

Changchai Company, Limited

Financial Report For the Year 2018

I Independent Auditor's Report

Type of the independent auditor's opinion	Unmodified unqualified opinion
Date of signing this report	9 April 2019
Name of the independent auditor	Jiangsu Gongzheng Tianye Certified Public Accountants LLP
No. of the auditor's report	Sugong W[2019]A405
Name of the certified public accountants	Dai Weizhong, Xu Wenxiang

Text of the Independent Auditor's Report

To the Shareholders of Changchai Company, Limited,

I Opinion

We have audited the accompanying financial statements of Changchai Company, Limited. (together with its consolidated subsidiaries included in the consolidated financial statements, the "Company"), which comprise the parent's and consolidated balance sheets as at 31 December 2018, the parent's and consolidated income statements, the parent's and consolidated cash flow statements, the parent's and consolidated statements of changes in owners' equity for the year then ended, as well as the notes to the financial statements.

In our opinion, the financial statements attached were prepared in line with the regulations of Accounting Standards for Business Enterprises in all significant aspects which gave a true and fair view of the consolidated and parent financial position of Changchai Company, Limited. as at 31 December 2018 and the consolidated and parent business performance and cash flow for 2018.

II Basis for Opinion

We conducted our audits in accordance with the Audit Standards for Chinese Registered Accountants. Our responsibilities under those standards are further described in the Auditor's Responsibilities for Audit of Financial Statements section of our report. We are independent of the Company in accordance with the China Code of Ethics for Certified Public Accountants, and we have fulfilled our other ethical responsibilities in accordance with the said Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

III Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. And key audit matter identified in our audit is summarized as follows:

(I) Recognition of revenue

1. Description of the item

The consolidated revenue of the Company in 2018 was RMB2,132,902,700. Because of the significant amount of the revenue and being the key performance indicator, related risks of recognition of revenue may existed according to the accounting policies, so we identify income recognition as a key audit item.

2. Response for audit

(1) Know the key internal control related to revenue recognition, evaluate whether its design and execution are valid or not, and test the operation effectiveness of the related internal control.

(2) Analyze and assess the time-point of transferring major risks and rewards related to recognition of sales revenue through the sampling inspection of sales contract and interviews with management, and then evaluate the recognition policies of sales revenue of the Company.

(3) Check the supporting documents related to revenue recognition, such as sales contracts, order form, invoice for sales, shipping order, declaration for exportation, and etc.

(4) Check the operating revenue recognized before and after the balance sheet date to the supporting documents, such as shipping order, declaration for exportation, and etc by sampling method to assess whether the operating revenue is recognized within appropriate period.

(5) Implement the confirmation by drawing sample to recognize the balance of accounts receivable and the amount of sales revenue according to the features and natures of customer transaction.

(II) Bad debt provision for accounts receivable

1. Description of the item

As stated in Notes V. 2 of the Financial Statements, as of 31 December 2018, carrying value of accounts receivable of the Company is RMB378,859,200, accounting for 10.70% of the total assets. Bad debt provision for accounts receivable of the Company is calculated by the assessment of accounts receivable's return ability. The assessment of accounts receivable's return ability needs large judgment of the management, involving the significant accounting estimations with significant influences on amounts. So, we take bad debt provision for

account receivable as a key audit item.

2. Response for audit

(1) Knowing, evaluating and testing the related internal control of bad debt provision for accounts receivable;

(2) Re-checking the related considerations and objective evidences of impairment test for accounts receivable, paying attention to whether the management has fully recognized the impairment of items;

(3) For accounts receivable made bad debt provision separately, we re-check the basis and reasonability for the estimated available cash flow in the future;

(4) For accounts receivable made bad debt provision by the credit risks characteristic group, we evaluate whether the ratio of bad debt provision confirmed by management is reasonable;

(5) We request for confirmation of accounts receivable, and check the confirmation result with the carrying amount;

(6) Checking the payment collection after the binding stage, and evaluating the reasonability of bad debt provision made by management.

IV Other Information

The Company's management (hereinafter referred to as "management") is responsible for the other information. The other information comprises all of the information included in the Company's 2017 Annual Report other than the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

V Responsibilities of Management and Those Charged with Governance for Financial Statements

The management is responsible for the preparation of the financial statements that give a fair view in accordance with CAS, and for designing, implementing and maintaining such internal control as the management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the management either intends to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

VI Auditor's Responsibilities for Audit of Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with CAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with CAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

(1) Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

(2) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances.

III. Company Profile

Changchai Company, Limited (hereinafter referred to as “the Company”) was founded on 5 May 1994, which is a company limited by shares promoted solely by Changzhou Diesel Engine Plant through the approval by the State Commission for Restructuring the Economic Systems with document TGS [1993] No. 9 on 15 January 1993 by way of public offering of shares. With the approved of the People’s Government of Jiangsu Province SZF [1993] No. 67, as well as reexamined and approved by China Securities Regulatory Commission (“CSRC”) through document ZJFSZ (1994) No. 9, the Company initially issued A shares to the public from 15 March 1994 to 30 March 1994. As approved by the Shenzhen Stock Exchange through document SZSFZ (1994) No. 15, such tradable shares of the public got listing on 1 July 1994 at Shenzhen Stock Exchange with “Su Changchai A” for short of stock, as well as “0570” as stock code (present stock code is “000570”).

In 1996, with the recommendation of the Office of the People’s Government of Jiangsu Province SZBH [1996] No. 13, as well as first review by Shenzhen Municipal Securities Administration Office through SZBZ [1996] No. 24, and approval of the State Council Securities Commission ZWF [1996] No. 27, the Company issued 100 million B shares to qualified investors on 27 August 1996 to 30 August 1996, getting listed on 13 September 1996.

On 9 June 2006, the Company held a shareholders’ general meeting related to A shares market to examine and approve share merger reform plan, and performed the share merger reform on 19 June 2006.

As examined and approved at the 2nd Extraordinary General Meeting of 2009 in September 2009, based on the total share capital of 374,249,551 shares as at 30 June 2009, the Company implemented the profit distribution plan, i.e. to distribute 5 bonus shares and cash of RMB0.80 for every 10 shares, with registered capital increased by RMB187,124,775.00, as well as registered capital of RMB561,374,326.00 after change. As at 31 December 2015, the total share capital of the Company is 561,374,326.00 shares, as well as registered capital of RMB561,374,326.00, which verified by Jiangsu Gongzheng Tianye Certified Public Accountants Company Limited with issuing Capital Verification Report SGC [2010] No. B002. And the unified social credit code of the enterprise business license of the Company is 91320400134792410W.

The Company’s registered address is situated at No. 123 Huaide Middle Road, Changzhou, Jiangsu, as well as its head office located at No. 123 Huaide Middle Road, Changzhou, Jiangsu.

The Company belongs to manufacturing with business scope including manufacturing and sale of diesel engine, diesel engines part and casting, grain harvesting machine, rotary cultivators, walking tractor, mould and fixtures, assembling and sale of diesel generating set and pumping unit. The Company mainly engaged in the production and sales of small and medium-sized single cylinders and multi-cylinder diesel engine with the label of Changchai Brand. The diesel engine produced and sold by the Company were mainly used in tractors, combine harvest models, light commercial vehicle, farm equipment, small-sized construction machinery, generating sets and shipborne machinery and equipment, etc. The Company’s main business remained unchanged in the Reporting Period.

1. Statement of Compliance with the Accounting Standards for Business Enterprises

The financial statements prepared by the Group are in compliance with in compliance with the Accounting Standards for Business Enterprises, which factually and completely present the Company’s and the Group’s financial positions, business results and cash flows and other relevant information.

2. Fiscal Period

The fiscal periods are divided into fiscal year and metaphase, the fiscal year is from January 1 to December 31 and as the metaphase included monthly, quarterly and semi-yearly periods.

3. Operating Cycle

A normal operating cycle refers to a period from the Group purchasing assets for processing to realizing cash or cash equivalents. An operating cycle for the Group is 12 months, which is also the classification criterion for the liquidity of its assets and liabilities.

4. Currency Used in Bookkeeping

Renminbi is functional currency of the Company.

5. Accounting Methods for Business Combinations under the Same Control and Business Combinations not under the Same Control

(1) Business combinations under the same control:

A business combination under the same control is a business combination in which all of the combining enterprises are ultimately controlled by the same party or the same parties both before and after the business combination and on which the control is not temporary.

For the merger of enterprises under the same control, if the consideration of the merging enterprise is that it makes payment in cash, transfers non-cash assets or bear its debts, it shall, on the date of merger, regard the share of the book value of the owner's equity of the merged enterprise as the initial cost of the long-term equity investment. The difference between the initial cost of the long-term equity investment and the payment in cash, non-cash assets transferred as well as the book value of the debts borne by the merging party shall offset against the capital reserve. If the capital reserve is insufficient to dilute, the retained earnings shall be adjusted.

If the consideration of the merging enterprise is that it issues equity securities, it shall, on the date of merger, regard the share of the book value of the owner's equity of the merged enterprise as the initial cost of the long-term equity investment. The total face value of the stocks issued shall be regarded as the capital stock, while the difference between the initial cost of the long-term equity investment and total face value of the shares issued shall offset against the capital reserve. If the capital reserve is insufficient to dilute, the retained earnings shall be adjusted.

All direct costs for the business combination, including expenses for audit, evaluating and legal services shall be recorded into the profits and losses at the current period. The expenses such as the handling charges and commission etc, premium income of deducting the equity securities, and as for the premium income was insufficient to dilute, the retained earnings shall be written down.

Owing to the reasons such as the additional investment, for the equity investment held before acquiring the control right of the combined parties, the confirmed relevant gains and losses, other comprehensive income and the changes of other net assets since the date of the earlier one between the date when acquiring the original equity right and the date when the combine parties and combined ones were under the same control to the combination date, should be respectively written down and compared with the beginning balance of retained earnings or the current gains and losses during the statement period.

(2) Business combinations not under the same control

A business combination not under the same control is a business combination in which the combining enterprises are not ultimately controlled by the same party or the same parties both before and after the business combination.

The combination costs of the acquirer and the identifiable net assets obtained by the acquirer in a business combination shall be measured at the fair values. The acquirer shall recognize the positive balance between the combination costs and the fair value of the identifiable net assets it obtains forms the acquiree as business reputation. The direct relevant expenses occurred from the enterprise combination should be included in the current gains and losses when occurred. The combination costs of the acquirer and the identifiable net assets obtained by it in the combination shall be measured according to their fair values at the acquiring date. The difference between the fair value of the assets paid out by the Company and its book value should be included in the current gains and losses. The purchase date refers to the date that the purchaser acquires the control right of the acquiree.

For the business combinations not under the same control realized through step by step multiple transaction, as for the equity interests that the Group holds in the acquiree before the acquiring date, they shall be re-measured according to their fair values at the acquiring date; the positive difference between their fair values and carrying amounts shall be recorded into the investment gains for the period including the acquiring date. The equity held by the acquiree which involved with the other comprehensive income and the other owners' equities changes except for the net gains and losses, other comprehensive income and the profits distribution and other related comprehensive gains and other owners' equities which in relation to the equity interests that the Group holds in the acquiree before the acquiring date should be transferred into the current investment income on the acquiring date, except for the other comprehensive income occurred from the re-measurement of the net profits of the defined benefit plans or the changes of the net assets of the investees.

6. Methods for Preparing Consolidated Financial Statements

The Company confirms the consolidated scope based on the control and includes the subsidiaries with actual control right into the consolidated financial statement.

The consolidated financial statement of the Company is compiled according to the regulations of No. 33 of ASBE-Consolidated Financial Statement and the relevant regulations and as for the whole significant come-and-go balance, investment, transaction and the unrealized profits should be written off when compiling the consolidated financial statement. The portion of a subsidiary's shareholders' equity and the portion of a subsidiary's net profits and losses for the period not held by the Group are recognized as minority interests and minority shareholder profits and losses respectively and presented separately under shareholders' equity and net profits in the consolidation financial statements. The portion of a subsidiary's net profits and losses for the period that belong to minority interests is presented as the item of "minority shareholder profits and losses" under the bigger item of net profits in the consolidated financial statements. Where the loss of a subsidiary shared by minority shareholders exceeds the portion enjoyed by minority shareholders in the subsidiary's opening owners' equity, minority interests are offset.

The accounting policy or accounting period of each subsidiary is different from which of the Company, which shall be adjusted as the Company; or subsidiaries shall prepare financial statement again required by the Company when preparing the consolidated financial statements.

As for the added subsidiary company not controlled by the same enterprise preparing the consolidated financial statement, shall adjust individual financial statement based on the fair value of the identifiable net assets on the acquisition date; as for the added subsidiary companies controlled by the same enterprise preparing the

financial statement, shall not adjust the financial statement of the subsidiaries, namely survived by integration as participating in the consolidation when the final control party starts implementing control and should adjust the period-begin amount of the consolidated balance sheet and at the same time adjust the relevant items of the compared statement.

As for the disposed subsidiaries, the operation result and the cash flow should be included in the consolidated income statement and the consolidated cash flow before the disposing date; the disposed subsidiaries of the current period, should not be adjusted the period-begin amount of the consolidated balance sheet.

Where the Group loses control on its original subsidiaries due to disposal of some equity investments or other reasons, the residual equity interests are re-measured according to the fair value on the date when such control ceases. The summation of the consideration obtained from the disposal of equity interests and the fair value of the residual equity interests, minus the portion in the original subsidiary's net assets measured on a continuous basis from the acquisition date that is enjoyable by the Group according to the original shareholding percentage in the subsidiary, is recorded in investment gains for the period when the Group's control on the subsidiary ceases. Other comprehensive incomes in relation to the equity investment and the other owners' equities changes except for the net gains and losses, other comprehensive income and profits distribution in the original subsidiary are treated on the same accounting basis as the acquiree directly disposes the relevant assets or liabilities (that is, except for the changes in the net liabilities or assets with a defined benefit plan resulted from re-measurement of the original subsidiary, the rest shall all be transferred into current investment gains) when such control ceases. And subsequent measurement is conducted on the residual equity interests according to the No.2 Accounting Standard for Business Enterprises-Long-term Equity Investments or the No.22 Accounting Standard for Business Enterprises-Recognition and Measurement of Financial Instruments.

For the disposal of equity investment belongs to a package deal, should be considered as a transaction and conduct accounting treatment. However, Before losing control, every disposal cost and corresponding net assets balance of subsidiary of disposal investment are confirmed as other comprehensive income in consolidated financial statements, which together transferred into the current profits and losses in the loss of control, when the Group losing control on its subsidiary.

For the disposal of the equity investment not belongs to a package deal, should be executed accounting treatment according to the relevant policies of partly disposing the equity investment of the subsidiaries under the situation not lose the control right before losing the control right; when losing the control right, the former should be executed accounting treatment according to the general disposing method of the disposal of the subsidiaries.

7. Classification of Joint Arrangements and Accounting Treatment of Joint Operations

The Group classifies joint arrangements into joint operations and joint ventures.

A joint operation refers to a joint arrangement where the Group is the joint operations party of the joint arrangement and enjoys assets and has to bear liabilities related to the arrangement. The Company confirms the following items related to the interests share among the joint operations and executes accounting treatment according to the regulations of the relevant ASBE:

- (1) Recognizes the assets that it holds and bears in the joint operation and recognizes the jointly-held assets according to the Group's stake in the joint operation;
- (2) Recognizes the liabilities that it holds and bears in the joint operation and recognizes the jointly-held liabilities according to the Group's stake in the joint operation;
- (3) Recognizes the income from sale of the Group's share in the output of the joint operation
- (4) Recognizes the income from sale of the joint operation's outputs according to the Group's stake in it

(5) Recognizes the expense solely incurred to the Group and the expense incurred to the joint operation according to the Group's stake in it.

8. Recognition Standard for Cash and Cash Equivalents

In the Group's understanding, cash and cash equivalents include cash on hand, any deposit that can be used for cover, and short-term (usually due within 3 months since the day of purchase) and high circulating investments, which are easily convertible into known amount of cash and whose risks in change of value are minimal.

9. Foreign Currency Businesses and Translation of Foreign Currency Financial Statements

(1) Foreign currency business

Concerning the foreign-currency transactions that occurred, the foreign currency shall be converted into the recording currency according to the middle price of the market exchange rate disclosed by the People's Bank of China on the date of the transaction. Among the said transactions that occurred, those involving foreign exchanges shall be converted according to the exchange rates adopted in the actual transactions.

On the balance sheet date, the foreign-currency monetary assets and the balance of the liability account shall be converted into the recoding currency according to the middle price of the market exchange rates disclosed by the People's Bank of China on the Balance Sheet Date. The difference between the recording-currency amount converted according to the exchange rate on the Balance Sheet Date and the original book recording-currency amount shall be recognized as gains/losses from foreign exchange. And the exchange gain/loss caused by the foreign-currency borrowings related to purchasing fixed assets shall be handled according to the principle of capitalizing borrowing expenses; the exchange gain/loss incurred in the establishment period shall be recorded into the establishment expense; others shall be recorded into the financial expenses for the current period.

On the balance sheet date, the foreign-currency non-monetary items measured by historical cost shall be converted according to the middle price of the market exchange disclosed by the People's Bank of China on the date of the transaction, with no changes in the original recording-currency amount; while the foreign-currency non-monetary items measured by fair value shall be converted according to the middle price of the market exchange disclosed by the People's Bank of China on the date when the fair value is recognized, and the exchange gain/loss caused thereof shall be recognized as the gain/loss from fair value changes and recorded into the gain/loss of the current period.

(2) Translation of foreign currency

The assets and liabilities items among the balance sheet of the foreign operation shall be translated at a spot exchange rate on the balance sheet date. Among the owner's equity items, except for the items as "undistributed profits", other items shall be translated at the spot exchange rate at the time when they are incurred. And the revenues and expenses items among the balance sheet of the foreign operation shall be translated at the approximate exchange rate of the transaction date. The difference caused from the above transaction of the foreign currency statement should be listed in the other comprehensive income among the owners' equities.

10. Financial Instruments

(1) Category of financial instruments

The Company classifies the financial assets into four kinds such as trading financial assets, available-for-sale financial assets, accounts receivable and held-to-maturity investment according to the investment purpose and the economy nature.

The Company classifies the financial liabilities into two kinds such as the financial liabilities measured by fair value with the changes included in the current gains and losses and the other financial liabilities measured by amortized cost according to the economy nature.

(2) Recognition basis and measurement methods of financial instruments

The trading financial assets should be measured by fair value with the changes of fair value included in the current gains and losses; the available-for-sale financial assets should be measured by fair value with the changes of fair value included in the owners' equities; and the accounts receivable and the held-to-maturity investment should be measured by amortized cost.

(3) Recognition basis and measurement methods of financial instruments transformation

The Company transfers or delivers a financial asset to a party other than the issuer of the financial asset and the transformation of the financial assets could be whole of the financial assets or a part of it, which including two methods:

The enterprise transfers the right to another party for receiving the cash flow of the financial asset;

The enterprise transfers the financial asset to another party, but maintains the right to receive the cash flow of the financial asset and undertakes the obligation to pay the cash flow it receives to the final recipient.

Where the Company has transferred a part or nearly all of the risks and rewards related to the ownership of the financial asset to the transferee, it shall stop recognizing the financial asset and the difference between the consideration received and the book value of the transferred financial assets should be recognized as gains and losses and at the same time transfers the accumulative gains or losses from the recognized financial assets among the original owners' equities in the gains and losses; if it retained nearly all of the risks and rewards related to the ownership of the financial asset, it shall continue to recognize the whole or part of the financial assets and the consideration received be recognized as financial liabilities.

Where the Company neither transfers nor retains nearly all of the risks and rewards related to the ownership of a financial asset, and it does not cease its control on the said financial asset, it recognizes the relevant financial asset and liability accordingly according to the extent of its continuous involvement in the transferred financial asset.

(4) De-recognition conditions of financial liabilities

Only when the prevailing obligations of a financial liability are relieved in all or in part may the recognition of the financial liability be terminated in all or partly.

(5) Recognition methods of the fair value of main financial assets and financial liabilities

As for the financial assets held by the Company or the financial liabilities plans to undertake, if there exists active market, should adopt the current offering price in the active market, and as for the financial assets plans to be purchased by the Company or the financial liabilities undertook, should adopt the current offering in the active market, and if there is no current offering price or asking price, should adopt the market quotation of the recent transactions or the adjusted market quotation of the recent transactions, except for there is definite evidence indicate the market quotation is not the fair value.

Where there is no active market for a financial instrument, the enterprise concerned shall adopt value appraisal techniques, including the prices adopted by the parties, who are familiar with the condition, in the latest market transaction upon their own free will, the current fair value obtained by referring to other financial instruments of the same essential nature etc.

(6) Impairment test method and withdrawal methods of impairment provision of financial assets (excluding accounts receivable)

The Company shall carry out an inspection, on the balance sheet day, on the carrying amount of the financial assets other than those measured at their fair values and of which the variation is recorded into the profits and

losses of the current period. Where there is any objective evidence proving that such financial asset has been impaired, an impairment provision shall be made. For the financial assets with significant single amount, if there is objective evidence indicates the occurred impairment, should recognize the impairment losses and should include which in the current gains and losses. As for the financial assets with insignificant single amount but not occur impairment, the Company should execute the impairment test by credit groups according to the credit degree of the customers and the actual situation of the happen of the bad debts over the years for recognizing the impairment losses.

The expression “objective evidence proving that the financial asset has been impaired” refers to the actually incurred events which, after the financial asset is initially recognized, have an impact on the predicted future cash flow of the said financial asset that can be reliably measured by the enterprise.

The objective evidences that can prove the impairment of a financial asset shall include:

A serious financial difficulty occurs to the issuer or debtor;

The debtor breaches any of the contractual stipulations, for example, fails to pay or delays the payment of interests or the principal, etc.;

The creditor makes any concession to the debtor who is in financial difficulties due to economic or legal factors, etc.;

The debtor will probably become bankrupt or carry out other financial reorganizations;

The financial asset can no longer continue to be traded in the active market due to serious financial difficulties of the issuer;

It is impossible to identify whether the cash flow of a certain asset within a certain combination of financial assets has decreased or not. But after making an overall appraisal according to the public data available, it is found that the predicted future cash flow of the said combination of financial assets has indeed decreased since it was initially recognized and such decrease can be measured, for example, the ability of the debtor of the said combination of financial assets worsens gradually, the unemployment rate of the country or region where the debtor is situated increases, the prices of the region where the guaranty is situated are obviously dropping, or the industrial sector concerned is in slump, etc.;

Any seriously disadvantageous change has occurred to technical, market, economic or legal environment, etc. wherein the debtor operates its business, which makes the investor of an equity instrument unable to take back its investment;

Where the fair value of the equity instrument investment drops significantly or not contemporarily;

Other objective evidences showing the impairment of the financial asset.

Where a financial asset measured on the basis of post-amortization costs is impaired, the carrying amount of the said financial asset shall be calculated by the difference between the book value and the current value of the predicted future cash flow of the impairment losses.

Where any financial asset measured on the basis of post-amortization costs is recognized as having suffered from any impairment loss, if there is any objective evidence proving that the value of the said financial asset has been restored, and it is objectively related to the events that occur after such loss is recognized, the impairment-related losses as originally recognized shall be reversed and be recorded into the profits and losses of the current period.

Where a sellable financial asset is impaired, even if the recognition of the financial asset has not been terminated, the accumulative losses arising from the decrease of the fair value of the owner’s equity which is directly included shall be transferred out and recorded into the profits and losses of the current period.. The accumulative losses are the initial cost after deducting the principal, the amortization amount, fair value of current period and balance after originally recorded into impairment loss of profits or losses. After the recognition of

impairment losses, if there is any objective evidence indicated that the value of financial assets is resumed and objectively related to the events after the recognition of impairment losses, transfer the impairment losses originally recognized, transfer the impairment losses of available for sale equity instrument investment and recognized as other comprehensive income, and transfer the impairment losses of available for sale liability instruments and record into current profits or losses.

11. Notes and Accounts Receivable

(1) Accounts Receivable with Significant Single Amount for which the Bad Debt Provision is Made Individually

Recognition criteria of accounts receivable with individual and significant amount	Significant single amounts refers to the accounts receivable of the single amount more than RMB 1 million (RMB 1 million include) (including accounts receivable and other accounts receivable)
Withdrawal method of the bad debt provision of the accounts receivable with significant single amounts	The Company makes an independent impairment test on the accounts receivable with significant single amount, and provision for bad debts shall withdrawn on the basis of the balance between the current values of the predicted future cash flow lower than book value. Upon independent impairment test, the accounts receivable with significant single amounts has not been impaired, it shall be withdrawn bad debt provision based on ending balance by adopting aging analysis method.

(2) Accounts Receivable which the Bad Debt Provision is withdrawn by Credit Risk Characteristics

Group name	Withdrawal method of bad debt provision
the age of the accounts receivable is divided by the groups of credit risk	aging analysis method

In the groups, those adopting aging analysis method to withdraw bad debt provision:

Applicable Not applicable

Aging	Withdrawal proportion of account receivables	Withdrawal proportion of other account receivables
Within 1 year (including 1 year)	2.00%	2.00%
1 to 2 years	5.00%	5.00%
2 to 3 years	15.00%	15.00%
3 to 4 years	30.00%	30.00%

4 to 5 years	60.00%	60.00%
Over 5 years	100.00%	100.00%

In the groups, those adopting balance percentage method to withdraw bad debt provision

Applicable Not applicable

In the groups, those adopting other methods to withdraw bad debt provision:

Applicable Not applicable

(3) Accounts Receivable with an Insignificant Single Amount but for which the Bad Debt Provision is Made Independently

Reason of individually withdrawing bad debt provision	Insignificant single amounts refers to the accounts receivable of the single amount lower than RMB 1 million (RMB1 million not include) (including accounts receivable and other accounts receivable).
Withdrawal method for bad debt provision	As for an account receivable with an insignificant single amount and which can not show its risk feature when withdrawing a bad-bet provision for it on the group basis, the bad-debt provision for the account receivable shall be withdrawn based on the difference of the expected present value of the future cash flows of the account receivable that less than its carrying amount. The Company shall withdraw the bad-debt provision for such an account receivable by combining the aging method and individual judgment based on the debtor entity's actual financial position, cash flows and other relevant information.

12. Inventory

Is the Company subject to any disclosure requirements for special industries?

No

(1) Category of Inventory

Inventory refers to the held-for-sale finished products or commodities, goods in process, materials consumed in the production process or the process providing the labor service etc. Inventory is mainly including the raw materials, low priced and easily worn articles, unfinished products, inventories and work in process—outsourced etc.

(2) Pricing method

Purchasing and storage of the various inventories should be valued according to the planed cost and the dispatch be calculated according to the weighted average method; carried forward the cost of the finished products according to the actual cost of the current period and the sales cost according to the weighted average method.

(3) Determination basis of the net realizable value of inventory and withdrawal method of the provision for falling price of inventory

At the balance sheet date, inventories are measured at the lower of the costs and net realizable value. When all the inventories are checked roundly, for those which were destroyed, outdated in all or in part, sold at a loss, etc, the Company shall estimate the irrecoverable part of its cost and withdrawal the inventory falling price reserve at the year-end. Where the cost of the single inventory item is higher than the net realizable value, the

inventory falling price reserve shall be withdrawn and recorded into profits and losses of the current period. Of which: in the normal production and operating process, as for the commodities inventory directly for sales such as the finished products, commodities and the materials for sales, should recognize the net realizable value according to the amount of the estimated selling price of the inventory minus the estimated selling expenses and the relevant taxes; as for the materials inventory needs to be processed in the normal production and operating process, should recognize its net realizable value according to the amount of the estimated selling price of the finished products minus the cost predicts to be occur when the production completes and the estimated selling expenses as well as the relevant taxes; on the balance sheet date, for the same inventory with one part agreed by the contract price and other parts not by the contract price, should be respectively recognized the net realizable value. For items of inventories relating to a product line that are produced and marketed in the same geographical area, have the same or similar end users or purposes, and cannot be practicably evaluated separately from other items in that product line provision for decline in value is determined on an aggregate basis; for large quantity and low value items of inventories, provision for decline in value is made based on categories of inventories.

(4) The perpetual inventory system is maintained for stock system.

(5) Amortization method of low-value consumables and packages

One time amortization method is adopted for low-value consumables and packages.

13. Assets Held for Sale

The Company recognizes the components (or the non-current assets) which meet with the following conditions as assets held for sale:

(1) The components must be immediately sold only according to the usual terms of selling this kind of components under the current conditions;

(2) The Company had made solutions on disposing the components (or the non-current assets), for example, the Company should gain the approval from the shareholders according to the regulations and had acquired the approved from the Annual General Meeting or the relevant authority institutions;

(3) The Company had signed the irrevocable transformation agreement with the transferee;

(4) The transformation should be completed within 1 year.

14. Long-term Equity Investments

(1) Judgment standard of joint control and significant influences

Joint control, refers to the control jointly owned according to the relevant agreement on an arrangement by the Company and the relevant activities of the arrangement should be decided only after the participants which share the control right make consensus. Significant influence refers to the power of the Group which could anticipate in the finance and the operation polices of the investees, but could not control or jointly control the formulation of the policies with the other parties.

(2) Recognition for initial investment cost

The initial investment cost of the long-term equity investment shall be recognized by adopting the following ways in accordance with different methods of acquisition:

1) As for those forms under the same control of the enterprise combine, if the combine party takes the cash payment, non-cash assets transformation, liabilities assumption or equity securities issuance as the combination consideration, should take the shares of the book value by the ultimate control party in the consolidate financial statement of the owners' equities of the combiners acquired on the merger date as the initial investment cost. The

difference between the initial investment cost and the book value of the paid combination consideration or the total amount of the issued shares of the long-term equity investment should be adjusted the capital reserve; If the capital reserve is insufficient to dilute, the retained earnings shall be adjusted. To include each direct relevant expense occurred when executing the enterprise merger into the current gains and losses; while the handling charges and commission occurs from the issuing the equity securities or the bonds for the enterprise merger should be included in the initial measurement amount of the shareholders' equities or the liabilities.

2) As for long-term equity investment acquired through the merger of enterprises not under the same control, its initial investment cost shall regard as the combination cost calculated by the fair value of the assets, equity instrument issued and liabilities incurred or undertaken on the purchase date adding the direct cost related with the acquisition. The identifiable assets of the combined party and the liabilities (including contingent liability) undertaken on the combining date shall be measured at the fair value without considering the amount of minority interest. The acquirer shall recognize the positive balance between the combination costs and the fair value of the identifiable net assets it obtains from the acquiree as business reputation. The acquirer shall record the negative balance between the combination costs and the fair value of the identifiable net assets it obtains from the acquiree into the consolidated income statement directly. The agent expense and other relevant management expenses such as the audit, legal service and evaluation consultation occurs from the enterprise merger, should be included in the current gains and losses when occur; while the handling charges and commission occurs from the issuing the equity securities or the bonds for the enterprise merger should be included in the initial measurement amount of the shareholders' equities or the liabilities.

3) Long-term equity investment obtained by other means

The initial cost of a long-term equity investment obtained by making payment in cash shall be the purchase cost which is actually paid.

The initial cost of a long-term equity investment obtained on the basis of issuing equity securities shall be the fair value of the equity securities issued.

The initial cost of a long-term equity investment of an investor shall be the value stipulated in the investment contract or agreement, the unfair value stipulated in the contract or agreement shall be measured at fair value.

As for long-term investment obtained by the exchange of non-monetary assets, where it is commercial in nature, the fair value of the assets surrendered shall be recognized as the initial cost of the long-term equity investment received; where it is not commercial in nature, the book value of the assets surrendered shall be recognized as the initial cost of the long-term equity investment received.

The initial cost of a long-term equity investment obtained by recombination of liabilities shall be recognized at fair value of long-term equity investment.

(3) Subsequent measurement and recognition of profits and losses

1) An investment in the subsidiary company shall be measured by employing the cost method

Where the Company hold, and is able to do equity investment with control over an invested entity, the invested entity shall be its subsidiary company. Where the Company holds the shares of an entity over 50%, or, while the Company holds the shares of an entity below 50%, but has a real control to the said entity, then the said entity shall be its subsidiary company.

2) An investment in the joint enterprise or associated enterprise shall be measured by employing the equity method

Where the Company hold, and is able to do equity investment with joint control with other parties over an invested entity, the invested entity shall be its joint enterprise. Where the Company hold, and is able to have equity investment with significant influences on an invested entity, the invested entity shall be its associated entity.

After the Company acquired the long-term equity investment, should respectively recognize investment income and other comprehensive income according to the net gains and losses as well as the portion of other comprehensive income which should be enjoyed or be shared, and at the same time adjust the book value of the long-term equity investment; corresponding reduce the book value of the long-term equity investment according to profits which be declared to distribute by the investees or the portion of the calculation of cash dividends which should be enjoyed; for the other changes except for the net gains and losses, other comprehensive income and the owners' equity except for the profits distribution of the investees, should adjust the book value of the long-term equity investment as well as include in the owners' equity .

The investing enterprise shall, on the ground of the fair value of all identifiable assets of the invested entity when it obtains the investment, recognize the attributable share of the net profits and losses of the invested entity after it adjusts the net profits of the invested entity.

If the accounting policy adopted by the investees is not accord with that of the Group, should be adjusted according to the accounting policies of the Group and the financial statement of the investees during the accounting period and according which to recognize the investment income as well as other comprehensive income.

For the transaction happened between the Company and associated enterprises as well as joint ventures, if the assets launched or sold not form into business, the portion of the unrealized gains and losses of the internal transaction, which belongs to the Group according to the calculation of the enjoyed proportion, should recognize the investment gains and losses on the basis. But the losses of the unrealized internal transaction happened between the Company and the investees which belongs to the impairment losses of the transferred assets, should not be neutralized.

The Company shall recognize the net losses of the invested enterprise according to the following sequence: first of all, to write down the book value of the long-term equity investment. Secondly, if the book value of the long-term equity investment is insufficient for written down, should be continued to recognized the investment losses limited to the book value of other long-term equity which forms of the net investment of the investees and to written down the book value of the long-term accounts receivable etc. Lastly, through the above handling, for those should still undertake the additional obligations according to the investment contracts or the agreements, it shall be recognized as the estimated liabilities in accordance with the estimated duties and then recorded into investment losses at current period. If the invested entity realizes any net profits later, the Group shall, after the amount of its attributable share of profits offsets against its attributable share of the un-recognized losses, resume recognizing its attributable share of profits.

In the preparation for the financial statements, the balance existed between the long-term equity investment increased by acquiring shares of minority interest and the attributable net assets on the subsidiary calculated by the increased shares held since the purchase date (or combination date), the capital reserves shall be adjusted, if the capital reserves are not sufficient to offset, the retained profits shall be adjusted; the Company disposed part of the long-term equity investment on subsidiaries without losing its controlling right on them, the balance between the disposed price and attributable net assets of subsidiaries by disposing the long-term equity investment shall be recorded into owners' equity.

For other ways on disposal of long-term equity investment, the balance between the book value of the disposed equity and its actual payment gained shall be recorded into current profits and losses.

For the long-term equity investment measured by adopting equity method, if the remained equity after disposal still adopts the equity method for measurement, the other comprehensive income originally recorded into owners' equity should adopt the same basis of the accounting disposal of the relevant assets or liabilities directly disposed by the investees according to the corresponding proportion. The owners' equity recognized owing to the

changes of the other owners' equity except for the net gains and losses, other comprehensive income and the profits distribution of the investees, should be transferred into the current gains and losses according to the proportion.

For the long-term equity investment which adopts the cost method of measurement, if the remained equity still adopt the cost method, the other comprehensive income recognized owing to adopting the equity method for measurement or the recognition and measurement standards of financial instrument before acquiring the control of the investees, should adopt the same basis of the accounting disposal of the relevant assets or liabilities directly disposed by the investees and should be carried forward into the current gains and losses according to the proportion; the changes of the other owners' equity except for the net gains and losses, other comprehensive income and the profits distribution among the net assets of the investees which recognized by adopting the equity method for measurement, should be carried forward into the current gains and losses according to the proportion.

For those the Company lost the control of the investees by disposing part of the equity investment as well as the remained equity after disposal could execute joint control or significant influences on the investees, should change to measure by equity method when compiling the individual financial statement and should adjust the measurement of the remained equity to equity method as adopted since the time acquired; if the remained equity after disposal could not execute joint control or significant influences on the investees, should change the accounting disposal according to the relevant regulations of the recognition and measurement standards of financial instrument, and its difference between the fair value and book value on the date lose the control right should be included in the current gains and losses. For the other comprehensive income recognized by adopting equity method for measurement or the recognition and measurement standards of financial instrument before the Group acquired the control of the investees, should execute the accounting disposal by adopting the same basis of the accounting disposal of the relevant assets or liabilities directly disposed by the investees when lose the control of them, while the changes of the other owners' equity except for the net gains and losses, other comprehensive income and the profits distribution among the net assets of the investees which recognized by adopting the equity method for measurement, should be carried forward into the current gains and losses according to the proportion. Of which, for the disposed remained equity which adopted the equity method for measurement, the other comprehensive income and the other owners' equity should be carried forward according to the proportion; for the disposed remained equity which changed to execute the accounting disposal according to the recognition and measurement standards of financial instrument, the other comprehensive income and the other owners' equity should be carried forward in full amount.

For those the Company lost the control of the investees by disposing part of the equity investment, the disposed remained equity should change to calculate according to the recognition and measurement standards of financial instrument, and difference between the fair value and book value on the date lose the control right should be included in the current gains and losses. For the other comprehensive income recognized from the original equity investment by adopting the equity method, should execute the accounting disposal by adopting the same basis of the accounting disposal of the relevant assets or liabilities directly disposed by the investees when terminate the equity method for measurement, while for the owners' equity recognized owing to the changes of the other owner's equity except for the net gains and losses, other comprehensive income and the profits distribution of the investees, should be transferred into the current investment income with full amount when terminate adopting the equity method.

15. Investment Real Estate

Measurement mode of investment real estate:

Measurement of cost model

Depreciation or amortization method

The investment real estate shall be measured at its cost. Of which, the cost of an investment real estate by acquisition consists of the acquisition price, relevant taxes, and other expense directly relegated to the asset; the cost of a self-built investment real estate composes of the necessary expenses for building the asset to the hoped condition for use. The investment real estate invested by investors shall be recorded at the value stipulated in the investment contracts or agreements, but the unfair value appointed in the contract or agreement shall be entered into the account book at the fair value.

As for withdrawal basis of provision for impairment of investment real estates, please refer to withdrawal method for provision for impairment of fixed assets.

16. Fixed Assets

(1) Recognition Conditions

Fixed assets refers to the tangible assets that simultaneously possess the features as follows: (a) they are held for the sake of producing commodities, rendering labor service, renting or business management; and (b) their useful life is in excess of one fiscal year. The fixed assets are only recognized when the relevant economic benefits probably flow in the Company and its cost could be reliable measured.

(2) Depreciation Method

Category of fixed assets	Method	Useful life	Annual depreciation
Housing and building	Average method of useful life	20-40	2.50%-5%
Machinery equipment	Average method of useful life	6-15	6.67%-16.67%
Transportation equipment	Average method of useful life	5-10	10%-20%
Other equipment	Average method of useful life	5-10	10%-20%

(3) Recognition Basis, Pricing and Depreciation Method of Fixed Assets by Finance Lease

The Company recognizes those meet with the following one or certain standards as the fixed assets by finance lease:

1) The leasing contract had agreed that (or made the reasonable judgment according to the relevant conditions on the lease starting date) when the lease term expires, the ownership of leasing the fixed assets could be transferred to the Company;

2) The Company owns the choosing right for purchasing and leasing the fixed assets, with the set purchase price which is estimated far lower than the fair value of the fixed assets by finance lease when executing the choosing right, so the Company could execute the choosing right reasonably on the lease starting date;

3) Even if the ownership of the fixed assets not be transferred, the lease period is of 75% or above of the useful life of the lease fixed assets;

4) The current value of the minimum lease payment on the lease starting date of the Company is equal to 90% or above of the fair value of the lease fixed assets on the lease starting date; the current value of the

minimum lease receipts on the lease starting date of the leaser is equal to 90% or above of the fair value of the lease fixed assets on the lease starting date;

5) The nature of the lease assets is special that only the Company could use it if not execute large transformation.

The fixed assets by finance lease should take the lower one between the fair value of the leasing assets and the current value of the minimum lease payment on the lease starting date as the entry value. As for the minimum lease payment which be regarded as the entry value of the long-term accounts payable, its difference should be regarded as the unrecognized financing expense. For the initial direct expenses occur in the lease negotiations and the signing process of the lease contracts that attribute to the handling expenses, counsel fees, travel expenses and stamp taxes of the lease items, should be included in the charter-in assets value. The unrecognized financing expenses should be amortized by adopting the actual interest rate during the period of the lease term.

The fixed assets by finance lease shall adopt the same depreciation policy for self-owned fixed assets. If it is reasonable to be certain that the lessee will obtain the ownership of the leased asset when the lease term expires, the leased asset shall be fully depreciated over its useful life. If it is not reasonable to be certain that the lessee will obtain the ownership of the leased asset at the expiry of the lease term, the leased asset shall be fully depreciated over the shorter one of the lease term or its useful life

17. Construction in Progress

Is the Company subject to any disclosure requirements for special industries?

No

(1) Valuation of the progress in construction

Construction in progress shall be measured at actual cost. Self-operating projects shall be measured at direct materials, direct wages and direct construction fees; construction contract shall be measured at project price payable; project cost for plant engineering shall be recognized at value of equipments installed, cost of installation, trail run of projects. Costs of construction in process also include borrowing costs and exchange gains and losses, which should be capitalized.

(2) Standardization on construction in process transferred into fixed assets and time point

The construction in process, of which the fixed assets reach to the predicted condition for use, shall carry forward fixed assets on schedule. The one that has not audited the final accounting shall recognize the cost and make depreciation in line with valuation value. The construction in process shall adjust the original valuation value at its historical cost but not adjust the depreciation that has been made after auditing the final accounting.

18. Borrowing Costs

(1) Recognition principle of capitalization of borrowing costs

The borrowing costs shall include the interest on borrowings, amortization of discounts or premiums on borrowings, ancillary expenses, and exchange balance on foreign currency borrowings. Where the borrowing costs occurred belong to specifically borrowed loan or general borrowing used for the acquisition and construction of investment real estates and inventories over one year (including one year) shall be capitalized, and record into relevant assets cost. Other borrowing costs shall be recognized as expenses on the basis of the actual amount incurred, and shall be recorded into the current profits and losses. The borrowing costs shall not be capitalized unless they simultaneously meet the following three requirements: (1) The asset disbursements have already incurred; (2) The borrowing costs have already incurred; and (3) The acquisition and construction or production

activities which are necessary to prepare the asset for its intended use or sale have already started.

(2) The period of capitalization of borrowing costs

The borrowing costs arising from acquisition and construction of fixed assets, investment real estates and inventories, if they meet the above-mentioned capitalization conditions, the capitalization of the borrowing costs shall be measured into asset cost before such assets reach to the intended use or sale, Where acquisition and construction of fixed assets, investment real estates and inventories is interrupted abnormally and the interruption period lasts for more than 3 months, the capitalization of the borrowing costs shall be suspended, and recorded into the current expense, till the acquisition and construction of the assets restarts. When the qualified asset is ready for the intended use or sale, the capitalization of the borrowing costs shall be ceased, the borrowing costs occurred later shall be included into the financial expense directly at the current period.

(3) Measurement method of capitalization amount of borrowing costs

As for specifically borrowed loans for the acquisition and construction or production of assets eligible for capitalization, the to-be-capitalized amount of interests shall be determined in light of the actual cost incurred of the specially borrowed loan at the present period minus the income of interests earned on the unused borrowing loans as a deposit in the bank or as a temporary investment.

Where a general borrowing is used for the acquisition and construction or production of assets eligible for capitalization, the enterprise shall calculate and determine the to-be-capitalized amount of interests on the general borrowing by multiplying the weighted average asset disbursement of the part of the accumulative asset disbursements minus the general borrowing by the capitalization rate of the general borrowing used. The capitalization rate shall be calculated and determined in light of the weighted average interest rate of the general borrowing.

19. Intangible Assets

(1) Pricing Method, Service Life, and Impairment Test

(1) Pricing method of intangible assets

Intangible assets purchased should take the actual payment and the relevant other expenses as the actual cost.

For the intangible assets invested by the investors should be recognized the actual cost according to the value of the investment contracts or agreements, however, for the value of the contracts or agreements is not fair, the actual cost should be recognized according to the fair value.

For the intangible assets acquires from the exchange of the non-currency assets, if own the commercial nature, should be recorded according to the fair value of the swap-out assets; for those not own the commercial nature, should be recorded according to the book value of the swap-out assets.

For the intangible assets acquires from the debts reorganization should be recognized by the fair value.

(2) Amortization method and term of intangible assets

As for the intangible assets with limited service life, which are amortized by straight-line method when it is available for use within the service period, shall be recorded into the current profits and losses. The Company shall, at least at the end of each year, check the service life and the amortization method of intangible assets with limited service life. When the service life and the amortization method of intangible assets are different from those before, the years and method of the amortization shall be changed.

Intangible assets with uncertain service life may not be amortized. However, the Company shall check the service life of intangible assets with uncertain service life during each accounting period. Where there are evidences to prove the intangible assets have limited service life, it shall be estimated of its service life, and be amortized according to the above method mentioned.

The rights to use land of the Company shall be amortized according to the rest service life.

(2) Accounting Policies of Internal R & D Expenses

The internal research and development projects of an enterprise shall be classified into research phase and development phase: the term “research” refers to the creative and planned investigation to acquire and understand new scientific or technological knowledge; the term “development” refers to the application of research achievements and other knowledge to a certain plan or design, prior to the commercial production or use, so as to produce any new material, device or product, or substantially improved material, device and product.

The Company collects the expenses of the corresponding phases according to the above standard of classifying the research phase and the development phase. The research expenditures for its internal research and development projects of an enterprise shall be recorded into the profit or loss for the current period. The development expenditures for its internal research and development projects of an enterprise may be capitalized when they satisfy the following conditions simultaneously: it is feasible technically to finish intangible assets for use or sale; it is intended to finish and use or sell the intangible assets; the usefulness of methods for intangible assets to generate economic benefits shall be proved, including being able to prove that there is a potential market for the products manufactured by applying the intangible assets or there is a potential market for the intangible assets itself or the intangible assets will be used internally; it is able to finish the development of the intangible assets, and able to use or sell the intangible assets, with the support of sufficient technologies, financial resources and other resources; the development expenditures of the intangible assets can be reliably measured.

20. Impairment of Long-term Assets

For non-current financial Assets of fixed Assets, projects under construction, intangible Assets with limited service life, investing real estate with cost model, long-term equity investment of subsidiaries, cooperative enterprises and joint ventures, the Group should judge whether decrease in value exists on the date of balance sheet. Recoverable amounts should be tested for decrease in value if it exists. Other intangible Assets of reputation and uncertain service life and other non-accessible intangible assets should be tested for decrease in value no matter whether it exists.

If the recoverable amount is less than book value in impairment test results, the provision for impairment of differences should include in impairment loss. Recoverable amounts would be the higher of net value of asset fair value deducting disposal charges or present value of predicted cash flow. Asset fair value should be determined according to negotiated sales price of fair trade. If no sales agreement exists but with asset active market, fair value should be determined according to the Buyer’s price of the asset. If no sales agreement or asset active market exists, asset fair value could be acquired on the basis of best information available. Disposal expenses include legal fees, taxes, cartage or other direct expenses of merchantable Assets related to asset disposal. Present value of predicted asset cash flow should be determined by the proper discount rate according to Assets in service and predicted cash flow of final disposal. Asset depreciation reserves should be calculated on the basis of single Assets. If it is difficult to predict the recoverable amounts for single Assets, recoverable amounts should be determined according to the belonging asset group. Asset group is the minimum asset combination producing cash flow independently.

In impairment test, book value of the business reputation in financial report should be shared to beneficial asset group and asset group combination in collaboration of business merger. It is shown in the test that if recoverable amounts of shared business reputation asset group or asset group combination are lower than book value, it should determine the impairment loss. Impairment loss amount should firstly be deducted and shared to

the book value of business reputation of asset group or asset group combination, then deduct book value of all assets according to proportions of other book value of above assets in asset group or asset group combination except business reputation.

After the asset impairment loss is determined, recoverable value amounts would not be returned in future.

21. Amortization Method of Long-term Deferred Expenses

Long-term deferred expenses of the Company shall be recorded in light of the actual expenditure, and amortized averagely within benefit period. In case of no benefit in the future accounting period, the amortized value of such project that fails to be amortized shall be transferred into the profits and losses of the current period.

22. Payroll

(1) Accounting Treatment of Short-term Compensation

Short-term compensation mainly including salary, bonus, allowances and subsidies, employee services and benefits, medical insurance premiums, birth insurance premium, industrial injury insurance premium, housing fund, labor union expenditure and personnel education fund, non-monetary benefits etc. The short-term compensation actually happened during the accounting period when the active staff offering the service for the Group should be recognized as liabilities and is included in the current gains and losses or relevant assets cost. Of which the non-monetary benefits should be measured according to the fair value.

(2) Accounting Treatment of the Welfare after Demission

The Company classifies the welfare plans after demission into defined contribution plans and defined benefit plans. Welfare plans after demission refers to the agreement on the welfare after demission reaches between the Company and the employees, or the regulations or methods formulated by the Company for providing the welfare after demission for the employees. Of which, defined contribution plans refers to the welfare plans after demission that the Company no more undertake the further payment obligations after the payment of the fixed expenses for the independent funds; defined benefit plans, refers to the welfare plans after demission except for the defined contribution plans.

Defined contribution plans

During the accounting period that the Company providing the service for the employees, the Company should recognize the liabilities according to the deposited amount calculated by defined contribution plans, and should be included in the current gains and losses or the relevant assets cost.

(3) Accounting Treatment of the Demission Welfare

The Company should recognize the payroll payment liabilities occur from the demission welfare according to the earlier date between the following two conditions and include which in the current gains and losses when providing the demission welfare for the employees: the Company could not unilaterally withdraw the demission welfare owing to the relieve plans of the labor relationship or reduction; when the Company recognizing the costs or expenses related to the reorganization involves with the demission welfare payments.

23. Estimated Liabilities

(1) Criteria of estimated liabilities

Only if the obligation pertinent to a contingencies shall be recognized as an estimated debts when the following conditions are satisfied simultaneously:

- 1) That obligation is a current obligation of the Company;
- 2) It is likely to cause any economic benefit to flow out of the Company as a result of performance of the obligation;
- 3) The amount of the obligation can be measured in a reliable way.

(2) Measurement of estimated liabilities

The Company shall measure the estimated debts in accordance with the best estimate of the necessary expenses for the performance of the current obligation.

The Company shall check the book value of the estimated debts on the Balance Sheet Date. If there is any conclusive evidence proving that the said book value can't truly reflect the current best estimate, the Company shall, subject to change, make adjustment to carrying value to reflect the current best estimate.

24. Revenue

Is the Company subject to any disclosure requirements for special industries?

No

(1) Recognition of revenue from sale of goods: the revenue from selling shall be recognized by the following conditions: The significant risks and rewards of ownership of the goods have been transferred to the buyer by the Company; the Company retains neither continuous management right that usually keeps relation with the ownership nor effective control over the sold goods; the relevant amount of revenue can be measured in a reliable way; the relevant revenue and costs of selling goods can be measured in a reliable way. The amount of the revenue from selling shall ascertain the revenue incurred by selling goods in accordance with the received or receivable price stipulated in the contract or agreement signed between the enterprise and the buyer, unless the received or receivable amount as stipulated in the contract or agreement is unfair.

(2) Recognition of revenue from providing labor services: When the total revenue and costs from providing labor can be measured in a reliable way; the relevant economic benefits are likely to flow into the enterprise; the schedule of completion under the transaction can be measured in a reliable way, the revenue from providing labor shall be recognized. If the Company can reliably estimate the outcome of a transaction concerning the labor services it provides, it shall recognize the revenue from providing services employing the percentage-of-completion method on the date of the balance sheet, otherwise the revenue from the providing of labor services shall be recognized in accordance with the amount of the cost of labor services incurred and expected to be compensated. The Company recognized the completion process of the transaction concerning the labor services according to the proportion of the occurred cost of the estimated total cost. The total amount of the revenue from providing services should be recognized according to the contract price received or receivable from the accepting of the labor services or the agreement price except for those unfair prices.

(3) Recognition of the revenue from transferring use rights of assets: When the relevant economic benefits are likely to flow into the enterprises and the amount of revenues can be measured in a reliable way, the revenue from abalienating the right to use assets shall be recognized. The amount of interest revenue should be measured and confirmed in accordance with the length of time for which the enterprise's cash is used by others and the actual interest rate; the amount of royalty revenue should be measured and confirmed in accordance with the period and method of charging as stipulated in the relevant contract or agreement; as for the rental revenue: the amount of the rental revenue from the operation lease should be recognized according to the straight-line method during each period of the lease term or accrued into the current gains and losses if rental actual occurred.

25. Government Subsidies

(1) Type

A government subsidy means the monetary or non-monetary assets obtained free by an enterprise from the government. Government subsidies consist of the government subsidies pertinent to assets and government subsidies pertinent to income according to the relevant government documents.

For those the government documents not definite stipulate the assistance object, the judgment basis of the Company classifies the government subsidies pertinent to assets and government subsidies pertinent to income is: whether are used for purchasing or constructing or for forming the long-term assets by other methods.

(2) Recognition of Government Subsidies

The government subsidies should be recognized only when meet with the attached conditions of the government subsidies as well as could be acquired.

If the government subsidies are the monetary assets, should be measured according to the received or receivable amount; and for the government subsidies are the non-monetary assets, should be measured by fair value.

(3) Accounting Treatment

The government subsidies pertinent to assets shall be recognized as deferred income, and included in the current gains and losses or offset the book value of related assets within the useful lives of the relevant assets with a reasonable and systematic method. Government subsidies pertinent to income used to compensate the relevant costs, expenses or losses of the Company in the subsequent period shall be recognized as deferred income, and shall be included in the current profit and loss during the period of confirming the relevant costs, expenses or losses; those used to compensate the relevant costs, expenses or losses of the Company already happened shall be included in the current gains and losses or used to offset relevant costs directly.

For government subsidies that include both assets-related and income-related parts, they should be distinguished separately for accounting treatment; for government subsidies that are difficult to be distinguished, they should be classified as income-related.

Government subsidies related to the daily activities of the Company shall be included into other income or used to offset relevant costs by the nature of economic business; those unrelated shall be included into non-operating income.

The government subsidies recognized with relevant deferred income balance but need to return shall be used to offset the book balance of relevant deferred income, the excessive part shall be included in the current gains and losses or adjusting the book value of assets for the government subsidies assets-related that offset the book value of relevant assets when they are initially recognized; those belong to other cases shall be directly included in the current gains and losses.

26. Deferred Income Tax Assets and Liabilities

(1) Basis of recognizing the deferred income tax assets

According to the difference between the book value of the assets and liabilities and their tax basis, A deferred tax assets shall be measured in accord with the tax rates that are expected to apply to the period when the asset is realized or the liability is settled.

The recognition of the deferred income tax assets is limited by the income tax payable that the Company probably gains for deducting the deductible temporary differences. At the balance sheet date, where there is strong evidence showing that sufficient taxable profit will be available against which the deductible temporary difference

can be utilized, the deferred tax asset unrecognized in prior period shall be recognized.

The Company assesses the carrying amount of deferred tax asset at the balance sheet date. If it's probable that sufficient taxable profit will not be available against which the deductible temporary difference can be utilized, the Company shall write down the carrying amount of deferred tax asset, or reverse the amount written down later when it's probable that sufficient taxable profit will be available.

(2) Basis of recognizing the deferred income tax liabilities

According to the difference between the book value of the assets and liabilities and their tax basis, A deferred tax liabilities shall be measured in accord with the tax rates that are expected to apply to the period when the asset is realized or the liability is settled.

27. Lease

(1) Accounting Treatment of Operating Lease

Lessee in an operating lease shall treat the lease payment under an operating lease as a relevant asset cost or the current profit or loss on a straight-line basis over the lease term. The initial direct costs incurred shall be recognized as the current profit or loss; Contingent rents shall be charged as expenses in the periods in which they are incurred.

Lessors in an operating lease shall be recognized as the current profit or loss on a straight-line basis over the lease term; Initial direct costs incurred by lessors shall be recognized as the current profit or loss; the initial direct expenses occur should be directly included in the current gains and losses except for those with larger amount and be capitalized as well as be included in the gains and losses by stages. Contingent rents shall be charged as expenses in the periods in which they are incurred.

(2) Accounting Treatments of Financial Lease

When the Company as the lessee, On the lease beginning date, the Company shall record the lower one of the fair value of the leased asset and the present value of the minimum lease payments on the lease beginning date as the entering value in an account, recognize the amount of the minimum lease payments as the entering value in an account of long-term account payable, and treat the balance between the recorded amount of the leased asset and the long-term account payable as unrecognized financing charges and the occurred initial direct expenses, should be recorded in the lease assets value. During each lease period, should recognize the current financing expenses by adopting the actual interest rate.

When the Company as the lessor and on the beginning date of the lease term, the Company shall recognize the sum of the minimum lease receipts on the lease beginning date and the initial direct costs as the entering value in an account of the financing lease values receivable, and record the unguaranteed residual value at the same time. The balance between the sum of the minimum lease receipts, the initial direct costs and the unguaranteed residual value and the sum of their present values shall be recognized as unrealized financing income. During each lease period, should recognize the current financing revenues adopting the actual interest rate.

28. Other Significant Accounting Policies and Estimates

(1) Operation termination

Operation termination refers to the compose part that meet with one of the following conditions which had been disposed by the Group or be classified to held-to-sold as well as could be individually distinguished in operating and compiling the financial statement:

- 1) The compose part represents an individual main business or a main operation area;
- 2) The compose part is a part intends to dispose and plan an individual main business or a main operation area;

3) The compose part is a subsidiary which be acquired only for resold.

(2) Hedging accounting

The term “hedging” refers to one or more hedging instruments which are designated by an enterprise for avoiding the risks of foreign exchange, interest rate, commodity price, stock price, credit and etc., and which is expected to make the changes in fair value or cash flow of hedging instrument(s) to offset all or part of the changes in the fair value or cash flow of the hedged item.

The term “hedging instrument” shall refer to a derivative instrument which is designated by an enterprise for hedging and by which it is expected that changes in its fair value or cash flow can offset the changes in fair value or cash flow of the hedged item. For a hedging of foreign exchange risk, a non-derivative financial asset or non-derivative financial liability may be used as a hedging instrument.

The “hedged item” shall refer to the following items which make an enterprise faced to changes in fair value or cash flow and are designated as the hedged objectives.

The hedging should be executed by the hedging accounting methods when satisfying the following conditions at the same time:

1) At the commencement of the hedging, the enterprise shall specify the hedging relationship formally (namely the relationship between the hedging instrument and the hedged item) and prepare a formal written document on the hedging relationship, risk management objectives and the strategies of hedging.

2) The hedging expectation is highly efficient and meets the risk management strategy, which is confirmed for the hedging relationship by enterprise at the very beginning.

3) For a cash flow hedging of forecast transaction, the forecast transaction shall be likely to occur and shall make the enterprise faced to the risk of changes in cash flow, which will ultimately affect the profits and losses.

4) The effectiveness of hedging can be reliably measured.

5) The hedging is highly effective in accounting period in which the hedging relationship is specified.

29. Changes in Main Accounting Policies and Estimates

(1) Change of Accounting Policies

Contents and reasons	Procedures	Remarks
In the balance sheet, “Notes Receivable” and “Accounts Receivable” are combined into “Notes Receivable and Accounts Receivable”; “Notes Payable” and “Accounts Payable” are combined into “Notes Payable and Accounts Payable”; “Interest Receivable” and “Dividends Receivable” are incorporated into “Other Receivables”; “Interest Payable” and	The 14 th Meeting of the 8 th Board of Directors	The impact on the items of Consolidated Balance Sheet as at 31 December 2017 is as follows: 1. “Notes Receivable and Accounts Receivable” increased by RMB1,108,415,299.12; “Notes receivable” decreased by RMB716,404,345.57 ; “Accounts receivable” decreased by RMB392,010,953.55; 2. “Notes Payable and Accounts Payable”

The “Dividends Payable” decreased by RMB3,891,433.83 and was incorporated into “Other Payables”; the “Other Payables” increased by RMB3,891,433.83, and the adjusted balance of "Other Payables" was RMB195,985,676.91.</p>
<p>In the income statement, the item of “R&D Expense” is added and the original R&D expense in the item of “Administrative Expense” is reclassified into “R&D Expense”; in the income statement, the items of “Of which: interest expense” and “Interest income” are added under the item of “Finance Costs”. The comparative data shall be adjusted accordingly.</p>		<p>The impact on the items of Consolidated Income Statement for the year 2017 is as follows:</p> <p>The “Administrative Expense” was reduced by RMB76,715,296.15, reclassified to "R&D Expense", and the adjusted “Administrative Expense” was RMB107,835,619.11, while the “R&D Expense” increased by RMB76,715,296.15.</p>

Notes of the Ministry of Finance on Revising and Printing the Format of 2018 General Enterprises Financial Statement (CK [2018] No. 15) was issued by the Ministry of Finance on 15 June 2018, which revised the format of general enterprises financial statements. After it was being reviewed and approved by the 14th Meeting of the 8th Board of Directors, the Company began to implement the above-mentioned notice on the required time by the Ministry of Finance.

(2) Changes in Accounting Estimates

Applicable Not applicable

30. Other

Critical accounting judgments and estimates

Due to the inside uncertainty of operating activity, the Group needed to make judgments, estimates and assumption on the book value of the accounts without accurate measurement during the employment of accounting policies. And these judgments, estimates and assumption were made basing on the prior experience of the senior executives of the Group, as well as in consideration of other factors. These judgments, estimates and assumption would also affect the report amount of income, costs, assets and liabilities, as well as the disclosure of contingent liabilities on balance sheet date. However, the uncertainty of these estimates was likely to cause significant adjustment on the book value of the affected assets and liabilities.

The Group would check periodically the above judgments, estimates and assumption on the basis of continuing operation. For the changes in accounting estimates only affected on the current period, the influence should be recognized at the period of change occurred; for the changes in accounting estimates affected the current period and also the future period, the influence should be recognized at the period of change occurred and future period.

On the balance sheet date, the Group needed to make judgments, estimates and assumption on the accounts in the following important items:

(1) Provision for Bad Debts

In accordance with the accounting policies of accounts receivable, the Group measured the losses for bad debts by adopting allowance method. The impairment of accounts receivable was based on the appraisal of the recoverability of accounts receivable. The impairment of accounts receivable was dependent on the judgment and estimates. The actual amount and the difference of previous estimates would affect the book value of accounts receivable and the withdrawal and reversal on provision for bad debts of accounts receivable during the period of estimates being changed.

(2) Provision for Falling Price of Inventories

In accordance with the accounting policies of inventories, for the inventories that the costs were more than the net realizable value as well as out-of-date and dull-sale inventories, the Group withdrawn the provision for falling price of inventories on the lower one between costs and net realizable value. Evaluating the falling price of inventories needed the management level gain the valid evidence and take full consideration of the purpose of inventories, influence of events after balance sheet date and other factors, and then made relevant judgments and estimates. The actual amount and the difference of previous estimates would affect the book value of inventories and the withdrawal and reversal on provision for bad debts of inventories during the period of estimates being changed.

(3) Held-to-maturity Investment

The Company classifies the non-derivative financial assets which meet with conditions with fixed or confirmable repayment amount and fixed maturity date as well as the Company owns definite intention and ability to hold until mature as the held-to-maturity investment. To execute the classification needs large judgment. In the process of executing the judgment, the Company would assess the intention and ability of the investment which hold until the due date. Except for the particular situation (for example, selling the investment with insignificant amount when approaching the due date), if the Company fails to hold the investment until the due date, should re-classify the investment to the available-for-sale financial assets and would no more be classified as the held-to-maturity investment in the current fiscal year as well as the afterward two complete fiscal years. If there exists such situation, that would probably cause significant influences on the value of the relevant financial assets presented on the financial statement and may influence the risks management strategies of the financial instruments of the Company.

(4) Held-to-maturity Investment Impairment

The Company confirms whether the held-to-maturity investment has impairment depends on the judgment from the management layer to a large extent. The objective evidences of the impairments including the issuers which occur serious financial difficulties that lead the financial assets could not continue to trade in the active market and to execute the contracts regulations (for example, to return the interests or the principal violates a treaty) etc. In the process of executing judgment, the Company needs to evaluate the influences of the objective evidences of the impairment on the estimated future cash flow.

(5) The Impairment of Financial Assets Available for Sale

The Group judged whether the financial assets available for sale were impaired relying heavily on the

judgment and assumption of the management team, so as to decide whether recognized the impairment losses in the income statement. During the process of making the judgment and assumption, the Group needed to appraise the balance of the cost of the investment exceeding its fair value and the continuous period, the financial status and business forecast in a short period, including the industrial situation, technical reform, credit level, default rate and risk of counterparty.

(6) Provision for Impairment of Non-financial Non-current Assets

The Group made a judgment on the non-current assets other than financial assets whether they had any indication of impairment on the balance sheet date. For the intangible assets without finite service life, other than the annual impairment test, they should be subject to the impairment test when there was any indication of impairment. For other non-current non-financial assets, which should be subjected to impairment test when there was indication of impairment indicated that the book value can't be recoverable.

When the book value of the assets or assets portfolio was more than the recoverable amount, which was the higher one between the net amount of fair value after deducting the disposal expenses and the discounted amount of the estimated future cash flow, it means impairment incurred.

The net amount of fair value after deducting the disposal expenses should be fixed the price in the sale agreement for similar assets in the fair transaction minus the increased costs directly attributable to the assets disposal.

When estimated the discounted value of future cash flow, the Group needed to make important judgment on the output, selling price, relevant costs and the discount rate for calculating the discounted amount, etc. When estimated the recoverable amount, the Group would adopt all the available documents, including the prediction for relevant output, selling price and relevant operating costs arising from reasonable and supportive assumptions.

The Group made the impairment test on goodwill at least one time per year, which required to predict the discounted amount of the future cash flow of the assets or assets portfolio with the distributed good will, for which, the Group needed to predict the future cash flow of the assets or assets portfolio, and adopt the property discounted rate to decide the discounted amount of future cash flow.

(7) Depreciation and Amortization

For the investment real estate, fixed assets and intangible assets, the Group withdrew the depreciation and amortization by adopting the straight-line method during the service life after full consideration of the salvage value. The Group checked the service life periodically so as to decide the amount of depreciation and amortization at each Reporting Period. The service life was fixed by the Group in accordance with the previous experience of the similar assets and the expected technical update. If there was any significant change on the previous estimates, the depreciation and amortization expenses should be adjusted.

(8) Income Tax

During the routine operating activities, there were some uncertainty in the ultimate tax treatment and calculation for parts of transactions. Some accounts of such transaction could be listed as pre-tax expenditures only after the approval of taxation authorities. If there were any differences between the ultimate result of recognition for these taxation matters and their initial estimates, the differences would affect the current income tax and deferred income tax at the period of ultimate recognition.

VI. Taxation

1. Main Taxes and Tax Rate

Category of taxes	Tax basis	Tax rate
-------------------	-----------	----------

VAT	Payable to sales revenue	17%, 16%, 13%, 11%, 10%, 6%
Urban maintenance and construction tax	Taxable turnover amount	Tax paid in accordance with the tax regulations of tax units location
Enterprise income tax	Taxable income	25% or 15%
Education surcharge	Taxable turnover amount	5%

Notes of the disclosure situation of the taxpaying bodies with different enterprises income tax rate

Name	Income tax rate
Changchai Co., Ltd.	15%
Changchai Wanzhou Diesel Engine Co., Ltd.	15%
Changzhou Changchai Benniu Diesel Engine Fittings Co., Ltd.	25%
Changzhou Housheng Investment Co., Ltd.	25%
Changzhou Changchai Housheng Agricultural Equipment Co., Ltd.	25%
Changzhou Fuji Changchai Robin Gasoline Engine Co., Ltd.	25%

2. Tax Preference

In 2018, the Company has been identified as High-tech Enterprises, therefore, it enjoys 15-percent preferential rate for corporate income tax; the Company's controlling subsidiary—Changchai Wanzhou Diesel Engine Co., Ltd., the controlling subsidiary company, shall pay the corporate income tax at tax rate 15% from 1 January 2011 to 31 December 2020 in accordance with the Notice of the Ministry of Finance, the General Administration of Customs of PRC and the National Administration of Taxation about the Preferential Tax Policies for the Western Development.

VII. Notes to Major Items in the Consolidated Financial Statements of the Company

1. Monetary Capital

Unit: RMB

Item	Ending balance	Beginning balance
Cash on hand	441,363.70	466,356.31
Bank deposits	684,620,907.41	324,781,747.27

Sales discount and three guarantees	144,278,468.99	142,449,844.40
Other	36,520,009.19	35,082,168.35
Total	195,520,817.07	192,094,243.08

2) Significant Other Payables Aging over One Year

The significant other payables aging over one year at the period-end mainly referred to the unsettled temporary credits and charges owned.

21. Current Portion of Non-current Liabilities

Unit: RMB

Item	Ending balance	Beginning balance
Current portion of long-term borrowings	18,500,000.00	
Total	18,500,000.00	

The current portion of long-term borrowings was RMB18,500,000.00 which was the borrowing for technical transformation project of the Company as the parent provided by China Merchants Bank Changzhou Branch with the term from 20 September 2017 to 19 September 2019 and the interest rate of 4.75%.

22. Other Current Liabilities

Unit: RMB

Item	Ending balance	Beginning balance
Sewage charge		54,000.00
Electric charge	2,082,985.18	1,974,937.59
Total	2,082,985.18	2,028,937.59

23. Long-term Borrowings

Unit: RMB

Item	Ending balance	Beginning balance
Mortgage borrowings	2,000,000.00	2,000,000.00
Loan on credit		19,500,000.00
Total	2,000,000.00	21,500,000.00

The mortgage loan at the period-end was RMB2,000,000.00, which was the loan by the subsidiary-Changchai Wanzhou from Gaosuntang Branch of Chongqing Three Gorges Bank with the duration from 14 December 2017 to 6 November 2020 and the interest rate of 6.15%.

24. Deferred Income

Unit: RMB

Item	Beginning balance	Increase	Decrease	Ending balance	Reason for formation
Government subsidies	60,992,858.46	—	1,064,373.62	59,928,484.84	Government appropriation
Total	60,992,858.46	—	1,064,373.62	59,928,484.84	--

Item involving government subsidies:

Unit: RMB

Item	Beginning balance	Amount of newly subsidy	Amount recorded into non-operating income in the Reporting Period	Amount recorded into other income in the Reporting Period	Amount offset cost in the Reporting Period	Other changes	Ending balance	Related to assets/related income
Electric control of diesel engine research and development and industrialization allocations	1,045,200.00			398,400.00			646,800.00	Related to assets
National major project special allocations	28,770,000.00						28,770,000.00	Related to assets
Remove compensation	21,177,658.46			665,973.62			20,511,684.84	Related to assets
Research and development and industrialization allocations	10,000,000.00						10,000,000.00	Related to assets

of national III/IV standard high-powere d efficient diesel engine for agricultural use

2. Equity in the Structured Entity Excluded in the Scope of Consolidated Financial Statements

Notes to the structured entity excluded in the scope of consolidated financial statements:

In 2017, the Company set up Changzhou Xietong Private Equity Fund (Limited Partnership) together with Synergetic Innovation Fund Management Co., Ltd. through joint investment. On 18 October 2018, new partners were added. In line with the revised Partnership Agreement, the general partner is Synergetic Innovation Fund Management Co., Ltd., and the limited partners are Changchai Company, Limited, Changzhou Zhongyou Petroleum Sales Co., Ltd., Changzhou Fuel Co., Ltd., Tong Yinzhu and Tong Yinxin. In accordance with the *Partnership Agreement*, the limited partner does not execute the partnership affairs. Thus, the Company does not control Changzhou Xietong Private Equity Fund (Limited Partnership) and did not include it into the scope of consolidated financial statements.

IX. The Risk Related to Financial Instruments

The goal of the Company's risk management was gaining the balance between the risk and income, and

reduced the negative impact to the operation performance of the Company in the lowest level and maximized the interests of shareholders and other equity investors. Base on the risk management goal, the basis strategy of the Company's risk management was to recognized and analyze all kinds of risk that the Company faced, set up suitable risk bottom line and conduct risk management, and supervised the risks timely and reliably and control the risk within the limited scope.

The main risks of the Company due to financial instruments were credit risk, liquidity risk and market risk. The management level had reviewed and approved the policies to manage the risks, which summarized as follows:

(I) Credit Risk

Credit risk was one party of the contract failed to fulfill the obligations and causes loss of financial assets of the other party.

The credit of risk of the Company mainly was related to account receivable, in order to control the risk, the Company conduct the following methods.

The Company only conducts related transaction with approved and reputable third party, in line with the policy of the Company, the Company need to conduct credit-check for the clients adopting way of credit to conduct transaction. In addition, the Company continuously monitors the balance of account receivable to ensure the Company would not face the significant bad debt risk.

(II) Liquidity Risk

Liquidity risk is referred to the risk of incurring capital shortage when performing settlement obligation in the way of cash payment or other financial assets. The policies of the Company are to ensure that there was sufficient cash to pay the due liabilities.

The liquidity risk was centralized controlled by the financial department of the Company. The financial departments through supervising the balance of the cash and securities can be convert to cash at any time and the rolling prediction of cash flow in future 12 months to ensure the Company has sufficient cash to pay the liabilities under the case of all reasonable prediction.

(III) Market Risk

Market risk is refer to risk of the fair value or future cash flow of financial instrument changed due to the change of market price, including: foreign exchange rate risk, interest rate risk.

1. Interest Rate Risk

Interest rate risk is refers to fluctuation risk of the fair value or future cash flow of financial instrument change due to the change of market price.

2. Foreign Exchange Risk

Foreign exchange rate risk is referred to the risk incurred form the change of exchange rate. As for the Company's export business, customers will be given a certain credit term, if the RMB appreciates against the dollar, the company's accounts receivable will incur foreign currency exchange loss.
