4. Changes and termination of certain designated projects for the use of raised funds for

On April 10, 2019, the Annual Shareholders Meeting approved a proposal on the change of certain designated projects included in the Project of Share Issuance for Assets Purchase and Supporting Finance. The Company will no longer use the raised funds on the project of the construction of Huai'an pesticide formulation center (RMB 249.80 million) and the project of fixed-assets investment-product A 600t/a (RMB 150.28 million). Instead, the Company will use the above amount (aggregated amount of RMB 400.08million) to pay the consideration of the equity transfer of Jiangsu Anpon Electrochemical Co., Ltd. The Company completed the payment process on August 28, 2019.

On May 20, 2020, the Annual Shareholders Meeting approved a Proposal on the Termination of the Use of Raised Funds for Certain Designated Projects included in the Project of Share Issuance for Assets Purchase and Supporting Finance. The Company will no longer use of the raised funds for the following previously designated projects: Projects of product development and registration, and fixed-asset Investment of ADAMA Agricultural Solutions Ltd. (the "Solutions").

The 4th Interim Shareholders Meeting on 16 November, approved a Proposal on the Use of the Raised Funds for the Acquisition of the 51% Equity Stake in Jiangsu Kelinong Agrochemical Co., Ltd. as well as that in Shanghai Dibai Plant Protection Co., Ltd.. <p>Situations failing to meet the planned schedule or achieve expected benefits and the reasons (according to the specific investment project)</p>	<p>1. Project of the Construction of Huai'an Pesticide Formulation Center Since Adama Pesticide (Jiangsu) Co., Ltd., a subsidiary company of the third-tier subsidiary of Solutions, is the entity to implement the construction project of Huai'an Pesticide Formulation Center, the Company needs to increase the capital of Solutions first, and then increase the capital of the subsidiaries by Solutions. The time and process required for the relevant approval process, such as funds entry and exist, is complicated. In order to avoid delays of the project, the Company invested its own capital into the project. After the approval of 2018 the Annual Shareholders Meeting, the amount of this project had been used to pay the consideration of the equity transfer of Jiangsu Anpon Electrochemical Co., Ltd.</p> <p>2. Projects of Products Development and Registration The project was planned to be implemented by ADAMA Makhteshim Ltd., ADAMA Agan Ltd., and ADAMA Brazil S/A, subsidiaries of Solutions. The time and process required for the relevant approval process, such as funds entry and exist, is complicated. In order to avoid delays of the project, the Company invested its own capital into the project.</p>

<p>Situations failing to meet the planned schedule or achieve expected benefits and the reasons (according to the specific investment project)</p>	<p>3. ADAMA Fixed-Assets Investment</p> <p>(1) Capacity Expansion Project for Pesticide Product A Since Product A is the Company’s newly developed product, it takes time to develop the market. In view of this, the management made changes to the time schedule of original expansion plan and suspended the investment in the second phase after careful deliberation. While adjusting the capacity expansion of the first stage in accordance with the needs of the market, the process is optimized to further enhance the product’s market advantage. Based on the changes in the market environment and in order to reduce the investment risk of raised funds, the Company decided that the follow-up investment of this project will be carried out by the Company with its own capital.</p> <p>(2) Equipment Investment for Fungicide product B for Brazilian market & Project on Capacity Expansion Investment for New Fragrance Ingredient Product C The above two projects started in 2017. Both projects involve cross-border investment by the Company, while the local approval process for cross-border investment might take some time. In order to meet the increasing demand of the market for Fungicide product B and New Fragrance Ingredient Product C as soon as possible, after completing the replacement of the first raised funds, the Company decided that its overseas subsidiaries shall be responsible for meeting project investment needs through their own funds and local financing. The fungicide project for Brazilian market was carried out in accordance with the original investment plan and officially delivered for use in January 2020, and the fragrance ingredient product project has been completed and delivered for use in May 2020.</p>

<p>Situations failing to meet the planned schedule or achieve expected benefits and the reasons (according to the specific investment project)</p>	<p>(3) Project on the Investment of the Equipment of Liquid Product Packaging The project aims to increase liquid packaging capacity to cope with expected future incremental demand and make inventory management more flexible and effective. However, due to the continuous climate change in Europe and North America in the past two years, there has been some changes in the incremental demand of the market. Based on the principle of prudence, the Company postponed the investment progress of the project and would not to use raised funds on the project.</p> <p>(4) Investment for the Relocation of Beer Sheb Plant and Its Integration with Neot Hovav Plant in Israel The purpose of this project is to improve the overall production efficiency and product quality through the integration and optimization of the two plants in production and operation. Since the integration of the plants involves a wide range, it will take a long time to carry out master planning procedures in Israel. At present, the project is in the planning and design stage. The Company believes that there will be some differences in the implementation time of the project and the schedule of use of raised funds. Therefore, the Company terminates the use of raised funds on this project.</p> <p>The proposal on terminating the above projects has been approved by the shareholders of the Company, on May 20, 2020. The Company will no longer use of the raised funds for the following previously designated projects: Projects of product development and registration and fixed-asset Investment of Solutions.</p>
