well as to monitor these risks in a timely and effective manner, and to ensure these risks under the limit level.

(1) Market risk

1) Exchange rate risk

Most of the Company's business is located in China, and settled with RMB. But the Company defined exchange rate risk of assets, liabilities dominated in foreign currency and future transaction dominated in foreign currency (mainly including USD, JPY, EURO, HKD and GBP). The financial department of the Company monitors the Company's foreign currency transaction and the scale of foreign assets and liabilities, and decreases exchange rate risk. During the current year the Company did not agree any forward foreign exchange contract or currency swap contract .As at 31st December 2023, the Company's assets and liabilities dominated in foreign currency are listed in RMB as following:

BINGSHAN REFRIGERATION & HEAT TRANSFER TECHNOLOGIES CO., LTD

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

Items	December 31, 2023	December 31, 2022
Monetary fund-USD	5,900,837.69	5,254,881.87
Monetary fund-JPY	5,352,282.10	1,367,327.65
Monetary fund- EURO	346,986.51	1,354,512.09
Monetary fund- HKD	84,495.39	-
Receivable -USD	50,158,313.38	40,859,881.78
Receivable -JPY	3,847,098.27	2,715,738.67
Receivable - EURO	5,426,571.06	7,467,708.34
Payables -USD	7,966,726.35	5,849,006.89
Payables -JPY	1,794,696.33	1,873,402.54
Payables - GBP	-	312,884.03

The group paid close attention to the effect on FX risk.

2) Interest rate risk

The interest risk of the group incurred from bank loan, risk of a floating interest rate of financial liabilities that lead to the group facing cash flow interest rate risk, financial liabilities with a fixed interest rate lead to the group facing cash flow interest rate risk. The company determined the proportion of fixed interest rate and floating interest rate according the current market circumstance. The group's interest-bearing debt is borrowings of RMB 799,000,000.00 at fixed interest rate as of December 31,2023(borrowings of RMB 740,000,000.00 in2022).

The financial department of the group continuously monitors the interest rates level, and the management would make some adjustment to lower the interest rate risk according to the latest market situation. Climbing interest rate will increase the cost of newly increased interest-bearing liability and interest expense for unsettled interest-bearing liability at floating rate and have adverse effect on the business performance.

The sensitive analysis:

As at 31st December 2023, based on the assumption of interest rate change of 50 BP, the group's net profit of current year will increase or decrease3.9955 million Yuan.

3) Price risk

The price risk of the Company is mainly commodity price risk. The Company sells products at market prices. As the national economy enters the "new normal", the manufacturing industry is under great economic downward pressure, and the drastic fluctuations of bulk material prices have a certain impact

Notes to financial statements

January 1, 2023 to December 31, 2023

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

on the group 's operations.

(2) Credit risk

The credit risk of the group comes from monetary fund, notes receivable, accounts receivable, and other accounts receivable etc. The management made credit policies and monitored changes of this credit exposure.

The group 's monetary fund was in bank with higher credit rating, so there was no significant credit risk, nor significant losses due to the default of other entity. Upper limit policy is adopted to avoid any credit risk from financial institution.

The group made relevant policy to control credit risk exposure from receivable, other receivable and notes receivable. The group assesses the client's credit background according to the client's financial performance, possibility of obtaining guarantee from the 3rd party, credit record and other factors such as current market. The group will periodically monitor the credit situation of the client and will take measures such as prompt letter, shorten credit period or cancel the credit to ensure the overall credit risk within the controllable scope.

As at 31st December 2023, the top five customers of receivable accounts balance are 240,544,632.79Yuan.

(3) Liquidity risk

Liquidity risk was referred to the risk of shortage of funds incurred when the enterprise fulfills the obligation of settlement by cash or other financial assets. The way to manage the liquidity risk is to ensure enough fund available to fulfill the liability by due date in prevention from unacceptable loss of or reputation damage to the group. The group periodically analyze the liability structure and expiry date and the financial department of the group continued to monitors the short term or long-term capital needs to ensure maintain plenty of cash flow. And the same time they also monitor the condition of bank loan agreements and obtain commitments from banks to reduce liquidity risks.

The fund mainly comes from bank loan. By December 31st, 2023, the credit limit still available is 618.30 million Yuan and short-term credit limit available is 618.30 million Yuan.

As at 31st December 2023, the group's financial assets and financial liabilities in line with non-discounted cash flow of the contracts as following:

BINGSHAN REFRIGERATION & HEAT TRANSFER TECHNOLOGIES CO., LTD

XI. Disclosure of Fair Value

1. Amount and measurement level of the assets and liabilities measured at fair value at the year end

Items	Fair value at the year end			
	1 st level measurement of FV	2 nd level measurement of FV	3 rd level measurement of FV	Total
Financial assets				
Continuously measured at FV	—	—	—	—
Receivable financing	-	303,585,218.53	-	303,585,218.53
Other non-current financial asset	162,340,919.04	-	1,683,852.59	164,024,771.63
Total	162,340,919.04	303,585,218.53	1,683,852.59	467,609,990.16

2. Basis for Market price of first level measurement of fair value

Equity instrument portion of the other noncurrent financial asset is measured at the unadjusted closing quoted price of Guotai Junan shares on stock market on December 29, 2023.

3. For continuous and discontinuous 2nd level of FV, valuation technique adopted and key parameter quantitative and qualitative information.

Bank acceptance notes (receivable financing) as measured at fair value through other comprehensive income is within this scope. Bank acceptance notes held by the group mainly are high credit grading from the large commercial bank. As the remaining maturity is short and credit risk is very low, on the balance sheet date, the book value of bank acceptance notes receivable is similar to fair value.

4. For continuous and discontinuous 3rd level of FV, valuation technique adopted and key parameter quantitative and qualitative information.

As of December 31, 2023, the book value of the share investment in Guotai Junan Investment Management Co.,Ltd and Wuhan Steel and Power Co.,Ltd is 1,683,852.59 Yuan. It is presented as other non-current financial asset in accordance with No.22- financial instrument recognition and measurement of Accounting Standards for Business Enterprises. Having

Notes to financial statements

(The currency is in RMB Yuan except otherwise indicated)

(English translation for reference only)

considered there is neither active market for invested company's share nor market price is available for reference, and it is not feasible to obtain the relevant observable input value. FV of the investment is measured at cost by taking influence factor of FV into consideration.

5. For continuous 3rd level of FV, adjusted information of opening and closing balance and sensitivity analysis of unobservable parameter.

No.

6. Assets continuously measured at fair value have switched among different level during the year.

No.

7. Changes of valuation technique and reasons for changes

No.

8. Assets and liability are disclosed at FV rather than measured at FV

No.

XII. Related Parties Relationship and Transactions

i. Related parties' relationship

1. Controlling shareholder and ultimate controller

(1) Controlling shareholder and ultimate controller

Parent company	Registered address	Business nature	Registered capital (10K)	Shareholding percentage (%)	Voting power percentage (%)
