Applicable Inapplicable

6. Financial Highlight

Whether the Company needs to make retroactive adjustment or restatement of financial data of previous years

Yes No

	2018	2017	Increase/decrease	2016
Turnover (yuan)	3,048,680,152.06	2,947,470,813.58	3.43%	4,203,866,173.72
Net profit attributable to shareholders of the listed company (yuan)	2,246,164,571.68	1,144,404,441.03	96.27%	697,956,378.23
Net profit attributable to the shareholders of the listed company and after deducting of non-recurring gain/loss (RMB)	21,171,063.10	366,212,412.32	-94.22%	623,075,474.92
Net cash flow generated by business operation (RMB)	387,102,719.57	557,833,145.73	-30.61%	465,717,074.92
Basic earnings per share (yuan/share)	1.91	0.97	96.91%	0.6

Diluted Earnings per share (yuan/share)	1.91	0.97	96.91%	0.6
Weighted average net income/asset ratio	53.17%	41.53%	11.64%	38.83%
	End of 2018	End of 2017	Increase/decrease from the end of last year	End of 2016
Total asset (RMB)	10,658,854,133.73	7,625,422,688.63	39.78%	6,787,051,278.08
Net profit attributable to the shareholders of the listed company (RMB)	5,195,187,621.88	3,238,939,202.18	60.40%	2,364,262,560.28

Note: The Company's main industrial curtain wall system and materials industry realized operating income of RMB2.011 billion this year, an increase of 21.59% over the previous year; the gross profit margin for the year was 14.41%, an increase of 3.38% over the previous year; and the net profit after deducting non-recurring gains and losses was RMB97,998,900, an increase of 1,123% over the previous year.

7. Differences in accounting data under domestic and foreign accounting standards

1. Differences in net profits and assets in financial statements disclosed according to the international and Chinese account standards

Applicable Inapplicable

There is no difference in net profits and assets in financial statements disclosed according to the international and Chinese account standards during the report period.

2. Differences in net profits and assets in financial statements disclosed according to the overseas and Chinese account standards

Applicable Inapplicable

There is no difference in net profits and assets in financial statements disclosed according to the international and Chinese account standards during the report period.

8. Financial highlights by quarters

In RMB

	Q1	Q2	Q3	Q4
Turnover	650,032,997.33	792,017,899.20	793,250,321.93	813,378,933.60
Net profit attributable to the shareholders of the listed company	98,377,550.44	131,754,112.75	91,338,344.89	1,924,694,563.60
Net profit attributable to the shareholders of the listed company and after deducting of	88,737,051.63	120,968,066.71	85,861,046.88	-274,395,102.12

non-recurring gain/loss				
Cash flow generated by business operations, net	-40,623,633.07	9,197,365.43	144,038,826.38	274,490,160.83

Where there is difference between the above-mentioned financial data or sum and related financial data in quarter report and interim report disclosed by the Company

Yes No

9. Accidental gain/loss item and amount

Applicable Inapplicable

In RMB

Item	2018	2017	2016	Notes
Non-current asset disposal gain/loss (including the write-off part for which assets impairment provision is made)	-5,080,792.02	89,483,320.53	-3,080,469.74	
Subsidies accounted into the current income account (except the government subsidy closely related to the enterprise's business and based on unified national standard quota)	5,931,937.15	5,637,910.24	7,571,963.67	
Capital using expense charged to non-financial enterprises and accounted into the current income account	922,330.10			
Gain from entrusted investment or assets management	27,065,331.33	20,455,865.70	1,401,717.08	
Gain/loss from debt reorganization		-3,674,141.05	-2,445,254.63	
Gain/loss from change of fair value of transactional financial asset and liabilities, and investment gains from disposal of transactional financial assets and liabilities and sellable financial assets, other than valid period value instruments related to the Company's common businesses	-1,192,774.07	2,013,922.62	2,369,839.47

Other non-business income and expenditures other than the above	1,675,521.71	4,054,553.86	5,857,845.48	
Other gain/loss items satisfying the definition of non-recurring gain/loss account			58,154,670.60	

Less: Influenced amount of income tax	720,926,531.10	220,906,068.58	6,168,477.85	
Influenced amount of minority shareholders' equity (after-tax)		8,581,417.95	339,234.87	
Total	2,224,993,508.58	778,192,028.71	74,880,903.31	--

Explanation statement should be made for accidental gain/loss items defined and accidental gain/loss items defined as regular gain/loss items according to the Explanation Announcement of Information Disclosure No. 1 - Non-recurring gain/loss mentioned.

Applicable Inapplicable

No circumstance that should be defined as recurrent profit and loss according to *Explanation Announcement of Information Disclosure No. 1 - Non-recurring gain/loss* occurs in the report period.

Chapter III Business Introduction

1. Major businesses of the Company during the report period

Whether the Company needs to comply with disclosure requirements of special industries

Yes

Property development and decoration industries

The Company must comply with disclosure requirements of the Shenzhen Stock Exchange Industry Information Disclosure Guideline No.6 – Listed Companies Engaged in Decoration Business.

The Company is headquartered in Nanshan District of Shenzhen and became listed in Shenzhen Stock Exchange on November 29, 1995. Currently, five major business subsidiaries of the Company are national high-tech enterprises with large modern production bases in Shenzhen, Shanghai, Chengdu, Nanchang, Dongguan and Foshan. The Company was engaged in the following businesses in the report period.

1. High-end curtain wall system and material business

(1) Main products and purposes

The Company's main products include energy-saving curtain walls, photo-electricity curtain walls, LED color-display curtain walls and aluminum plate materials. Construction curtain walls are mainly used on high-level buildings, large-area public venues such as airports, stations, cultural centers and exhibition centers, daylighting roof, shaped construction (ball-shaped and clock-shaped buildings) with external retaining and decoration functions.

(2) Main business modes, specific risks and changes;

The projects implemented by the Company are mainly through the bidding method to obtain contract orders. Project design, material procurement, production and processing, and the construction and installation and after-sales service model are based on the contract orders. The main risk of this mode is that it takes a long period of time from the completion of the order to the completion of the project, and it is highly dependent on raw materials and labor costs. It is greatly affected by the national industrial policy, raw material prices, and labor market fluctuations. Different contract orders have different requirements, imposing high requirements on production management. The Company's curtain wall products are engineered by itself. The operation mode remained unchanged in the report period.

(3) Main business drive

See 3. Core competitiveness analysis in this chapter.

(4) Development stage of the industry, circle and industry position

The construction of office buildings and urban complexes in first- and second-tier cities in China has maintained a relatively stable rhythm and volume. The use of building curtain walls in high-end residential and apartment buildings has increased. Building curtain walls remain the most common design element for public buildings such as airports, stations, cultural stadiums, schools and hospitals. The curtain wall industry is mature, the scale is stable and there is no obvious periodicity.

With the Belt and Road Initiative, Guangdong-Hong Kong-Macao Bay District and the construction of Xiong'an New District as a major national strategy, it has provided a broader and better development opportunity for the energy-saving curtain wall and materials business. The Company is a pioneer and first listed company in this industry. Over the past more than 20 years, the Company has undertaken hundreds of large projects and received the highest award in the industry China Construction Luban Award and Zhan Tianyou Civil Engineering Award for many times. The Company has also received nearly 100 provincial and above awards. The Company has been in the top 10 of "China's top 100 building curtain wall industry" for many years, and has already had strong brand advantages and competitiveness in the industry. The Company has a strong technology lead in the industry with 437 patents,

including 36 intention patents and two software copyrights. The Company also took part in the preparation of 22 national or industry standards including the Public Construction Energy Saving Design Standard, making 9 records among Chinese enterprises. The Company has a Class A qualification for building curtain wall engineering contracting and class A qualification for building curtain wall engineering design. It is the highest level for curtain wall design and construction companies in China.

(5) Macroeconomic situation of the industry, the impact of changes in the industrial policy environment on the Company, and the countermeasures taken by the Company

In 2018, the supply-side reform continued to deepen and industry development opportunities and challenges coexisted. With the continuous strengthening of the national environmental protection policy and the fluctuation of the price of international energy and metal materials, the price of most of the building materials is rising, which brings big challenge to the curtain wall industry. However, the comprehensive promotion of the construction of the Guangdong, Hong Kong, and Macau Bay Area and the Xiong'an New District has also brought many opportunities to the industry.

In 2018, the Company will continue to steadily and securely operate traditional high-quality markets such as Guangdong-Hong Kong-Macao Bay District, Yangtze River Delta, Beijing-Tianjin-Hebei and Chengdu-Chongqing areas and promote overseas markets step by step. The Company will establish a long-term development mechanism for the team, continue to enhance brand image, focus on key customers and enrich quality, and establish strategic alliances with outstanding companies. The Company will accelerate the construction of the Chengdu Xinjin production base and the Shanghai Songjiang production base and create conditions for the Company to increase production, increase revenue and continue to develop rapidly.

(6) Quality control system, implementation standards, control measures and overall evaluation

Quality control system: The Company implements a comprehensive quality management system and has established a quality management system in accordance with ISO9001 from the aspects of design, procurement, storage, production, testing, delivery, installation, and after-sales service, and conduct regular reviews.

Implementation of the standard: In the process of building curtain wall business, the Company strictly complies with GB/T21086-2007 "Building Curtain Wall", JG/T231-2007 "Building Glass Lighting Roof" and other national and industrial standards.

Control measures: The Company has established complete and effective quality control measures and quality management bodies, and strictly implements various quality management and control measures.

Overall evaluation: The Company's products and project quality are in full compliance with the relevant requirements of the relevant national standards and standards, and maintain proper operation, providing customers with stable and reliable quality products and engineering.

(7) Major project quality problem during the reporting period

None.

2. Rail transport equipment business

The Company's main products in this sector are rail transport screen door systems, which are a necessary part of modern subway system. It is installed at the edge of the subway platform and separates trains from the platform. The Company seeks to win orders through tenders and purchase raw materials and arrange production based on orders. The Company has built a complete industry chain that integrates designing, production, engineering and after-sales services. The operation mode remained unchanged in the report period. The Company has developed rail transport screen door systems with independent intellectual property rights. The Company also prepared the first Rail Transport Station Screen Door Standard. The Fangda metro screen door system which is at the international advanced level has been applied in subways in 37 cities around the world. More than 10 million people use the large subway screen door system every day. The Fangda screen door system has grasped a leading market share and established incomparable brand influence thanks to its patents, standard and maintenance services. According to the China Urban Rail Association, the market share of Fangda's screen door system ranks first in the world for nearly five years.

3. New energy industry: Solar PV power generation industry is largely supported by the Chinese government. The Company

is one of the first companies that possess intellectual property rights in the designing, production and integration of solar PV systems. In 2018, photovoltaic power stations in Xuanfeng Town, Pingxiang Town, Jiangxi Province, and photovoltaic power stations in the parks of Jiangxi Isuzu Automobile Co., Ltd. in Nanchang City and Dongguan Songshan Lake Photovoltaic Power Plant all operated steadily with a total power generation capacity of 20,737,000 kilowatt hours, meeting the designed power generation efficiency. The sales income reached RMB 20,475,500 and operating profit of RMB 11,009,000. In the future, it will still bring long-term, stable income and profits to the Company.

4. Real estate

The Company has basically completed one of the projects: Fangda Town ("Fangda Plaza", the same below) project in Nanshan District, Shenzhen; one project under development Nanchang HonggutanFenghuangzhouFangda Center Project; there are two projects in construction: FangdaBangshen Project in Baoan District, Shenzhen and Urban Renewal Project along the Dagang River in Henggang, Shenzhen.

For a detailed discussion of the Company's business, please refer to "III. Analysis of Core Competencies" in this section of the report and Chapter VI "Operation Discussion and Analysis".

II. Major assets change

1. Major assets change

Main assets	Major change
Equity assets	Long-term equity investment increased by 105.34% year-on-year mainly due to the payment of joint venture investment in the current period.
Fixed assets	No significant change
Intangible assets	Intangible assets increased by 36.43% year-on-year mainly due to the increase of land use rights of Shanghai Songjiang Base in the current period.
Project in progress	Construction in progress increased by 2083.85% year-on-year mainly due to the company's self-use office in the renovation of real estate.
Investment real estate	Investment real estate increased by 133.23% year-on-year mainly because the 1# building of Fangda Plaza project was converted into investment real estate and subsequent value added by fair value measurement

2. Major foreign assets

Applicable Inapplicable

3 Core Competitiveness Analysis

Whether the Company needs to comply with disclosure requirements of special industries

Yes

Property development and decoration industries

The Company must comply with disclosure requirements of the Shenzhen Stock Exchange Industry Information Disclosure Guideline No.6 – Listed Companies Engaged in Decoration Business.

(1) Curtain wall system and material

1. Expertise and brand competitiveness

The industry and target market of the Company have high requirements for the performance of participating enterprises which has formed certain thresholds. Especially in the super high-rise buildings, large public buildings and special-shaped external maintenance structures, the company has rich experience in project implementation. It has established business contacts and cooperation with many large real estate development companies. The Company has a high reputation and strong market competitiveness.

The Company has 437 patents (including 36 invention patents) and 2 software copyrights in the curtain wall system and materials industry which has created many firsts in the industry and is one of the high-end preferred brands in the Chinese curtain wall system materials industry. FANGDA is a nationwide well-known trademark in China.

2. Focusing on the high-end market to edge out competitors

In the fierce market competition, the Company accurately positions the market in the field of high-end energy-saving curtain wall systems with high requirements for technology, service and management, and focuses its resources on high-end curtain wall projects. The construction of a number of curtain wall projects won the national "Luban Award", "Zhan Tianyou Civil Engineering Award", "National Quality Engineering Award", "China Construction Engineering Decoration Award", "Magnolia" Award and "Customer Satisfaction Project" awards, and won the title of "China's curtain wall industry's most competitive top 10" and so on. The Company has built a leading brand and created a clear edge in the high-end curtain wall market.

3. Well-developed industry base landscape

Thanks to continued investment in facilities, the Company has established a national business landscape with Shenzhen as the headquarters, Dongguan Songshanhu as the base in the south, Beijing in the north, Chengdu in the southwest and Shanghai and Nanchang in the east. The Dongguan Songshanhu and Nanchang bases are the largest and most advanced curtain wall system and material production bases in China and across the world, fueling the Company to increase its market share and competitiveness.

4. General solutions

The Company has integrated the design, production, management and engineering of curtain wall systems to enjoy technological, cost, quality and service advantages.

5. Talent

The Company has trained a group of outstanding teams with strong marketing technical, management and financial experience from a large number of project implementation experience. The core backbone personnel are stable, ensuring the execution ability of orders and bringing good user experience to customers.

6. Boost overseas market development to increase overseas orders

In recent years, the Company has increased its investment in overseas markets and gradually expanded its influence in Australia and Southeast Asia. Thanks to good product quality and contract performance, it has continuously won the trust of new and old customers and more orders. The overseas market orders are growing steadily.

(2) Rail transport equipment business

1. National development strategy

With the implementation of major national strategies such as the Guangdong, Hong Kong, and Macao Bay District, Xiong'an New District, and the "Belt and Road" Initiative, the region has radiated into Southeast Asia, South Asia, Central Asia, and West Asia, and has extended to Eastern Europe and North Africa with strong demand for infrastructure construction and interconnection. According to statistics as of December 31 2018, a total of 35 cities in the Chinese Mainland have completed the construction of 5,766.6 kilometers of urban rail transit lines. As the world's largest supplier of rail transit shielding door systems, the Company will also make full use of its advantages in technology, brand, and service to further consolidate and increase its domestic market share, and actively participate in rail transit construction in Guangdong, Hong Kong, Macao Bay District and Xiong'an New District. The

Company will vigorously expand overseas markets, especially the “Belt and Road” Initiative, maintain the continuity and stability of overseas orders, balance the development of domestic and foreign markets, and continue to “lead” the rail transit industry.

2. Technical advantage

Through continued independent innovation, the Company has developed the global leading metro screen door system with full intellectual property right and broken the monopoly of overseas competitors. The Company has also compiled the *Rail Transport Station Screen Door Standard*, which is the first of its kind in China. The standard was approved in April 2006 and was implemented on March 1, 2007. As the first standard in the industry in China, the standard has played a key role in guiding the development of China’s rail transport screen door industry and enabled the Company a dominant lead in the industry. Currently, the Company has 230 metro screen door patents, including 47 invention patents. The Company also has eight computer software copyrights.

3. Brand equity

So far, the Company has undertaken railway screen door projects in more than 30 cities including Hong Kong, Singapore, Kuala Lumpur of Malaysia, Noida of India and Bangkok of Thailand. The Fangda subway screen door system has grasped a leading market share and established incomparable brand influence thanks to its patents, standard and maintenance services. The Company has become the largest railway screen door supplier in the world.

4. Industry chain advantage

As the first company to enter the subway screen door industry in China, the Company's subway screen doors have reached to more than 60% of the subway cities in China, and many domestic subway screen doors have entered the maintenance period. The Company actively expands its industrial chain and takes the lead in the domestic market to provide metro maintenance services. The Company has a natural advantage in this high-end service industry. Our screen door system are independently developed by us, thus enabling us to provide prompt, overall, effective and standard maintenance services for our customers without other third parties. As more and more subways are opened, the business volume will continue to increase.

(3) New energy industry

The new energy business mainly comprises solar power PV application, PV construction and LED industry.

1. Technical advantage

With more than ten years’ experience in developing solar energy PV power generating curtain wall technology, the Company is the earliest company that masters the intelligent property right in the designing, production and integration of solar energy PV curtain wall systems and is a pioneer in the application of PV curtain wall technology.

2. Relation with other industries

Distributed solar power PV power generation is closely related to the Company’s existing businesses. Most distributed solar power PV systems are closely related to construction. Moreover, the Company has more than 10 years' experience in electrical product integration. The Company also has more than 20 years’ experience in construction management and has the level-1 construction curtain wall engineering qualification and electrical installation engineering qualification.

(4) Real Estate

1. The Company is committed to the Guangdong-Hong KongMacao Bay District, focusing on the development of urban renewal projects in the core area of Shenzhen. Benefiting from the continued positive economic growth of Shenzhen and the rapid economic development, it is expected that the Company's real estate sales and property leasing will continue to contribute profits to the company.

2. Although the company is a later comer in the industry, the Shenzhen Fangda Town project was quickly recognized by the market and the sales rate was faster. At the same time, the Company has been rated as “Shenzhen Real Estate Development Industry Development Potential Enterprise” by Shenzhen Housing Association for three consecutive years. In 2018, it has been awarded “Shenzhen Real Estate Development Industry Brand Value Enterprise” with professional operations for commercial and property management.

Chapter IV Operation Discussion and Analysis

1. Summary

In 2018 China's economic downward pressure increased. The Sino-US trade friction continued to affect and the prices of major raw materials fluctuated. The Company overcame many unfavorable factors, completed the targets set at the beginning of the year and continued to maintain a good development trend. In the report period, the Company recorded a sales income of RMB3,048,680,100, up 3.43% year on year. The net profit attributed to owners of the parent reached RMB2,246,164,600, up 96.27% year on year. The revenue from main businesses continued growing to RMB298,829,200, up 46.43% year on year. As of the end of the reporting period, the Company's order reserve was RMB4,634,830,300 (excluding real estate sales), an increase of 14.02% from the end of the previous year, which was 152.03% of the Company's sales revenue in 2018.

1. High-end curtain wall system and material business

In 2018, the Company adhered to the high-quality development road, made full use of the advantages of being located in the core area of the Guangdong-Hong Kong-Macao Bay District and continued to deepen the high-end energy-saving curtain wall market in Dawan District of Guangdong Hong Kong and Macao and achieved remarkable results. The number of new orders and the quality were significantly improved. During the reporting period, the Company won a series high-end curtain wall and material projects including the Shenzhen International Convention and Exhibition Center, Shenzhen Tencent Digital Building, Shenzhen Bao'an Central District Haifu Ecological Building, Shenzhen Mawan Ecological Park, Shenzhen Shenye Midtown Project, Shenzhen LongguangJiuzuan, Shenzhen HongrongyuanYicheng Center Garden, Zhuhai Youte Square, ZhongshanJiangbolong Science and Technology Park, AIIB Beijing Headquarters, Shanghai Pudong Shipyard Phase II and III, Shanghai GemdaleJiuting Center, Suzhou Sunan Vanke Yangshan North Phase II, Nanchang Business Union Center, Hefei Vanke Forest Park, Hangzhou Alibaba Babaxixi Park Phase IV, Wuhan Rongchuan Center Phase III, Lanzhou Donghu Square and Chengdu Zhaoshang Grand Rubik Building No.14 with a total amount of RMB2.353, including RMB1.52 billion from the Guangdong-Hong Kong-Macau Bay District, which accounts for 64.6% of the total, reflecting the Company's strong competitiveness in terms of product quality technical strength and brand influence. During the reporting period, the Company achieved good results in the domestic market and also made new breakthroughs in the overseas market. It signed projects such as Evermore in Melbourne Australia and Golder River in Ho Chi Minh Vietnam to further expand the Company's business in the international market and improve influence of brands in overseas markets. In 2018, the Company's curtain wall system and materials business realized sales income of RMB2,010,704,000 with a year-on-year increase of 21.59% and net profit after deduction of RMB97,998,900, an increase of 1,123.00%. As of the end of the reporting period, the Company's curtain wall system and materials business orders reserve was RMB3,176,378,500 with an increase of 14.85% over the same period of the previous year, which was 157.97% of the sales revenue of the curtain wall system and materials business in 2018. The abundant order reserve has laid the foundation for the continuous development of the Company's curtain wall system and materials business. It is expected that the curtain wall system and materials business will remain an important source of sales revenue and profit for the Company.

In order to meet the Company's growing demand for orders, the Company continues to invest in hardware such as production base construction. In June 2018, the Fangda Western Headquarters Base in Chengdu Xinjin started construction and will be finished in the first half of 2019. The base covers an area of 45,000 square meters and has a total construction area of about 21,000 square meters. It will become the most modern energy-saving and environmental protection curtain wall research and development and production base in western China. The new production base invested and constructed in Shanghai Songjiang was started in January 2019. It is expected to be completed by the end of 2019. The base covers an area of 23,800 square meters and the total construction area is about 43,000 square meters. After the completion of the two bases, the national industrial layout of the upgrade company will be improved and the production capacity of the Company's energy-saving and environmental protection curtain wall will be

enhanced to provide guarantee for the Company's sustained and rapid development.

During the reporting period, the Company tried its best to convert orders into sales revenue and successfully completed and delivered a series of high-end curtain wall projects such as the Shenzhen Evergrande Times Financial Center Project, Shenzhen Vanke Binhai Landmark Building, Shenyang Merchants Diamond Hill Plaza Project, Hangzhou Huanglong Vanke International Center and Shanghai Shipyard (Pudong) Area 2E3-2 (Phase I) and Zhonghai Taiyuan Yingze Bridge West Project. During the reporting period, Shenzhen ShenyeShangcheng (South District), Shenzhen China Energy Storage Building, Guangzhou Southern Power Grid Project and Shenzhen Fangda Town invested and constructed by the Company won the "China Construction Engineering Decoration Award" thanks to the outstanding design and construction quality; the Hong Kong Chinese University (Shenzhen) curtain wall project won the "Luban Award", the highest honor award in China's construction industry and the Shenzhen New Century Wenbo Building project won the "My Favorite Curtain Wall Project" in Shenzhen. These honors highlights the Company's glory as a leading brand in the industry.

2. Rail transport equipment business

In 2018, the Chinese manufacturing, innovation and construction made great progress. As the world's largest supplier of subway screen door systems, the Company also seized the historical opportunity and took the "Belt and Road Initiative" opportunity to accelerate the overseas market layout, which enabled the Company's rail transit business to achieve rapid growth in both Chinese and overseas markets. In 2018, the Company won the first phase of the Ahmedabad Metro in India, the Golden Line of the Thai Metro, the Line 3 of Shijiazhuang Metro, the second and third phases of the Wuhan Metro Line 8, the second and third phases of Chengdu Metro Line 3 and the phase one of the Nanning Subway Line No.4, Line No.2 East Extension Line, Guiyang Metro Line No.2, Xi'an Metro Line 1 Phase II, Xiamen Metro Line No.3 Phase I Project and won screen door maintenance contracts of the Nanchang Subway No.1, Nanning Metro Line No.1, Nanjing Metro Line No.1, Wuhan Intercity Railway, Wuhan Metro Line No.2 and No.3, Tianjin Metro Line No.1 East Extension Line and Shenzhen Metro Line No.11 with a total amount of RMB72,5864,000. As of the end of the reporting period, the Company's rail transit industry order reached RMB1,458,451,800 with an increase of 12.25% over the same period of last year, which is 489.93% of the Company's rail transit industry operating income in 2018.

During the reporting period, the first phase of the No.7 line of Wuhan Rail Transit, the first phase of the No. 11 line and the Zhifang Line of the Wuhan City Rail Transit System were opened. All of the nine rail lines in Wuhan have adopted the Fangda screen door system. Fangda's screen door system relies on many advantages such as "advanced performance, stable quality, reliable operation, safety and attractive design" and participates in the historical transformation of rail transit from scratch to single line and network in many cities in China. It has achieved a good market share in the world for the past five years.

Since the promulgation and implementation of the national industry standard "Urban Rail Transit Platform Screen Door" edited by the Company on March 1 2007, it has played an active role in regulating and guiding the development and technological innovation of the barrier door industry in China's rail transit platform. However, with the advancement of the industry's scientific and technological level and the continuous emergence of new experiences and new demands in the practical application of rail transit screen door products, this standard can no longer meet the actual needs of the industry. To this end in November 2018, the Company once again led the revision of the "Urban Rail Transit Platform Screen Door" standard, highlighting the Company's position as a leader in the field of urban rail transit platform screen doors, fully reflecting the Fangda screen door system in China's track leawding advantages in many aspects such as brand influence, market share, patent ownership, standard setting and maintenance professional services in the transportation sector.

3. New energy industry

During the reporting period, the three solar photovoltaic power plants that the Company had connected to the grid were operating safely and steadily. In 2018, the total power generation was 20,737,000 kWh, the sales revenue was RMB20,475,500 and the operating profit was RMB11,009,000, exceeding the expectation. Among them, the 20MW distributed photovoltaic power generation project of Chayu Village, Xuanfeng Town, Luxi County, Jiangxi Province and the distributed photovoltaic power generation project of, Songshan Lake in Dongguan have been included in the Renewable Issue issued by the Ministry of Finance the National Development and Reform Commission and the National Energy Administration. The Company's solar photovoltaic power

station will continue to bring long-term stable income and profit to the company and play a good role in promoting low-carbon development ecological civilization construction and accelerating the development of circular economy.

4. Real estate

(1) Industry development and impacts on the Company's future business and profitability

During the reporting period, the Fangda Town project sold by the Company was in Nanshan District, Shenzhen. As a first-tier city in China, Shenzhen has been a hot city with rapid population inflows and sustained economic growth in recent years. In 2018, Shenzhen has adjusted the urban renewal work reform project. There are not many industrial reform projects that are on sale or about to enter the market. At the same time, driven by the sales price of the real estate around the project, the sales price and gross profit margin of the Company's Fangda Town project increased significantly during the reporting period. In 2019, the remaining saleable area of the project is approximately 10,675.75 square meters and the estimated sales price and gross profit margin can maintain or exceed the 2018 level.

During the reporting period, the 1# building of the second phase of Shenzhen Fangda Town Project has completed planning acceptance. Except for part of its own use, the remaining area is about 74,000 square meters for rental. As of the end of the reporting period, the lease area that has been signed reached 11,000 square meters. The commercial part of the Fangda Town project was opened in October 2018. As of the end of the reporting period, the signing rate of commercial shops was 90%, which have been opened. It is expected that the real estate sales and property leasing will continue to contribute profits and cash flow to the Company in the future.

(2) Main business model, landscape, market position and competitiveness of the Company

The Company's business model adopts the traditional vertical overlap hybrid development model that includes land acquisition and property management vertically overlapping in management and each project is independently operated by a special project company.

The Company will focus on Guangdong, Hong Kong, and Macau Bay Area, focusing on the development of Shenzhen's urban renewal projects. The development of products will be mainly office buildings, supporting businesses, security housing, or residential properties. The Company has established a professional team to operate and manage the Company's businesses and properties.

Although the Company is a late comer in the real estate industry, the Fangda Town project developed by the Company has been quickly recognized by the market and the sales rate has been fast. At the same time, the Company has been rated as "Shenzhen Real Estate Development Industry Development Potential Enterprise" by the Shenzhen Real Estate Industry Association for three consecutive years. In 2018, it was named "Shenzhen Real Estate Development Industry Brand Value Enterprise". With the influence of Fangda Brand and its strong professional level, the Company has gained a firm foothold in the market competition and its market position has gradually increased.

(3) Land reserve

Project held by the Company:

Project	Purpose	Development area (m ²)	Building are (m ²)	Location	Notes
Fangda Town	Industrial	35,397.60	212,400.00	Shenzhen	Basically completed, available for sale and lease
Nanchang HonggutuanFenghuangzhou Project	Commercial	16,608.55	66,433.93	Nanchang	In construction, available for presales in 2019

During the reporting period, in addition to the above-mentioned projects, the Company also has a cooperative project Shenzhen FangdaBangshen Project, which covers an area of 20,714.9 square meters. During the reporting period, it is actively promoting related matters related to project renewal declaration.

During the reporting period, Shenzhen ZhongrongLitai Investment Co. Ltd. a controlled subsidiary of the Company and Shenzhen HenggangDakang Co. Ltd. and Shenzhen HenggangDakang Co. Ltd. Shangzhong Branch signed the "Shenzhen

Henggangda". The cooperation agreement for the urban renewal project along the Dakang River area of Shenzhen HenggangDakangJoint Stock Co., Ltd. covering an area of about 80000 square meters is currently being actively promoted.

In addition, the Company does not hold other development projects and land to be developed.

(4) Real estate development

Project under construction	Interests percentage	Starting time	Floor area (m ²)	Building are (m ²)	Finished building are (m ²)	Estimated total investment (in RMB100 million)	Invested amount (in RMB100 million)
Fangda Town	100%	May. 2014	35,397.6	212,400	217,763.69	25.85	23.37
Nanchang HonggutanFenghuangzhou Project	100%	May. 2018	16,608.55	66,433.93	0	6.70	2.3

(5) Project sales in the report period

Project under construction	Interests percentage	Sellable area (m ²)	Sold area (m ²)
Shenzhen Fangda Town	100%	93,086.25	82,410.50

(6) Real estate lease

Form	City	Interests percentage	Floor area (m ²)	Lease ratio (leasable)	Notes
Office building	Shenzhen	100%	26,040.55	97.00%	Fangda Building
Commercial shop	Shenzhen	100%	31,543.00	90.00%	Commercial podium of Fangda Town
Office building	Shenzhen	100%	11,893.73	13.19%	Office building of Fangda Town
Office building	Jiangxi	100%	5,387.50	100.00%	Jiangxi New Material
Plant	Jiangxi	100%	45,623.82	96.52%	Jiangxi New Material

(7) Financing in the report period

Financing source	Currency	Balance (in RMB)	Financing cost (interest rate)	Due date	Collateral/guarantee
Bank loan	RMB	893,978,153.39	Interval rate, between 10% below the benchmark interest rate and 60% above the benchmark interest rate on the withdrawal date	2023-2-11	Pledged by equity in Fangda Real Estate Co., Ltd. and guaranteed by the Company Guarantee

(8) Development strategy and operation plan in the next year

The Company has taken the real estate business as one of the important sectors of the Company. The Company's development strategy is to become an influential and professional company in the core area and to win customer satisfaction through quality products.

In 2019, the Company plans to complete the rental and sales of the Fangda Town project except for its own use; to realize the pre-sale of the Nanchang Honggutan Phoenix Island project; to actively promote the project declaration of the Shenzhen FangdaBangshen project; to complete the preparations before the Dukang project declaration. It is expected that the real estate sales and property leasing will continue to contribute profits to the Company in the future.

(9) Bank mortgage loan guarantee provided for commercial housing purchasers

The Group's property business provides periodic mortgage guarantee for property purchasers. The term of the periodic guarantee lasts from the effectiveness of guarantee contracts to the completion of mortgage registration and transfer of housing ownership certificates to banks. By 31.12.18, the Company has provided periodic guarantee of RMB778,189,500.

(10) Property management

In 2018 the wholly-owned subsidiary Fangda Property continued to improve the on-site property management quality of Shenzhen Fangda Town, Fangda Building and Dongguan Industrial Park. Through refined management, customers were satisfied by the services.

5. Repurchase of B shares and increase in shareholding by actual controllers

The B-share market has long been in a downturn due to the loss of financing functions, poor liquidity, and small market capacity. The Company's B share price has largely deviated from the Company's actual operating conditions. The performance of the B shares is not in line with the Company's intrinsic value, and the Company's investment value is underestimated. In order to enhance the Company's investment value and maximize the interests of shareholders, the Company reviewed and approved two repurchases of B shares and cancellation in 2018. As of the disclosure date of this report, the Company has repurchased 60,258,065 B shares and used funds of HKD227,491,556.01, which has maintained the stability of the market and enhanced investors' confidence. The following table shows the details:

Repurchase	Period	Number of shares	Fund used	Date of cancellation
First	August 13, 2018 to August 16, 2018	28,160,568	114,478,923.89	29.08.18
Second	December 19, 2018 to January 3, 2019	32,097,497	113,012,632.21	11.01.19
	Total	60,258,065	227,491,556.10	

Since optimistic about the Company's future development, since 2011, the company's actual controller, chairman and president Mr. XiongJianming and Banglin Technology Company and Shengjiu Investment Co. Ltd. controlled by him have been increasing their shareholdings. In the reporting period, Banglin Company increased its holdings of 9,819,645A shares and Shengjiu Company increased its holdings of 2,103,856 B shares. These are the actions of the actual controllers to stabilize the Company's share price during the declining of the Company's stock price.

6. Innovation

The Company adheres to the business philosophy of "technology-based innovation" and the scientific and technological innovation development path. Its independent innovation capabilities and technology level has always been at the forefront of domestic similar enterprises. The year 2018 is the company's management innovation year. The Company comprehensively improves production efficiency and project management efficiency through management model innovation, system innovation and technological innovation.

In 2018, the Company edited and prepared 10 national provincial and municipal standards, applied for 27 patents and obtained 23 new authorized patents including 4 invention patents, and independently developed new products "BIM system parameter design development and application" and 18 items such as "Enhanced PEDC_IBP_200 R&D" and "Functional R&D of Passenger Detectors". The company's screen door industry takes intelligent manufacturing as the starting point and develops automatic

glue-making robots and automatic welding robots to put into trial production promotes the intelligent production of welding and rubbering promotes the technical level and product quality and reduces the labor intensity of employees in order to improve product market competitiveness, reduce labor costs and improve economic efficiency.

In 2018, the Company focused on management refinement and service refinement, implemented virtual server solutions and independently established a cloud terminal management system to achieve the goals of reducing office costs, cross-regional cross-time office and data security management, effectively improve office IT systems, convenience and security. The Shenzhen Fangda Town project built by the Company has gradually introduced the building intelligent control system, parking space guidance system, visitor management system and self-paying system. While realizing the innovation of management mode, it also saves management resources.

7. Awards

During the reporting period, the Company was awarded Top 100 Listed Companies in China, the Best Employer Award in China, Top 500 Enterprises in Guangdong, the Top 100 in Guangdong Manufacturing Industry, Top 100 Private Enterprises in Guangdong and the 40th Anniversary of Reform and Opening up, Guangdong Excellent Enterprises, Guangdong Provincial Independent Innovation Demonstration Enterprise, Guangdong Province Honesty Demonstration Enterprise, Guangdong Provincial Contract-honoring and Credit Enterprise, Shenzhen Top 100 Enterprises and Shenzhen Outstanding Social Responsibility Enterprise, won the National Outstanding Foreign Investment Enterprise - Harmonious Labor Relations Promotion Award, Best Board of Directors In 2017. In the information disclosure assessment, the Company was awarded the highest level A of the Shenzhen Stock Exchange and the chairman and president of the company Mr. XiongJianming was elected as the representative of the 13th National People's Congress.

A number of curtain wall projects undertaken by the wholly-owned subsidiary FangdaJianke won the awards such as the "Luban Award", "China Construction Engineering Decoration Award", "Excellent Quality Award" and "My Favorite Curtain Wall Project".

FangdaZhichuang, a wholly-owned subsidiary was awarded the honorary title of "Excellent Contractor" issued by Nanjing Metro Operation Company and Tianjin Metro Operation Company and "Excellent Contractor" issued by MTR Rail Transit Co. Ltd. Mr. XiongHaigang, the general manager of FangdaZhichuang was named "the 40th anniversary of reform and opening up affecting the innovation and development of Shenzhen equipment industry."

Fangda Real Estate Co. Ltd., a wholly-owned subsidiary, was awarded the "Shenzhen Real Estate Development Industry Brand Value Enterprise".

Xu Weihua, an employee of Fangda Jiangxi New Materials Co. Ltd., a wholly-owned subsidiary, won the "Nanchang May 1st Labor Medal" Fang Hongjian staff, Li Honglin and Wei Zhengpei were awarded the title of "Star Craftsman" in Shenzhen Decoration Industry.

The Company must comply with disclosure requirements of the Shenzhen Stock Exchange Industry Information Disclosure Guideline No.3 – Listed Companies Engaged in Property Development.

IX. Future Prospect

(1) Competition map and development trend

1. Curtain wall and material system industry

With the development of the major national strategies such as the construction of Guangdong, Hong Kong, and Macau Bay Area and Xiong'an New District, commercial and office buildings, urban commercial complexes, star-rated hotels and other urban commercial spaces as well as airports, stations, rail transit, museums, libraries, Public spaces such as stadiums, schools, and hospitals have strong demand for curtain walls, and the curtain wall system and material industry still have a good foundation. Over recent years, a series of industry policies will be issued to push forward the industry, providing a gold opportunity for the development of energy-saving curtain wall and material business.

2. Rail transport equipment business

In recent years, with the support of national policies, the urban transportation industry will continue to develop well and the market scale will continue to expand with significant economic benefits. According to statistics as of December 31 2018, a total of 35 cities in the Chinese Mainland have completed the construction of 5,766.6 kilometers of urban rail transit lines. The total number of newly added operation lines in the three years since the "13th Five-Year Plan" has been 2148.7 kilometers and the average annual new line length is 716.2 kilometers.

With the implementation of major national strategies such as the Guangdong, Hong Kong, and Macao Bay District, Xiong'an New District, and the "Belt and Road" Initiative, the region has radiated into Southeast Asia, South Asia, Central Asia, and West Asia, and has extended to Eastern Europe and North Africa with strong demand for infrastructure construction and interconnection. Therefore, the rail transit equipment industry will face new and unprecedented opportunities for development.

3. New energy industry

Photovoltaic is a clean energy source supported by the government. In 2019, the photovoltaic industry and policy trends are still improving. The photovoltaic industry will enter a new stage of development from high-speed development that relies on government subsidy to refined high-technology development, reshuffling the industry development direction.

4. Real estate

Shenzhen is located in the core area of Guangdong, Hong Kong and Macau Bay, and the economy continues growing. The Company focuses on the development of urban renewal projects in Shenzhen. With the rapid development of Shenzhen's economy, it is expected that there will still be some room for development in the real estate industry in Shenzhen and surrounding cities.

(2) Company development strategy and business plan

In 2019, the Company's management theme was to "reshape the management foundation of Fangda" and improve management efficiency through reshaping. The energy-saving curtain wall and materials industry will continue to give full play to its brand

advantages and steadily and securely operate traditional high-quality markets such as Guangdong-Hong Kong-Macao Bay, Yangtze River Delta, Beijing-Tianjin-Hebei and Chengdu-Chongqing areas and will promote overseas markets step by step. As the world's largest rail transit screen door system supplier, the Company will continue to consolidate its leading position in the domestic industry actively explore overseas markets vigorously develop technical maintenance services and broaden the Company's new product range. The new energy industry will continue to manage the safe operation and maintenance of the three power stations to ensure power generation efficiency. The Company will expand the new energy photovoltaic business in accordance with relevant national policies and in light of the Company's own situation. The real estate business will focus on urban renewal projects in the core areas of Guangdong-Hong Kong-Macau Bay and complete the development, rental and sales of the current four projects.

(3) Capital demand and source for projects in progress

To realize the business target in 2019, the Company will develop suitable financial and capital plans, accelerate the collection of accounts receivable, sales payment from sales of Fangda Town, expand financing channels, and use share issuance, bank loans and other financing products to meet the demand for capital.

(4) Risks and solutions

1. Market risks and measures

As the overall designing and engineering quality continues improving in the domestic construction curtain wall industry, curtain wall products will become increasingly standard, intensifying the market competition. In addition, the market concentration of first- and second-tier cities will increase, and regional competition will become more intense. The Company will continue to adopt a prudent management policy, refined management, and technological innovations to reduce management costs and accelerate the return of funds. Through new technologies and processes, we will improve product quality, lower costs and elevate earnings. While consolidating the domestic market, the Company will step up the efforts in exploring overseas markets, thus elevating our competitiveness in global markets and improving our resistance to risks.

2. Management risks and measures

With an increase in orders in recent years and operation of five industry bases, the Company has continued expanding rapidly in terms of capitalization, business and teams. The organizational structure and management system have become more complicated, leading to management risks in industry expansion. The Company will continue to improve the management mode, integrate business management, optimize the business flow, seeking to build a high-efficient and solid management team. We will introduce high-quality, professional technical and management talents in different fields to strengthen the Company's core competitiveness.

3. Production and operation risks and measures

The macro-economy and market demand have added to the fluctuation in prices of main raw materials such as aluminum and steel and labor, affecting the Company's profitability and creating additional production and operation risks for the Company. The Company has sought to lower the purchase and production costs, pay attention to technical R&D, reduce consumption of raw materials, introduce automatic and intelligent production equipment, strengthen staff training to improve working efficiency.

4. Solar PV power plant risks and measures

The industry is closely related to policies of the local government. Changes in policies will have large impacts on the industry. The Company will continue paying attentions to the development of the industry. The Company will conduct adequate verification on project feasibility, control costs, quality and schedules strictly, and improve its development, construction and maintenance capabilities.

Chapter V Significant Events

I. Profit distribution and reserve capitalization plan

Establishment, implementation or adjustment of profit distribution policies especially the cash dividend policy during the report period

Applicable Inapplicable

During the report period, the Company implemented the profit distribution plan for 2017. Approved at the Shareholders' Meeting 2017 held on 15.05.18, the Company's profit distribution plan for 2017 is distributing a cash dividend of RMB1.50 (tax-included) for every ten shares to all the shareholders based on a total of 1,183,642,254 shares on 31.12.17. No bonus share was issued this year. The plan was implemented on 06.06.18 (see the 2017 Share Equity Distribution Implementation Announce 2018-27).

Explanation of Cash Dividend Distribution Policies	
Comply with the Articles of Association or resolution made at the General Shareholders' Meeting	Yes
Clear and definite distribution standard and proportion	Yes
Decision-making procedure and mechanism	Yes
Independent directors fulfill their duties	Yes
Middle and small shareholders express their opinions and claims. There rights are well protected.	Yes
Cash dividend distribution policies are adjusted or revised according to law	Inapplicable

Profit distribution and reserve capitalizing pre-plans or plans over the recent three years (including the reporting period)

2016: A cash dividend of RMB3.50 (including tax) for each ten shares is issued to all shareholders on the basis of 789,094,836 shares with a total amount of RMB 276,183,192.60, on 31.12.16. Five shares were issued for every ten shares to all shareholders through capitalization of capital reserve. No dividend share was issued.

2017: A cash dividend of RMB1.50 (including tax) for each ten shares is issued to all shareholders on the basis of 1,183,642,254 shares with a total amount of RMB 177,546,338.10, on 31.12.17.

No dividend share or capitalization share was issued in the year.

2018: The Company plans to distribute a cash dividend of RMB2.00 (including tax) for each ten shares issued to all shareholders on the basis of 1,123,384,189 shares with a total amount of RMB 224,676,837.8 upon the cancellation of the B shares repurchased as of January 11, 2019.

No dividend share or capitalization share was issued in the year.

Distribution of cash dividend over the recent three years (including this period)

In RMB

Year	Cash dividend (including tax)	Net profit attributable to shareholders in the consolidated financial statements	Proportion in the net project attributable to shareholders in the consolidated financial statements	Cash dividend paid in other manners	Proportion of cash dividend paid in other manners
2018	335,842,891.28	2,246,164,571.68	14.95%	111,166,053.48	33.10%
2017	177,546,338.10	1,144,404,441.03	15.51%	0.00	0.00%
2016	276,183,192.60	697,956,378.23	39.57%	0.00	0.00%

Cash dividend proposed despite the Company records profits in the report period and a positive undistributed profit/

Applicable Inapplicable

Note: In the above table the "Cash Dividend (including tax)" of RMB 335,842,891.28 in 2018 is the sum of the amount of RMB224,676,837.8 for the discovery of the bonus in 2018 and the repurchase amount of the B shares repurchased in 2018; "Cash dividend paid in other manners" of RMB 111,166,053.48 is the amount of B shares repurchased by the Company in 2018.

II. Profit Distribution and Reserve Capitalization Plan in the Report Period

Applicable Inapplicable

Bonus shares for every ten shares	0
Cash dividend for every ten shares (yuan, tax-included)	2.00
Shares capitalized for every 10 shares	0
A total number of shares as the distribution basis	1,123,384,189
Total cash dividend (yuan, including tax)	224,676,837.80
Distributable profit (yuan)	504,081,999.00
Proportion of cash dividend in the distributable profit	100%
Cash dividend	
The Company is in a fast growth stage. Therefore, the cash dividend will reach 20% of the profit distribution at least.	
Details of profit distribution or reserve capitalization plan	
The Company plans to distribute a cash dividend of RMB2.00 (including tax) for each ten shares is issued to all shareholders on the basis of 1,123,384,189 shares with a total amount of RMB 224,676,837.8. No dividend share or capitalization share was issued in the year.	

III. Performance of promises

1. Commitments that have been fulfilled and not fulfilled by actual controller, shareholders, related parties, acquirers of the Company

Applicable Inapplicable

There is no commitment that has not been fulfilled by actual controller, shareholders, related parties, acquirers of the Company

Auditor's Report

Grant Thornton (2019) No.350ZA0156

To the shareholders of China Fangda Group Co., Ltd.:

1. Auditors' Opinions

We have audited the Financial Statements of China Fangda Group Co., Ltd. ("Fangda Group") attached hereafter, including the Balance Sheet and Consolidated Balance Sheet ended 31.12.18 and the Income Statement, Consolidated Income Statement, Cash Flow Statement, Consolidated Cash Flow Statement, Statement on Change of Shareholders' Equity, Consolidated Statement on Change of Shareholders' Equity of the year 2018, as well as the Notes to the Financial Statements.

We believe that Fangda Group has been following with the Enterprise Accounting Standard in preparing of the Financial Statements. The Financial Statements is reflecting, in all important aspects, the financial situation of Fangda Group as of 31.12.18, and the business performance and cash flow of year 2018.

2. Basis of the Opinions

We carried out the auditing works with compliance to Chinese CPA Auditing Standard, The "CPA's Responsibility for Auditing Financial Statements" section of the audit report further elaborated our responsibilities under these guidelines. In accordance with the Code of Ethics for Chinese Certified Public Accountants, we are independent of Fangda Group and perform other professional ethics duties. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

3. Key Audit Matters

The key audit matters are the matters that we believe are most important for the audit of the

current financial statements based on professional judgment. The response to these matters is based on the overall audit of the financial statements and the formation of an audit opinion. We do not comment on these matters separately.

(1) Income recognition

For related information disclosure, please refer to Note III, 25, Note III, 30(3), Note V, 34 and Note XIII 2 of the financial statements.

1. Description

In 2018, China Fangda Group's operating income was RMB3.049 billion of which construction contract revenue accounted for 68.32% of the group's total revenue.

Fangda Group confirms revenue for the construction services provided by the construction according to the percentage of completion method when the results of the construction contract can be reliably estimated. Management needs to make a reasonable estimate of the initial total contract revenue and total contract costs for the construction contract and continue to assess and revise it during the contract implementation process, which involves significant accounting estimates of the management.

Therefore, we identify construction contracts revenue recognition as key audit matters.

2. Audit response

Our audit procedures for the implementation of revenue recognition for construction contracts mainly include:

(1) Understand and evaluate the design of internal control related to management contract and construction contract budget and revenue recognition, and test the effectiveness of key control implementation.

(2) Obtained a major construction contract, verified the contract revenue, and reviewed key contract terms. Check the construction contract and cost budget information on which management expects total revenue and estimated total cost.

(3) Obtain a construction contract ledger and project income cost summary table, perform an analytical review of the project gross profit, and recalculate the construction contract completion percentage and income in the construction contract to verify its accuracy.

(4) Select samples to check the project engineering details of the main project, subcontracted labor approval forms, and the owner's production value approval documents and records to verify the contract costs incurred.

(5) Select samples to check if the relevant contract costs are recorded in the appropriate accounting period.

(6) Select a sample to conduct a site inspection of the progress of the project image to verify the reasonableness of the project's completion schedule.

(2) Measurement of fair value of investment real estate

For related information disclosure, please refer to Note III, 15, Note III, 30(1), Note V, 9 (2), 43 and Note IX 2 of the financial statements.

1. Description

As of 31.12.18, the carrying amount of investment real estate subsequently measured in the consolidated financial statements using the fair value model was RMB5.231 billion, accounting

49.08% of the total assets, and the gains from changes in fair value realized in the current period were RMB2.917 billion, with a greater impact on the Group's consolidated statements.

The management of Fangda Group annually employs a third-party assessment agency with relevant qualifications to evaluate the fair value of the investment real estate. The evaluation adopts the comparison method and the income method to comprehensively analyze various factors that affect the real estate price of the appraisal subject. The assessment of the fair value of investment real estate involves many estimates and assumptions, such as the analysis of the economic environment and future trends of the real estate where the investment real estate is located, discount rates, etc. The changes in estimates and assumptions will have big impacts on the fair value of the investment real estate evaluated. Therefore, we identify the measurement of fair value of investment real estate as a key audit matter.

2. Audit response

Our audit procedures for the measurement of fair value of investment real estate mainly include:

(1) Assess the competency, professional quality, independence and objectivity of third-party assessment agencies employed by the management.

(2) Obtain the assessment report, selected major or typical samples, and use our real estate appraisal experts to review and review the assessment methods and assumptions used in the assessment report and the rationality of the selected key assessment parameters. Check the accuracy and relevance of the data used by the management in valuation.

(3) Review the measurement, presentation and disclosure of fair value of investment real estate in the financial statements.

(3) Provision of bad debt of account receivable

For details of the disclosure of relevant information please refer to Note III 11 and Note V 2 of the notes to the financial statements.

1. Description

As stated in Note III 11 and Note V 2 of the financial statements as of December 31 2018, the balance of accounts receivable of the Company was RMB2.286 billion and the provision for bad debts was RMB366 million. The book value as a percentage of total assets was 21.45%. Due to the significant amount of accounts receivable of Fangda Group, the management needs to use important accounting estimates and judgments when determining the estimated recoverable amount of accounts receivable. If the accounts receivable cannot be recovered on time or cannot be recovered the impact on the financial statements is relatively high. Therefore we determined the accuracy of the provision for bad debts of accounts receivable as a key audit matter.

2. Audit response

(1) Understand and evaluate the effectiveness of relevant internal control design for the provision of bad debts of Fangda Group and accounts receivable and test the effectiveness of key control operations.

(2) Based on the Company's industry characteristics and actual business conditions, the management's standard for the significant amount of individual accounts receivable is evaluated and the basis for the combination and the proportion of impairment based on the age of the accounts are appropriate.

(3) Review the management's accrual process for the provision for impairment of receivables

including: (1) for accounts receivable with impairment provision prepared by aging analysis method, obtain the aging analysis form of accounts receivable prepared by management and bad debts provision form, select the sample to check the accuracy of the ageing division of the accounts receivable and calculate the accuracy of the calculation of the bad debt provision; (2) for the accounts receivable for the provision for impairment provision review the management test process, the accuracy and reasonableness of the information and related assumptions are checked for the appropriateness of the provision for impairment of accounts receivable with long-term accounts receivable.

4. Other information

The management of Fangda Group (hereinafter referred to as management) is responsible for other information. The other information includes the information covered in Fangda Group's 2018 annual report, but does not include the financial statements and our audit report.

Our audit opinions published in the financial statements do not cover other information and we do not publish any form of assurance conclusion on other information.

In connection with our audit of the financial statements, our responsibility is to read other information. In the process, we consider whether there is a material inconsistency or other material misstatement of other information whether it is in the financial statements or what we have learned during the audit process.

Based on the work we have performed, if we determine that there is a material misstatement of other information, we should report that fact. In this regard, we have nothing to report.

5. Executives' responsibilities on the Financial Statements

(1) Preparing these financial statements according to the *Accounting Standards for Business Enterprises* and presenting them fairly; (2) designing, implementing and maintaining necessary internal control to make sure that these financial statements are free from material misstatement, whether due to fraud or error.

In the preparation of the financial statements, the management is responsible for assessing Fangda Group's ability to continue as a going concern, disclosing issues related to going concern (if applicable), and applying the going concern assumption unless management plans to liquidate Fangda Group, terminate operations or there are no other realistic choices.

The management is responsible for overseeing the financial reporting process of Fangda Group.

6. Auditor's responsibility for auditing financial statements

Our objective is to obtain reasonable assurance as to whether the entire financial statements are free from material misstatement due to fraud or error and to issue an audit report containing audit opinions. Reasonable assurance is a high level of assurance, but it does not guarantee that an audit performed in accordance with auditing standards can always be discovered when a major misstatement exists. The report may be due to fraud or mistakes, and if a reasonable expectation of misstatement alone or aggregated may affect the economic decision-making made by users of financial statements based on the financial statements, the misstatement is generally considered to be material.

In the process of conducting audit work in accordance with auditing standards, we use

professional judgment and maintain professional suspicion. At the same time, we also perform the following tasks:

(1) Identify and assess risks of material misstatement of financial statements due to fraud or errors, design and implement audit procedures to address these risks, and obtain adequate and appropriate audit evidence as a basis for issuing audit opinions. Since fraud may involve collusion, falsification, intentional omission, misrepresentation or override of internal controls, the risk of failing to detect a material misstatement due to fraud is higher than the risk of failing to detect a material misstatement due to an error.

(2) Understand audit-related internal controls to design appropriate audit procedures.

(3) Evaluate the appropriateness of accounting policies adopted by the management and the reasonableness of accounting estimates and related disclosures.

(4) Conclude on the appropriateness of management's use of continuing operations assumptions. At the same time, based on the audit evidence obtained, it concludes that whether there are major uncertainties in the matters or circumstances that may cause major doubts about the ability of the Company's continuing operations. If we conclude that there are significant uncertainties, the auditing standards require us to request the users of the report to pay attention to the relevant disclosures in the financial statements in the audit report; if the disclosure is not sufficient, we should publish non-unqualified opinions. Our conclusions are based on the information available as of the date of the audit report. However, future events or circumstances may result in Fangda Group's inability to continue operating.

(5) Evaluate the overall presentation, structure, and content (including disclosure) of the financial statements and evaluate whether the financial statements fairly reflect the relevant transactions and events.

(6) Obtain sufficient and appropriate audit evidence on the financial information of entity or business activities in Fangda Group to express opinions on the financial statements. We are responsible for directing, supervising and executing group audits and assume full responsibility for audit opinions.

We communicate with the governance team on planned audit scope, timing, and major audit findings, including communication of the internal control deficiencies that we identified during the audit.

We also provide a statement to the management on compliance with ethical requirements related to independence, and communicate with the management on all relationships and other matters that may reasonably be considered to affect our independence, as well as related preventive measures (if applicable).

From the matters passed with the management, we determine which items are most important for the audit of the financial statements of the current period and thus constitute the key audit matters. We describe these matters in our audit report, unless laws and regulations prohibit the public disclosure of these matters, or in rare cases, if it is reasonably expected that the negative consequences of communicating something in the audit report will outweigh the benefits in the public interest, we determine that such matter should not be communicated in the audit report.

Legal representative: XiongJianming CFO: Lin Kebing Accounting Manager: Wu Bohua

Note 1: The "Notes receivable and accounts receivable" line item reflects the amount that should be collected by the enterprise for operating activities such as selling goods and providing services and the commercial drafts received including bank acceptance measured at amortized cost on the balance sheet date and bills of exchange and commercial acceptance bills. The item should be based on the ending balance of the "Announceable Notes" and "Accounts Receivable" accounts less the amount of the relevant bad debt provision ending balance in the "bad debt provision" account.

2. The "other receivables" line item should be filled in based on the total balance of "end of interest" "dividends receivable" and "other receivables" less the balance of bad debt provision in the "bad debt provision" account.

3. The "under construction" line item reflects the closing book value of the construction in progress and the final book value of the various materials prepared by the enterprise for the construction in progress. The item be filled in based on the closing balance of the "construction in progress" less the amount after the closing balance of the "depreciation reserve for construction in progress" account and the ending balance of the "engineering materials" less the "depreciation reserve for engineering materials".

4. The "Notes payable and accounts payable" line item reflects the amount payable by the enterprise on the balance sheet date for the purchase of materials commodities and services and the commercial drafts issued and accepted including bank acceptance bills and commercial acceptance bills. The item should be filled in based on the closing balance of the "Payables Payables" account and the total balance of the ending credit balances of the relevant detailed accounts to which the "Accounts Payable" and "Prepaid Accounts" accounts belong.

5. The "Other Payables" line item should be filled in based on the total closing balance of the "Payable Interests" "Dividends Payable" and "Other Payables" accounts.

6. The "Long-term Payables" line item reflects the ending book value of various long-term payables other than long-term borrowings and bonds payable by the company on the balance sheet date. The project should be filled in based on the closing balance of the "Long-term Payables" account less the closing balance of the relevant "Unrecognized Financing Expenses" account and the closing balance of the "Special Payables" account.

III. General Information

China Fangda Group Co., Ltd. (the “Company” or the “Group”) is a joint stock company registered in Shenzhen, Guangdong and was approved by the Government of Shenzhen with Document 深府办函 (1995) 194号, and was founded, on the basis of Shenzhen Fangda Construction Material Co., Ltd., by way of share issuing in October 1995. The unified social credit code is: 91440300192448589C; registered address: Fangda Building, Kejinan Road 12, High-tech Zone, Shenzhen. Mr. XiongJianming is the legal representative.

The Company issued foreign currency shares (B shares) and local currency shares (A shares) and listed in November 1995 and April 1996 respectively in Shenzhen Stock Exchange. The Company received the Reply to the Non-public Share Issuance of Fangda China Group Co., Ltd. (CSRC License [2016] No.825) to allow the Company to conduct non-public issuance of 32,184,931 A-shares in June 2016. According to the profit distribution plan for 2016 approved by the 2016 general shareholders' meeting, the Company issued five shares for every ten shares to all shareholders through surplus capitalization based on the total 789,094,836 shares on December 31, 2016. At the end of 2017, the registered capital was RMB1,183,642,254.00. In August 2018, the company repurchased and cancelled 28,160,568.00 B shares and the existing registered capital was RMB1,155,481,686.00.

The Company has established a corporate governance structure that comprises shareholders' meeting, board of directors and supervisory committee. Currently, the Company sets up the President Office, Administrative Department, HR Department, Enterprise Management Department, Financial Department, Audit and Supervisory Department, Securities Department, Technology Innovation Department and IT Department and has established subsidiaries including Fangda Decoration, FangdaChuangzhi, Fangda New Material, Fangda Property and Fangda New Energy.

The business nature and main business operations of the Company and subsidiaries (“the Group”) include (1) production and sales of curtain wall materials, design, production and installation of construction curtain walls; (2) assembly and production of subway screen doors; (3) development and operation of real estate projects on land, of which rights have been obtained lawfully; (4) R&D, installation and sales of PV devices, design and installation of PV power plants.

The financial statements and notes are approved at the 13th meeting of the 8th term of the Board of Directors held on 28.01.19.

The consolidation scope for the consolidated financial statements includes the Company and all subsidiaries. The main entities included in the scope of consolidation in this period include two subsidiaries. In this period the company is no longer included in the scope of consolidation. In this period the subsidiary Fangda Decoration Engineering (Shenyang) Co. Ltd. (hereinafter referred to as Shenyang Decoration Company) was cancelled. See Note 8 Change to consolidation scope and Note 9 Interests in other entities.

IV. Basis for the preparation of financial statements

1. Preparation basis

The financial statements are prepared according to the enterprise financial standard and guidelines, interpretation and other related regulations (“the Standard”) issued by the Ministry of Finance. The Group has also disclosed related financial information according to the requirement of the Regulations of Information Disclosure No.15 – General Provisions for Financial Statements (Revised in 2014) issued by the CSRC.

The Group prepares the financial statements based on continuous operation.

The Group's auditing is based on the accrual basis. Except for some financial instruments and property held for investment, the financial statements are prepared based on historical costs. In case of any asset impairment, the impairment provision will be made as required.

2. Continuous operation

The Company assessed the continuing operations capability of the Company for the 12 months from the end of the reporting period. No matters were found that would affect the Company's ability to continue as a going concern. It is reasonable for the Company to prepare financial statements based on continuing operations.

V. Significant Account Policies and Estimates

Whether the Company needs to comply with disclosure requirements of special industries

Yes

Property development and decoration industries

The Company must comply with disclosure requirements of the Shenzhen Stock Exchange Industry Information Disclosure Guideline No.2 – Listed Companies Engaged in Solid Mineral Resources Related Business.

Specific accounting policy and estimate prompt:

The Group determines the accounting policies and income recognition policies for investment real estate according to the production and business features. For details, see Note V. 13 and Note V. 22.

1. Statement of compliance to the Enterprise Accounting Standard

The financial report and statements are prepared with compliance to the requirement of the Enterprise Accounting Standard. They

reflect the financial position as of 31.12.18, and business performance and cash flow situation in Year 2018 of the Company frankly and completely.

2. Fiscal Period

The fiscal year of the Group is the solar calendar year, that is from January 1 to December 31.

3. Operation period

The operation period of the Group is 12 months.

4. Bookkeeping standard money

The Company, domestic subsidiaries and overseas subsidiary Shihui International Holding Co., Ltd. use RMB as bookkeeping standard money. Overseas subsidiaries Automatic System (Hong Kong) Co., Ltd. and Fangda Australia Pty Ltd use HKD and AUD as bookkeeping standard money respectively. The Group prepares financial statements in RMB.

5. Accounting treatment of the entities under common and different control

(1) Consolidation of entities under common control

Assets and liabilities obtained by the merging party are calculated at their book value with the merged parties at the merger day in the consolidated financial statement of the merging party in addition to the adjustment made given the difference in accounting policies. The differences between the book value of net assets and the book value of consideration price (or the total of face value of share issued) are adjusted to the capital reserve (share capital premium). If the share capital premium is not enough to offset the difference, it will be adjusted to the retained gains.

Enterprise merger under common control through multiple transactions

In separate financial statements, the initial investment cost is the book value of the merged party's net assets that can be shared by the merging party in the consolidate financial statements of the final controlling party according to the shareholding percentage on the merging date; adjust the capital surplus (share premium) according to the difference between the initial investment cost and the book value of the held investment before merger plus the book value of the consideration paid on the merger date. Where the capital surplus falls short, the retained income should be adjusted.

In consolidated financial statements, assets and liabilities obtained by the merging party from the merged party should be measured at the book value in the final controlling party's consolidated financial statements other than the adjustment made due to differences in accounting policies; adjust the capital surplus (share premium) according to the difference between the initial investment cost and the book value of the held investment before merger plus the book value of the consideration paid on the merger date. Where the capital surplus falls short, the retained income should be adjusted. Changes in recognized related profit and loss, other misc. incomes and other owner's equity between the later one of the date when the original stock equity was obtained and the date when the merged party and merging party become under the common control should respectively write down the retained profit in beginning of the report period or current period's profit or loss.

(2) Consolidation of entities under different control

For merger of entities under different control, the merger cost is the fair value of the asset paid, liability undertaken, and equity securities issued for exchanging of control power over the entities at the day of acquisition. On the acquisition day, the assets and liabilities (if any) acquired by the Group from the acquired party are recognized on the fair value.

If the merger costs exceed the fair value of the recognizable net assets of the acquired party in the merger, it is recognized as goodwill and measured based the costs after the accumulative impairment provision is deducted; if the the fair value exceeds the costs, it is included in the income statement for the period after being re-examined.

Where there is new or further evidence on the condition existing on the acquisition date 12 months later and adjustment needs to be made, the good will should be adjusted and merged.

(3) Treatment of related transaction fee in enterprise merger

Agency expenses and other administrative expenses such as auditing, legal consulting, or appraisal services occurred relating to the merger of entities are accounted into current income account when occurred. The transaction fees of equity certificates or liability certificates issued by the purchaser for payment for the acquisition are accounted at the initial amount of the certificates.

6. Preparation of Consolidated Financial Statements

(1) Consolidation scope

The consolidate scope of consolidated financial statements is determined based on control. Control means the power possessed by the Company on invested entities to share variable returns by participating in related activities of the invested entities and to impact the amount of the returns by using the power. Subsidiaries are enterprises controlled by the Company.

(2). Preparation of Consolidated Financial Statements

The consolidated financial statements are prepared by the Company based on financial statements of the Company and subsidiaries and according to other related information. During preparation of consolidated financial statements, the accounting policies and period of the Company and subsidiaries must be the same. Major transactions and balances between companies are offset.

Subsidiaries and businesses increased because of merger of enterprises under the common control during the report period are deemed consolidated into the consolidate scope from the date of becoming controlled by the final party. The operating result and cash flows of the subsidiaries and businesses from the date of becoming controlled by the final party should be incorporated into the consolidate income statement and consolidate cash flow statement.

For subsidiaries and businesses increased because of merger of enterprises not under the common control, their incomes, expenses and profits between the date of acquisition and end of the report period should be incorporated into the consolidated income statement, and the cash flows should be incorporated into the consolidated cash flow statement.

The shareholder's equity of the subsidiary company is not part of the company's ownership and is presented separately as minority shareholders' equity in the consolidated balance sheet. The subsidiary's current net profit or loss is the share of minority shareholders' equity is listed as "minority shareholder gains and losses" in the net profit item of the consolidated income statement. If the losses of subsidiaries shared by the minority shareholders exceed the part of the owners' equity of the subsidiaries at the beginning of the period, the excessive part will offset the minority shareholders' equity.

(3) Acquisition of subsidiary minority interests

The difference between the investment cost of the long-term equity obtained from acquisition of minority interests and the share of net assets in the subsidiary calculated continuously based on the increased shareholding percentage, and the difference between the disposal income obtained from the partial disposal of the subsidiary's equity investment without losing the control power and the share of net assets in the subsidiary calculated continuously based on the increased shareholding percentage should be adjusted and consolidated in the capital surplus in the consolidated balance sheet. Where the capital surplus falls short, the retained income should be adjusted.

(4) Treatment of loss of subsidiaries' control power

For loss of control over subsidiaries due to disposal of partial equity investment or other reasons, the remaining equity should be re-measured at the fair value on the date of loss of the control power; the sum of the consideration obtained from the disposal of stock equity and the fair value of the remaining equity, minus the sum of the share of the net assets' book value calculated continuously from the acquisition date according to the original shareholding percentage and the goodwill should be recorded in the investment gain of the current period of the loss of control power.

Other misc. incomes related to the equity investment in the original subsidiary is transferred to the current period's profit and loss when the control power is lost, except for the other misc. incomes generated by remeasurement and resetting of earning plan or change in the net assets by the invested party.

7. Recognition of cash and cash equivalents

Cash refers to cash on hand and deposits that can be used at any time for payment. Cash equivalent refers to the investments with short term, strong liquidity and small risk of value fluctuation that are held by the Group and easily converted into cash with known amount.

8. Foreign exchange business and foreign exchange statement translation

(1) Foreign currencies

Trades of the Group made in foreign currencies are translated into RMB basing on the spot exchange rate on the date when the trade is conducted.

At the balance sheet date, foreign currency items are translated on the spot exchange rate of the balance sheet date. The exchange differences caused by the difference in exchange rates on the balance sheet date and initial recognizing date or previous balance sheet date are included in the current profits and losses. Non-monetary items accounted in foreign currency and on historical costs are exchanged with the spot exchange rate on the transaction date. Non-monetary items accounted in foreign currency and on fair value are exchanged with the spot exchange rate on the determination date of the fair value. The exchange difference between the accounting standard-currency amount and the original accounting standard-currency amount are included in the current profits and losses.

(2) Translation of foreign exchange statement

On the balance sheet date, when foreign currency financial statements of overseas subsidiaries are converted, the assets and liabilities items in the balance sheet are converted using the spot exchange rate on the balance sheet date. The shareholders' equity items are calculated as "undistributed profits", except for other items. The spot exchange rate on the date of occurrence is used for conversion.

The income and expense items in the income statement are translated using the exchange rate that is determined by the system's reasonable method and approximate to the spot exchange rate on the transaction date.

All items in the cash flow statement are converted according to the exchange rate that is determined by the system's reasonable method and approximate to the spot exchange rate on the day the cash flow occurs. The impact of changes in exchange rates on cash is used as a reconciliation item, which is separately presented in the cash flow statement "Items Affecting Exchange Rate Movements on Cash and Cash Equivalents".

The difference arising from the translation of the financial statements is reflected in the "Other comprehensive income" item under the shareholders' equity item in the balance sheet.

When foreign operations are disposed of and the control rights are lost, the difference in foreign currency statements related to the overseas operations that are listed in the shareholders' equity items in the balance sheet is transferred to the profit or loss for the current period, either in whole or in proportion to the disposal of the foreign operations.

9. Financial instrument

Financial instrument refers to a company's financial assets and contracts that form other units of financial liabilities or equity instruments.

(1) Recognition and derecognition of financial instrument

The Group recognizes a financial asset or liability when it becomes one party in the financial instrument contract.

Financial asset is derecognized when:

- (1) The contractual right to receive the cash flows of the financial assets is terminated;
- (2) The financial asset is transferred and meets the following derecognition condition.

When partial or all of the current responsibilities attached to such financial liabilities, the partial or all of the financial liabilities are derecognized. When the Group (debtor) and creditor enter into an agreement to replace the existing financial liabilities by undertaking new financial liabilities and the contract terms for the new financial liabilities are essentially different from those for the existing one, the existing financial liabilities will be derecognized and new financial liabilities will be recognized.

Financial asset transactions in regular ways are recognized and de-recognized on the transaction date.

(2) Classification and measurement of financial assets

Financial assets of the Group are categorized as: financial assets measured at fair value with variations accounted into current income account, receivables and financial assets available for sales. Financial assets are measured at the fair value at the initial recognition.

For financial assets measured at fair value with variations accounted into current income account, related transaction expenses are accounted into the current income. For other financial assets, the related transaction expenses are accounted into the initial recognized amounts.

Financial assets measured at fair value with variations accounted into current income account

It includes transactional financial assets and financial assets measured by fair value and with variations accounted into current gain/loss account at initial recognition. The financial assets are further measured by fair value with the gain/loss created by variations in fair value and related dividends and interest accounted into the current gain/loss account.

Receivables

Receivables refer to non-derivative financial assets without quotations but with fixed recoverable amount or can be confirmed, including receivable notes, receivable accounts and other receivables (Note V. 10). Receivables adopt the effective interest method and are further measured by amortized cost. Gain/loss generated at final recognition, impairment or amortization is accounted into the current gain/loss account.

Sellable financial assets

Sellable financial asset refers to those sellable non-derivate financial assets recognized initially and financial assets other than the above-mentioned types of financial assets. Sellable financial assets are further measured by fair value and the premium/discount is amortized by the effective interest method and recognized as interest income. Other than the exchange difference of impairment loss and foreign exchange monetary financial assets, which is recognized as current gain and loss, the variations in fair value of sellable financial assets is recognized as other comprehensive gain. When it is derecognized and transferred out, it is accounted into the current gain/loss account. Dividends and interest income related to sellable financial assets are accounted into the current gain/loss account.

Equity instrument investment without quotation in an active market and whose fair value cannot be reliably measured and derivative financial assets that are linked to the equity instrument and that need to be settled through delivery of the equity instruments are measured by costs.

(3) Classification and measurement of financial liabilities

The Group's financial liabilities are mainly other financial liabilities

Other financial liabilities adopt the effective interest method and are further measured by amortized cost. Gain/loss generated at final recognition or amortization is accounted into the current gain/loss account.

Differences between financial liabilities and equity instruments

Financial liabilities is liabilities that meet one of the following conditions:

- (1) contractual obligation to deliver cash or other financial assets to other parties.
- (2) under potential adverse conditions, the contractual obligation to exchange financial assets or financial liabilities with other parties.
- (3) In the future, a non-derivative instrument contract that can be settled with the company's own equity instruments will be used, and the company will deliver a variable amount of its own equity instruments based on the contract.
- (4) Derivatives contracts that may be settled with the company's own equity instruments or may be settled in the future, except for a derivative contract that exchanges a fixed amount of its own equity instruments for a fixed amount of cash or other financial assets.

Equity instruments refer to contracts that prove the ownership of a company's remaining equity in assets after deducting all liabilities.

If the Group cannot unconditionally avoid the performance of a contractual obligation by delivering cash or other financial assets, the contractual obligation is in line with the definition of a financial liability.

If a financial instrument is required to be settled with or can be settled with the Group's own equity instruments, the Group's own equity instrument used to settle the instrument needs to be considered as a substitute for cash or other financial assets or for the holder of the instrument to enjoy the remaining equity in the assets after all liabilities are deducted. If it is the former, the instrument is the financial liabilities of the Group; if it is the latter, the instrument is the equity instrument of the Group.

(4) Derivative financial instruments and embedded derivatives

The Group's derivative financial instruments include futures contracts. It is initially measured at the fair value at the date of signing the derivative transaction contract and is subsequently measured at its fair value. Derivative financial instruments with a positive fair value are recognized as asset, and instruments with a negative fair value are recognized as liabilities. Any gains or losses arising from changes in fair value that do not meet the hedge accounting requirements are directly charged to profit or loss for the current period.

For hybrid instruments containing embedded derivatives, if there are no financial assets or financial liabilities that are not designated as measured at fair value and their changes are recorded as profit or loss for the current period, there is no close relationship between the embedded derivatives and the principal contract in terms of economic characteristics and risks with same conditions as embedded derivatives, the separately existing tools are in accordance with the definition of the derivatives, the embedded derivatives are split from the hybrid tools and processed as separate derivative financial instruments. If it is not possible to separately measure the

embedded derivative instrument at the time of acquisition or on the subsequent balance sheet date, the entire hybrid instrument is designated as financial asset or financial liabilities that are measured at its fair value and whose changes are recorded as profit or loss for the current period.

(5) Fair value of financial instrument

See Note III. 10 for the recognition of fair value of financial assets and liabilities.

(6) Impairment of financial assets

Financial assets measured at fair value with variations accounted into current income account. The Group checks the book value of financial assets on the balance sheet date. Impairment provision will be made in case of objective evidence proving impairment to the financial assets. Objective evidence proving impairment to the financial assets refers to events actually occur after the initial recognition of financial assets, with influence on the estimated future cash flows of the financial assets and can be reliably measured by the Group.

Objective evidence proving impairment to the financial assets includes the following observable situations:

- ① Severe financial difficulties in the issuer or debtor;
- ② The debtor violates the contract or defaults or delays the payment of the interest or principal;
- ③ The Group makes compromise to the debtor with financial difficulties due to economic or legal consideration;
- ④ The debtor may go bankruptcy or conduct other financial reorganization;
- ⑤ The financial assets can no longer be traded in an active market due to material financial difficulties in the issuer;
- ⑥ It cannot be recognized whether the cash flow of an asset in a group of financial assets has decreased. However, according to open data, it can be evaluated that the estimated future cash flow of the group of financial assets has decreased and the decrease can be measured, including:

- The payment capacity of the debtor of the financial assets continues weakening;

- Situations that may lead to the payment failure of the financial assets happen in the country or region where the debtor is located;

⑦ Significant adverse changes occurs to the technical, market, economic or legal environment of the debtor, leading to that the equity instrument investor may not be able to recover the investment;

⑧ Other objective evidence that can prove the impairment of the financial assets

Financial assets measured at amortized cost

If there is objective evidence proving impairment to the financial assets, the book value of the financial assets will be written down to the present value of the estimated future cash flow (excluding undiscovered future credit loss). The write-down amount is accounted into the current gain/loss account. The present value of the estimated future cash flow is determined by the original effective discount rate with the value of the guarantee considered.

Conduct impairment test separately for major financial assets. If there is objective evidence suggesting impairment, determine the impairment loss and account it into the current gain/loss account. For financial assets with insignificant single amounts, impairment tests are conducted separately or included in the portfolio of financial assets with similar credit risk characteristics. Test financial assets without impairment separately (including major and minor financial assets) and conduct impairment test in the financial assets combination with similar credit risk features. Conduct impairment test for financial assets separately recognized as impaired excluding financial assets combination with similar credit risk features.

After the Group recognizes impair loss to financial assets measured by amortized cost, if there is object evidence suggesting that the value of the financial assets is restored objectively due to an event after the loss, the recognized impairment loss can be reversed and accounted into the current gain/loss account. The book value after the reversal must not exceed the amortized cost of the financial assets on the reversal date assuming that no impairment provision was made.

(7) Transfer of financial assets

The transfer of financial assets refers to transferring or delivering the financial assets to another party (receiver) other than the issuing party of the financial assets.

Recognition of the financial asset is terminated as soon as all of the risks and rewards attached to the financial asset have been transferred to the receiver. Whereas if all of the risks and rewards attached to the financial assets are reserved, recognition of the financial asset shall not be terminated.

When the Group neither transfers nor reserve almost all risks and rewards attached to the financial assets, it will be handled as: When the controlling power over the financial asset is given up, the financial assets will be derecognized and the generated assets and liabilities will be recognized; when the controlling power is not given up, financial asset and related liability shall be recognized according to the extend the Company is involving in the financial asset.

(8) Deduction of financial assets and liabilities

When the Group has the legal right to deduct recognized financial assets and liabilities, can exercise the legal right, and the Group plans to settle them in net, liquidate and repay the financial assets and liabilities, the amount after the deduction will be presented in the balance sheet. Exception for the deducted part, other financial assets and liabilities are separately presented in the balance sheet.

10. Receivable note and accounts receivable

(1) Receivables with major individual amount and bad debt provision provided individually

Judging basis or standard of major individual amount	For the current year, the Company recognizes project receivables and receivable notes of over RMB10 million (inclusive) as “individual receivable with large amount” while recognizes product receivables and receivable notes of over RMB2 million (included) as “individual receivable with large amount” and other receivables over RMB1 million (included) as “individual receivable with large amount”.
Provision method for account receivable with major individual amount and bad debt provision provided individually	The Company performs impairment examination individually on each large amount receivables, and recognizes impairment and provides bad debt provision when the impairment is recognized based on objective evidence. Those not impaired are accounted along with the minor amount receivables and recognized in risk groups.

(2) Recognition and providing of bad debt provisions on groups

Group	Method of bad debt provision
Account age	Aging method
Receivables within consolidation, receivables of real estate property sold with bank mortgage and accounts and receivable notes between the Company and partners	Other method

Note: According to the name of the specific combination, fill in the bad debt provision accrual method for each combination.

Receivables adopting the aging method in the group:

√ Applicable □ Inapplicable

Age	Providing rate for receivable account	Providing rate for other receivables
Within 1 year (inclusive)	1.00%	3.00%
1-2 years	5.00%	10.00%
2-3 years	20.00%	30.00%
3-4 years	30.00%	50.00%
4-5 years	50.00%	80.00%
Over 5 years	100.00%	100.00%

Receivables adopting the balance percentage method in the group

□ Applicable √ Inapplicable

Group	Providing rate for receivable account	Providing rate for other receivables

Receivables adopting other methods in the group

□ Applicable √ Inapplicable

Group	Providing rate for receivable account	Providing rate for other receivables

Note: Fill in the specific combination name and accrual ratio.

(3) Receivables with not major individual amount and bad debt provision provided individually

The Company must comply with disclosure requirements of the Shenzhen Stock Exchange Industry Information Disclosure Guideline No.6 – Listed Companies Engaged in Decoration Business.

Reasons for separate bad debt provision	Long account age or deterioration of customer creditability
Method of bad debt provision	According to the difference between the present value of future cash flow and the book value

11. Inventories

Whether the Company needs to comply with disclosure requirements of special industries

Yes

Property development and decoration industries

(1) Classification of inventories

The Company's inventories include purchased materials, raw materials, low-value consumables, OEM materials, products in process, semi-finished goods, finished goods, inventory, development products, and construction in process.

(2) Pricing of delivering inventory

Inventories are measured at cost when procured. Raw materials, products in process and commodity stocks in transit are measured by the weighted average method.

Construction contracts are measured by the effective cost, including direct and indirect expenses generated before the contracts are

fulfilled. Costs generated and recognized accumulatively by construction in process and settled payment are listed in the balance sheet as offset net amounts. The excessive part of the sum of the generated costs and recognized gross profit (loss) over the settled payment is listed inventories; the excessive part of the settled payment over the sum of the generated costs and recognized gross profit (loss) is listed as the prepayment received.

Travel and bidding expenses generated by execution of contracts, if they can be separated and reliably measured and it is likely to enter into contracts, are accounted as the contract cost when the contracts are entered into; or into the current gain/loss account if the conditions are not met.

The development costs include land transfer payment, infrastructure and facility costs, installation engineering costs, borrows before completion of the development and other costs during the development process. The special maintenance funds collected in the first period are included in the development overheads. The actual costs of the development product is priced using the separate pricing method.

(3) Recognition of inventory realizable value and providing of impairment provision

The realizable net value of inventory is the estimated sales prices of the inventory less costs to be incurred until the completion, estimated sales expense and taxes. The realizable net value of inventory should be recognized based on solid evidence with the purpose of the inventory and after-balance-sheet-date events taken into consideration.

If the inventory cost is higher than the realizable net value on the balance sheet date, the inventory depreciation provision should be made. The Group makes inventory depreciation provision for separate or a type of inventory. If factors affecting the inventory value disappear on the balance sheet date, the depreciation provision made should be reversed to the original value.

(4) Inventory system

The Group uses perpetual inventory system.

(5) Amortizing of low-value consumables and packaging materials

Low-value consumables are amortized on on-off amortization basis at using.

12. Long-term share equity investment

The Group's long-term equity investment includes control on invested entities and significant impacts on equity investment. Invested entities on which the Group has significant impacts are associates of the Group.

(1) Recognition of initial investment costs

Long-term equity investment generated by enterprise merger: for long-term equity investment obtained by merger of enterprises under common control, the obtained share of book value of the interests of the merged party's owner in the consolidate financial statements on the merger date is the investment costs; for long-term equity investment obtained by merger of enterprises not under common control, the merger cost is the investment cost.

For long-term equity investment obtained by cash, the actually paid consideration is the initial investment cost.

(2) Subsequent measurement and recognition of gain/loss

Investments by the Company in subsidiaries are calculated using the cost method; in joint ventures are calculated using the equity method.

For the long-term equity investment measured on the cost basis, except for the announced cash dividend or profit included in the practical cost or price when the investment was made, the cash dividends or profit distributed by the invested entity are recognized as

investment gains in the current gain/loss account.

When the equity method is used to measure long-term equity investment, the investment cost will not be adjusted if the investment cost of the long-term equity investment is larger than the share of fair value of the recognizable assets of the invested entity. When it is smaller than the share of fair value of the recognizable assets of the invested entity, the book value will be adjusted and the difference is included in the current gains of the investment.

When the equity method is used, the current investment gain is the share of the net gain realized in the current year that can be shared or borne, recognized as investment gain and other misc. income. The book value of the long-term equity investment is adjusted accordingly. The book value of the long-term equity investment should be accordingly decreased based on the share of profit or cash dividend announced by the invested entity; according to other changes in the owner's equity except for net profit and loss, other misc income and profit distribution of the invested entity, adjust the book value of the long-term equity investment and record it in the capital surplus (other capital surplus). When the share of the net gains that can be enjoyed is recognized, it is recognized after the net profit of the invested entity is adjusted based on the fair value of the recognizable assets of the invested entity according to the Company's accounting policies and accounting period.

Where substantial influence on invested entities is imposed or joint control is implemented due to increase in investment, the sum of the fair value of the original equity and increased investment on the conversion date is the initial investment cost under the equity method. The difference between the fair value and book value of the original equity on the conversion date and the accumulative change in the fair value originally accounted in other misc. income should be transferred into the profit and loss of the current period using the equity method.

Where joint control or substantial influence on invested entities is lost due to disposal of part of investment, the remaining equity after the disposal should be treated according to the Enterprise Accounting Standard No.22 – Recognition and Measurement of Financial Instruments from the date of losing the joint control or substantial influence. The difference between the fair value and book value should be accounted the profit and loss of the current period. For other misc. incomes of original share equity investment determined using the equity method, when the equity method is no longer used, it should be treated based on the same basis of the treatment of related assets or liability of the invested entities; the other owners' interests related to the original share equity investment should be transferred to gain/loss of the current period.

Where the disposal of part of the equity investment leads to loss of control on the invested entity, and the remaining equity after the disposal can impose common control or significant impacts on the invested entity, use the equity method and make adjustment as if the equity method was used when the remaining equity was acquired. If not, perform accounting treatment according to provisions in the Enterprise Accounting Standard No.22 – Recognition and Measurement of Financial Tools. The difference between the fair value and book value on the date of losing control should be transferred into the profit and loss of this period.

Where the Company's shareholding decreases and the Company loses the control due to increased investment by another investor, but the Company can still impose common control or significant impacts on the invested entity, the share of increased net assets of the invested entity that can be shared by the Company should be calculated based on the new shareholding, the difference between the net assets and original book value of the original long-term equity investment should be recorded in the profit and loss of this period and adjusted as if equity method was used when it was acquired according to the new shareholding proportion.

Internal transaction gain not realized between the Company and affiliates is measured according to the shareholding proportion and the investment gains is recognized after deduction. The unrealized internal transaction loss between the Company and the invested entity is the impairment loss of transferred assets and should not be written off.

(3) Basis for recognition of major influence on invested entities

Major influence refers to the power to participate in decision-making of financial and operation policies of a company, but cannot control or jointly control the making of the policies. When considering whether the Company can impose significant impacts on the invested entity, impacts of conversion of shares with voting rights held directly or indirectly by the investor and voting rights that can be executed in this period held by the investor and other party into shares of the invested entity should be considered.

When Company directly or indirectly holds 20% (inclusive) but less than 50% of the shares with voting rights of the invested entity, it is generally considered that the Company can impose significant impacts unless there is clear evidence proving that the Company shall not participate in the production and business decision making of the company; when the Company holds less than 20% of the shares with voting rights, it is generally not considered that the Company has significant impacts on the invested entity, unless there is clear evidence proving the contrary.

(4) Equity investment held for sale

For the remaining equity investments not classified as assets held for sale, the equity method is adopted for accounting treatment.

Equity investments classified as held for sale to associates that are no longer eligible to hold classified assets for sale are retrospectively adjusted using the equity method starting from the date that they are classified as held for sale.

(5) Impairment examination and providing of impairment provision

See Note V. 18 for the assets impairment provision method for investment in subsidiaries and joint ventures.

13. Investment real estates

Measuring mode of investment real estate

Measured at cost

Depreciation or amortization method

Investment real estates of the Group are buildings leased.

For investment real estates with an active real estate transaction market and the Group can obtain market price and other information of same or similar real estates to reasonably estimate the investment real estates' fair value, the Group will use the fair value mode to measure the investment real estates subsequently. Variations in fair value are accounted into the current gain/loss account.

The fair value of investment real estate is determined with reference to the current market prices of same or similar real estates in active markets; when no such price is available, with reference to the recent transaction prices and consideration of factors including transaction background, date and district to reasonably estimate the fair value; or based on the estimated lease gains and present value of related cash flows.

For investment real estate under construction (including investment real estate under construction for the first time), if the fair value cannot be reliably determined but the expected fair value of the real estate after completion is continuously and reliably obtained, the investment real estate under construction is measured by cost. When the fair value can be measured reliably or after completion (the earlier one), it is measured at fair value. For an investment real estate whose fair value is proven unable to be obtained continuously and reliably by objective evidence, the real estate will be measured at cost basis until it is disposed and no residual value remains as assumed.

The difference of the proceeds from sales, transfer, retirement or destruction of investment real estates with book value and related taxes deducted is accounted into the current gain/loss account.

Investment real estate that use the cost method for further measurement adopt the straight-line depreciation provision method. See Note V. 18 for the provision method.

14. Fixed assets

(1) Recognition conditions

Fixed assets is defined as the tangible assets which are held for the purpose of producing goods, providing services, lease or for operation & management, and have more than one accounting year of service life. The fixed assets can only be recognized when economic interests related to the fixed assets are very likely to flow into the company and the costs of the fixed assets can be reliably measured. The Group measures fixed assets at the actual costs when the fixed assets are obtained

(2) Depreciation method

Type	Depreciation method	Service year	Residual rate	Annual depreciation rate %
Houses & buildings	Average age	35-50	10%	1.8%-2.57%
Mechanical equipment	Average age	10	10%	9%
Transportation facilities	Average age	5	10%	18%
Electronics and other devices	Average age	5	10%	18%
PV power plants	Average age	20	5%	4.75%

15. Construction in process

Whether the Company needs to comply with disclosure requirements of special industries

Yes

Property development and decoration industries

The Group recognizes the cost of construction in process according to the actual construction expense, including necessary engineering expenses, borrowing costs to be capitalized before the engineering reaches the preset service condition and other related costs.

Construction in process will be transferred to fixed assets when it reaches the preset service condition.

See Note V. 18 for the provision method for construction in process.

16. Borrowing expenses

(1) Recognition principles for capitalization of borrowing expenses

Borrowing expenses occurred to the Group that can be accounted as purchasing or production of asset satisfying the conditions of capitalizing, are capitalized and accounted as cost of related asset. Borrowing expenses start to be capitalized when all of the followings are satisfied:

(1) Asset expense has already occurred. Asset expenses include cash payment, non-cash asset transferring, or undertaking of debt with interest done for purchasing or producing of assets;

(2) The borrowing expense has already occurred;

(3) Purchasing or production activity, which is necessary for the asset to reach the useful status, has already started.

(2) During borrowing expense capitalization

When the asset satisfying the capitalizing conditions has reached its usable or sellable status, capitalizing of borrowing expenses shall be terminated. Borrowing expenses incurred after assets that meet capitalization conditions reach the service or sales conditions are accounted into the current gain/loss account according to the actual amounts.

If the construction or production of assets satisfying the capitalizing conditions is suspended abnormally for over 3 months, capitalizing of borrowing expenses shall be suspended. During the normal suspension period, borrowing expenses will be capitalized continuously.

(3) Calculation of the capitalization amount of borrowing expense

Interest expenses generated by special borrowings less the interests income obtained from the deposit of unused borrowings or investment gains from temporary investment is capitalized; the capitalization amount for general borrowing is determined based on the capitalization rate which is the exceeding part of the accumulative assets expense over weighted average of the assets expense of the special borrowing/used general borrowing. The capitalization ratio is the weighted average interest rate of general borrowings.

In the capitalization period, the exchange difference of special borrowings in foreign currencies should be fully capitalized. The exchange difference should be recorded in the profit and loss of this period.

17. Intangible assets

(1) Pricing method, service life and depreciation test

The Group's intangible assets include land using rights, trademarks, patent, special technologies, and software.

Intangible assets are initially measured at costs and the useful life will be determined when obtained. Where the useful life is limited, the intangible assets will be amortized within the predicted useful life by using the amortization method that can reflect predicted realization way of the economic benefit of the assets; whether the realization way cannot be reliably confirmed, use the straight-line method. If the useful life is uncertain, the intangible assets are not amortized.

Intangible assets with limited useful life are amortized as followings:

Type	Useful life	Basis of amortization
Land using right	Beneficial age	Average age
Trademarks and patents	10	Average age
Proprietary technology	10	Average age
Software	5, 10 years	Average age

At the end of each year, the Group will reexamine the useful life and amortization basis of intangible assets with limited useful life. If they change, adjust the prediction and handle it according to accounting estimate changes.

On the balance sheet day, if the intangible assets become unlikely to bring future economic benefits for the Group, transfer all the intangible assets' book value into the current gain/loss account.

See Note V. 18 for the impairment provision method for intangible assets.

(2) Accounting policies for internal R&D expenses

The Group divides internal R&D project expenses into research and development expenses.

The research expenses are accounted the current gain/loss account.

Development expenses can only be capitalized when the following conditions are satisfied: the technology is feasible for use or sales; there is the intention to use or sell the intangible assets; it can be proven that the product generated by the intangible assets is demanded or the intangible assets in demanded; if the intangible is used internally, it can be proven that it is useful; with necessary technical and financial resources and other resources to complete the development of the intangible assets and the intangible assets can be used or sold; the development expense can be reliably measured. If not, the development expense is accounted into the current gain/loss account.

If a research project meets the above-mentioned conditions and passes the technical and economic feasibility study, the project will enter the development stage.

Expenses in the development stage capitalized are listed as development expense on the balance sheet and transferred to intangible assets when the project reaches the useful condition.

18. Assets impairment

The Group uses the cost mode to continue measuring the assets impairment to investment real estatment, fixed assets construction in progress, intangible assets and goodwill (except for the inventories, investment real estate measured by the fair value mode, deferred income tax assets and financial assets). The method is determined as follows:

The Group judges whether there is a sign of impairment to assets on the balance sheet day. If such sign exists, the Group estimates the recoverable amount and conducts the impairment test. Impairment test is conducted annually for goodwill generated by mergers and intangible assets that have not reached the useful condition no matter whether the impairment sign exists.

The recoverable amount is determined by the higher of the net of fair value minus disposal expense and the present value of the predicted future cash flow. The Group estimates the recoverable amount on the individual asset item basis; whether it is hard to estimate the recoverable amount on the individual asset item basis, determine the recoverable amount based on the asset group that the assets belong to. The assets group is determined by whether the main cash flow generated by the group is independent from those generated by other assets or assets groups.

When the recoverable amount of the assets or assets group is lower than its book value, the Group writes down the book value to the recoverable amount, the write-down amount is accounted into the current income account and the assets impairment provision is made.

For goodwill impairment test, the book value of goodwill generated by mergers is amortized through reasonable measures since the

purchase day to related asset groups; those cannot be amortized to related assets groups are amortized to related combination of asset groups. The related asset groups or combination of asset groups refer to those that can benefit from the synergistic effect of mergers and must not exceed to the reporting range determined by the Group.

When the impairment test is conducted, if there is sign of impairment to the asset group or combination of asset groups related to goodwill, first perform impair test for asset group or combination of asset groups without goodwill and calculate the recoverable amount and recognize the related impairment loss. Then conduct impairment test on those with goodwill, compare the book value with recoverable amount. If the recoverable amount is lower than the book value, recognize the impairment loss of the goodwill.

Once recognized, the asset impairment loss cannot be written back in subsequent accounting period.

19. Long-term amortizable expenses

The Group's long-term amortizable expenses are measured at the actual costs and amortized averagely based on the beneficial term. For long-term amortizable expenses that are not beneficial in the subsequent account periods, the residual value is fully accounted into the current gain/loss account.

20. Staff remuneration

(1) Accounting of operational leasing

The Group pays for the medical insurance, job injury insurance and breeding insurance and housing fund according to employees' wages and bonus and recognizes them as liabilities, which are recorded into the profit and loss or related assets costs in the current period. If the liabilities cannot be fully paid within 12 months upon the end of the report period in which the employees provide service, and the financial impacts are substantial, the liabilities should be measured at the discounted amount.

(2) Accounting of post-employment welfare

The post-employment welfare of the Group is a defined plan, which means that the Company does not need to assume any responsibility after making fixed contribution to an independent fund. The defined plan includes basic pension and unemployment insurance. The contribution of the plan is recognized as liabilities and recorded in the profit and loss of this period or related assets costs.

(3) Accounting of dismiss welfare

Where the Group provides dismiss welfare for employees, the staff remuneration liabilities is recognized on the earlier one of the following two date: when the Group cannot cancel the dismiss welfare provided for termination of employment or layoff; when the Group recognizes the costs or expenses of reorganization related to the payment of dismiss welfare.

21. Anticipated liabilities

When responsibilities occurred in connection to contingent issues, and all of the following conditions are satisfied, they are recognized as expectable liability in the balance sheet:

- (1) This responsibility is a current responsibility undertaken by the Group;
- (2) Execution of this responsibility may cause financial benefit outflow from the Group;
- (3) Amount of the liability can be reliably measured.

Expected liabilities are initially measured at the best estimation on the expenses to exercise the current responsibility. The book value of expected liability is revised at balance sheet day, and adjustment will be made to reflect current best estimation.

22. Revenue

Whether the Company needs to comply with disclosure requirements of special industries

Yes

Property development and decoration industries

The Company must comply with disclosure requirements of the Shenzhen Stock Exchange Industry Information Disclosure Guideline No.2 – Listed Companies Engaged in Solid Mineral Resources Related Business.

(1) General principles

1. Sales of goods

When all of the following conditions are satisfied, the sales of goods are recognized as sales income according to the contract amount received or receivable from the buyer: (1) Main risks and rewards attached to the ownership of the goods have been transferred to the buyer; (2) No succeeding power of administration or effective control is reserved which are usually attached to ownership; (3) Amount received can be reliably measured; (4) Related financial benefit may inflow to the Company; (5) Relative costs, occurred or will occur, can be reliably measured.

2. Providing of labor service

If they are not in the same year, then use the estimation on percentage basis when it is possible.

The completion percentage is the costs occurred on the total cost.

The reliable estimation of the result of providing of labor service must meet the following conditions: A. the revenue can be reliably measured; B. the economic benefit is very likely to flow into the company; C. the completion can be determined reliably; D. costs incurred or will be incurred can be reliably measured.

If the result cannot be reliably estimated, use the service cost amount of the compensation obtained or will be obtained to recognize the revenue of the providing of labor service and recognize the incurred labor service cost as the current expense. If no compensation can be obtained for incurred labor service cost, no revenue can be recognized.

3. Demising of asset using rights

The revenue is recognized when the financial benefit in connection with the demising of asset using right was received and the amount can be reliably measured.

4. Construction contracts

On the balance sheet day, the Group recognizes the contract income and costs using the completion percentage method if the result of the construction contract can be reliably estimated. If not, such contracts are treated differently. If the contract cost can be recovered, the revenue is recognized according to the actual contract costs that can be recovered and the contract cost is recognized as the current expense; if not, the contract cost is recognized as the current expense and no revenue is recognized.

If the estimated total costs exceed the total revenue, the Group recognizes the estimated loss as the current expense.

The completion percentage is determined by the share of the costs incurred in the total cost.

The reliable estimation of the result of a construction contract must meet the following conditions: A. the revenue can be reliably

measured; B. the economic benefit is very likely to flow into the company; C. the completion cost can be clearly distinguished and determined reliably; D. the completion and costs that will be incurred for completion of the contract can be reliably recognized.

(2) Specific revenue recognition method

① Construction contracts

Metro screen door projects of the Company and Shenzhen Fangda Automatic System, and curtain wall project of FangdaJianke are individual construction contracts. They are accounted by the following means:

Construction contracts completed within a fiscal year are recognized for their income and cost upon completion.

Income and expenses of the construction contracts carried over-year are recognized on percentage basis at balance sheet day when all of the following conditions are satisfied: contract income can be reliably measured, relative financial benefit can inflow to the Company; progress of the project and costs to complete the contract can be reliably recognized; cost occurred to complete the contract can be clearly distinguished and reliably measured, which enables comparing of actual cost with predicted cost.

Contract costs are direct and indirect expenses occurred since the date when the contract is engaged till the completion day. The competition percentage is determined by the share of the costs incurred in the total cost.

Construction contracts completed in current term are recognized for income according to the actual total income of the contract less income recognized in previous terms; meanwhile, the total costs of the contract less costs recognized in previous terms are recognized as current contract costs. If the total contract cost is predicted to be greater than the predicted total income, the predicted loss shall be recognized as current cost instantly.

Parts of the curtain wall project under FangdaJianke are outsourced, and administrative fees are collected at the agreed rate. For these construction contracts, income will be recognized when ongoing payment for the project is received and corresponding costs are transferred.

② Sales product

Revenue of products for domestic sales is recognized when the Group delivers the products and receives the sales payment or obtains the payment voucher; revenue for products for overseas sales is recognized at departure of the products.

③ Real estate sales

Income from real estate sales is recognized when the contract is signed and performed, project is developed and completed with the record for the completion acceptance, the handover procedure is completed or property is deemed accepted by the customer as per the property sales contract, the payment is received or it is believed that the payment can be received, and the cost can be measured reliably.

23. Government subsidy

(1) Judgment basis and accounting treatment of assets-related government subsidy

Government subsidy is only recognized when the required conditions are met and the subsidy is received.

When a government subsidy is monetary capital, it is measured at the received or receivable amount. None monetary capital are measured at fair value; if no reliable fair value available, recognized at RMB1.

Government subsidies related to assets are obtained by the Group to purchase, build or formulate in other manners long-term assets; or subsidies related to benefits.

For subsidies that can formulate long-term assets without clear government regulations, the part of the subsidies corresponding to the asset value will be measured as assets-related government subsidies, while the rest of them will be measured as benefit-related government subsidies. Where it is difficult to distinguish them from each other, the whole subsidies will be measured as

benefit-related government subsidies.

If the asset-related government subsidy is recognized as deferred gain, should be recorded in gain and loss in the service life.

(2) Judgment basis and accounting treatment of return-related government subsidy

If a government subsidy related to income is used to compensate for related costs or losses that have occurred, it shall be included in the current profit or loss or write-down related costs; if it is used to compensate for the related costs or losses in the subsequent period, it shall be included in the deferred income. During the period in which the related cost, expense or loss is recognized, it is included in the current profit or loss or the relevant cost is written off. Government subsidy measured at the nominal amount is accounted into current income account. The Group adopts a consistent approach to the same or similar government subsidies.

Government subsidy related to routine operations should be recorded in other gains or offset related cost. Government subsidy not related to routine operations should be recorded in non-operating income or expense.

When a confirmed government subsidy needs to be returned, the book value of the asset is adjusted against the book value of the relevant asset at initial recognition. If there is a related deferred income balance, the book balance of the related deferred income is written off and the excess is credited to the current profit or loss; In other cases, it is directly included in the current profit and loss.

The policy-based preferential loan obtained has interest subsidy. If the government allocates the interest-subsidy funds to the lending bank, the loan amount actually received will be used as the entry value of the loan, and the borrowing cost will be calculated based on the loan principal and policy-based preferential interest rate. If the government allocates the interest-bearing funds directly to the Group, discount interest will offset the borrowing costs.

24. Differed income tax assets and differed income tax liabilities

Income tax includes current and deferred income tax. Except for the adjustment goodwill generated by mergers or deferred income tax related to transactions or events directly accounted into the owners' equity, income tax is accounted as income tax expense into the current gain/loss account.

The Group uses the temporary difference between the book value of the assets and liabilities on the balance sheet day and the tax base and the liabilities method to recognize the deferred income tax.

The taxable temporary difference recognizes the related deferred income tax liabilities, unless the taxable temporary difference is created by the following transactions:

- (1) Initial recognition of goodwill, or of assets or liabilities generated in transactions with the following features: the transaction is not a merger and the transaction does not affect the accounting profit or taxable proceeds;
- (2) For taxable temporary difference related to investment in subsidiaries and affiliates, the reversal timing for the temporary difference can be controlled and the difference is unlikely to be reversed in the foreseeable future.

For deductible temporary difference, deductible loss and tax deduction that can be accounted in subsequent years, the Group recognizes the incurred deferred income tax assets to the extent to the future income tax proceeds that is very likely to be received for deducting deductible temporary difference, deductible loss and tax deduction, unless the deductible temporary difference is generated in following transactions:

(1) the transaction is not a merger and the transaction does not affect the accounting profit or taxable proceeds;

(2) for the taxable temporary difference related to investment in subsidiaries and affiliates, the corresponding deferred income tax assets are recognized when the following condition is met: the temporary difference is very likely to be reversed in the foreseeable future and it is very likely to receive the taxable proceeds that can be used to deduct the deductible temporary difference.

On the balance sheet day, the Group measures the deferred income tax assets and liabilities with the tax rate applicable during the predicted period during which the assets are recovered or the liabilities are paid off and reflects the income tax influence of the assets recovery and liabilities repayment way on the balance sheet day.

On the balance sheet day, the Group re-examines the book value of the deferred income tax assets. If it is unlikely to have adequate taxable proceeds to reduce the benefits of the deferred income tax assets, less the deferred income tax assets' book value. When there is adequate taxable proceeds, the lessened amount will be reversed.

25. Leasing

(1) Accounting of operational leasing

The Group transfers all the risks and rewards attached to the asset at substantially transferred to the lessee, it is recognized as financial leasing, and the others are operational leasing. The Group's lease forms are mainly operating leases.

(1) The Group is the lessor

Rentals from operational leasing are recognized as current gains on straight basis to the periods of leasing. Initial direct expenses are recorded to current income account.

(2) The Group is the lessee

Rentals in operational leasing are recorded to relative capital cost or current income account on straight basis to the periods of leasing. Initial direct expenses are recorded to current income account.

26. Other significant accounting policies and estimates

The Group continuously reviews significant accounting judgment and estimate adopted for the reasonable forecast of future events based on its historical experience and other factors.

Significant accounting judgment and assumptions that may lead to major adjustment of the book value of assets and liabilities in the next accounting year are listed as follows:

(1) Goodwill impairment

The Group judges whether there is impairment to goodwill at least annually. This required valuation of the use value of the asset groups with goodwill. While estimating the use value, the Group needs to estimate the cash flow from the asset group in the future and choose the proper discount rate to calculate the present value of the future cash flow.

(2) Estimate of fair value

The Group uses fair value to measure investment real estate and needs to estimate the fair value of investment real estate at least quarterly. This requires the management to reasonably estimate the fair value of the investment real estate with the help of valuation experts.

(3) Deferred income tax assets

If there is adequate taxable profit to deduct the loss, the deferred income tax assets should be recognized by all the unused tax loss. This requires the management to make a lot of judgment to forecast the time and amount of future taxable profit and determine the amount of the deferred tax assets based on the taxation strategy.

(4) Construction contracts

The Group recognizes income based on the completion of individual construction contract. The management determines the completion percentage based on the actual cost in the total budget and forecasts the contract income. The starting and completion dates of construction contracts fall in different account periods. The Group will review and adjust contract income and cost estimation in budgets (if the actual contract income is less than the estimate or actual contract cost, contract estimation loss provision will be made).

(5) Development cost

For property that has been handed over with income recognized, but whose public facilities have not been constructed or not been completed, the management will estimate the development cost for the part that has not been started according to the budget to reflect the operation result of the property sales.

(6) Accounting of hedging

When the hedge relationship begins, the Group specifies the hedge relationship in writing to specify the follow: risks management target and hedging strategy; nature of the hedged item and quantity; nature and quantity of hedging instruments, nature and identification of hedged risks; evaluation of the hedging effectiveness, including the economic relationship between the hedged item and hedging instrument, hedging ratio, analysis of the hedging ineffectiveness source; the beginning date of the specified hedging relationship.

Cash flow hedging

During the existence of the hedging relationship, the part of the cumulative gain or loss of the hedging instrument within the change to the current value of the cumulative cash flow of the hedged item is included into other misc. incomes. The part that is lower or larger than the cash flow change is included into the gain or loss of the current period.

When the hedging relationship ends and related inventory is recognized, the hedging instrument gain or loss recognized in “Other misc. income hedging reserve” will be transferred to “Raw materials”.

27. Major changes in accounting policies and estimates

(1) Changes in accounting policies

Applicable Inapplicable

Account policy changes and reasons	Approval procedure	Notes
------------------------------------	--------------------	-------

<p>According to the Notice of the Ministry of Finance on Revising the Format of the 2018 Annual General Financial Statements of the Company (Accounting 2018 No. 15) the original "Announceable Notes" and "Accounts Receivable" line items will be consolidated into the "balance sheet" in the balance sheet. "Notes receivable and accounts receivable"; the original "receivable interest" and "dividends receivable" items are merged into "other receivables"; the original "fixed assets clean-up" items are merged into "fixed assets"; the original "engineering material" item will be merged into "construction in progress"; the original "payable bills" and "payables" items will be consolidated into "payable bills payables and accounts payable" items; the original "payable interest" and "payable dividend" will be merged into "other receivables"; the original "special payables" item is merged into "long-term payables". In the income statement the "R&D expenses" are separated from the original "administrative expenses"; under the "finance expenses" line item the "interest expense" and "interest income" detailed items are separately listed; the original "re-measurement setting benefits" The change of the plan net debt or net assets is replaced by the "re-measurement of the change in the defined benefit plan"; the original "share under the equity method that cannot be reclassified into other comprehensive income of the investee and the profit and loss" is changed to "equity". Other comprehensive income that cannot be transferred to profit or loss under the law"; the original share of the other comprehensive income that is reclassified into profit or loss after the investee is changed to the other comprehensive income of the convertible profit and loss</p>	<p>13th meeting of the 8th Supervisory Committee</p>	
---	--	--

<p>under the equity method. In the statement of changes in owner's equity under the "internal transfer of shareholders' equity", item the original "transfer re-measurement of changes in net liabilities or net assets of defined benefit plans" was changed to "transfer of retained profit from change in set benefit program".</p>

2. Tax preference

(1) According to the Certification of High-tech Enterprise issued by Shenzhen Commission of Technological Innovation, Shenzhen Commission of Finance, Shenzhen National Tax Bureau, and Shenzhen Local Tax Bureau on 19.06.15, FangdaJianke was entitled to enjoy a tax preference of enterprise income tax of 15% for three years (2015-2017) since the qualifications were awarded.

(2) According to the Certification of High-tech Enterprise issued by Shenzhen Commission of Technological Innovation, Shenzhen Commission of Finance, Shenzhen National Tax Bureau, and Shenzhen Local Tax Bureau on 19.06.15, Fangda Decoration was entitled to enjoy a tax preference of enterprise income tax of 15% for three years (2015-2017) since the qualifications were awarded.

(3) According to the Certification of High-tech Enterprise issued by Jiangxi Ministry of Science and Technology, Jiangxi Ministry of Finance, Jiangxi National Tax Bureau, and Jiangxi Local Tax Bureau on 25.09.15, Fangda New Material was entitled to enjoy a tax preference of enterprise income tax of 15% for three years (2015-2017) since the qualifications were awarded.

(4) On December 25, 2013, Kexunda was certified by Shenzhen Nanshan National Tax Bureau as a software and integrated circuit designer according to the Shenzhen National Tax Reduction Registration [2013] No.739 and will enjoy exemption from the enterprise income tax for two years and 50% reduction of the same tax for another three years from the year that the company starts making a net profit. Kexunda started making profits in 2013 and therefore starts to enjoy the exemption. Kexunda entered the semi-exemption period in 2015.

(5) On November 7, 2014, Chengdu Fangda was certified by Sichuan Xinjin National Tax Bureau as an encourage industry company in the west China (Xin Jin National Tax Doc. [zzy024]) and started to enjoy a tax rate of 15%.

(6) On 02.11.15, Dongguan New Energy was certified by Dongguan National Tax Bureau Songshanhu branch as the national supported public infrastructure project according to the Song Shan Hu Tax Doc [2015] 3305. The company is exempted from enterprise income tax for three years and halfly exempted for another three years. In 2015, the company entered the exemption period.

(7) On 02.03.16, according to the document issued by Luxi National Tax Bureau, the PV power generation project undertaken by PingxiangFangdaLuxin New Energy Co., Ltd, became the infrastructure project supported by the central government. The company enjoys a three-year enterprise income tax relief and 50% reduction for another three years. In 2016, the company entered the exemption period.

(8) On 02.06.16, according to the document issued by Nanchang Xinjian District National Tax Bureau, the PV power generation project undertaken by subsidiary Xinjian New Energy Company, became the infrastructure project supported by the central government. The company enjoys a three-year enterprise income tax relief and 50% reduction for another three years. In 2016, the company entered the exemption period.

(9) On 10.03.17, according to the registration to Shenzhen National Tax Bureau, subsidiary Kechuangyuan Software became a newly established software and integrated circuit designing company and can enjoy the two-year full exemption and three-year half-exemption of the enterprise income tax from the first year that the company records profit. Kexunda started making profits in 2016 and therefore starts to enjoy the exemption.

(10) According to the Certification of High-tech Enterprise issued by Guangdong Ministry of Science and Technology, Guangdong Ministry of Finance, Guangdong National Tax Bureau, and Guangdong Local Tax Bureau on 25.09.15, Dongguan New Material was entitled to enjoy a tax preference of enterprise income tax of 15% for three years (2016-2018) since the qualifications were awarded.

Note: Explain the main tax incentives and the basis.

The Company must comply with disclosure requirements of the Shenzhen Stock Exchange Industry Information Disclosure Guideline No.12 – Listed Companies Engaged in Software And Information Technology Services.

Note: Disclose the tax incentives enjoyed by the company during the reporting period such as software VAT refunds and the impact of relevant tax incentives on the company's current profit and loss.

(2) Fixed assets without ownership certificate

In RMB

Item	Book value	Reason
Houses in Urumuqi for offsetting debt	525,188.43	Historical reasons
Yuehai Office Building C 502	136,705.17	Historical reasons
Tianjin Wanda Center, office building, 15th floor 1507	3,536,190.00	In the process of applying for property right certificate

Other note

- On 31.12.18, the cumulative depreciation of the original value of RMB60,287,329.40 in the Group's houses and buildings is RMB8,988,711.82. The net value of RMB51,298,617.58 has been pledged to Shenzhen OCT branch of China Construction Bank. The relevant borrowing has been repaid, but the pledge has not been released.
- In the current period, the increase in housing and other buildings was caused by FangdaJianke, a subsidiary of the company, which received the property of Tianjin Wanda Center and the other reduction of housing and buildings which was caused by Fangda New Materials Co. Ltd. to transfer the leased property to investment real estate this year.
- In the current period, other increases in other fixed assets such as machinery and equipment and other reductions were caused by the reclassification of the fixed assets category of the subsidiary FangdaJianke.

Others	11,608,911.89	19,621,369.16
Total	811,019,728.40	501,189,510.69

Other note

1. The tax withheld is the land VAT that needs to be settled and paid for the property delivered of the Fangda Town developed by Fangda Property.

2. The major other payables aged over 1 year at the end of the year are mainly the land value-added tax of RMB418,264,992.03, which is not yet settled.

25. Non-current liabilities due within 1 year

In RMB

Item	Closing balance	Opening balance
Long-term loans due within 1 year	200,000,000.00	200,000,000.00
Total	200,000,000.00	200,000,000.00

Others:

26. Other current liabilities

In RMB

Item	Closing balance	Opening balance
Substituted money on VAT	9,328,682.25	9,531,014.81
Total	9,328,682.25	9,531,014.81

27. Long-term borrowings

(1) Classification of long-term borrowings

In RMB

Item	Closing balance	Opening balance
Loan by pledge	693,978,153.39	893,978,153.39
Credit borrow	500,000,000.00	
Total	1,193,978,153.39	893,978,153.39

Notes to classification of long-term borrowings:

The above-mentioned borrowing is the 100% stock pledging of Fangda Property Development held by the Company.

Other note, including interest rate range:

The interest rate of long-term borrowings ranges between 5.39% and 6.785%.

28. Anticipated liabilities

In RMB

Item	Closing balance	Opening balance	Reason
Maintenance fee	6,831,162.99	6,368,353.05	
Total	6,831,162.99	6,368,353.05	--

Note: including related significant assumptions and estimates for anticipated liabilities

29. Deferred earning

In RMB

Item	Opening balance	Increase	Decrease	Closing balance	Reason
Government subsidy	10,489,483.94	1,333,000.00	1,421,322.64	10,401,161.30	See Note
Total	10,489,483.94	1,333,000.00	1,421,322.64	10,401,161.30	--

Items involving government subsidies:

In RMB

Liabilities	Opening balance	Amount of new subsidy	Amount included in non-operating revenue	Other misc. gains recorded in this period	Costs offset in the period	Other change	Closing balance	Related to assets/earning
Major investment project prize from Industry and Trade Development	1,738,095.50			57,142.80			1,680,952.70	Assets-related

Division of Dongguan Finance Bureau								
Massive production project of air-breathing double-layer hollow glass energy-saving curtain call	7,517,843.03			123,987.24			7,393,855.79	Assets-related
Railway transport screen door controlling system and information transmission technology	125,065.17			28,507.00			96,558.17	Assets-related
Distributed PV power generation project subsidy sponsored by Dongguan Reform and Development Commission	443,750.09			24,999.96			418,750.13	Assets-related
Luxi county Xuanfeng town government business introduction subsidy	184,730.15			3,725.64			181,004.51	Assets-related
Shenzhen SME Service Bureau enterprise IT construction subsidy	480,000.00	20,000.00					500,000.00	Assets-related

Second batch of the 2017 Corporate Research and Development Funding Scheme		1,113,000.00		1,113,000.00				Earning-related
Shenzhen Science and Technology Innovation Committee Technology Innovation Subsidy		200,000.00	-{ }-	69,960.00			130,040.00	Earning-related
Total	10,489,483.94	1,333,000.00		1,421,322.64			10,401,161.30	

Others:

1. The Dongguan Finance Bureau Industry and Trade Development Division major subsidy project is a subsidized project not stipulated in Dongguan Financial Circular [2013] No.779. As the project has formed into long-term assets, the Company treats it as an assets-related government subsidy.

2. The massive production project of air-breathing double-layer hollow glass energy-saving curtain wall is a subsidized project stipulated in Guangdong Financial Doc [2013] No.183. As the project has formed into long-term assets, the Company treats it as an assets-related government subsidy.

3. The railway transport screen door controlling system and information transmission technology is a subsidized project stipulated in Shenzhen Tech Innovation [2013] No.242. RMB300,000 is used to purchase equipment and RMB900,000 is used to purchase materials and for travel fees. As the project has formed into long-term assets, the Company treats RMB300,000 as assets-related government subsidy and RMB900,000 as earning-related government subsidy. The Dongguan Municipal Development and Reform Commission on the organization of the Dongguan City distributed photovoltaic power generation subsidy program is based on the "Dongguan Municipal Development and Reform Commission's Circular on Organizing the Application of Dongguan Distributed PV Generation Capital Subsidy Project" for various types of buildings and structures using distributed photovoltaic power generation projects. Owners, according to the installed capacity of 250,000 yuan / MW for a one-time grant, the maximum subsidy for a single project does not exceed 2 million yuan, because the project is related to assets, the company will use it as a government subsidy related to assets.

4. The Xuanfeng Town Government Investment Promotion Subsidy Project of Luxi County promoted the development of the local economy. Xuanfeng Town Government of Luxi County introduced Luxin New Energy Company's solar photovoltaic power generation project and gave Luxin New Energy Corporation subsidies for obtaining state-owned construction land use rights. As this project is related to assets, the Company regards it as a government grant related to the assets.

5. The subsidy project of the Shenzhen Municipal Bureau of Small and Medium-sized Enterprises Service Enterprise

Informationization Project is based on the relevant provisions of the Interim Measures for the Management of Special Funds for the Development of Private and Small and Medium-sized Enterprises in Shenzhen (SCC (2012) No. 177) issued by the Shenzhen Municipal Bureau of Small and Medium Business Administration. In 2017, the special fund enterprise informationization project subsidies, because the project is related to assets, the company will use it as a government grant related to assets.

30. Capital share

In RMB

	Opening balance	Change (+,-)					Closing balance
		Issued new shares	Bonus shares	Transferred from reserves	Others	Subtotal	
Total of capital shares	1,183,642,254.00				-28,160,568.00	-28,160,568.00	1,155,481,686.00

Others:

1. The decrease in share capital was due to the repurchase and cancellation of B shares by the company during the reporting period.
2. By 31.12.18, the Company has 1,417,242 restricted shares, of which 1,417,242 shares are held by senior management natural person.

31. Capital reserve

In RMB

Item	Opening balance	Increase	Decrease	Closing balance
Capital premium (share capital premium)	71,375,387.61		71,375,293.37	94.24
Other capital reserves	1,454,097.35			1,454,097.35
Total	72,829,484.96		71,375,293.37	1,454,191.59

Other note, including explanation about the reason of the change:

The decrease in share capital was due to the repurchase and cancellation of B shares by the company during the reporting period.

32. Shares in stock

In RMB

Item	Opening balance	Increase	Decrease	Closing balance
B share		111,166,053.48	100,334,615.82	10,831,437.66
Total		111,166,053.48	100,334,615.82	10,831,437.66

Other note, including explanation about the reason of the change:

- (1) The company held the 8th meeting of the 8th Board of Directors and the 2017 Shareholders' Meeting on April 24 2018 and May 15 2018 respectively and reviewed and approved the proposal of the company to repurchase domestically listed foreign shares (B shares). From August 13th to August 18th 2018, a total of 28,160,568.00 shares were repurchased through centralized bidding. The highest price was HK\$4.22/share, the lowest price was HK\$3.95 per share and the actual accumulated payment was

HK\$114,478,923.89 (including transaction costs). The treasury shares were RMB 100,334,615.82. The company held the 10th meeting of the 8th Board of Directors and the 1st Extraordinary General Meeting of Shareholders in 2018 on September 10 2018 and September 27 2018 respectively. The share (B shares) proposal as of December 31 2018 through the centralized bidding method a total of 3670247.00 shares were purchased and the highest price was HK\$3.399/share, the lowest price was HK\$3.24 per share and the actual accumulated payment was HK\$12,312,442.82 (including transaction costs) accounting for treasury shares of RMB10831437.66;

(2) 28,160,568.00 shares of share capital reduced as a result of the write-off of treasury shares

(3) If the cost of the cancelled stocks is higher than the corresponding cost of equity, the capital reserve of RMB71375293.37 and surplus reserve of RMB798754.45 will be reduced.

33. Other miscellaneous income

In RMB

Item	Opening balance	Amount occurred in the current period					Closing balance
		Amount before income tax	Less: amount written into other gains and transferred into gain/loss in previous terms	Less: Income tax expenses	After-tax amount attributed to the parent	After-tax amount attributed to minority shareholders	
2. Other misc. incomes that will be re-classified into gain and loss	8,585,847.99	-1,551,389.15	-141,000.00	-206,628.75	-1,203,760.40		7,382,087.59
Effective part in the gain and loss of arbitrage of cash flow	-119,850.00	-1,518,525.00	-141,000.00	-206,628.75	-1,170,896.25		-1,290,746.25
Translation difference of foreign exchange statement	-50,855.47	-32,864.15			-32,864.15		-83,719.62
Investment real estate measured at fair value	8,756,553.46						8,756,553.46
Other miscellaneous income	8,585,847.99	-1,551,389.15	-141,000.00	-206,628.75	-1,203,760.40		7,382,087.59

34. Surplus reserves

In RMB

Item	Opening balance	Increase	Decrease	Closing balance
Statutory surplus reserves	110,690,396.65	10,583,579.20	798,754.45	120,475,221.40
Total	110,690,396.65	10,583,579.20	798,754.45	120,475,221.40

35. Retained profit

In RMB

Item	Current period	Last period
Adjustment on retained profit of previous period	1,863,191,218.58	1,016,820,576.30
Retained profit adjusted at beginning of year	1,863,191,218.58	1,016,820,576.30
Plus: Net profit attributable to owners of the parent	2,246,164,571.68	1,144,404,441.03
Less: Statutory surplus reserves	10,583,579.20	21,850,606.15
Common share dividend payable	177,546,338.10	276,183,192.60
Closing retained profit	3,921,225,872.96	1,863,191,218.58

Details of retained profit adjusted at beginning of the period

- 1) Retrospective adjustment due to adopting of the Enterprise Accounting Standard and related regulations, included the retained profit by RMB0.
- 2) Variation of accounting policies, influenced the retained profit by RMB0.
- 3) Correction of material accounting errors, influenced the retained profit by RMB0.
- 4) Change of consolidation range caused by merger of entities under common control, influenced the retained profit by RMB0.
- 5) Other adjustment influenced the retained profit by RMB0.

36. Operational revenue and costs

In RMB

Item	Amount occurred in the current period		Occurred in previous period	
	Income	Cost	Income	Cost
Main business	2,987,575,699.48	2,314,151,985.65	2,900,462,349.88	1,977,766,793.96

Other miscellaneous income		
--Total of misc. incomes	-836,397.74	-2,162,975.06

X. Risks of Financial Tools

Major financial tools of the Group include monetary fund, accounts receivable, receivable bills, other receivables, other current assets, financial assets measured at fair value and whose change recorded in the profit and loss of this period, accounts payable, interest payable, payable bills, other payables, short-term borrowings, other current liabilities, non-current liabilities due within one year and long-term borrowings. Details about the Group's financial instruments are disclosed in related notes. The following explains risks related to the financial instruments and risk management policies adopted by the Group to lower the risks. The management of the Group manages and monitor the risks to ensure that the risks are within the acceptable range.

1. Risk management target and policy

The target of the risk management is to balance between risk and benefit and lower financial risks' impacts on the Group's financial performance. Based on the target, the Group has formulated risk management policy to identify and analyze risks facing the Group and set an appropriate acceptable level and internal control procedures to monitor the risks. The Group regularly reviews the risk management policies and related internal control system to suit the market status and changes in the Group's operating activities. The internal auditing department of the Group will regularly or randomly check the implementation of the internal control system.

Risks caused by the Group's financial instruments are credit risk, liquidity risk and market risk (including interest, exchange rate and product price/equity tool price risks).

(1) Credit risk

Credit risk is caused by the failure of one party of a financial instrument in performing its obligations, causing the risk of financial loss for the other party.

The Group manages credit risks through classification. The credit risk is mainly caused by bank deposit and receivables.

The Group's bank deposit is mainly deposited in state-owned banks and large-sized listed banks. The credit risk caused by bank deposited is minor.

For receivables, the Group sets up related policies to control the credit risk. The Group set the credit line and term for debtors according to their financial status, external rating, and possibility of getting third-party guarantee, credit record and other factors. The Group has adopted a policy of cooperating only with creditworthy counterparties and obtaining sufficient collateral when necessary to mitigate the risk of financial losses arising from the failure of the counterparty to perform its contractual obligations. The Group regularly monitors debtors' credit record. For those with poor credit record, the Group will send written payment reminders, shorten or cancel credit term to lower the general credit risk.

The debtors of the Group's accounts receivable are customers distributed in different industries and regions. The Group continues to perform credit assessments on the financial status of the receivables and when appropriate purchases credit guarantee insurance.

The largest credit risk facing the Group is the book value of each financial asset on the balance sheet. The Group makes no guarantee that may cause the Group credit risks.

Among the Group's receivables, accounts receivable from top 5 customers account for 18.60% of the total accounts receivable (2017: 12.85%); among other receivables, other receivables from top 5 customers account for 66.83% of the total other receivables (2017: 71.91%).

(2) Liquidity risk

Liquidity risk is the risk of capital shortage when the Group needs to pay cash or settled with other financial assets.

The Group keeps adequate cash and cash equivalent, and monitors the level to ensure that the cash and cash equivalent can meet the operation needs. The management of the Group monitors the use of bank loans and ensures that they are used as agreed. The Group also obtains guarantee from financial institutions for adequate standby fund to meet short-term and long-term capital demand.

The Group can also use fund generated by operating activities and bank and other loans. On 31.12.18, bank loan credit that the Group has not used was RMB2,649,754,000 (31.12.17: RMB2,538,021,800).

Financial liabilities and excluded guarantees held by the Group by undiscounted residual contract cash flow (in RMB10,000) at the end of the period:

Assets	Closing amount			
	Less than 1 year	Within 1-3 years	Over 3 years	Total
Financial liabilities:				
Short-term loans	20,800.00			20,800.00
Notes payable and accounts payable	139,987.76	14,588.41	173.36	154,749.53
Employees' wage payable	4,451.31			4,451.31
Other payables	25,200.85	55,107.77	1,003.25	81,311.87
Non-current liabilities due in 1 year	20,000.00			20,000.00
Other current liabilities	932.87			932.87
Long-term loans		119,397.82		119,397.82
Total liabilities	211,372.79	189,094.00	1,176.61	401,643.40

Financial liabilities and excluded guarantees held by the Group by undiscounted residual contract cash flow (in RMB10,000) at the beginning of the period:

Assets	Opening amount			
	Less than 1 year	Within 1-3 years	Over 3 years	Total
Financial liabilities:				
Short-term loans	61,600.00			61,600.00

Notes payable and accounts payable	141,188.66	6,732.71	9.96	147,931.33
Employees' wage payable	4,039.91			4,039.91
Other payables	15,776.16	31,241.89	3,343.43	50,361.48
Non-current liabilities due in 1 year	20,000.00			20,000.00
Other current liabilities	953.1			953.1
Long-term loans		80,000.00	9,397.82	89,397.82
Total liabilities	243,557.83	117,974.60	12,751.21	374,283.64

The amount of financial liabilities disclosed in the above table is undiscounted contractual cash flow and may therefore differ from the carrying amount in the balance sheet.

(3) Market risk

Market risk of financial instrument is caused by changes in the fair value of financial instruments or future cash flow, including interest risk, exchange rate and other price risks.

Exchange rate risk

Interest rate risk is caused by fluctuation of the fair value or future cash flow of financial instruments caused by changes in the market interest rate. The interest rate risk can be caused by recognized interest-bearing financial instruments and unrecognized financial instruments.

The Group's interest rate risk mainly arises from long-term interest-bearing debts such as long-term bank loans. Financial liabilities with floating interest rate cause cash flow interest rate risk for the Group. Financial liabilities with fixed interest rate cause fair value interest rate risk for the Group. The Group decides the proportion between fixed interest rate and floating interest rate according to the market environment and regularly reviews and monitors the combination of fixed and floating interest rate instruments.

The Group pays close attention to the risks of changing interest rates. The Group adopts no hedging policies currently. However management is responsible for monitoring interest rate risk and will consider hedging significant interest rate risk should the need arise. As fixed deposits are short-term borrowing, the interest rate risk of the fair value of bank deposit is minor.

On December 31 2018, the current floating interest rate borrowing was RMB500 million. if the borrowing rate calculated with floating interest rate rises or falls by 50 basis points, while other factors remain unchanged, the Group's net profit and shareholders' equity will change by RMB90,800. (December 31, 2017: 0)

For the financial instruments held on the balance sheet date that expose the Group to fair value interest rate risk, the impact of the net profit and shareholders' equity in the above sensitivity analysis is measured based on the assumption that the interest rate changes on the balance sheet date according to the new interest rate. For floating interest rate non-derivatives held on the balance sheet date that expose the Group to cash flow interest rate risk, the effect of net profit and shareholder equity in the above sensitivity analysis is the interest income or income estimated by the above interest rate changes. The previous year's analysis was based on the same assumptions and methods.

Exchange rate risk

Exchange rate risk is caused by fluctuation of the fair value or future cash flow of financial instruments caused by changes in the foreign exchange rates. The exchange rate risk can be caused by financial instruments priced in foreign currencies.

Exchange rate risk is mainly attributable to the Group's financial position and cash flows affected by fluctuations in foreign exchange rates. Except for the subsidiaries established in Hong Kong holding assets in Hong Kong dollars as the settlement currency, there is only a small amount of investment in the Hong Kong market. The proportion of assets and liabilities held by the Group in foreign currency assets and liabilities is not significant. Therefore the Group believes that the exchange rate risk is not significant.

The Group pays close attention to the risks of changing exchange rate. The Group takes no measure to prevent other exchange risks currently. However management is responsible for monitoring exchange rate risk and will consider hedging significant exchange rate

risk should the need arise.

See Note V. 51 Foreign Currency Item Note for the Group's financial assets and liabilities priced in foreign currencies.

Other price risks

Other price risks refer to risks of fluctuations caused by changes to market prices, regardless of whether the changes are caused by factors related to a single financial tool or issuer, or factors related to all similar financial tools traded in the market. Other price risks come from changes in product prices or equity tool prices.

The Group's investment in financial assets classified as fair value through changes in fair value through profit or loss, and investment properties measured in fair value are measured at fair value on the balance sheet date. Therefore, the Group bears risks of changes in the securities market and real estate market prices.

The Group closely follows impacts of price changes to the Company's securities investment price and real estate price risks. The Group takes no measure to prevent other price risks currently. The management is responsible for monitoring the other price risks.

2. Capital management

The Group's capital management aims to ensure continuous operation of the Group, provide returns for shareholders, help other interested parties make benefit, and maintain the best capital structure and lower capital cost.

The Group may adjust the dividend distributed to shareholders, issue new shares or sell assets to maintain or adjust the capital structure.

The Group monitors the capital structure based on the assets/liability ratio. On 31.12.18, the Group's assets/liability ratio is 51.26% (December 31, 2017: 57.52%).

XI. Fair Value

1. Closing fair value of assets and liabilities measured at fair value

In RMB

Item	Closing fair value			
	First level fair value	Second level fair value	Third level fair value	Total
1. Continuous fair value measurement	--	--	--	--
2. Leased building		5,234,401,663.38		5,234,401,663.38
Total assets measured at fair value continuously		5,234,401,663.38		5,234,401,663.38
Derivative financial liabilities	1,625,725.00			1,625,725.00
Total assets measured at fair value continuously	1,625,725.00			1,625,725.00
2. Discontinuous fair value measurement	--	--	--	--

2. Recognition basis of market value of continuous and discontinuous items measured at first level fair value

The Group determines the fair value using quotation in an active market for financial instruments traded in an active market;

Valuation technique and qualitative and quantitative information for key parameters of continuous and discontinuous second level fair value items

For investment in real estate similar with real estate transaction, the Group uses valuation techniques to determine its fair value. The technique is comparison and earning method. Inputs include transaction date, status, region and other factors.

4. Switch between different levels, switch reason and switching time policy

In the period, there is no switch in the financial assets measured at fair value between the first and second level or transfer in or out of the third level.

5. Fair value of financial assets and liabilities not measured at fair value

Financial assets and liabilities measured at amortized cost include: monetary capital, bills receivable, accounts receivable, other receivables, short-term borrowings, notes payable, accounts payables, other payables, and long-term payables.

The difference between book value and fair value of financial assets and liabilities not measured at fair value is small.

Ltd. for a payment of RMB 13810243.67 and its overdue interest payment of RMB 3044545.82 totaling RMB 16854789.49 to the Taijiang District People's Court of Fuzhou City. The case has been filed yet.

(2) Pending major lawsuits

On September 6, 2017, Chenghua District People's Court of Chengdu Municipality sentenced Sichuan ChutaHengyuan Industrial Co., Ltd. to pay construction money to FangdaJianke within 10 days from the date of the verdict 川 0108 民初 1828 号 RMB10,242,182.99. As of the date of this report, FangdaJianke has applied for execution and has not received the relevant payment.

On September 10 2018, the People's Court of Lixia District of Jinan City sentenced Shandong Zhonghong Real Estate Co. Ltd. to the Company for payment of 5960429.45 yuan within 10 days from the date of the effective date of the (2018) Lu 0102 Minchu 5367 civil judgment. As of the date of this report, FangdaJianke has applied for execution and has not received the relevant payment.

(3) Contingent liabilities formed by providing of guarantee to other companies' debts and their influences on financial situation

By December 31, 2013, the Company has provided loan guarantees for the following entities:

Name of guaranteed entity	Guarantee	Amount (in RMB10,000)	Start date	End date
Fangda Property	Pledge guarantee	2,490.49	2015/11/6	2023/2/11
Fangda Property	Pledge guarantee	545.76	2015/11/20	2023/2/11
Fangda Property	Pledge guarantee	2388.91	2015/12/9	2023/2/11
Fangda Property	Pledge guarantee	4,614.39	2015/12/28	2023/2/11
Fangda Property	Pledge guarantee	4241.27	2016/1/26	2023/2/11
Fangda Property	Pledge guarantee	4,260.74	2016/1/29	2023/2/11
Fangda Property	Pledge guarantee	343.47	2016/3/28	2023/2/11
Fangda Property	Pledge guarantee	3,615.06	2016/4/27	2023/2/11
Fangda Property	Pledge guarantee	1,157.69	2016/5/22	2023/2/11
Fangda Property	Pledge guarantee	414.66	2016/5/30	2023/2/11
Fangda Property	Pledge guarantee	3,113.99	2016/6/13	2023/2/11
Fangda Property	Pledge guarantee	1,465.99	2016/6/24	2023/2/11
Fangda Property	Pledge guarantee	4415.64	2016/7/26	2023/2/11
Fangda Property	Pledge guarantee	4,813.23	2016/8/15	2023/2/11
Fangda Property	Pledge guarantee	5,519.40	2016/9/7	2023/2/11
Fangda Property	Pledge guarantee	15,048.01	2016/10/8	2023/2/11
Fangda Property	Pledge guarantee	7,628.15	2016/11/7	2023/2/11
Fangda Property	Pledge guarantee	6,140.11	2016/11/30	2023/2/11
Fangda Property	Pledge guarantee	9,889.21	2017/1/19	2023/2/11
Fangda Property	Pledge guarantee	1,830.24	2017/5/31	2023/2/11
Fangda Property	Pledge guarantee	2,581.45	2017/6/28	2023/2/11
Fangda Property	Pledge guarantee	2,879.95	2017/8/30	2023/2/11
Total		89,397.81		

Note: Contingent liabilities caused by guarantees provided for other entities are all related guarantees between interested entities in the Group.

(4) Providing guarantee for property purchasers

The Group's property business provides periodic mortgage guarantee for property purchasers. The term of the periodic guarantee lasts from the effectiveness of guarantee contracts to the completion of mortgage registration and transfer of housing ownership certificates to banks. By December 31, 2018, the Company has provided periodic guarantee of RMB778 million.

On 31.12.18, the Company has no other contingent events that should be disclosed.

(2) Significant contingent events that do not need to be disclosed should be explained

No such significant contingent event

XIV. Post-balance-sheet events**1. Profit distribution**

In RMB

Profit or dividend to be distributed	224,676,837.80
Profit or dividend approved to be distributed	224,676,837.80

2. Notes to other issues in post balance sheet period

The Company held the 10th meeting of the 8th Board of Directors and the 1st Extraordinary General Meeting of Shareholders in 2018 on September 10 2018 and September 27 2018 respectively and reviewed and approved the repurchase of some domestically listed foreign shares (B shares) from January 1 2019 to January 3 2019 of 28,427,250 shares through a centralized bidding method. The highest price was HK\$3.58 per share, the lowest price was HK\$3.31 per share and the actual payment was HK\$100700189.39 (including transaction costs). The company has completed the repurchase and cancellation of 320,97,497.00 shares (including 3670247.00 shares that have been repurchased on December 31, 2018) on January 11, 2019.

On 28.01.19, the Company has no other contingent events that should be disclosed.

XV. Other material events**1. Suspension of operations**

In RMB

Item	Income	Expense	Total profit	Income tax expenses	Net profit	Suspended operation profit attributable to the owners of parent company
Suspension of operations		220,214.40	-220,214.40		-220,214.40	-220,214.40

Other note

XVI. Notes to Financial Statements of the Parent

1. Receivable note and accounts receivable

In RMB

Item	Closing balance	Opening balance
Notes receivable	200,000,000.00	
Account receivable	471,039.12	408,154.54
Total	200,471,039.12	408,154.54

(1) Notes receivable

1) Classification of notes receivable

In RMB

Item	Closing balance	Opening balance
Commercial acceptance	200,000,000.00	

Total	200,000,000.00
-------	----------------

(2) Account receivable

1) Account receivable disclosed by categories

In RMB

Type	Closing balance					Opening balance				
	Remaining book value		Bad debt provision		Book value	Remaining book value		Bad debt provision		Book value
	Amount	Proportion	Amount	Provision rate		Amount	Proportion	Amount	Provision rate	
Recognition and providing of bad debt provisions on groups	485,607.34	100.00%	14,568.22	3.00%	471,039.12	420,777.88	100.00%	12,623.34	3.00%	408,154.54
Total	485,607.34	100.00%	14,568.22	3.00%	471,039.12	420,777.88	100.00%	12,623.34	3.00%	408,154.54

Account receivable with major individual amount and bad debt provision provided individually at the end of the period:

Applicable Inapplicable

In the group, the account receivable of which bad debt provision is made through the account aging method:

Applicable Inapplicable

In RMB

Age	Closing balance		
	Account receivable	Bad debt provision	Provision rate
Sub-item of within 1 year			
Less than 1 year	485,607.34	14,568.22	3.00%
Subtotal for less than 1 year	485,607.34	14,568.22	3.00%
Total	485,607.34	14,568.22	3.00%

Group recognition basis:

Account receivable adopting the balance percentage method in the group

2) Bad debt provision made, returned or recovered in the period

A bad debt provision of RMB1,944.88 was made in the period. RMB0.00 was recovered or reversed. 3) Balance of top 5 accounts receivable at the end of the period

The total balance of top-five accounts receivable at the end of the period is RMB4,517,278,600, accounting for 93.02% of the total remaining balance of all accounts receivable. The bad debt provision made at the end of the period is RMB135,518,400.

2. Other receivables

In RMB

Item	Closing balance	Opening balance
------	-----------------	-----------------

Interest receivable		1,020,000.00
Dividend receivable	100,000,000.00	150,000,000.00
Other receivables	722,543,653.04	672,773,780.45
Total	822,543,653.04	823,793,780.45
