

Fourth Quarter Activities Report

For period ending 31 December 2018

ASX: STO | ADR: SSLZY

24 January 2019

Record sales revenue and strong production

- Record quarterly sales revenue of \$1,043 million, up 7% and including record quarterly LNG sales revenue of \$449 million, up 11%
- Record annual sales revenue of \$3,696 million, up 19%
- Fourth quarter production up 6% to 15.9 mmbœ due to sustained strong performance from the core portfolio and acquisition of Quadrant Energy, partially offset by the sale of the non-core Asian assets

Onshore activity levels increasing within disciplined operating model

- A record 305 wells in GLNG drilled in 2018, up 77%. Expect to drill 350-400 wells in 2019
- 85 wells drilled in the Cooper Basin in 2018, up 40%. Expect to drill ~100 wells in 2019, including up to 16 exploration wells

Cooper Basin exploration and appraisal success

- The Cooper Basin exploration program resulted in five new field discoveries (four gas and one oil) and at Moomba South, four appraisal wells targeting a significant 2C resource have been brought on-line
- The Moomba South program also discovered new plays in the Granite Wash and Tirrawarra sandstone which are being assessed for further appraisal

Quadrant Energy acquisition completed on 27 November 2018

- On completion, Santos paid an amount of \$1.93 billion, comprising the purchase price of \$2.15 billion less completion adjustments and cash acquired

Cash generative core portfolio. Balance sheet supportive of growth profile

- As at 31 December 2018, Santos had cash and cash equivalents of \$1.3 billion and total debt of \$4.9 billion, resulting in net debt of \$3.6 billion and gearing of approximately 33%

Santos Managing Director and Chief Executive Officer Kevin Gallagher said: "In 2018, Santos delivered higher production in the onshore business and acquired Quadrant Energy which will provide a significant boost to our production in 2019."

"Our cash generative asset portfolio set new records for quarterly and annual sales revenues, notwithstanding the divestment of our non-core Asian assets during the year, while our low cost and disciplined operating model enabled more investment in exploration and appraisal to improve ongoing organic resource and reserve replacement."

"With the completion of the value accretive Quadrant Energy acquisition in November, we are now focused on integrating these low cost, long-life conventional assets and realising the \$30-50 million combination synergies per annum."

"I am pleased that Brett Darley, previously Quadrant's CEO, has joined Santos to lead our Australian offshore business."

"In 2019, we will focus on our disciplined growth portfolio, including PNG LNG expansion, Barossa backfill to Darwin LNG, appraisal of the exciting Dorado oil discovery and lifting the drilling activity to grow production and appraisal activity in our onshore business."

"Santos is positioned for growth across each of our five core assets and we are targeting production of more than 100 mmbœ by 2025, almost double 2018's level," Mr Gallagher said.

Comparative performance (Santos share including Quadrant Energy)¹

Santos share	Units	Q4 2018	Q3 2018	Change	2018	2017	Change
Production	mmbœ	15.9	15.0	6%	58.9	59.5	-1%
Sales volume	mmbœ	20.9	20.3	3%	79.2	83.4	-5%
Ave. realised oil price	\$/bbl	68.8	81.1	-15%	75.1	57.9	30%
Sales revenue	\$million	1,043	973	7%	3,696	3,107	19%
Capital expenditure ²	\$million	272	180	51%	759	682	11%

¹ Quadrant Energy included from completion of the acquisition on 27 November 2018.

² Capital expenditure including restoration expenditure and acquisition of exploration assets but excluding capitalised interest.

¹ Quadrant Energy included from completion of the acquisition on 27 November 2018.

Fourth quarter production was higher than the prior quarter due primarily to the completion of the of acquisition of Quadrant Energy on 27 November 2018, partially offset by completion of the sale of Santos' non-core Asian asset portfolio on 6 September 2018.

2018 Guidance (excluding Quadrant Energy)

Excluding the acquisition of Quadrant Energy, 2018 sales volumes of 77.2 mmboe were above the upper end of guidance (74-76 mmboe) and production of 57.1 mmboe was within guidance (56-58 mmboe). Upstream production costs of approximately \$8.00/boe were at the lower end of guidance (\$8.0-8.6/boe) and capital expenditure of \$732 million was toward the lower end of guidance (\$725-775 million).

Updated 2018 guidance shown in the table below excludes the acquisition of Quadrant Energy.

2018 Guidance Item	Previous guidance (excluding Quadrant)	Updated guidance (excluding Quadrant)
Sales volumes	74-76 mmboe	77.2 mmboe
Production	56-58 mmboe	57.1 mmboe
Upstream production costs	\$8.0-8.6/boe	~\$8/boe
Depreciation, depletion and amortisation (DD&A)	\$650-700 million	No change
Capital expenditure	\$725-775 million	\$732 million

Further detail of 2018 capital expenditure, including exploration and evaluation expenditure, is reported in the table on page 11 of this report.

Guidance on 2018 financial outcomes above is preliminary and subject to finalisation of the company's accounting and audit processes, and Board review. As such, actual results for the year ended 31 December 2018 may differ from the guidance given in this update.

Santos will announce its results for the year ended 31 December 2018 on 21 February 2019. The full-year report (incorporating Appendix 4E) and associated investor briefing presentation will be available on Santos' website at www.santos.com. A live webcast briefing, including analyst/investor questions, will be available on Santos' website from 11:00am AEDT on 21 February 2019.

2019 Guidance

Santos expects 2019 sales volumes to be in the range of 88-98 mmboe and production to be in the range of 71-78 mmboe. Further 2019 guidance will be provided at Santos' 2018 full-year results on 21 February 2019.

The 2019 first quarter activities report will be released on Wednesday 17 April 2019.

2019 Annual General Meeting

The 2019 Annual General Meeting will be held on Thursday 2 May 2019 at the Adelaide Oval commencing at 10:00am ACST.

Oil price hedging

3.2 million barrels of oil hedging expired in the fourth quarter under the zero-cost three way collar hedges.

As a result of the Quadrant acquisition, 1.4 million barrels of 2019 oil hedges were novated to Santos. The following oil price hedging positions were in place as at 14 January 2019.

2019 Open oil price positions	2019
Swaps (barrels)	990,000
Brent fixed swap price (\$/bbl)	US\$63.23
Re-participating swaps (barrels) ¹	480,000
Brent fixed swap price (\$/bbl)	US\$67.39
Brent long call price (\$/bbl)	US\$76.00
Zero-cost collars (barrels) ²	3,431,000
Ceiling (\$/bbl)	US\$79.27
Floor (\$/bbl)	US\$45.00

¹ When Brent price is below the weighted average long call price, Santos realises fixed swap price. When Brent price is above the call strike price, Santos realises Brent price less the difference between the long call price and the fixed swap price.

² When Brent price is above the weighted average ceiling price, Santos realises ceiling price. When Brent price is between the floor and ceiling price, Santos realises Brent price. When Brent price is below the floor price, Santos realises floor price.

Capital expenditure	\$million	80	57	61	245	199

2018 Cooper Basin production was up 8% year-on-year to 15.5 mmboe, demonstrating the success in arresting production decline and returning the asset to growth.

With four rigs in operation in the fourth quarter, 26 wells were drilled comprising seven exploration wells, twelve appraisal wells and seven development wells. A record spud to oil on-line time of 28 days was achieved with Cooroo North West 2 as the onshore business continues to set new operating limits to efficiently commercialise the vast discovered resource that remains undeveloped. A total of 85 wells were drilled in 2018 and Santos expects to drill ~100 wells in 2019.

The eight well Moomba South appraisal program continued during the quarter with four wells successfully brought on-line at the end of the quarter and two new plays discovered. A summary of exploration and appraisal activity is included on page 12 of this report.

Also during the quarter, Santos announced a project to convert beam pumps on oil wells to solar and batteries at 56 sites. The solar beam pump will reduce emissions and waste from oil production, saving 140 barrels of oil per day which is required to fuel the pumps and instead will be sold for beneficial use. The A\$16 million project will be partially funded by a grant of A\$4.2 million from the Australian Renewable Energy Agency (ARENA).

In January, Santos announced it had executed binding agreement extensions with Beach Energy and Senex Energy for gas processing and related gas liquids purchases at the Moomba gas facilities. The gas processing agreement extensions are expected to result in the production of up to 18 TJ of sales gas per day, or 20 PJ over the three year term.

Sales gas to LNG plant						
GLNG equity gas	PJ	36	37	29	143	124
Santos portfolio gas	PJ	15	15	15	59	62
Third-party	PJ	26	19	44	94	120
Total sales gas to LNG plant	PJ	77	71	88	297	306
LNG cargoes shipped		20	20	26	80	89

¹ Includes LNG produced from GLNG equity gas, Santos portfolio gas and third-party quantities.

Annual LNG production was lower than the prior year primarily due to the GLNG joint venture partners diverting about 40 PJ of gas to the domestic market. The diverted gas, originally slated for export cargoes and equivalent to ~0.7 million tonnes of LNG, was sold to east coast domestic customers. When combined with 4.8 million tonnes of LNG exported, annual LNG-equivalent production was ~5.5 million tonnes.

Gross GLNG-operated upstream sales gas production increased to 585 TJ/d at the end of the quarter, supported by growth in Scotia production and continued steady incline in Roma.

Gross daily production from Fairview increased to 431 TJ/day at the end of the quarter. Focus continues to be on improving well availability. Gross daily production from Roma increased to 82 TJ/day at the end of the quarter. Field production is expected to continue building as new development areas come online. Drilling continues in the Roma East project with 121 wells drilled to date. 80 wells are now on flare with early dewatering continuing.

Gross daily production from the Scotia field grew to 63 TJ/d at the end of the quarter. Production from the field continues to grow as the reservoir de-pressures. Production from the Arcadia field remained steady. Drilling continues in the Arcadia Valley project with 39 wells drilled to date. First production from this next phase of development is expected in late 2019.

Santos' share of production from the non-operated Combabula and Spring Gully fields was 42 TJ/day.

92 wells were drilled across the GLNG acreage in the fourth quarter with a record number of wells drilled (305) and connected (300) in 2018. In 2019, 350-400 wells are expected to be drilled.

58 development wells were drilled across Santos' non-operated Eastern Queensland acreage in the quarter.

Also during the quarter, Santos as operator was appointed preferred tenderer to explore new acreage in a 50-50 joint venture with Shell. The PLR201718-2-5 licence covers approximately 400 square kilometres, 19 kilometres east of the town of Surat and was released by the Queensland Government exclusively to boost domestic gas supply on the east coast.

¹ Measured at the Kutubu entry point.

² Purchased by PNG LNG.

Continued strong performance from PNG LNG during the quarter saw sales volumes and production in-line with the prior quarter. The LNG plant operated at an annualised rate of 8.7 mtpa during the fourth quarter and achieved daily rates in excess of 9 mtpa annualised. Annual production in 2018 was however lower than the prior year primarily due to the impact of a severe earthquake in the first half.

PNG LNG expansion opportunities continue to be progressed with a proposal for Santos to farm-in to PRL 3 (P'nyang) under negotiation.

Santos along with the other PNG LNG parties and the Papua LNG Joint Venture are also continuing discussions to build alignment for the proposed construction of three additional LNG trains at the PNG LNG site, with two trains to process gas from the Papua LNG project and one train for the proposed PNG LNG expansion.

LNG cargoes shipped		16	14	14	54	51

Darwin LNG sales volumes and production were consistent with prior quarter, in-line with the delivery schedule.

Santos announced on 3 December 2018 that the 3-well Bayu Undan infill program was delivered 40% under budget and the final well brought on-line during the quarter, over three months ahead of schedule. The program's success has resulted in delivery of higher liquids production and increased offshore well capacity. As a result, condensate and LPG production were significantly higher than the previous quarter.

Following FEED entry in April 2018, detailed engineering design for the Barossa development is being advanced across a number of fronts with a final investment decision targeted towards the end of 2019. Bids for the Subsea Production System have been evaluated and contract award is expected in the first quarter of 2019. The FPSO design competition between Modec and the TechnipFMC/Samsung consortium is progressing well.

The successful development of Barossa would extend the operating life of Darwin LNG for more than 20 years and deliver ~9 mmboe average annual net production to Santos.

Western Australia¹ (excluding Quadrant Energy acquisition)

Santos share	Units	Q4 2018	Q3 2018	Q4 2017	2018	2017
Sales volume

Capital expenditure	\$million	38	11	22	66	79

¹ Includes Western Australia oil assets. The comparative periods have been restated accordingly. Excludes Quadrant Energy.

Sales gas sales volumes and production were higher than the prior quarter primarily due to higher customer nominations.

Quadrant Energy (27 November to 31 December 2018)

Santos share	Units	Q4 2018 ¹
Sales volume		
Sales gas	PJ	7.6
Condensate	000 bbls	106.8
Crude oil	000 bbls	570.9
Total sales volume	mmboe	2.0
Total sales revenue	\$million	80
Production

Crude oil	000 bbls	254.1
Total production	mmboe	1.8
Capital expenditure	\$million	27

¹ 27 November to 31 December 2018

On 27 November 2018, Santos announced the completion of the acquisition of Quadrant Energy. On completion Santos paid an amount of \$1.93 billion, comprising the purchase price of \$2.15 billion less completion adjustments and cash acquired. The completion amount was fully funded from Santos' existing cash resources and \$1.2 billion of new debt facilities.

2018 full-year production from the Quadrant Energy assets was approximately 18 mmboe.

During the fourth quarter, the Van Gogh infill project saw the drilling and completion of two subsea wells and connection into existing offshore infrastructure. The wells were brought online in January 2019.

Asia¹

Capital expenditure	\$million	1	3	17	8	34

¹As at 1 January 2018, the 'Other' reporting segment was restructured to comprise Santos' Asian assets only. New South Wales entered the core portfolio and is now reported under the segment 'Queensland and NSW' and WA Oil is now reported under the segment 'Western Australia'. The comparative periods have been restated accordingly.

Santos announced the completion of the sale of its producing Asian assets on 7 September 2018.

Santos completed the sale of its exploration assets in Malaysia during the fourth quarter. Completion for certain exploration assets in Vietnam and Bangladesh remains subject to customary consents and regulatory approvals.

Santos has agreed to sell its 50% interest in the Northwest Natuna Production Sharing Contract in Indonesia, which contains the undeveloped Ande Ande Lumut oil field, to AWE Holdings Singapore Pte Ltd (an entity held by Mitsui). Completion of the sale is subject to customary consents and regulatory approvals and is expected in the coming months.

Corporate, exploration and eliminations

Santos share	Units	Q4 2018	Q3 2018	Q4 2017	2018	2017
Total sales volume	mmboe	0.8	1.2	2.3	4.6	6.6
Total sales revenue	\$million	58	37	92	219	287
Capital expenditure	\$million	35	6	15	64	85

Sales volumes and revenues in the corporate segment primarily represents gas trading activities.

Fourth quarter capital expenditure included \$18 million for seismic acquisition and \$14 million for exploration and evaluation activities, primarily in the NT, not recorded against core assets.

Capital expenditure (including Quadrant Energy)

Total exploration, evaluation and development expenditure, including Quadrant Energy from 27 November 2018, is summarised in the table below.

\$million	Q4 2018	Q3 2018	Q4 2017	2018	2017
Capital expenditure

¹ Includes acquisition of exploration assets

Exploration and appraisal activity

Cooper Basin

During the quarter, seven near field exploration wells and 12 appraisal wells were drilled, with a further appraisal well drilling ahead at year end.

The exploration program resulted in five new field discoveries (four gas and one oil).

Six of eight planned Moomba South appraisal wells had been completed to the end of December. Four wells were fracture stimulated and brought online by the end of the quarter, and a further well has been cased and suspended and awaits fracture stimulation and testing. Two wells remain to be drilled in the current campaign. The program seeks to delineate and establish initial FEED input to the potential development of a large unexploited gas contingent resource in the Patchawarra reservoirs on the southern flanks of the Moomba high. Secondary exploration targets include the Granite Wash and Tirrawarra sandstones. An update on the outcome of the appraisal will be made following the program completion.

Elsewhere in the Cooper, seven appraisal wells (four gas and three oil) were drilled resulting in six being cased and suspended for future production.

Eastern Queensland

In the Mahalo JV (ATP 1191), five appraisal wells were drilled, cased and suspended – the Straun Pilot (Straun-2 vertical corehole, Straun-3 lateral), the Sirius Road pilot (Sirius Road-1 vertical corehole, Sirius Road 2 lateral) and the Memooloo corehole. These wells are designed to convert significant remaining contingent and prospective resource potential to reserves category. All wells are on-line and flowing water at encouraging initial rates.

ATP2040, a 393km² block in the Bowen Basin was granted to Santos (50% and operator). Exploration will target Early Permian sandstones and commence on 1 January 2019 for a six year term.

Western Australia

During the quarter, preparations continued for a multi-well Santos-operated drilling program that will commence in March 2019 with Corvus-2 in the Dampier Sub-basin, before moving to the Bedout Basin to drill the Dorado-2 and Dorado-3 wells, appraising the 2018 Dorado-1 oil and gas discovery. In addition, the Roc South-1 near field exploration well will test an oil and gas prospect analogous and adjacent to the Dorado field.

Planning for the 3,326km² Keraudren 3D dual purpose (exploration delineation and Dorado development preparation) seismic survey in the Bedout Sub-basin progressed, with acquisition anticipated to commence in March 2019.

Northern Australia

In the McArthur Basin two water monitoring bores were installed during the quarter and monitoring commenced to support applications for multi-well exploration activity in 2019.

In the Amadeus Basin final approvals and agreements were progressed to support the drilling of the planned 2019 Dukas 1 wildcat well. Dukas will test the gas-bearing potential of a large pre-salt prospect in the southern Amadeus basin.

In the offshore Bonaparte Basin, processing of the Beehive 3D seismic survey has commenced.

PNG

The Muruk-2 appraisal well spudded 10 November. At 31 December the well had reached a depth of 3,127m MD. The primary target Toro Sandstone, is prognosed to be 350-400m below current depth at the end of the quarter.

Seismic activity

No new seismic acquisitions were undertaken in the fourth quarter of 2018.
