 $\sqrt{\text{Applicable}} \square \text{N/A}$

Item	% Change	Main reason
Net profit attributable to shareholders of the listed company	226.21	The main reasons are the return on investment of and the profit or loss on changes in the fair value of some held-for-trading financial assets during the reporting period.
Net profit attributable to shareholders of the listed company after deduction of non-recurring profit or loss	N/A	The main reasons are the year-on-year decrease in the control expenses and period expenses during the reporting period.
Net cash flow from operating activities		The main reasons are the adjustment in the method of settlement with suppliers and the optimization of payment terms during the reporting period.
Basic earnings per share (RMB/share)	Same as the reasons for the change in the attributable to shareholders of the listed compa	
Diluted earnings per share (RMB/share)	233.33	Same as the reasons for the change in the net profit attributable to shareholders of the listed company.

1. Analysis of business operation

From the beginning of 2024, the Company insisted on high-quality development for overall operation by continuously carrying out the development strategy of "core technologies + core devices + application

scenarios" to enhance the key development path with cinema businesses and dedicated display businesses as the fundamental business and with automotive businesses and other innovative businesses as growth businesses, which reflected strong resilience and activity in the overall business operation. The fundamental businesses led to continuously improving profit indicators for the Company, while the growth businesses created new energy - the automotive business achieved the revenue breakthrough from 0 to 1 to develop into a key growth pole of the Company in the future. During the reporting period, our operating income was RMB 445 million, essentially sustaining the level of the prior period; the net profit attributable to the parent company reached RMB 44.5433 million, up by 226.21% year on year; the net profit attributable to shareholders of the listed company after deduction of non-recurring profit or loss reversed the loss into profit; and the overall gross profit margin, was 32.44%, while other key financial indicators maintained stable. The operating highlights of the Company during the reporting period include:

> Starting of the revenue contribution period for the automotive optics business

In December 2023, we achieved the official implementation of AITO M9, the first nominated automobile model, and entered the stage of intense mass production and delivery in March 2024, which started the revenue contribution period for the automotive optics business. In the first quarter of 2024, we achieved the revenue of RMB 48.0268 million from the automotive optics business. The automobile-grade projection giant screen in AITO M9 redefined in-vehicle intelligent space by meeting various demands for in-vehicle entertainment, office, etc. The smooth implementation and delivery of M9 indicated that our automobile-grade projection giant screen has been fully tested on the market.

On April 25, 2024, we released the world's first ALL-in-ONE universal laser headlight on Beijing International Automotive Exhibition, which, for the first time, integrated the high beam ADB headlight, variable color temperature headlight (compatible with the fog light mode), ground information display, automotive cinema, etc. into one headlight module with a small size. This greatly reduced the power consumption and volume of the entire system, and greatly reduced the overall cost of the system while meeting various demands for safety, social attributes, and individualization.

> Stable growth of the cinema business

The record-breaking Spring Festival box office in 2024 and the continuous release of film watching demands driven by outstanding films predict the strong development of the film market, which will promote the continuous increase in our revenue from the cinema business. During the reporting period,

our revenue from the cinema business was RMB 153 million, up by 21% year on year. Meanwhile, we enhanced the efforts for developing and marketing the VLED LED Cinema projection solution to further expand the growth space of the cinema business and improve the business resilience for sustainable development.

Continuous improvement in operation quality at Formovie

Thanks to the effective adjustment in personnel and business structure in the previous period, Formovie reasonably controlled and optimized its period expenses and continuously improved the quality of its overall operation during the reporting period. It reduced the losses by RMB 14.6943 million year on year, reducing the rate of loss by 40.12% year on year. This reduced the impact on the profit indicators of the Company. Formovie will continue to focus on more competitive own brand products while taking overseas advantages of Google TV+Netflix dual certification to continuously improve its inherent dynamics and operating quality.

2. Profit analysis

- (1) During the reporting period, some held-for-trading financial assets generated investment returns and profit or loss on change in the fair value, which provided active effects on the net profit attributable to the parent company;
- (2) During the reporting period, we maintained stable and favorable development of the cinema, automotive optics, and other businesses; meanwhile, our optimization and control of expenses and expenditures led to the decrease in period expenses by 20.60%, achieving obvious results in cost reduction and efficiency improvement. At present, the arbitration between the Company and relevant GDC parties is still under trial. This arbitration case incurred the legal service fees of RMB 7.5593 million during the reporting period. With such fees excluded, the period expenses could be further reduced, which would increase by RMB 7.5593 million in the net profit attributable to the parent company and the net profit attributable to the parent company net of non-recurring profit or loss.
